

# **MECHANICAL TESTING of ADVANCED FIBRE COMPOSITES**

**Edited by J M Hodgkinson**

---

**WOODHEAD PUBLISHING LIMITED**

## Contents

---

<i>Preface</i>	xi	
<i>List of contributors</i>	xiii	
<b>1</b>	<b>Introduction</b>	<b>1</b>
	<b>J M HODGKINSON</b>	
	<b>References</b>	<b>3</b>
<b>2</b>	<b>General principles and perspectives</b>	<b>4</b>
	<b>S TURNER</b>	
2.1	Mechanical testing in perspective	4
2.2	Formal framework for mechanical test methods	10
2.3	Special features of the mechanical testing of composites	13
2.4	Nature and quality of test data	19
2.5	Mechanical tests for long-fibre composites	24
2.6	Concluding comments	33
	References	34
	Bibliography	35
<b>3</b>	<b>Specimen preparation</b>	<b>36</b>
	<b>F L MATTHEWS</b>	
3.1	Introduction	36
3.2	Laminate production	36
3.3	Quality checking	39
3.4	Specimen preparation	39
3.5	Strain gauging	41
3.6	Summary	42
	References	42

vi	<b>Contents</b>	
<b>4</b>	<b>Tension</b>	<b>43</b>
	<b>E W GODWIN</b>	
4.1	Introduction	43
4.2	Testing equipment	50
4.3	Specimen details	56
4.4	Test procedure	62
4.5	<i>Data reduction</i>	64
4.6	Material and sample preparation	67
4.7	Practical example	70
4.8	Future developments	71
	References	73
<b>5</b>	<b>Compression</b>	<b>75</b>
	<b>F L MATTHEWS</b>	
5.1	Introduction	75
5.2	Types of test	76
5.3	Standards	82
5.4	Specimen preparation	83
5.5	Specimen configurations	85
5.6	Execution and problems	87
5.7	Typical results	89
5.8	Conclusions	97
	References	97
<b>6</b>	<b>Shear</b>	<b>100</b>
	<b>W R BROUGHTON</b>	
6.1	Introduction	100
6.2	Test methods	101
6.3	Summary of test methods	118
6.4	Comparison of data	118
6.5	Recommendations and concluding remarks	118
	Acknowledgements	122
	References	122
<b>7</b>	<b>Flexure</b>	<b>124</b>
	<b>J M HODGKINSON</b>	
7.1	Introduction	124
7.2	Three-point and four-point flexure tests	125
7.3	Comparison of recommended test methods	128
7.4	Failure modes	133
7.5	Typical data	133
7.6	Steel versus soft lined rollers	138

7.7	Through-thickness flexure	140
7.8	Conclusions	141
	References	141
<b>8</b>	<b>Through-thickness testing</b>	<b>143</b>
	<b>W R BROUGHTON</b>	
8.1	Introduction	143
8.2	General issues	144
8.3	Tensile test methods	146
8.4	Compression test methods	156
8.5	Shear test methods	160
8.6	Concluding remarks	167
	Acknowledgements	167
	References	168
<b>9</b>	<b>Interlaminar fracture toughness</b>	<b>170</b>
	<b>P ROBINSON AND J M HODGKINSON</b>	
9.1	Introduction	170
9.2	Terminology and typical values	170
9.3	Overview of test methods and standards	173
9.4	Mode I testing	178
9.5	Mode II testing	194
9.6	Mixed mode I/II	200
9.7	Multidirectional laminates	204
9.8	Conclusions	206
	References	207
<b>10</b>	<b>Impact and damage tolerance</b>	<b>211</b>
	<b>P J HOGG AND G A BIBO</b>	
10.1	Introduction	211
10.2	Impact testing	211
10.3	Damage tolerance – compression after impact (CAI) tests	228
10.4	Boeing test methods and related variants	229
10.5	Data interpretation	235
10.6	Standardisation status	241
10.7	Future trends	243
	References	244
<b>11</b>	<b>Fatigue</b>	<b>248</b>
	<b>P T CURTIS</b>	
11.1	Introduction	248
11.2	Basic test philosophy	249

viii	<b>Contents</b>	
11.3	<b>Machines and control modes</b>	254
11.4	<b>Presentation of data</b>	256
11.5	<b>Monitoring fatigue damage growth</b>	256
11.6	<b>Potential problems</b>	261
11.7	<b>Fatigue life prediction</b>	264
11.8	<b>Post-fatigue residual strength</b>	266
	<b>References</b>	266
<b>12</b>	<b>Environmental testing of organic matrix composites</b>	<b>269</b>
	<b>G PRITCHARD</b>	
12.1	<b>Introduction</b>	269
12.2	<b>Why environmental testing?</b>	269
12.3	<b>Environmental threats to composites</b>	270
12.4	<b>Standard tests</b>	271
12.5	<b>Sample conditioning</b>	275
12.6	<b>Experimental approaches</b>	276
12.7	<b>Determination of sorption behaviour</b>	278
12.8	<b>Lowering of <math>T_g</math> by absorbed liquids</b>	279
12.9	<b>How do composites perform in adverse environments?</b>	280
12.10	<b>Diffusion of liquids into composites</b>	284
12.11	<b>Classification of absorption categories</b>	288
12.12	<b>Edge corrections</b>	289
	<b>References</b>	291
<b>13</b>	<b>Scaling effects in laminated composites</b>	<b>293</b>
	<b>C SOUTIS</b>	
13.1	<b>Introduction</b>	293
13.2	<b>Background</b>	294
13.3	<b>Investigation of failure</b>	294
13.4	<b>Practical application examples</b>	304
13.5	<b>Specialised scaling techniques in composites</b>	308
13.6	<b>Concluding remarks</b>	311
	<b>References</b>	312
<b>14</b>	<b>Statistical modelling and testing of data variability</b>	<b>314</b>
	<b>L C WOLSTENHOLME</b>	
14.1	<b>Introduction</b>	314
14.2	<b>Importance of looking at data plots</b>	314
14.3	<b>Basic statistics</b>	316
14.4	<b>Distribution of sample statistics</b>	317
14.5	<b>Testing for differences between samples</b>	317

	Contents	ix
14.6	Comparing several samples simultaneously	325
14.7	General linear model (GLM)	331
	References	339
<b>15</b>	<b>Development and use of standard test methods</b>	<b>340</b>
	<b>G D SIMS</b>	
15.1	Introduction	340
15.2	Development of test methods	341
15.3	Validation of test methods	343
15.4	Sources of standards and test methods	347
15.5	Harmonisation of composite test methods	352
15.6	Recommended mechanical test methods	355
	References	355
	Bibliography – selected ISO standards	356
	Appendix – contact details for standards organisations	357
