VOIGT, DVM**

Preface, vii

Acknowledgments, ix

- 1** Introduction to the Hematology Laboratory, 3
- 2** Blood Composition, 7
- 3** Blood Volume and Effects of Blood Loss, 13
- 4** Blood Collection and Handling, 15
- 5** Blood Smears and Staining, 21
- 6** Routine Hematology Laboratory Tests, 27
- 7** Leukocyte Cell Types and Functions, 55
- 8** Introduction to the Immune System, 67
- 9** Erythrocyte Form, Function, and Indices, 81
- 10** Erythrocyte Abnormalities, 87
- 11** Anemias and Polycythemias, 95
- 12** Hemostasis and Coagulation, 103
- 13** Hematopoiesis and Bone Marrow Examination, 111
- 14** Collection and Handling of Cytology Samples, 119
