

High Availability Networking

with Cisco

Vincent C. Jones

Contents

	Acknowledgments	ix
	Preface	xi
CHAPTER 1	Reliability and Availability	1
	The Need for Network Availability	2
	Mathematics of Reliability and Availability ..	10
	Network Vulnerabilities	26
	Designing for Improved Network Availability	33
	Wrap-Up	38
CHAPTER 2	Bridging and Routing	41
	Basic Connectivity Definitions	41
	Bridging for Higher Availability	55
	Routing for Higher Availability	67
	Wrap-Up	98
CHAPTER 3	Multihomed Links	101
	Two Network Interfaces with Independent Addresses	102
	Two Network Interfaces with One IP Address	112
	Two Systems with One IP Address	123
	Wrap-Up	132
CHAPTER 4	Dial Backup for Permanent Links	133
	General Considerations	134
	Dial Backup Approaches	140
	Basic ISDN Dial Backup	147
	Wrap-Up	168

CHAPTER 5	Advanced Dial Backup	171
	Dial Backup over Asynchronous Links	172
	Combining Channels for Higher Bandwidth	184
	Supporting IPX along with IP	205
	BGP-Driven Dial Backup.....	215
	Wrap-Up	235
CHAPTER 6	Multiple Routers at a Single Site	237
	Protecting LAN Users from Router Loss.....	238
	Dial Backup by One Router for a Line on Another	261
	Protecting Against LAN Segmentation.....	285
	Wrap-Up	307
CHAPTER 7	Hub-and-Spoke Topology	309
	Routing Protocols for Hubs with Many Spokes	312
	Configuration Example: Dual Connections to Every Spoke	329
	Dial Backup with Multiple Dial Access Servers.....	334
	Using More than One Hub	366
	Wrap-Up	373
CHAPTER 8	Connecting to Service Providers	375
	Linking to an External Network	376
	Connecting to an Internet Service Provider	406
	Connecting Through Multiple ISPs.....	435
	Wrap-Up	458
CHAPTER 9	Connecting Through Firewalls	461
	Firewalls Concepts	462
	Firewalls in a Fully Redundant Network	469
	Redundant Firewalls with Automatic Switchover	480
	Wrap-Up	512
CHAPTER 10	IBM SNA and DLSw	513
	Data Link Switching (DLSw).....	513
	DLSw for Ethernet-Attached Devices.....	522
	DLSw Through Firewalls.....	541
	Wrap-Up	560
CHAPTER 11	Disaster Recovery Considerations	561
	Disaster Recovery Requirements	562
	Traditional Approaches	567

	Hot Backup Facility Approaches	569
	Load Sharing Approaches.....	584
	Wrap-Up	589
CHAPTER 12	Management Considerations	591
	Network Monitoring.....	592
	Configuration Management.....	600
	Total Quality Control.....	606
	Wrap-Up	608
	Glossary	611
	Index	653
