

Woodhead Publishing in Food Science and Technology

Food product development

Mary Earle, Richard Earle and Allan Anderson

WOODHEAD PUBLISHING LIMITED

Contents

<i>Preface</i>	ix
Part I Introduction	1
1 Keys to new product success and failure	3
1.1 Food products – the basis of innovation	3
1.2 Measures of product success and failure	10
1.3 Key factors in product success	16
1.4 Product development process: the basis for success	20
1.5 Managing for product success	26
1.6 Relating to consumers and markets: the key to product success	31
1.7 Knowledge of society, industry and technology	32
1.8 Product development management in the food industry	36
1.9 Basis and structure of the book	37
1.10 References	38
Part II Key requirements for successful product development	43
2 Developing an innovation strategy	45
2.1 Possibilities for innovation	46
2.2 Incorporating innovation into the business strategy	59
2.3 Building up the innovation strategy	64
2.4 Getting the innovation strategy right	69
2.5 Focusing the product development programme	78
2.6 Developing the product development strategy	85

2.7	Planning the product development programme	91
2.8	References	93
3	The product development process	95
3.1	Product strategy	96
3.2	Product design and process development	111
3.3	Product commercialisation	118
3.4	Product launch and evaluation	123
3.5	Service in product development	130
3.6	Where is the product development process going?	144
3.7	References	146
4	The knowledge base for product development	149
4.1	Technology, knowledge and the food system	150
4.2	Knowledge management or knowledge navigation?	157
4.3	Necessary knowledge for product development	165
4.4	Tacit knowledge in product development	176
4.5	Creating knowledge in product development	183
4.6	References	192
5	The consumer in product development	194
5.1	Understanding consumer behaviour	195
5.2	Understanding food choice	203
5.3	Consumers' avoidance and acceptance of new products	207
5.4	Integrating consumer needs and wants in product development	209
5.5	Sensory needs and wants in food product development	219
5.6	Consumers in Stage 1: Product strategy development	223
5.7	Consumers in Stage 2: Product design and process development	236
5.8	Consumers in Stage 3: Product commercialisation	245
5.9	Consumers in Stage 4: Product launch and evaluation	250
5.10	References	253
Part III	Managing and improving product development	257
6	Managing the product development process	259
6.1	Principles of product development management	260
6.2	People in product development management	262
6.3	Designing the PD Process	267
6.4	Establishing key decision points and the decision makers	271
6.5	Establishing outcomes, budgets and constraints	276
6.6	Organising the PD Process	287
6.7	Managing the PD Process	299
6.8	Company organisation for product development	307
6.9	References	314

7	Case studies: product development in the food system	317
7.1	Primary production: creating a new apple variety	319
7.2	Development of Thai mango products and their competitive advantage in export markets	327
7.3	Industrial products: PD Process and management for whey proteins	332
7.4	Consumer products: new products and a new platform in variety sauces	340
7.5	Some brief comments on the case studies	345
7.6	Acknowledgements	346
7.7	References	347
8	Improving the product development process	348
8.1	Key messages	349
8.2	Evaluating product development	352
8.3	Innovation metrics	358
8.4	Striving for continuous improvement	364
8.5	References	369
