

The image shows a close-up, low-angle view of a modern building's facade. A large, curved, metallic structure, possibly a canopy or part of a transit station, dominates the left and center of the frame. The structure has a brushed metal finish and is illuminated from below, creating a warm glow. To the right, a wall with a blue-tinted, textured surface is visible. The overall composition is dynamic and architectural.

**FUTURE  
TRANSPORT  
IN CITIES**

**BRIAN RICHARDS**

<b>Part II</b>	<b>Transport and the future city</b>	35
<b>Chapter 4</b>	Roads in the future city	35
	The intelligent highway	39
	Public transport	40
	Automated highways	40
	Paying for road space	43
<b>Chapter 5</b>	The future city centre	45
	Traffic in the future city centre	47
	Handling goods deliveries	48
	Deliveries	48
	Future goods handling	49
	Walking in the future city centre	50
	Cold-weather cities	50
	Arcaded streets	50
	Covered streets	51
	Covered cities	51
<b>Chapter 6</b>	Transport availability in city centres	53
	Underground systems	53
	The case for surface light rail	56
	A future for elevated systems	56
	Small monorails	64
	Pedestrian systems	64
	Vehicles in future city centres	69
	Clean air	69
	Dealing with cars	71
	Deliveries	72
	A car-free London	73
<b>Chapter 7</b>	Future sub-centres	77
	La Défense, Paris	77
	Canary Wharf, London	80
	Future residential areas	80
	The low-density dilemma	83
	Intelligent cars and highways	85
	Transport in the suburbs	88
	Low density and long walks	90
	Cycling	91
	High- and low-density living	92
	Car-free housing	98

<b>Part III</b>	<b>The new transport technology</b>	101
<b>Chapter 8</b>	New systems of transport	101
	Moving pavements	103
	New developments	112
	City cars	114
	Smart car clubs	114
	Smart bikes	120
	Car clubs	122
	Personal rapid transit	124
	Group rapid transit	129
	Horizontal elevators and peplemovers	130
	The future of buses	132
	Guided buses	133
	Central areas	137
	Vehicles	138
	Design	139
	The new fuels	140
	Future light rail systems	142
	Urban design	142
	Integration with other systems	145
	Integration with development	150
	Integrated transport-only connect	151
	Conclusions	154
	Comparative systems	156
	Selected bibliography	158
	Index	159

Preface		xi
Acknowledgements		xiii
<b>Part I</b>	<b>The transport situation today</b>	1
<b>Chapter 1</b>	Introduction	1
	The present situation	1
	Cars in cities: what is happening	2
	Park and ride	3
	Moving around residential areas	5
<b>Chapter 2</b>	Improving public transport	9
	Buses	9
	Light rail: an alternative to trams	13
	Light rail in city centres	16
	Suburban travel	16
	The rebirth of the railways	19
	High-speed rail travel	20
	Metro and rapid transit systems	24
	Station design	27
<b>Chapter 3</b>	Towards a better environment	29
	Bringing back walking	29
	A new interest in cycling	33
