

INDUSTRIAL WASTE TREATMENT HANDBOOK

Frank Woodard

Pollution
Engineering

Table of Contents

<i>Preface</i>	ix	4 Wastes from Industries	61
<i>Acknowledgments</i>	x	Chemical Descaling	61
1 Management of Industrial Wastes: Solids, Liquids, and Gases	1	Degreasing	62
Management of Industrial Wastewater	1	Rinsing	64
O&M Costs	10	Electroplating of Tin	65
Management of Solid Wastes from Industries	18	The Copper Forming Industry	74
Management of Discharges to the Air	20	Prepared Frozen Foods	77
Bibliography	28	Wastes from De-inking	86
2 Fundamentals	29	Die Casting: Aluminum, Zinc, and Magnesium	93
Introduction	29	Anodizing and Alodizing	99
Characteristics of Industrial Wastewater	29	Production and Processing of Coke	103
The Polar Properties of Water	30	The Wine-Making Industry	107
Electrical and Thermodynamic Stability	33	The Synthetic Rubber Industry	110
Chemical Structure and Polarity of Water	36	The Soft Drink Bottling Industry	119
Hydrogen Bonding	37	Production and Processing of Beef, Pork, and Other Sources of Red Meat	124
Polar Solvents versus Nonpolar Solvents — True Solutions	38	Rendering of By-Products from the Processing of Meat, Poultry, and Fish	130
Emulsification	40	The Manufacture of Lead Acid Batteries	138
Colloidal Suspensions	43	Bibliography	144
Mixtures Made Stable by Chelating Agents	44	5 Industrial Stormwater Management	149
Summary	44	General	149
Examples	45	Federal Stormwater Regulations	149
Bibliography	48	Prevention of Groundwater Contamination	151
3 Laws and Regulations	49	Stormwater Segregation, Collection, Retention, and Treatment	152
Introduction	49	Design Storm	152
History of Permitting and Reporting Requirements	49	System Failure Protection	153
Water Pollution Control Laws	50	Stormwater Retention	153
Groundwater Pollution Control Laws	52	Stormwater Treatment	153
Air Pollution Control Laws	55	Stormwater as a Source of Process Water Makeup	154
Bibliography	60	Bibliography	165

6 Wastes Characterization: The Wastes Characterization Study, Wastes Audit, and the Environmental Audit	166	pH Control	227
Wastes Characterization Study	166	Chemical Methods of Wastewater Treatment	230
Wastes Audit	169	Biological Methods of Wastewater Treatment	255
Environmental Audit	172	Development of Design Equations for Biological Treatment of Industrial Wastes	256
Characteristics of Industrial Wastewater	179	Physical Methods of Wastewater Treatment	322
Characteristics of Discharges to the Air	192	Bibliography	394
Sample Analysis	198		
Ambient Air Sampling	198	9 Treatment and Disposal of Solid Wastes from Industry	397
Characteristics of Solid Waste Streams from Industries	201	Characterization of Solid Wastes	398
Bibliography	205	The Solid Waste Landfill	400
		Solid Waste Incineration	409
7 Pollution Prevention	208	The Process of Composting Industrial Wastes	421
§ 13101. Findings and Policy	208	Solidification and Stabilization of Industrial Solid Wastes	427
General Approach	209	Bibliography	433
Source Reduction	212		
The Waste Audit	215	10 Methods for Treating Air Discharges from Industry	437
Benefits of Pollution Prevention	216	Reduction at the Source	437
Bibliography	216	Containment	437
		Treatment	438
8 Methods for Treating Wastewaters from Industry	219	Bibliography	456
General	219		
Principle and Nonprinciple Treatment Mechanisms	220	Index	461
Waste Equalization	223
