Introduction

XXIII

Part I What's New

I	Changes in the Interface	5
	Resizable Viewport Panels	6
	Expandable Command Panel	6
	Redesigned Stack View Display	7
	Redesigned Drop-Down Menus	10
	Improved Transform Type-In	13
	New Quad Menus	14
	New Manipulators	15
	Enhanced Track Bar	16
	Enhanced Playback Controls and Time Configuration	18
	Improved Interactive Rotation	19
	New Visual MAXScript	19
	Summary	31
2	Changes in Modeling and Materials	33
	Modeling Tools	34
	Mesh Modeling with the Editable Mesh	34
	Poly Modeling with the Editable Poly	36
	Meshsmooth	44
	Hierarchical Subdivision Surface Modeling (HSDS Modifier)	46
	FAQs About HSDS	50
	Spline and Bezier Patch Modeling	51
	Editable Spline	51
	Editable Patch	53
	Patch-Compliant Modifiers	55
	Multi-Res Modifier	55
	Changes in Materials and Mapping	57
	Multi/Sub-Object Material	57
	Viewing of Multiple Maps in Viewports	59
	Opacity Map/Alpha Transparency	60
	3D Procedural Maps	60
	Vertex Data	61
	Pixel Shader/Hardware Shaders	62
	Asset Browser	63
	Summary	64

3 Changes in Animation	67
Character Animation Overview	68
Bones	69
Creating Bones in max 4	70
Adjusting Bone Objects	71
Bone Parameters Rollout	72
Applying Bone-Like Properties	74
Display Bone Links	75
Bone Scaling and Alignment	76
Auto-Align Check Box	76
Freeze Length Check Box	76
Inverse Kinematics (IK)	76
A Review of IK	77
Forward Kinematics Versus Inverse Kinematics	77
IK Solvers in 3ds max 4	79
History Independent (HI)	79
History Dependent (HD)	80
IK Limb Solver	80
HI Solver and IK Limb Solver Parameters	80
The IK Solver Rollout	81
The IK for FK Pose Check Box	81
IK/FK Snap	81
Pick Start Joint and Pick End Joint	82
IK Solver Properties Rollout	82
Iterations Parameter	83
IK Display Options	83
Constraints	84
Attach Constraint	86
Link Constraint	87
Surface Constraint	87
Path Constraint	88
Position Constraint	89
Look-At Constraint	89
Orientation Constraint	91
Skin	91
Parameters Rollout	92
Display Rollout	94
Advanced Parameters Rollout	94
Gizmos Rollout	95
Joint and Bulge Angle Deformers	95
Morph Angle Deformer	100

Flex Modifier	101
Flex Spinner	102
Strength	102
Sway	103
Use Chase Springs	103
Use Weights	103
Simple Soft Bodies	103
Advanced Springs Rollout	104
Weights and Painting Rollout	104
Forces and Deflectors Rollout	105
Advanced Parameters Rollout	105
The Advanced Springs Rollout	105
Point Cache Modifier	107
Wire Parameter	109
Reactor Controller	111
How Reactors Work	111
Explicit Set Key	118
Spring Controller	119
Forces Limits and Precision Rollout	119
Calculations Parameters	120
New Space Warps	120
Summary	122
 4 Changes in Rendering	 125
New Multi-Pass Effects	126
Depth of Field	128
Motion Blur	130
New ActiveShade	131
New Exposure Control	135
New Render Elements Functionality	136
Enhanced Network Rendering	139
Running as a Service Versus Running as an Application	139
The Network Rendering Manager	140
The Network Rendering Server	142
Sending a Job to the Render Farm	144
Network Job Assignment Window	144
The Queue Manager	146
Summary	148

Part II Production Workflow

5 Workflow in the Broadcast/Film Environment	153
The Project/The Elements	155
The Artists	155
Geography	156
Schedule	157
Layout/Previs	158
Rigging/Animation Setup	158
Rendering	159
Compositing	159
Approvals	161
Changes	162
The Tools	162
General	163
Layout/Previs	163
Modeling	164
Texturing/Mapping	164
Rigging/Animation Setup	165
Animation	165
Lighting	166
Rendering	166
Compositing	166
Summary	166
6 Workflow in the Games/Interactive Environment	169
The Artist's Role on a Game-Development Team	171
The Lead Artist/Art Director	171
Senior/Advanced Artist	171
Junior/Intern Artist	172
Roles: Who Does What?	172
Game Artist's Workflow	173
Concept/Brainstorming	173
Modeling	174
Texturing	174
Rigging/Animation Setup	175
Exporting/Testing	175
The Tools	176
Setting Up max to Work for You	176
Keyboard Shortcuts	176
Viewport Rendering	177

Customizing the UI	177
Modeling	178
Detail: Animation Relevance	178
Smoothing Groups	179
STL Check Modifier	179
Patches for Games	180
MultiRes Modifier	180
Texturing	180
Rigging	181
Animation	181
Export Considerations	182
Summary	182

Part III Modeling

7 Non-Organic Modeling for Broadcast/Film	187
Building a Toy Fire Truck Using Polygonal	
Modeling Techniques	188
Summary	213
8 Non-Organic Modeling for Games/Interactive Applications	215
Summary	243
9 Organic/Character Modeling Using the Patch Method for Broadcast/Film	245
Summary	301
10 Organic/Character Modeling Using the Box Method for Broadcast/Film	305
The Advantages of Box Modeling	306
Summary	337
11 Organic/Character Modeling for Games/Interactive Applications	339
Summary	375

Part IV Rigging

12 Non-Organic Model Rigging for Broadcast/Film Applications	381
Summary	405

13 Non-Organic Model Rigging for Games/ Interactive Applications	409
Summary	425
14 Organic/Character Model Rigging for Broadcast/Film Applications	427
Defining Bones	430
Summary	503
15 Organic/Character Model Rigging for Games/Interactive Applications	505
Summary	528

Part V Materials and Mapping

16 Materials/Shaders/Mapping for the Fire Truck	533
Summary	548
17 Materials/Shaders/Mapping for the Jester	551
Summary	604
18 Materials/Shaders and Mapping for Games/Interactive Applications	607
Material IDs Versus Sub-Object Materials	608
Assigning Material IDs	609
Navigating the Sub-Object Panels	609
Assembling Faces into Logical Groupings	612
Using Smoothing Groups	613
Building Sub-Object Materials	617
Checking Constraints on the Target Platform	617
Assigning Mapping Coordinates	621
Mesh Select/UV Map Pairs	621
Using Unwrap UVW	625
Finishing Off	628
Adding Maps	629
Using Vertex Shading	632
Using Texporter	633
Using Other Texturing Tools	634
Preparing for Export	635
Summary	636

Part VI Animation

19	Camera Matching	641
	Summary	665
20	Animation Techniques	667
	Animating Is Practicing	668
	Timing	668
	Animating with Bones	669
	Using Animation Tools	674
	Animating the Clothing	677
	Summary	677
21	Particle Effects	679
	Basic Components of Particle Systems	680
	Particle Classes	681
	Common Particle Parameters	683
	Simple Particles: Spray and Snow	683
	Super Particles: SuperSpray, Blizzard, PCloud, and PArray	684
	Special Particle Maps	691
	Space Warps for Particles	691
	Forces	691
	Deflectors	692
	The Project	692
	Summary	718
22	Scripting Custom Animations	721
	This Chapter's Exercise	722
	How Do I Start Coding?	723
	LightCleaner v1.00	726
	Proof of Concept	726
	Pseudo-Code	729
	Functions	730
	Running the Script	731
	LightCleaner v1.10	731
	Variables	736
	LightViewer v1.00	736
	Globals	743
	Pseudo-Code	744
	The Script at Work	748

LightUtilities v2.50	748
Code That Writes Code	752
Summary	754

Part VII Lighting

23 Lighting Techniques for Broadcast/Film	759
The Nature of max Lighting	761
Preparing to Light	764
Summary	784
24 Lighting Techniques for Games/Interactive Applications	787
Model Preparation	789
Summary	810

Part VIII Rendering and Compositing

25 Rendering for Compositing	815
Motion Blur	816
Image Motion Blur	816
Scene Motion Blur	817
Object Motion Blur	818
Multi-Pass Motion Blur	818
Using Motion Blur	819
Matte Objects	823
Multi-Pass Rendering	825
Rendering Multiple Passes	828
Diffuse Pass	829
Summary	844
26 Compositing and Finishing in Combustion	847
Why Combustion?	848
Summary	857
Appendix: What's on the CD-ROM	859
Index	862
