

HEALTH, SAFETY, AND ACCIDENT MANAGEMENT IN THE CHEMICAL PROCESS INDUSTRIES

Ann Marie Flynn
Louis Theodore

Contents

Part I: Introduction	1
Chapter 1 Past History	3
1.1 Introduction	3
1.2 Early Accidents	4
1.3 Recent Major Accidents	7
1.4 Other Accidents	18
1.5 Advances in Safety Features	21
1.6 Illustrative Examples	24
1.7 Summary	28
References	29
Chapter 2 Legislation	31
2.1 Introduction	31
2.2 Early Legislation	32
2.3 Air Pollution Legislation	34
2.4 Water Pollution Legislation	37
2.5 Hazardous and Toxic Waste Legislation	39
2.6 Superfund Amendments and Reauthorization Act of 1986 (SARA)	42
2.7 Occupational Safety and Health Administration (OSHA)	67
2.8 USEPA's Risk Management Program	69
2.9 Regulatory Problem Areas and Potential Environmental Violations	69
2.10 The Pollution Prevention Act of 1990	71
2.11 Illustrative Examples	73
2.12 Summary	76
References	77
Chapter 3 Emergency Planning and Response	79
3.1 Introduction	79
3.2 The Need for Emergency Response Planning	80
3.3 The Planning Committee	81
3.4 Hazards Survey	85
3.5 Plan for Emergencies	87
3.6 Training of Personnel	90
3.7 Notification of Public and Regulatory Officials	92

3.8 Plan Implementation	94
3.9 Other State Regulatory Initiatives	97
3.10 Illustrative Examples	100
3.11 Summary	102
References	103
Part II: Process and Plant Accidents	107
Chapter 4 Process Fundamentals	109
4.1 Introduction	109
4.2 Units and Dimensions	109
4.3 Physical Properties	111
4.4 Chemical Properties	116
4.5 Conservation Laws	119
4.6 Engineering Principles	122
4.7 Illustrative Examples	129
4.8 Summary	131
References	132
Chapter 5 Process Equipment	133
5.1 Introduction	133
5.2 Reactors	133
5.3 Heat Exchangers	136
5.4 Mass Transfer Equipment	137
5.5 Ancillary Equipment	142
5.6 Environmental Control Equipment	149
5.7 Utilities	156
5.8 Protective and Safety Systems	157
5.9 Process Diagrams	159
5.10 Plant Siting and Layout	161
5.11 Illustrative Examples	172
5.12 Summary	176
References	177
Chapter 6 Classification of Accidents	179
6.1 Introduction	179
6.2 Equipment Accidents	180
6.3 Human Errors and Occupational Mishaps	182
6.4 Transport Accidents	185
6.5 Electrical Failures	189
6.6 Nuclear Accidents	192
6.7 Natural Disasters	195
6.8 Illustrative Examples	196
6.9 Summary	200
References	201

Chapter 7 Fires, Explosion, Toxic Emissions, and Hazardous Spills	203
7.1 Introduction	203
7.2 Fire Fundamentals	203
7.3 Plant Fires	214
7.4 Explosion Fundamentals	221
7.5 Plant Explosions	229
7.6 Toxic Emissions	233
7.7 Hazardous Spills	237
7.8 Illustrative Examples	240
7.9 Summary	246
References	247
Chapter 8 Process Applications	249
8.1 Introduction	249
8.2 Chlorine	250
8.3 Ammonia	255
8.4 Hydrogen Cyanide	263
8.5 Hydrogen Fluoride	269
8.6 Sulfuric Acid	274
8.7 Other Chemical Processes	279
8.8 Illustrative Examples	281
8.9 Summary	281
References	282
Part III: Health Risk Assessment	285
Chapter 9 Introduction to Health Risk Assessment	287
9.1 Introduction	287
9.2 The Health Risk Evaluation Process	288
9.3 Health Hazard Identification	289
9.4 Dose-Response	292
9.5 Exposure Assessment	293
9.6 Health Risk Characterization	294
9.7 Illustrative Examples	295
9.8 Summary	296
References	297
Chapter 10 Health Hazard Identification	299
10.1 Introduction	299
10.2 Toxicology Principles	300
10.3 Epidemiology Principles	301
10.4 Molecular/Atomic Structural Analysis	302
10.5 Material Safety Data Sheet (MSDS)	302
10.6 Engineering Problem Solving	303
10.7 Fate of Chemical Health Hazards	307
10.8 Carcinogens versus Noncarcinogens	309

10.9 Illustrative Examples	310
10.10 Summary	312
References	313
Chapter 11 Dose-Response	315
11.1 Introduction	315
11.2 Definitions	316
11.3 Toxicology	322
11.4 Epidemiology	324
11.5 Noncarcinogens	327
11.6 Carcinogens	334
11.7 Uncertainties/Limitations	340
11.8 Illustrative Examples	342
11.9 Summary	349
References	351
Chapter 12 Exposure Assessment	353
12.1 Introduction	353
12.2 Components of an Exposure Assessment	354
12.3 Dispersion in Water Systems	357
12.4 Dispersion in Soils	363
12.5 Effective Height of Emission	367
12.6 Atmospheric Dispersion Equations for Continuous Sources	371
12.7 Atmospheric Dispersion Equation for Instantaneous Sources	381
12.8 Stack Design Considerations	383
12.9 USEPA Air Quality Models	384
12.10 Illustrative Examples	386
12.11 Summary	392
References	394
Chapter 13 Health Risk Analysis and Characterization	395
13.1 Introduction	395
13.2 Qualitative Risk Scenarios	396
13.3 Quantitative Risk: Noncarcinogens	398
13.4 Quantitative Risk: Carcinogens	403
13.5 Risk Uncertainties/Limitations	405
13.6 Risk-Based Decision Making	407
13.7 Public Perception of Risk	408
13.8 Illustrative Examples	413
13.9 Summary	419
References	421

Part IV: Hazard Risk Assessment	423
Chapter 14 Introduction to Hazard Risk Assessment	425
14.1 Introduction	425
14.2 Risk Evaluation Process for Accidents	426
14.3 Hazard Identification	428
14.4 Causes of Accidents	429
14.5 Consequences of Accidents	430
14.6 Cause-Consequence Analysis	431
14.7 Future Trends	432
14.8 Illustrative Examples	432
14.9 Summary	435
References	436
Chapter 15 Event/Hazard Identification	437
15.1 Introduction	437
15.2 Event/Hazard Evaluation Techniques	438
15.3 System Checklists	439
15.4 Safety Review/Safety Audit	442
15.5 "What If" Analysis	443
15.6 Preliminary Hazard Analysis (PHA)	444
15.7 Hazard and Operability Study (HAZOP)	445
15.8 Illustrative Examples	449
15.9 Summary	455
References	457
Chapter 16 Accident Causes and Probability	459
16.1 Introduction	459
16.2 Causes of Accidents	461
16.3 Equipment Failure	462
16.4 Mechanical Operations	472
16.5 Other Causes	472
16.6 Fault Tree Analysis (FTA)	475
16.7 Illustrative Examples	478
16.8 Summary	481
References	482
Chapter 17 Accident Consequences and Evaluation	483
17.1 Introduction	483
17.2 Accident Minimization/Prevention	484
17.3 Consequence Estimation	495
17.4 Evacuation Procedure	496
17.5 Failure Modes, Effects and Critical Analysis	499
17.6 Vulnerability Analysis	500
17.7 Event Tree Analysis (ETA)	504
17.8 Illustrative Examples	506

17.9 Summary	510
References	511
Chapter 18 Hazard Risk Analysis	513
18.1 Introduction	513
18.2 Risk Characterization	514
18.3 Cause-Consequence Analysis	515
18.4 Qualitative Hazard Risk Analysis	517
18.5 Quantitative Hazard Risk Analysis	521
18.6 Uncertainties/Limitations	523
18.7 Public Perception of Risk	525
18.8 Risk Communication	526
18.9 Illustrative Examples	531
18.10 Summary	535
References	536
Part V: Quantitative Hazard Risk Assessment	539
Chapter 19 Hazard Risk Assessment Fundamentals	541
19.1 Introduction	541
19.2 Probability Definitions and Interpretations	542
19.3 Set Notation for Events	544
19.4 Basic Theorems	546
19.5 Conditional Probability	548
19.6 Bayes' Theorem	550
19.7 Random Variables	551
19.8 Probability Distributions	552
19.9 Expected Values	558
19.10 Estimation of Mean and Variance	562
19.11 Illustrative Examples	563
19.12 Summary	566
References	569
Chapter 20 Hazard Risk Assessment Calculations	571
20.1 Introduction	571
20.2 Series and Parallel Systems	571
20.3 Reliability Relations	573
20.4 The Bathtub Curve	576
20.5 Other Special Distributions	579
20.6 Monte Carlo Simulation of Failure Distributions	592
20.7 Fault Tree Analysis	595
20.8 Event Tree Analysis	599
20.9 Illustrative Examples	601
20.10 Summary	603
References	606

Chapter 21 Hazard Risk Analysis Applications	609
21.1 Introduction	609
21.2 Estimation of Failure Rate of Coolant Recycle Pump	614
21.3 Transportation of Hazardous Chemicals	616
21.4 Release of Toxic Vapor	618
21.5 Operation of Holdup Tank Containing a Hazardous Chemical	622
21.6 Bus Section Failures in Electrostatic Precipitators	626
21.7 Illustrative Example	628
21.8 Summary	634
References	637
Index	639
