

Pipeline Technology

Brugge • Belgium • May 21-24, 2000

Volume II

Editor: R. Denys

CONTENTS

Volume II

PIPELINE INSPECTION

- Providing complete ultrasonic inspection of pipeline girth welds 1
T.S. Connelly, B. Gross, H. van Dijk and A. Gilroy-Scott
- Methods to determine fitness for purpose after pigging 17
R. van Agthoven, J.A. De Raad and R. Kania
- Application and validation of mechanized ultrasonic inspection for manual metal arc pipeline welds 27
A. Glover and D. Hodgkinson
- Inspection and rehabilitation of crude oil pipelines in the FSU and Eastern Europe 41
A.H. Feizlmayr and H.J. Fassl
- Ultrasonic phased arrays for pipeline girth weld inspections 55
M. Moles, N. Dubé and M. Russell
- Transverse field inspection – a new direction in magnetic flux leakage technology 63
E. Holden and D. Smith

FATIGUE BEHAVIOUR

- Fracture and fatigue analysis of a hot tap tee 73
D. J. Horsley and Y.-Y. Wang
- Ductile fracture initiation behavior of pipe under a large scale of cyclic bending 87
M. Toyoda, M. Ohata, N. Ayukawa, G. Ohwaki, Y. Ueda and I. Takeuchi
- Fatigue behaviour of steel pipes containing dent and gouge combinations 103
R. Champavere, M. Zarea and R. Batisse
- Numerical prediction method for fatigue life of line pipes containing idealized flaws under fluctuating pressure 119
N. Oguchi, N. Hagiwara, H. Yatabe and T. Masuda
- Determination of fatigue crack propagation limit curves and their application for pipelines having crack like defects 127
J. Lukács
- Assessment of large diameter buried pipeline bends subjected to internal pressure and axial loading due to thermal expansion 141
D.N. Bramley, S. Wheat, R.M. Andrews and A.T. Young

CORROSION ASSESSMENT

Detection and assessment of AC corrosion <i>R. Gregoor and A. Pourbaix</i>	155
A newly developed methodology for projection of potential attenuation and anode current output for cathodically polarized pipelines <i>W.H. Hartt and K.P. Bethune</i>	167
Experience gained from the on site application of an advanced technique for coating damage detection of buried pipelines <i>H. Testaert, F. Leemans and I. Cornelis</i>	181
On-line monitoring system for detecting third-party damage on cathodically protected pipelines <i>Y. Hosokawa, T. Masuda, H. Ohira and N. Sasaki</i>	193
Test methodologies for the study of near neutral stress corrosion cracking in pipeline steels <i>M. Pontremoli and E. Senigaglia</i>	205

CONVENTIONAL PIPELINE STEELS

Development of large-diameter linepipe for offshore applications <i>M. Gräf and H.-G. Hillenbrand</i>	221
Production results and new development trends for high strength, high toughness offshore linepipe steels <i>J. Bauer, P. Flüß and V. Schwinn</i>	235
Development of high strength steels for line pipe applications in a wide strip mill (from API X60 to X85) <i>T. Bakolas, J. Neutjens, P. Cantinieaux and P. Harlet</i>	247
Main metallurgical characteristics for line pipe materials <i>E. Martinez</i>	265
Fitness for purpose evaluation of X65 sour resistant UOE pipes <i>T. Hara, H. Asahi, Y. Terada and H. Ogawa</i>	277
High temperature thermomechanical processing of pipe steel – technical basis and production experience <i>K. Hulka, J.M. Gray and F. Heisterkamp</i>	291

ADVANCED WELDING PROCESSES

Girth welding of supermartensitic stainless steels with matching filler metals <i>H. Heuser, C. Jochum, E. Perteneder and J. Tösch</i>	307
Computerised welding system for cross-country pipelines <i>J.G. Buijvoets and F. Rinaldi</i>	319
Laser orbital welding applied to offshore pipe line construction <i>Y. Gainand, J.P. Mas, J.P. Jansen, J.C. Coiffier, J.C. Dupont and C. Vauthier</i>	327

Development of electron beam welding for girth welding of gas transmission pipelines <i>Y. Hara, M. Toyoda, M. Ushio, H. Irie, H. Masuda and T. Yamakawa</i>	343
---	-----

Homopolar pulse welding of martensitic stainless steel linepipe <i>Y. Ichiyama, H. Asahi, R.S. Hudson, R.W. Carnes and R. Hebner</i>	359
---	-----

Advanced welding processes for transmission pipelines <i>S.A. Blackman and D.V. Dorling</i>	371
--	-----

EXTERNAL DAMAGE AND BURIED PIPELINES

Recent developments in avoiding, detecting, and assessing severity of mechanical damage <i>B.N. Leis, T.A. Bubenik, R.B. Francini, J.B. Nestleroth and R.J. Davis</i>	389
--	-----

EPRG methods for assessing the tolerance and resistance of pipelines to external damage <i>P. Roovers, R. Bood, M. Galli, U. Marewski, M. Steiner and M. Zaréa</i>	405
---	-----

The design of transmission pipelines to be resistant to external interference <i>J. Spiekhout and R.N. Knott</i>	427
---	-----

Stability analysis of pipelines in complicated natural environments <i>A.S. Tsourikov, N.G. Figarov and R. Keyes</i>	443
---	-----

Behaviour of buried pipelines in seismic areas <i>R. Fdez. Loeches, J.A. Lana, B. Destombes, M. Zarea, A. Engel, G. Giusti and S. Maffina</i>	457
--	-----

Behaviour of pipelines in seismic areas <i>F. De Paola, N. Fontana and G. Perillo</i>	471
--	-----

WELD PROPERTIES AND WELDING CONSUMABLES

Welding X-80 and beyond : a consumable manufacturers perspective <i>C. Dallam and M. Quintana</i>	483
--	-----

Welding high strength steel pipelines – a consumable manufacturer's view <i>D.J. Widgery</i>	499
---	-----

Capabilities and limitations of modern welding consumables suitable for girth welding of pipelines – a producer's perspective <i>E. Perteneder, H. Königshofer and R. Bischof</i>	509
--	-----

How to improve the toughness at low temperature of the longitudinal weld seams of pipes with w.t. < 12,7 mm <i>J.P. Jansen, J.C. Coiffier and V. Thillou</i>	527
---	-----

The properties and weldability of grade X80 spiral welded pipes <i>N.O. Torvela, R.O. Laitinen, M.-M. Valkama and D.A. Porter</i>	543
--	-----

Properties of HAZ in two-pass submerged-ARC welded large-diameter pipe <i>M. Gräf and K. Niederhoff</i>	553
--	-----

European welding standards for gastransmission pipelines <i>W.N. Schipaanboord and P.P.C. Coors</i>	567
--	-----

REPAIR WELDING AND WELDING ON PIPELINES

Repair methods of damaged steel pipes applied in Slovak transmission gas pipeline <i>P. Bernasovsky, P. Simko and J. Tyralla</i>	583
---	-----

First under water hot tapping in Egypt <i>M.M. Khaled</i>	591
--	-----

Repair of pipeline defects using weld deposition <i>W.A. Bruce, J.F. Swatzel and D.V. Dorling</i>	607
--	-----

Risks in welding of in-service gas pipelines <i>G. Rihar</i>	625
---	-----

PLASTIC AND COMPOSITE PIPELINES

Plastics gas distribution networks. A summary of 30 years experience <i>L. Van Hoeymissen</i>	639
--	-----

Experience of OAO "Zapsibgasprom" in construction of distribution poly-ethylene pipelines under complicated geological and environmental conditions <i>V.N. Nikiforov and L.V. Kozodoev</i>	651
--	-----

Advanced high density polyethylene coating system for gas transmission pipelines <i>D. Nozahic and L. Leiden</i>	659
---	-----

Application of optimisation methods to the design of high performance composite pipelines <i>A.M. Harte, J.F. McNamara and I.D. Roddy</i>	667
--	-----

High pressure composite pipeline and joints for gas distribution network <i>J.F. McNamara, A. Connolly and J. Steen</i>	681
--	-----
