

 WILEY-VCH

Ceramic Materials and Components for Engines

Edited by
Jürgen G. Heinrich and Fritz Aldinger

Contents

I. Systems	1
New Technologies in the Light of Materials	3
The Promise of SOFC Power Generation Technology	7
Ceramic Matrix Composites for Disk Brakes and Their Manufacturing Technologies	13
Ceramic Cutting Tools.	21
Practical Use of Ceramic Components and Ceramic Engines.	27
Beta Ceramic in Zebra [®] and NAS Batteries	33
Oxygen Sensors for Lean Combustion Engines	39
Ceramic Gas Turbine „CGT302“ Development Summary	45
Preparation of Planar SOFC-Components Via Tape Casting of Aqueous Systems, Lamination and Cofiring	51
Glasses from the System RO-R ₂ O ₃ -SiO ₂ as Sealants of High Chromium Steel Components in the Planar SOFC.	57
Lightweight and Wear Resistant CMC Brakes	63
Development of Ceramic Sheathed Type Thermocouple with High Heat Resistance and High Durability.	69
Advances in Hot Gas Filtration Technique	73
Nano-Scaled Ceramic Membranes for the Filtration of Fine and Sticky Dust.	79
Production and Characterization of TiCN-Based Materials for Cutting Tool Applications	85
Sensitivity Characterization to Flammable Gas.	91
II. Performance / Reliability	95
Evaluation of Mechanical Reliability of Si ₃ N ₄ Nozzles after Exposure in an Industrial Gas Turbine	97
Friction and Wear of Advanced Ceramics	103
Lifetime Prediction for Silicon Nitride	109
Standardising Measurement and Test Methods for Advanced Technical Ceramics	115
Investigations on the Stable Crack Growth of Indentation Cracks	121
Prediction of Thermal Shock Resistance of Components Using the Indentation-Quench Test	127
Ceramic Components for Metal Forming Tools	133
Effect of Grain Boundary Composition on High-Temperature Mechanical Properties of Hot-Pressed Silicon Carbide Sintered with Ytria	139
Thermal Shock Properties of SiALON Ceramics	147
Corrosion of Nonoxide Silicon-Based Ceramics in a Gas Turbine Environment	153
Mechanical Properties and Wear Behaviour of Differently Machined Silicon Nitride and Silicon Carbide Ceramic Surfaces	157
Design of Wear Resistant Polycrystalline Alumina	163
Crack Growth of Ceramic Materials in Sliding Contact	169
Damage Detection in Tetragonal Zirconia Polycrystals (TZP) by Impedance Spectroscopy.	175
Reliability and Reproducibility of Silicon Nitride Valves: Experiences of a Field Test	181
Self-Mated Tribological Properties of Plasma Sprayed Chromium Carbide Coating	187
Role of Grain Size in Scratch Damage Resistance in Zirconias and Silicon Nitrides	193
Ceramic Coatings with Solid Lubricant Ability for Engine Applications.	199
Tribological Behavior of Silicon Nitride/Steel Contacts under Lubricated Conditions	205
Optimization of the Brazilian Disc Test for Ceramic Materials.	211

The Impulse Excitation Technique for Rapid Assessment of the Temperature Dependence of Structural Properties of Silicon Nitride and Zirconium Oxide Ceramics	217
VAMAS Round Robin Testing of High Temperature Flexural Strength	223
Effect of High Voltage Screening Method on Titania Ceramics with Different Surface Finishing	229
In Situ Observation of Tension and Cyclic Fatigue Damage in Hi-NiCALON Fiber/SiC Composite	233
Multi-Axial Strength Data for Al ₂ O ₃ - and MgO-ZrO ₂ -Ceramics	239
III. Design, Modelling and Simulation.	245
Fatigue Design and Testing of Ceramic Intake and Exhaust Valves	247
Design and Testing of a Prototype SiSiC heat Exchanger for Coal Combustion Power Stations	255
Design and Testing of Ceramic Components for Industrial Gas Turbines	261
An Investigation on Paste Flow in a Press-Moulded Ceramic Dome	267
Design Standard for Advanced Ceramic Materials and Components	273
Static and Cyclic Stress-Lifetime Curves of Ceramics	279
Lifetime Prediction of Ceramic Thermal Barrier Coatings Based on Lifetime Analyses of Close to Reality Tests	285
Creep of a Silicon Nitride under Various Specimen/Loading Configurations	291
Mathematical Model of Microhardness of Plasma Sprayed Chromium Oxide Coating	299
Lifetime Prediction Model for Plasma-Sprayed Thermal Barrier Coatings Based on a Micromechanical Approach	305
Analytical Design and Experimental Verification Methods of Ceramic Radial Turbine Rotors for a Gas Turbine	311
The Evolution of Damage in Ceramic Materials for Gas Turbine Applications under Complex Load Conditions	319
Mechanical Failure of Electroceramic Components	325
The Energy and The Power Time Dependence on the Ultrasonic Welding Process – A Weibull Statistical Based Model	333
IV. Cost Effective Manufacturing	345
Advances in Brazing of Ceramic Materials for Engines	347
Stereolithography for Ceramic Part Manufacturing	353
Application of the Mold SDM Process to the Fabrication of Ceramic Parts for a Micro Gas Turbine Engine	359
Potential of the Hydrolysis Assisted Solidification Process for Wet Forming of Si ₃ N ₄ Ceramics	365
Green Machining of Aluminium Oxide Ceramics	371
Laser-Assisted Turning of Silicon-Nitride Ceramics	377
Ceramic Engineering with Preforms for Locally Reinforced Light Metal Components	383
Laser Beam Welding of Alumina – a New Successful Technology	387
SRBSN Material Development for Automotive Applications	393
Process Design for High Performance Grinding of Advanced Ceramics in Mass Production	399
New Ceramic Excellence for Complex Machining of Engine Materials	405
Process Strategies for Grinding of Advanced Ceramic Cutting Tools	411
Ultrasonic Assisted Face Grinding and Cross-Peripheral Grinding of Ceramics	417
V. Material Design and Process Development	423
Advancing in Mechanical Properties of Silicon Nitride: The Roles of Starting Powders and Processing	425
Materials Design of Composite Materials – Compatibility of Self-Damage Monitoring and Strengthening	431
The Design of Composition and Mechanical Properties of α - β SiAlON Ceramics Densified with Higher Atomic Number Rare Earths	435
Grain-Boundary Phase Control of Silicon Nitride Materials	439
Sintering and Microstructure of Silicon Nitride with Magnesia and Cerium Additives	443
Characterisation of Multi-Cation Stabilised Alpha-SiALON Materials	447

Grain Boundaries of SiC-SiO ₂ Composite	453
Millimeter Wave Sintering of Ceramics	457
Internally Cooled Monolithic Silicon Nitride Aerospace Components	463
Preparation and High Temperature Strength of Gd ₄ Al ₂ O ₉ /MgO Composites.	469
Characterization of In Situ SiC-BN Composites	471
Coating Experiments on Carbon Fibers Using a Continuous Liquid Coating Process	477
Effect of Al Component on Mechanical Properties in Al-Penetrated Alumina	483
Cavitation Creep in the Next Generation Silicon Nitride.	487
Thermal Conductivity and Phonon Scattering Mechanisms of β -Si ₃ N ₄ Ceramics	495
A High Thermal Conductive β -Silicon Nitride Substrate for Power Modules	499
Characterisation of the Pore Structure of Biomorphic Cellular Silicon Carbide Derived from Wood by Mercury Porosimetry	505
TBC Consisting of New Metal-Glass Composites	513
Aspects on Sintering of EB-PVD TBCs	517
Crack Propagation in a Thermal Barrier Coating System	523
Porosity Graded Silicon Carbide Evaporator Tubes for Gasturbines with Premix Burners	531
Porous Ceramics Functional Cavities for System Innovation	537
Feasibility Studies on Applying In Situ Single Crystal Oxide Ceramic Eutectic Composites in Non-Cooled High Efficiency Turbine System	543
Synthesis and Property Tailoring of Reaction-Based Composites: The RBAO and the 3A Process	549
Properties of Silicon Nitride/Carbide Nano/Microcomposites – Role of SiC Nano-inclusions and Grain Boundary Chemistry	553
Layered Si ₃ N ₄ /(SiAlON+TiN) Composites with Self-Diagnostic Ability	559
Multilayer C/SiC Composites for Automotive Brake Systems	565
Sinter Additive Optimization in Processing of Aluminum Nitride for Heat Exchanger Components	571
New Opportunity for Bimodal Microstructure Control in Silicon Nitride	577
Design of SiCN – Precursors for Various Applications	581
Gelatin Casting and Starch Consolidation of Alumina Ceramics	587
Liquid-Phase Sintered Silicon Carbide Based Ceramics with AlN-Y ₂ O ₃ and AlN-La ₂ O ₃ Additives	593
Slip Casting of ATZ Ceramics	599
The Preparation for Sintered Body of CeO ₂ Based Complex Oxide in Low Temperature Solid Oxide Fuel Cells Using Colloidal Surface Chemistry	605
Processing and Properties of TiC-Ni ₃ Al Composites	611
Ceramic Joints Between SiC Bodies: Microstructure, Composition, and Joining Strength	617
Fatigue Behaviour of Ceramics Stressed Near Fatigue Limit under Rotary Bending	621
Laser Cutting and Joining of 2D-Reinforced CMC	627
Analysis of Compounding and Injection Moulding Process of Ceramic Powders	631
Use of the SOL-Gel Method in the Extrusion of Alumina Ceramics and ATZ Ceramics	637
Advanced Hot-Pressed Ceramic Matrix Composites (CMC) in SiC _w , SiC _p , C/Si ₃ N ₄ Systems	641
High Temperature Si ₃ N ₄ -BN Composite	647
Processing of SiCN-Fibres Prepared from Polycarbosilazanes	653
Design of Grain Boundary Phases in Silicon Nitride – Silicon Carbide Nano-Composites	657
Yb-Si-Al-O-N Glasses and Glass-Ceramics as Grain-Boundary Phases for Silicon Nitride Materials.	661
Index.	665
