Preface	vi		
Acknowledgements	vi		
Author biographies	vii		
Section I			
Introductory Bacteriology			
1. Microbial pathogens and infectious disease	3	26. <i>Bordetella bronchiseptica</i> and <i>Bordetella avium</i>	155
2. Structure of bacterial cells	8	27. <i>Moraxella bovis</i>	159
3. Cultivation, preservation and inactivation of bacteria	12	28. <i>Brucella</i> species	162
4. Bacterial genetics and mechanisms of genetic variation	17	29. <i>Campylobacter</i> species	168
5. Laboratory diagnosis of bacterial disease	23	30. <i>Lawsonia intracellularis</i>	173
6. Antimicrobial agents	28	31. Spirochaetes	175
7. Bacterial colonization, tissue invasion and clinical disease	36	32. Pathogenic anaerobic non-spore-forming Gram-negative bacteria	185
		33. Mycoplasmas	189
		34. <i>Chlamydia</i> and <i>Chlamydophila</i> species	196
		35. <i>Rickettsiales</i>	203
		36. Bacterial species of limited pathogenic significance	213
Section II			
Pathogenic Bacteria			
8. <i>Staphylococcus</i> species	43	Section III	
9. Streptococci	49	Mycology	
10. <i>Corynebacterium</i> species	55	37. General features of fungi associated with disease in animals	219
11. <i>Rhodococcus equi</i>	60	38. Dermatophytes	224
12. Actinomycetes	63	39. <i>Aspergillus</i> species	229
13. <i>Listeria</i> species	72	40. Yeasts and disease production	233
14. <i>Erysipelothrix rhusiopathiae</i>	76	41. Dimorphic fungi	240
15. <i>Bacillus</i> species	80	42. Zygomycetes of veterinary importance	246
16. <i>Clostridium</i> species	84	43. Fungus-like organisms of veterinary importance	251
17. <i>Mycobacterium</i> species	97	44. <i>Pneumocystis carinii</i>	255
18. <i>Enterobacteriaceae</i>	106	45. Opportunistic infections caused predominantly by phaeoid fungi	257
19. <i>Pseudomonas aeruginosa</i> and <i>Burkholderia</i> species	124	46. Mycotoxins and mycotoxicoses	260
20. <i>Aeromonas</i> species, <i>Plesiomonas shigelloides</i> and <i>Vibrio</i> species	128	47. Pathogenic algae and cyanobacteria	269
21. <i>Actinobacillus</i> species	131	Section IV	
22. <i>Pasteurella</i> species and <i>Mannheimia haemolytica</i>	137	Introductory Virology	
23. <i>Francisella tularensis</i>	144	48. Nature, structure and taxonomy of viruses	275
24. <i>Haemophilus</i> species	147	49. Replication of viruses	283
25. <i>Taylorella equigenitalis</i>	152	50. Genetics and evolution of viruses	290
		51. Propagation of viruses and virus-cell interactions	295

52. Pathogenesis of viral diseases	301	74. <i>Flaviviridae</i>	426
53. Laboratory diagnosis of viral infections	305	75. <i>Togaviridae</i>	434
		76. Prions: unconventional infectious agents	438

Section V Viruses and Prions

54. <i>Herpesviridae</i>	315
55. <i>Papillomaviridae</i>	327
56. <i>Adenoviridae</i>	331
57. <i>Poxviridae</i>	335
58. <i>Asfarviridae</i>	343
59. <i>Parvoviridae</i>	346
60. <i>Circoviridae</i>	352
61. <i>Retroviridae</i>	354
62. <i>Reoviridae</i>	367
63. <i>Birnaviridae</i>	373
64. <i>Orthomyxoviridae</i>	375
65. <i>Paramyxoviridae</i>	381
66. <i>Rhabdoviridae</i>	390
67. <i>Bornaviridae</i>	396
68. <i>Bunyaviridae</i>	398
69. <i>Picornaviridae</i>	402
70. <i>Caliciviridae</i>	408
71. <i>Astroviridae</i>	412
72. <i>Coronaviridae</i>	413
73. <i>Arteriviridae</i>	422

Section VI Microbial Agents and Disease Production

77. Interactions of microbial pathogens with the nervous system	445
78. Interactions of microbial pathogens with the male and female reproductive systems	450
79. The role of microbial pathogens in intestinal disease	457
80. Microbial infections and pneumonia	461
81. Bacterial causes of bovine mastitis	465
82. Foot infections of cattle, sheep and pigs associated with microbial agents	476
83. Disinfection and other aspects of disease control	481
84. Infection and immunity	494
Index	517
