R. KUWANO

**ADVANCED
LABORATORY
STRESS-STRAIN
TESTING OF
GEOMATERIALS**

Table of contents

Preface	VII
Recent advances in stress-strain testing of geomaterials in the laboratory; background and history of TC-29 for 1994 - 2001 <i>F.Tatsuoka, S.Shibuya & R.Kuwano</i>	1
<i>S-O-A Reports (National reports and international round-robin tests)</i>	
Report on the current situation of laboratory stress-strain testing of geomaterials in Italy and its use in practice <i>A.Cavallaro, V.Fioravante, G.Lanzo, D.C.F.Lo Presti, S.Rampello, A.d'Onofrio, F.Santucci de Magistris & F.Silvestri</i>	15
A review of laboratory equipments for stress-strain testing in Greece <i>V.N.Georgiannou</i>	45
Recent state of laboratory stress-strain tests on geomaterials in Japan <i>J.Kuwano & M.Katagiri</i>	47
A review of Japanese standards for laboratory shear tests <i>J.Kuwano, M.Katagiri, K.Kita, M.Nakano & R.Kuwano</i>	53
International round-robin test organized by TC-29 <i>S.Yamashita, Y.Kohata, T.Kawaguchi & S.Shibuya</i>	65
Report on applications of laboratory stress-strain test results of geomaterials to geotechnical practice in Japan <i>J.Koseki, F.Tatsuoka, M.Yoshimine, M.Hatanaka, K.Uchida, N.Yasufuku & I.Furuta</i>	111
<i>Individual papers</i>	
Viscous deformation in triaxial compression of a dense well-graded gravel and its model simulation <i>L.Q.AnhDan, J.Koseki & F.Tatsuoka</i>	187
Modelling of stress and strain relationship of dense gravel under large cyclic loading <i>K.Balakrishnaiyer & J.Koseki</i>	195
Investigation of tied-back wall behavior and selection of geomechanical parameters for numerical analysis <i>M.M.Berilgen, I.K.Ozaidin, & O.Inan</i>	203
Small strain stiffness under different isotropic and anisotropic stress conditions of two granular granite materials <i>A.Correia, L.Q.AnhDan, J.Koseki, & F.Tatusoka</i>	209
Viscous and non viscous behaviour of sand obtained from hollow cylinder tests <i>H.Di Benedetto, H.Geoffroy & C.Sauzeat</i>	217

Micaceous sands: stress-strain behaviour and influence of initial fabric <i>V.N.Georgiannou</i>	227
Effect of ageing on stiffness of loose Fraser River sand <i>J.A.Howie, T.Shozen & Y.P.Vaid</i>	235
Deformation characteristics of recompressed volcanic cohesive soil <i>M.Katagiri & K.Saitoh</i>	245
Effects of ageing on stress-strain behaviour of cement-mixed sand <i>L.Kongsukprasert, R.Kuwano & F.Tatsuoka</i>	251
Dependency of horizontal and vertical sugrade reaction coefficients on loading width <i>J.Koseki, Y.Kurachi, & T.Ogata</i>	259
Low-strain stiffness and material damping ratio coupling in soils <i>C.G.Lai, O.Pallara, D.C.F.Lo Presti & E.Turco</i>	265
A solid cylinder torsional shear device <i>J.Manzanas & V.Cuellar</i>	275
Application of an elasto-viscous model to one-dimensional consolidation of clay under cyclic loading <i>T.Moriwaki, Y.E.Supranata, M.Sitoh & M.Hashinoki</i>	279
Effects of stress path on the flow rule of sand in triaxial compression <i>H.Nawir, R.Kuwano & F.Tatsuoka</i>	287
Simulation of viscous effects on the stress-strain behaviour of a dense silty sand <i>F.Santucci de Magistris, F.Tatsuoka & M.Ishihara</i>	295
Interrelationship between the metastability index and the undrained shear strength of six clays <i>S.Shibuya, T.Mitachi, M.Temma & T.Kawaguchi</i>	303
Case study on the practical use of elastic modulus in deformation analysis of soft clay ground <i>S.B.Tamrakar, S.Shibuya & T.Mitachi</i>	309
Effects of fabric anisotropy of a sand specimen on small strain stiffness measured by the bender element method <i>S.Yamashita & T.Suzuki</i>	317
Strength and deformation characteristics of artificially cemented clay with dispersion due to the mixing quality <i>N.Yasufuku, H.Ochiai, K.Omine & N.Iwamoto</i>	323
Author index	329
