PREFACE XIX

ABOUT THE AUTHOR XXXI

CHAPTER 1 CORE NETWORK CONCEPTS 1

Introduction	2
<i>The Global Internet: Living in Dog Years</i>	2
<i>Internal Corporate Networks</i>	2
<i>The Telephone System</i>	2
<i>Beyond Use Knowledge</i>	2
<i>Networking and Programming</i>	2
<i>Telecommunications and Data Networks</i>	3
<i>Networks</i>	3
Applications, Client Stations, and Servers	3
<i>Applications</i>	4
<i>Client/Server Architectures</i>	4
<i>Popular Client Technologies</i>	5
<i>Server Technology</i>	6
<i>Server Scalability</i>	9
<i>Director Servers</i>	9
Transmission Links	13
<i>Trunk Links</i>	13
<i>Access Links</i>	13
<i>Transmission Link Technology</i>	13
Switches	13
<i>Packet Switching</i>	13
<i>Message Structure</i>	13
Quality of Service (QoS)	17
<i>Speed</i>	17
<i>Congestion and Latency</i>	18
<i>Reliability</i>	18
<i>Service Level Agreements (SLAs)</i>	19
Geographical Scope	19
<i>Local Area Networks</i>	19
<i>Wide Area Networks (WANs)</i>	19
<i>Customer Premises Operation Versus Carrier Networks</i>	19
<i>LANs Versus WANs: Speed</i>	20
<i>Metropolitan Area Networks (MANs)</i>	20
Internets	21
<i>Networks Versus Internets</i>	21
<i>Internets Versus The Internet</i>	21
<i>The Internet</i>	24

The Internet, Intranets, and Extranets	29
<i>The Global Internet</i>	30
Intranets	30
Extranets	30
Firewalls	30
Gaining Perspective	30
<i>Market Realities</i>	30
Chapter 1a Case Study: Panko.Info	33
Introduction	33
Web Hosting	33
Servers	33
Connection to the Internet	34
Domain Name	35
Getting a Domain Name	35
Getting a DNS Host	35
Management	35
Building the Website	36
FrontPage	36
E-Commerce	36
Web Design Service	36
Price	36
CHAPTER 2 STANDARDS	39
Introduction	40
Warning: Difficult Material	40
The Importance of Standards	40
Layered Communication	42
Horizontal Communication Through Protocols	42
Layers	43
Only an Example	44
The Physical, Data Link, and Internet Layers	44
Introduction	43
Links and Messages	46
Connecting Devices	49
Format Conversion	49
Layer Cooperation at the Physical, Data Link, and Internet Layers	51
Vertical Message Communication on the Source Host	51
On Switch X1 (and Switch X2)	53
On Router R1	54
On the Destination Host (Host B)	54
The Transport and Application Layers	57
Transport Layer Standards	57
Application Layer Standards	58
Layering at All Layers	58
Standards Architectures	60
TCP/IP and OSI Architectures	60

TCP/IP	63
TCP/IP and OSI	64
A Multiprotocol World	64
Gaining Perspective	66

CHAPTER 3 PHYSICAL LAYER PROPAGATION 67

Introduction	68
<i>The Physical Layer</i>	68
Signaling	68
<i>Disturbances and Propagation</i>	68
<i>Analog and Binary Data</i>	69
<i>Analog, Binary, and Digital Signals</i>	69
UTP Signal Propagation	73
<i>UTP Transmittal Standards</i>	73
<i>4-Pair UTP and RJ-45</i>	73
<i>Attenuation and Noise Problems</i>	76
<i>Electromagnetic Interference (EMI) in UTP Wiring</i>	77
<i>Serial and Parallel Transmission</i>	79
Optical Fiber Transmission Links	80
<i>Optical Fiber</i>	80
<i>Distance Limitations with Optical Fiber</i>	82
Radio Signal Propagation	84
<i>Radio Signals and Antennas</i>	84
<i>Wave Characteristics</i>	85
<i>Terminology</i>	87
<i>Wireless Propagation Problems</i>	89
Physical Layer Topologies	90
<i>Major Topologies</i>	90
<i>Physical and Logical Topologies</i>	91
Gaining Perspective	92
<i>Market Perspective</i>	92

Chapter 3a Hands On: Cutting and Connectorizing UTP 95

CHAPTER 4 A SMALL ETHERNET PC NETWORK 103

Introduction	104
<i>Elements of a Small PC Network</i>	104
<i>Ethernet</i>	104
UTP Transmission Links	105
<i>Purchasing UTP Wiring</i>	106
Hubs and Switches	107
<i>Hubs</i>	107
<i>Switches</i>	109
Network Interface Cards	111
<i>Splitting the Data Link Layer: MAC and LLC</i>	111
<i>Media Access Control: The Ethernet Frame</i>	112
<i>Media Access Control: CSMA/CD</i>	115

Server Services	117
<i>TCP/IP Autoconfiguration</i>	118
<i>File Service</i>	119
<i>Print Service</i>	120
<i>Application Service</i>	121
Popular Network Operating Systems for PC Servers	122
<i>Microsoft Windows Server</i>	122
<i>LINUX</i>	123
<i>Novell NetWare</i>	124
Gaining Perspective	124
<i>Market Realities</i>	124
Chapter 4a Hands On: Configuring a Microsoft Windows 98 PC as a Client	127
CHAPTER 5 OTHER LAN TECHNOLOGIES	137
Introduction	138
Larger Ethernet Networks	138
<i>Multiple Ethernet Switches</i>	138
<i>Reliability in a Hierarchical Switched Network</i>	138
<i>Workgroup Versus Core Switches</i>	141
<i>Virtual LANs and Ethernet Switches</i>	142
<i>Ethernet Physical Layer Standards</i>	145
Wireless LANs	145
<i>Advantages</i>	145
<i>Disadvantage</i>	145
<i>802.11 Wireless LANs</i>	147
<i>Bluetooth</i>	150
ATM LANS	153
<i>Complexity</i>	153
<i>A Lost Speed Advantage</i>	153
<i>Handling Traffic Peaks</i>	157
<i>ATM Network Operation</i>	160
<i>ATM Cells</i>	161
<i>Unreliable Service</i>	162
Legacy LAN Technologies	162
<i>Token-Ring Networks</i>	162
<i>Early Ethernet 802.3 Physical Layer Standards</i>	164
<i>Ethernet 802.3 10Base2</i>	165
Gaining Perspective	166
<i>Market Realities</i>	166
Chapter 5a Case Study: XTR Consulting's PC Network	169
Introduction	169
Initial Situation	169
Network Design	170
Server	170

The Current Situation	171
The Future	172

CHAPTER 6 TELEPHONY: INTERNAL AND EXTERNAL 173

Introduction	174
<i>Public Switched Telephone Network (PSTN)</i>	174
Internal Telephony	175
<i>Private Branch Exchanges (PBXs)</i>	175
<i>Building Wiring Distribution</i>	175
<i>Data Cabling</i>	177
<i>Building Cabling Management</i>	179
The Technology of the PSTN	179
<i>Customer Premises</i>	179
<i>Local Loop</i>	180
<i>Switch Hierarchy</i>	181
<i>Trunk Line Technologies</i>	181
<i>Circuits and Circuit Switching</i>	181
Analog and Digital Transmission in the PSTN	184
<i>Mostly Digital</i>	184
<i>Codec</i>	185
<i>Sampling</i>	186
<i>Digital-to-Analog Conversion (DAC)</i>	188
Cellular Telephony	188
<i>Cells</i>	188
<i>Why Cells?</i>	190
<i>Generations of Cellular Telephony</i>	191
Regulation and Carriers	194
<i>Regulation and Deregulation</i>	194
<i>Carriers in the United States</i>	196
<i>Data Networking</i>	197
Convergence	197
<i>Saving Money</i>	197
<i>Improving Applications</i>	198
<i>PBX-PBX IP Telephony</i>	199
<i>Will Cost Savings Be Realized?</i>	199
<i>Service Quality</i>	200
<i>Perspective</i>	201
Gaining Perspective	201

Chapter 6a Case Study: Rewiring a College Building 203

Introduction	203
Option 1: State of the Art Rewiring	204
Option 2: Using the Existing UTP Data Wiring	205
Option 3: Resegmentation	205

CHAPTER 7	WIDE AREA NETWORKS (WANs)	207
Introduction	208	
WANs and the Telephone Network	208	
Reasons to Build a WAN	208	
WAN Technologies	208	
Low Speeds	209	
Telephone Modem Communication	209	
Modulation	209	
Modulation Standards	210	
Leased Line Networks	212	
Leased Lines	212	
Trunk-Line Based Lease Lines	212	
Digital Subscriber Lines (DSLs)	214	
Cable Modem Services	216	
Satellite Access	217	
Public Switched Data Networks (PSDNs)	219	
Leased Lines Versus PSDNs	219	
Popular PSDN Services	221	
Access Devices	224	
Frame Relay Pricing	226	
Virtual Private Networks (VPNs)	229	
PSDN Lack of Connectivity	229	
Advantages of Using the Internet for Internal and Customer Communication	230	
Latency Control	230	
Security	230	
Remote Access VPNs	230	
Point-to-Point Tunneling Protocol (PPTP)	232	
Site-to-Site Networking and Intranets	233	
IPsec	234	
Gaining Perspective	235	
Market Perspective	235	
 Chapter 7a	 Case Study: First Bank of Paradise's Wide Area Networks	 239
 CHAPTER 8	 TCP/IP INTERNETWORKING	 243
Introduction	243	
Routers	244	
Router Operation	244	
Routing Standards	247	
Multiprotocol Routing	247	
Routing Decisions: IP Routing Tables	249	
Hierarchical IP Addresses	249	
Network/Subnet Masks	251	
Finding Row Matches	253	
Finding the Best Match	255	
After the Row Is Selected	257	
Recap	258	

Other Internet Layer Standards	259
Domain Name System (DNS)	259
Internet Control Message Protocol (ICMP) for Supervisory Messages	260
IPv4 and IPv6	262
The Transmission Control Protocol (TCP)	262
TCP and IP	264
Connection Opens and Closes	265
The User Datagram Protocol (UDP)	268
Port Numbers	269
Layer 3 and Layer 4 Switches	270
Layer 3 Switches	270
Layer 4 Switches	271
Gaining Perspective	272
Market Realities	272

CHAPTER 9 SECURITY 275

Introduction	276
The Snake in the Networking Garden	276
Types of Attackers	276
Types of Security Systems	277
Attack Prevention Systems	279
Dangers	279
Firewalls	282
Packet Filter Firewalls	282
Application (Proxy) Firewalls	284
Network Address Translation (NAT)	285
Intrusion Detection	287
Hardening Servers and Clients	288
Kerberos Authentication	290
Biometric Authentication	292
Smart Cards	292
Access Permissions	292
Secure Communications Systems	293
Phase 1: Negotiation of Security Parameters	293
Phase 2: Mutual Authentication	294
Phase 3: Key Exchange	294
Phase 4: Ongoing Communication	294
Encryption for Confidentiality	294
Terminology	294
Symmetric Key Encryption	296
Public Key Encryption	296
Authentication	299
Applicant and Verifier	299
Initial Authentication with MS-CHAP Challenge-Response Authentication	299
Message-by-Message Authentication with Digital Signatures	301
Digital Certificates	303
Certificate Authorities and Digital Certificates	304
The Role of the Digital Certificate	304

<i>Checking the Certificate Revocation List (CRL)</i>	305
<i>Public Key Infrastructures (PKIs)</i>	305
Multilayer Security	306
Creating Appropriate Security	306
<i>Understanding Needs</i>	307
<i>Policies and Enforcement</i>	307
<i>Security Audits</i>	308
<i>Incident Handling</i>	308
<i>Privacy</i>	309
Gaining Perspective	309
<i>Market Realities</i>	309
Chapter 9a Not Hands On: How Attackers Hack Servers	313
Introduction	313
Scanning Attacks	313
<i>Host Scanning</i>	314
<i>Port Scanning</i>	314
<i>Fingerprinting Software Version Numbers</i>	314
Hacking the Victim	315
<i>Hacking the Victim by Cracking Passwords</i>	315
<i>Hacking the Victim with Social Engineering</i>	315
<i>Hacking the Victim with a Buffer Overflow Attack</i>	315
After the Break-In	316
<i>Deleting Audit Logs</i>	316
<i>Creating a Back Door Account</i>	316
<i>Doing Damage</i>	316
Experimentation Is Illegal	317
CHAPTER 10 NETWORK MANAGEMENT AND SYSTEMS ADMINISTRATION	319
Introduction	319
Cost Analysis	320
<i>Non-Technology Costs</i>	322
<i>Total Cost of Ownership (TCO)</i>	324
<i>Multi-Criterion Product Selection</i>	325
<i>Developing a Disciplined Project Portfolio</i>	327
<i>Developing a Smooth Multiyear Budget</i>	327
Administrative Servers	327
<i>Network Management Functions</i>	327
<i>Network Management Systems</i>	328
<i>Network Management Protocols</i>	330
<i>Network Simulation Programs</i>	331
<i>Directory Servers</i>	333
Server Management (Systems Administration)	334
<i>Server Selection</i>	336
<i>Ongoing Work</i>	336
Access Permissions	338
<i>Access Permissions Table</i>	338

Groups	340
Automatic Inheritance	341
Gaining Perspective	342
Market Realities	342
Chapter 10a Hands On: Using a Protocol Analyzer	345
CHAPTER 11 NETWORK APPLICATIONS	353
Introduction	354
Networked Applications	354
Traditional Applications Architecture	354
Hosts with Dumb Terminals	354
Client/Server Systems	355
Electronic Mail (E-Mail)	357
Importance	357
E-Mail Standards	359
Simple Mail Transfer Protocol (SMTP) ²	360
Receiving Mail (POP and IMAP)	360
Web-Enabled E-mail	361
The World Wide Web and E-Commerce	362
The World Wide Web	362
Electronic Commerce (E-Commerce)	364
Links to Other Systems	365
Application Servers	366
E-Commerce Security	367
Web Services	368
Basic Web Service	369
Universal Description, Discovery, and Integration (UDDI) Protocol	371
Peer-to-Peer (P2P) Applications	372
Traditional Client/Server Applications	372
Peer-to-Peer (P2P) Applications	373
Pure Peer-to-Peer Applications: Gnutella	374
Using Servers to Facilitate P2P Interactions	375
Processor Utilization: SETI@home	377
The Future of P2P	378
Gaining Perspective	378
Market Realities	378
Chapter 11a Setting Up a Peer-to-Peer PC Network	381
MODULE A MORE ON TCP AND IP	393
Introduction	393
General Issues	393
Multiplexing	393
More on TCP	395
Numbering Octets	395
Ordering TCP Segments Upon Arrival	397
The TCP Acknowledgement Process	397
Flow Control: Window Size	398

TCP Fragmentation	399
Bi-Directional Communication	400
More on Internet Layer Standards	401
Mask Operations	401
IPv6	402
IP Fragmentation	404
Dynamic Routing Protocols	405
Address Resolution Protocol (ARP)	410
Classful Addresses in IP	412
Mobile IP	414
Diff-Serve and Multi-Protocol Label Switching (MPLS)	415
MODULE B MORE ON PROPAGATION	419
Introduction	419
Modulation	419
Frequency Modulation	419
Amplitude Modulation	420
Phase Modulation	420
Quadrature Amplitude Modulation (QAM)	421
Orthogonal Frequency Division Multiplexing (OFDM)	422
More on Radio Propagation	423
Frequency Bands: UHF and SHF	423
Microwave Systems	425
Satellite Systems	425
Infrared Transmission	426
Optical Fiber Purchase and Installation	427
Multimode and Single Mode Fiber	427
Fiber Quality: Bandwidth-Distance	427
ST and SC Connectors	428
MODULE C MORE ON LOCAL AREA NETWORKS	431
Introduction	431
Logical Link Control Layer Framing	431
The Ethernet II Frame	432
Electrical Signaling	434
Electrical Signaling in 10 Base-T	434
Electrical Signaling in 100Base-TX	435
More on Ethernet Switching	436
Ethernet Switch Learning	436
Purchasing an Ethernet Switch	439
Store-and-Forward Versus Cut-Through Switching	440
Mixed Switches	441
Spanning Tree Protocol (802.1D) Backup Links	441
Wireless Bridges	443
More on Organizing 802.11 Wireless LANs	443
MODULE D MORE ON TELEPHONE SERVICE	447
The Public Switched Telephone Network (PSTN)	447
More on Customer Premises Telephony	447

PBX Networks 447

User Services 449

Carrier Services and Pricing 450

Basic Voice Services 450

Advanced Services 451

T1 Multiplexing 452

MODULE E MORE ON LARGE-SCALE NETWORKS 455

Introduction 455

More on Telephone Modem Standards 455

Training and Standards 455

Error Correction and Data Compression Standards 456

ATM 457

Layering in ATM 457

Subdividing the ATM Adaptation Layer 458

High Overhead 459

The ATM Physical Layer 459

Layer 3 Switching 460

Reduced Protocol Support 460

Avoiding Individual Router Forwarding Decisions 461

Replacing the Bus 462

ASICs 463

Frame Relay's Frame Structure 463

MODULE F MORE ON SECURITY 467

Introduction 467

Replay Attacks and Defenses 467

IPsec (IP Security) 468

Secure Communication Systems and Internet Layer Protection 468

Transport and Tunnel Modes 469

IPsec Headers 470

Security Associations (SAs) 472

Establishing Security Associations (SAs) 472

Windows Implementation 476

Point-to-Point Protocol (PPP) Security 476

Before PPP 477

Point-to-Point Protocol Security: The Negotiation Phase 479

PPP Authentication 479

PPP Confidentiality 481

Remote Access Servers (RASs) and Network Access Servers (NASs) 483

Kerberos 483

Initial Login 484

Ticket-Granting Ticket 484

Requesting a Connection 485

Receiving Credentials 485

Sending the Service Ticket and Authenticator 485

Subsequent Communication 486

Perspective 486
