Preface .....	v
---------------	---

## 1 Mechanisms of Mixing and Dispersion

*James L. White*

1.1 Introduction .....	1
1.2 Representation of Mixtures .....	1
1.3 Interfaces and Interfacial Tension .....	3
1.4 Overview .....	5
1.5 Modeling of Interfacial Area Generation .....	6
1.6 Breakup of Phases in Blending .....	10
1.7 Breakup of Particle Agglomerates .....	20
References .....	21

## 2 Overview of Polymer Mixing Machinery

*James L. White*

2.1 Introduction .....	24
2.2 Classification of Mixing Machines .....	24
2.3 History of the Development of Mixing Technology .....	28
References .....	31

## 3 Batch and Internal Mixers

*James L. White*

3.1 Introduction .....	33
3.2 Classification of Batch and Internal Mixers .....	35
3.3 Survey of Development of Technology .....	36
3.4 Overall Mechanical Design: Machines and Process .....	44
3.5 Separated Rotor Internal Mixers .....	48
3.6 Intermeshing Rotor Internal Mixers .....	59
References .....	65

## 4 Single Screw Extruders

*Anthony F. Dean*

4.1 Introduction .....	69
4.2 Compounding Applications .....	72

4.3	History .....	73
4.4	Single Screw Extruder Construction .....	74
4.5	Screw Design .....	78
4.6	In-Line Mixers .....	93
4.7	Scaleup .....	95
4.8	Operation .....	96
4.9	Troubleshooting .....	98
4.10	Conclusion .....	100
	References .....	100

## **5 Kneaders**

*Christopher C. Case*

5.1	Historical Perspective .....	102
5.2	Operating Principle .....	103
5.3	Description of Modern Machines .....	108
5.4	Applications/Configurations .....	114
	References .....	118

## **6 Modular Co-rotating Twin Screw Extruders**

*James L. White*

6.1	Introduction .....	119
6.2	Development of the Technology .....	120
6.3	Geometry .....	126
6.4	Elements and Construction of Modular Co-rotating Twin Screw Extruders .....	129
6.5	Flow Mechanisms and Experimental Studies .....	139
6.6	Flow Simulation in Individual Elements .....	142
6.7	Simulation of Modular Machine Behavior .....	155
6.8	Applications .....	158
	References .....	158

## **7 Modular Counter-rotating Twin Screw Extruders: Intermeshing and Tangential**

*James L. White*

7.1	Introduction .....	163
7.2	Classification of Modern Tehnology .....	163
7.3	Survey of Development of Technology .....	164

7.4	Modular Intermeshing Counter-rotating Twin Screw Extruders .....	171
7.5	Tangential Counter-rotating Twin Screw Extruders .....	179
7.6	Composite Intermeshing/Tangential Machines .....	186
	References .....	186

## 8 Continuous Mixers

*James L. White*

8.1	Introduction .....	189
8.2	Classification of Technology .....	189
8.3	Survey of Development of Technology .....	190
8.4	Nonintermeshing Counter-rotating Machines .....	195
8.5	Self-wiping Co-rotating Machines .....	203
	References .....	203

## 9 Feeding and Feeders

*David H. Wilson*

9.1	Introduction .....	205
9.2	Variables Affecting Feeding .....	205
9.3	Storage Bins .....	207
9.4	Types of Feeders .....	212
9.5	Volumetric versus Gravimetric Feeders .....	220
	References .....	226

**Name Index** 227

**Subject Index** 233
