

Michael D. Meyer  
Eric J. Miller

# Urban Transportation Planning

Second Edition

# CONTENTS

**Preface** ix

**About the Authors** xiv

## **Chapter 1**

### **Urban Transportation Planning: Definition and Context** 1

1.0 Introduction 1

1.1 A Definition of Urban Transportation  
Planning 2

1.2 A Multimodal Perspective on  
Transportation Planning 6

1.3 A Changing Society and Its Impact on  
Urban Transportation Planning 13

1.4 Chapter Summary 34

Questions 35

References 36

## **Chapter 2**

### **Transportation Planning and Decision Making** 41

2.0 Introduction 41

2.1 Institutional Framework for Transportation  
Decision Making 41

2.2 An Evolving Perspective on the Planning  
and Decision-Making Process 52

2.3 Conceptual Models of Decision Making 60

2.3.1 The Rational Actor Approach 60

2.3.2 The Satisficing Approach 61

2.3.3 The Incremental Approach 62

2.3.4 The Organizational Process  
Approach 63

2.3.5 The Political Bargaining  
Approach 64

2.3.6 Summary 65

2.4 The Elements of Decision Making:  
Development of a Transportation Planning  
Process 68

2.5 Characteristics of a Decision-Oriented  
Planning Process 71

2.6 Development of a Decision-Oriented  
Transportation Planning Approach 75

2.7 Chapter Summary 80

Questions 82

References 83

## **Chapter 3**

### **Urban Travel and Transportation System Characteristics: A Systems Perspective** 89

3.0 Introduction 89

3.1 Transportation from a Systems  
Perspective 89

3.1.1 System Hierarchy 91

3.1.2 System Purpose 95

3.1.3 System Boundary 96

3.1.4 System Components 98

3.1.5 System Performance 100

3.1.6 System Capacity 103

3.1.7 System Control 104

3.1.8 System Feedback 107

3.2 Transportation System Impacts 111

3.2.1 Context 112

3.2.2 Natural System Impacts 114

3.2.3 Physical Impacts 115

3.2.4 Social and Cultural Impacts 127

3.3 Characteristics of Urban Travel 149

3.3.1 Trip Purpose 149

3.3.2 Temporal Distribution of Trip  
Making 154

3.3.3 Spatial Distribution of Trip  
Making 156

3.3.4 Modal Distribution of Trip  
Making 156

3.3.5 Transportation Safety 160

3.3.6 Travel Costs 162

3.4 Chapter Summary 163

Questions 166

References 168

**Chapter 4****Data Management and Use In Decision Making 179**

- 4.0 Introduction 179
- 4.1 The Transportation Planning Database 179
  - 4.1.1 Classification Schemes for Data Collection 181
  - 4.1.2 Sampling Methods in Data Collection 182
- 4.2 Transportation System and User Data 185
  - 4.2.1 Data on Highway Network Performance and Condition 186
  - 4.2.2 Data on Transit Network Performance and Condition 187
  - 4.2.3 Evolution Toward Asset Management 190
  - 4.2.4 User Characteristics—Passenger 191
  - 4.2.5 User Characteristics—Freight 200
  - 4.2.6 Changing Technology and Data Collection 202
- 4.3 Developing a Community Vision and Goals Set 204
  - 4.3.1 Articulating a Vision 206
  - 4.3.2 Planning Goals and Objectives 212
  - 4.3.3 Market Research Information 216
- 4.4 Monitoring Transportation Performance: The Feedback Loop 220
  - 4.4.1 Measures to Diagnose Problems and Identify Opportunities 220
  - 4.4.2 Measures to Evaluate System Performance 224
- 4.5 Developing a Data Management Plan 230
- 4.6 Chapter Summary 235
- Questions 238
- References 240

**Chapter 5****Demand Analysis 247**

- 5.0 Introduction 247
- 5.1 The Role of Demand Analysis in Transportation Planning 248
  - 5.1.1 Problem Definition 248
  - 5.1.2 Choice of Analysis Technique 251
  - 5.1.3 Parameter Estimation 252
  - 5.1.4 Validation 252
  - 5.1.5 Forecasting 254
  - 5.1.6 Data collection 255

- 5.2 Analysis of Transportation Demand 256
  - 5.2.1 Economic Theory and Consumer Behavior 256
  - 5.2.2 Trip-Making Characteristics 261
  - 5.2.3 Aggregation 263
- 5.3 Simplified Demand Estimation Techniques 264
  - 5.3.1 Trend Analysis 265
  - 5.3.2 Elasticity-Based Models 266
- 5.4 The Urban Transportation Modeling System 270
  - 5.4.1 Trip Generation 271
  - 5.4.2 Trip Distribution 278
  - 5.4.3 Modal Split 282
  - 5.4.4 Assignment 283
  - 5.4.5 Time-of-Day Models 288
  - 5.4.6 Summary 289
- 5.5 Discrete Choice Models 290
  - 5.5.1 Overview of Choice Theory 290
  - 5.5.2 Characteristics of the Logit Model 292
- 5.6 Activity-Based Methods 303
- 5.7 Estimating Nonmotorized Travel Demand 309
- 5.8 Estimating Goods Movement Demand 310
- 5.9 Chapter Summary 319
- Questions 320
- References 326

**Chapter 6****Urban Activity System Analysis 333**

- 6.0 Introduction 333
- 6.1 Basic Concepts and the Role of Urban Activity Analysis in Transportation Planning 334
- 6.2 Land-Use Models 341
  - 6.2.1 Heuristic Models: Lowry-Type Models 342
  - 6.2.2 Simulation Models 346
  - 6.2.3 Operational Models 354
  - 6.2.4 Scenarios 365
  - 6.2.5 Summary 370
- 6.3 Assessment of Transportation Impacts on the Urban Activity System 372
- 6.4 Chapter Summary 374
- Questions 375
- References 378

**Chapter 7****Supply Analysis 385**

- 7.0 Introduction 385
  - 7.1 The Role of Supply Analysis in Transportation Planning 385
  - 7.2 Analysis of Transportation System Performance 390
    - 7.2.1 Basic Concepts 391
    - 7.2.2 Performance Analysis Concepts 396
  - 7.3 Performance Analysis Methods for Facilities 411
    - 7.3.1 Exclusive Right-of-Way or Guideway Operations 412
    - 7.3.2 Shared Right-of-Way Operations 417
    - 7.3.3 Analysis of Multimodal Corridor Performance 431
  - 7.4 Network Models 433
    - 7.4.1 Roadway/Freeway/Subarea Network Optimization 434
    - 7.4.2 Signal Optimization 435
    - 7.4.3 Network Flow Analysis 437
    - 7.4.4 Out-of-Vehicle Performance Measures 439
    - 7.4.5 Representing Access In a Transportation Network 444
  - 7.5 Impact Models 445
    - 7.5.1 Air-Quality Impact 445
    - 7.5.2 Noise Impact 453
    - 7.5.3 Fuel Consumption 460
  - 7.6 Cost Models 462
    - 7.6.1 Basic concepts 463
    - 7.6.2 Capital Cost Models 464
    - 7.6.3 Operations, Maintenance, and Management Costs 467
  - 7.7 Chapter Summary 471
  - Questions 475
  - References 478
- 8.2.2 Estimates of Economic Benefits and Costs 491
  - 8.2.3 Social Costs of Transportation 498
  - 8.2.4 Distributional Impacts 500
  - 8.3 A Framework for Evaluation 503
  - 8.4 Cost-Effectiveness Evaluation 505
  - 8.5 Economic Concepts of Discounting and Capital Recovery 508
  - 8.6 Comparative Assessment Methods 511
    - 8.6.1 Single-Objective Assessment Methods 512
    - 8.6.2 Multiobjective Assessment Methods 516
    - 8.6.3 Treatment of Uncertainty in Evaluation 519
  - 8.7 Examples of Evaluation in Transportation Planning 523
    - 8.7.1 Evaluation of Alternative Regional Plans—The Southeastern Wisconsin Example 524
    - 8.7.2 Portland's (Oregon) Transportation Plan Implementing a 2040 Vision 527
    - 8.7.3 Albany (New York) New Visions Planning 530
    - 8.7.4 Urban Corridor Analysis in Salt Lake City 538
    - 8.7.5 New York Cross-Harbor Freight Major Investment Study 546
    - 8.7.6 Benefit/Cost Analysis of Light Rail in Portland (Oregon) 548
  - 8.8 Evaluation of Implemented Programs and Projects (Ex Post Evaluation) 550
  - 8.9 Chapter Summary 556
  - Questions 557
  - References 559

**Chapter 9****Program and Project Implementation 565**

- 9.0 Introduction 565
  - 9.1 Characteristics of a Programming Process 565
  - 9.2 Setting Priorities for Project Selection 570
    - 9.2.1 Goals Achievement 571
    - 9.2.2 Numerical Ratings 572
    - 9.2.3 Priority Indexes 573
    - 9.2.4 Programming Evaluation Matrix 578
- 8.0 Introduction 483
  - 8.1 What Is Evaluation? 484
  - 8.2 Characteristics of Benefit And Cost Measurement 488
    - 8.2.1 General Characteristics of Benefits and Costs 488

9.2.5	Systems Analysis Techniques	584
9.2.6	Summary	586
9.3	Financial Analysis and Funding Availability	587
9.4	Program/Project Implementation and Innovative Financing	597
9.4.1	Nontraditional Funding	598
9.4.2	Institutional Capability	603
9.5	Chapter Summary	613
	Questions	614
	References	615
