

Wastewater Microbiology Series

Nitrification and Denitrification in the Activated Sludge Process

MICHAEL H. GERARDI

Environmental
PROTECTION
Magazine Series

Contents

Preface	xi
PART I OVERVIEW	1
1 Nitrogen: Environmental and Wastewater Concerns	3
2 The Oxidation States of Nitrogen	11
3 Nitrogenous Compounds	17
4 Bacteria	21
5 The Activated Sludge Process	31
PART II NITRIFICATION	35
6 Introduction to Nitrification	37
7 Nitrifying Bacteria	43
8 Organotrophs	55
9 The Wastewater Nitrogen Cycle	63
	vii

10	Nitrogen Assimilation	77
11	Forms of Nitrification	81
12	Indicators of Nitrification	87
13	Nitrite Ion Accumulation	91
14	BOD	95
15	Dissolved Oxygen	103
16	Alkalinity and pH	109
17	Temperature	115
18	Inhibition and Toxicity	119
19	Mode of Operation	123
20	Classification of Nitrification Systems	127
21	Troubleshooting Key and Tables	129
PART III	DENITRIFICATION	133
22	Introduction to Denitrification	135
23	Denitrifying Bacteria	137
24	Biochemical Pathway and Respiration	139
25	Gaseous End Products	143
26	Sources of Nitrite Ions and Nitrate Ions	145
27	Operational Factors Influencing Denitrification	147
28	Substrate or cBOD	149

29 Free Molecular Oxygen	151
30 The Occurrence of Denitrification	153
31 Monitoring and Correcting Accidental Denitrification	159
32 Zoning	163
33 Benefits of Denitrification	167
APPENDIX I THE GRAM STAIN	169
APPENDIX II F/M, HRT, MCRT	171
References	175
Abbreviations and Acronyms	179
Chemical Compounds and Elements	181
Glossary	183
Index	191
