Introduction xi

1. RATIONALE FOR VALIDATING STERILIZATION PROCESSES 1

2. CHARACTERIZATION OF RADIATION PROCESSES 5

Physical Characteristics of Radiation 5

Facility Design 7

Effects of Radiation on Microorganisms 9

System Operations 10

Critical Process Parameters 12

Dose Distribution 12

Dosimeters 14

Dose Mapping 16

3. CONTRACT STERILIZATION 19

Selection of the Sterilization Facility 20

Obtain a Written Contract 21

Verification of Validation 22

Routine Processing 23

4. PREVALIDATION PLANNING 25

Product and Package Materials Evaluation 25

Accelerated Aging 31

Establishment and Maintenance of Product Families 36

Grouping into Product Families 36

Selection of Family Representative 37

Selection of Sample Item Portion (SIP)	37
Sterility Assurance Levels (SAL)	40
5. MICROBIOLOGICAL CONSIDERATIONS	45
Evaluation of Product Bioburden	45
Evaluation of Bioburden Data	50
Bioburden Isolates	53
Product Sterility Testing	53
Troubleshooting Microbiological Failures	56
6. STERILIZATION SUPPORT TESTING	59
Selection of a Test Laboratory and Test Methods	59
Environmental Monitoring and Control	60
Biocompatibility Testing	63
Bacterial Endotoxin and Pyrogen Testing	67
7. THE VALIDATION PROTOCOL	73
8. OUTLINE OF THE STERILIZATION VALIDATION	77
Product and Packaging Materials Evaluation	77
Equipment Qualification and Documentation	78
Sterilization Dose Selection	79
Dose Audit	94
Dose Augmentation	95
Selection of a Sterilization Dose for a Single Production Batch	95
Alternate Sampling Plans for Dose Verification and Audit	96
9. FINAL REPORT	99
10. ROUTINE MONITORING AND CONTROL	101
Adopting a Device into a Validated Sterilization System	102
Dose Audit Failure	103
Frequency of Sterilization Dose Audits	105

*Appendix 1: Contract Radiation Sterilization Facilities
in the United States* 107

Appendix 2: Method 1 Dose Verification 109

<i>Appendix 3: Method 1 Quarterly Dose Audit</i>	111
<i>Appendix 4: Worked Example for Method 1</i>	113
<i>Appendix 5: Method 2A Dose Validation</i>	115
<i>Appendix 6: Worked Example for Single Product Batch ($SIP < 1$)</i>	117
<i>Appendix 7: Worked Example of VD_{max} 25 kGy Substantiation ($SIP < 1$)</i>	119
<i>Appendix 8: Worked Example for Dose Augmentation for Device Qualified Using Method 1</i>	121
<i>Appendix 9: Dose Validation Protocol</i>	123
<i>Appendix 10: Accelerated Aging Protocol</i>	133
<i>Appendix 11: Radiation Dose (kGy) Required to Achieve Given SAL</i>	139
 <i>Glossary</i>	 145
 <i>Bibliography</i>	 155
