

Projections for HIV/AIDS in Thailand : 2000-2020

The Thai Working Group
on HIV/AIDS Projection

March 2001

ISBN 974-294-016-9

TABLE OF CONTENTS

| | |
|---|-------------|
| FOREWORD AND ACKNOWLEDGEMENTS | i |
| TABLE OF CONTENTS..... | iii |
| TABLE OF FIGURES AND TABLES..... | v |
| EXECUTIVE SUMMARY | viii |
| Background – The Need for Projections..... | viii |
| The Thai Epidemic Today – Impacts of Changing Behavior | ix |
| <i>The current and future state of the Thai epidemic</i> | <i>ix</i> |
| Successes to date – the benefits of the Thai response..... | x |
| The Need for Vigilance - Sustaining the Success | xii |
| Results of Projections – Five Scenarios for Policy Development | xv |
| PROJECTIONS FOR HIV/AIDS IN THAILAND: 2000-2020 | 1 |
| INTRODUCTION – THE NEED FOR NEW PROJECTIONS..... | 1 |
| THE THAI WORKING GROUP ON HIV/AIDS PROJECTION..... | 2 |
| THE ASIAN EPIDEMIC MODEL (AEM)..... | 3 |
| <i>Structure and methodology of the model.....</i> | <i>3</i> |
| Calculating new adult infections | 5 |
| Calculating adults living with HIV, AIDS cases and deaths..... | 6 |
| Calculating age distributions for HIV and deaths..... | 7 |
| Calculating pediatric HIV, AIDS and deaths..... | 8 |
| <i>Key Input Parameters – Sub-populations, sexual and injecting drug behaviors</i> | <i>9</i> |
| SIZES OF sub-populations over time..... | 10 |
| Sexual behaviors over time | 12 |
| Injecting drug use behaviors over time..... | 14 |
| <i>Other Parameters in the Model.....</i> | <i>15</i> |
| ESTIMATING INFECTION LEVELS IN THAILAND - FITTING THE MODEL | 15 |
| <i>Calculating the prevalences for model comparison.....</i> | <i>15</i> |
| <i>Fitting the model to the data</i> | <i>18</i> |
| RESULTS OF THE PROJECTIONS | 23 |
| <i>Assessing The Impact of Policy Decisions – Five Scenarios.....</i> | <i>23</i> |
| Starting situation at the beginning of the Ninth National Plan | 23 |
| Scenario 1 – Baseline | 24 |
| Scenario 2 – Heterosexual Risk..... | 24 |
| Scenario 3 –Heterosexual Risk + IDU (Injecting Drug Users)..... | 25 |
| Scenario 4 –Heterosexual Risk + IDU + MTCT (Mother-to-Child Transmission) | 25 |
| Scenario 5 –Heterosexual Risk + IDU + MTCT + Couples | 26 |
| <i>Results of the Baseline Scenario – the Current Situation.....</i> | <i>26</i> |
| <i>The current state of the Thai epidemic</i> | <i>27</i> |
| <i>History of the Thai epidemic - changes in risk behavior reduce new infections</i> | <i>28</i> |
| <i>Gender balances in the epidemic</i> | <i>30</i> |
| <i>Changing routes of transmission.....</i> | <i>31</i> |
| <i>Expanded prevention efforts are needed – IDU, husband-wife, and mother-to-child transmission continues</i> | <i>31</i> |
| <i>However, sustaining prevention efforts for commercial sex is critical.....</i> | <i>32</i> |
| <i>Estimating the benefits of prevention</i> | <i>33</i> |
| <i>Steady and high demand for care and support, ongoing AIDS-related deaths</i> | <i>35</i> |
| <i>Age distributions of new infections – the role of the young</i> | <i>36</i> |

HIV & AIDS-related death age distributions imply significant labor force impacts..... 38

Children with HIV and AIDS 42

Comparison of the Five Scenarios.....44

IMPROVING FUTURE MODELING EFFORTS47

REFERENCES.....49

APPENDICES53

Appendix A – Input Values and Parameters Used in Projections A-1

Appendix B – Results of ProjectionsB-1

Scenario 1 – Baseline B-2

Scenario 2 –Heterosexual Risk Reduction..... B-12

Scenario 3 –Heterosexual Risk + IDU..... B-22

Scenario 4 –Heterosexual Risk + IDU + MTCT..... B-32

Scenario 5 –Heterosexual Risk + IDU + MTCT + Couples..... B-42

Failure to sustain prevention efforts scenario..... B-52

Appendix C – Age Distributions of HIV Infections and AIDS-related DeathC-1

Age distributions for HIV – male..... C-2

Age distributions for HIV – female..... C-5

Age distributions for AIDS-related Deaths – male..... C-8

Age distributions for AIDS-related Deaths – female..... C-11
