INTRODUCTORY UNIT

INTRODUCTORY LECTURE Introduction to the Biochemical Laboratory	1
<i>Theory/Principles</i> Course Description	6
<i>Theory/Principles</i> “Central Dogma of Molecular Biology”	8
<i>Theory/Principles</i> Laboratory Safety	9
<i>Theory/Principles</i> The Scientific Method: Surviving Recipe Mentality	11
<i>Theory/Principles</i> Proactive Troubleshooting	13
<i>Theory/Principles</i> Introduction to the Biotechnology Laboratory	16
<i>Theory/Principles</i> Error Analysis and Assay Sensitivity	20
<i>Theory/Principles</i> Treatment of Analytical Data	22
<i>Theory/Principles</i> Concentration and Temperature Effects on pK_a	30
INTRODUCTORY LAB 1 Basic Biochemical Techniques I: Pipet Calibration and Solution Preparation	35
<i>Process Rationale</i> Pipets	38
INTRODUCTORY LAB 2 Basic Techniques II: Absorbance Spectroscopy and Protein Concentration Determinations	39
<i>Process Rationale</i> AMP and Tryptophan Absorbance Spectra; Sample Calculations	43
<i>Theory/Principles</i> Absorption Data for the Nucleoside Monophosphates	44
<i>Process Rationale</i> Absorption Spectra Data for the Aromatic Amino Acids at pH 6; UV Absorption Characteristics of the Aromatic Amino Acids. Selected Extinction Coefficients	46
<i>Process Rationale</i> BCA Assay Sample Data	47
<i>Innovation/Insight</i> Measurement of Protein in 20 Seconds	48

PART 1 NUCLEIC ACIDS AND CLONING

<i>Part 1 Introduction</i>	50
<i>Flowchart Part 1</i>	51

UNIT 1

LECTURE 1 DNA Isolation	52
<i>Theory/Principles</i> Subcloning Procedure	60
<i>Innovation/Insight</i> The pET Bacterial Plasmid System (Novagen)	61
LAB 1.1 Media Preparation; Bacterial Growths; Plasmid Minipreps; <i>Hind</i> III Digestion of DNA, Commercial Bacteriophage λ DNA <i>Bst</i> EII Digest Size Standards	64
<i>Process Rationale</i> pUR278 and p2D Restriction Maps	67
<i>Process Rationale</i> Cloning the <i>myo-3</i> Gene from <i>C. elegans</i> and Construction of an Expression Vector	68
<i>Process Rationale</i> <i>C. elegans myo-3</i> Gene in pUR288	69
<i>Vendor Literature</i> Restriction Enzymes <i>Hind</i> III and <i>Bst</i> EII; λ DNA Digests	70
<i>Process Rationale</i> Phage λ <i>Bst</i> EII Digest	72
LAB 1.2 Agarose Gel Electrophoresis; Photography of <i>Hind</i> III Plasmid Digests Visualized by Fluorescence of Intercalated Ethidium	73
<i>Exercises</i> Restriction Mapping	76

UNIT 2

LECTURE 2 Construction of Recombinant Plasmids	79
---	----

<i>Innovation/Insight</i> Protecting and Manipulating Large DNA Substrates	82
<i>Innovation/Insight</i> Yeast of Burden - Yoking the YAC	83
LAB 2.1 Extraction and Cleanup of DNA Bands Cut from Agarose Gels, Quantitation of Yields, and Ligation of <i>myo-3</i> <i>Hind</i> III DNA Insert Fragment into Linearized β -gal Plasmid DNA	87
<i>Vendor Literature</i> Gibco BRL™ T4 DNA Ligase	93
<i>Vendor Literature</i> DNA Purification Kit (NaI/Glass Bead Method)	99
<i>Alternative Approach</i> The Use of β -Agarase to Recover DNA from Gel Slices	105
<i>Alternative Approach</i> GELase™	106

UNIT 3

LECTURE 3 The Polymerase Chain Reaction	107
<i>Innovation/Insight</i> Polymerase Chain Reaction Used for Antigen Detection; Immuno-PCR: Very Sensitive Antigen Detection by Means of Specific Antibody-DNA Conjugates	117
LAB 3.1 Polymerase Chain Reaction Test for <i>myo-3</i> Gene Insert Orientation	121

UNIT 4

LECTURE 4 Transcription of Genomic DNA and Analysis of the Resulting mRNAs	125
<i>Alternative Approach</i> Isolation of Total RNA from <i>E. coli</i> Cells	128
<i>Alternative Approach</i> Promega™ PolyAtract™ System 1000	131
<i>Alternative Approach</i> Electrophoresis and Northern Blotting of RNA	136

UNIT 5

LECTURE 5 Transformation and Gene Expression	137
<i>Innovation/Insight</i> How Cells Respond to Stress	140
LAB 5.1 Preparation of Fresh Transformation-Competent Cells	148
<i>Alternative Approach</i> Ultracomp™ Transformation Kit	150
LAB 5.2 Colony Immunoblotting to Screen for Transformants	152
<i>Alternative Approach</i> The QIAexpressionist, QIAGEN™	155

UNIT 6

LECTURE 6 Analysis of DNA or RNA by Duplex Hybridization: DNA Isolation, Labeling, and Probing	165
<i>Innovation/Insight</i> Reduction of Background Problems in Nonradioactive Northern and Southern Blot Analyses Enables Higher Sensitivity than ³² P-Based Hybridization	168
LAB 6.1 Labeling of DNA and Probe Construction from Cloned <i>C. elegans myo-3</i> Gene; Quantitation of DNA Concentration	175
<i>Vendor Literature</i> Digoxigenin Labeling of DNA: Genius™ Nucleic Acid Labeling System	177
LAB 6.2 Isolation of <i>C. elegans</i> Genomic DNA, Quantitation of DNA Concentration, and Digestion to Extract the <i>myo-3</i> Gene	190
LAB 6.3 Southern Blotting	192

PART 2 PROTEIN PURIFICATION

<i>Part 2 Introduction</i>	196
<i>Flowchart Part 2</i>	197

UNIT 7

LECTURE 7 Protein Purification	198
<i>Theory/Principles</i> Preparation and Handling of Biological Macromolecules for Crystallization	204
<i>Theory/Principles</i> Solution Structure of Biomacromolecules in Ionic Solutions	213
<i>Theory/Principles</i> Solubility as a Function of Protein Structure and Solvent Components	219
<i>Theory/Principles</i> Dominant Forces in Protein Folding	231

<i>Alternative Approach</i> Hydrophobic Interaction Chromatography	261
<i>Alternative Approach</i> Centriprep Microconcentrators for Small Volume Concentration; Centricon-3 and Centricon-100	266
<i>Innovation/Insight</i> Subcellular Fractionation	271
LAB 7.1 The Protein Purifier: A Learning Aid from Pharmacia	273
LAB 7.2 Induction and Purification of β -Galactosidase Fusion Protein from Bacteria	278
LAB 7.3 Gel Filtration of Molecular Weight Standards and Protein Fractionation	280
<i>Process Rationale</i> Gel Filtration Chromatography	282
<i>Vendor Literature</i> Sephadex and Sephacryl	286
<i>Vendor Literature</i> Sigma™ Gel Filtration Molecular Weight Markers	288
LAB 7.4 Microplate β -Galactosidase Assay to Determine Fractions Containing Fusion Protein; MW Determination	290
<i>Process Rationale</i> Time Course Assay of β -Galactosidase	292
<i>Vendor Literature</i> β -Galactosidase Substrates	294
<i>Innovation/Insight</i> Luminescent Reporter Gene Assays for Luciferase and β -Galactosidase Using a Liquid Scintillation Counter	295
LAB 7.5 Ion Exchange Column Chromatography	296
<i>Process Rationale</i> Ion Exchange Chromatography	298
<i>Theory/Principles</i> The Isoelectric Point: Protein Charge Neutrality at a Particular pH	302
<i>Alternative Approach</i> Ion-Pair Chromatography	303
<i>Alternative Approach</i> HPLC: Ion Exchange and Reverse Phase Methods: Literature Sources	305
LAB 7.6 Affinity Chromatography and Microplate β -Galactosidase Assays to Determine Fractions Containing Fusion Protein	307
<i>Process Rationale</i> Affinity Chromatography	310
<i>Process Rationale</i> Affinity Chromatography: One Step Purification of Hybrid Proteins Carrying Fused β -Galactosidase Activity	314
LAB 7.7 BCA Protein Concentration Assays and β -Galactosidase Assays to Construct an Enzyme Purification Table	317
UNIT 8	
LECTURE 8 Discontinuous Gel Electrophoresis, Protein Mobilities, and Apparent Size Determination	321
<i>Process Rationale</i> Discontinuous Gel Electrophoresis and Protein Size Determination	323
LAB 8.1 Discontinuous SDS Gel Electrophoresis	326
UNIT 9	
LECTURE 9 Immunochemical Techniques	329
<i>Innovation/Insight</i> Immunochemical Techniques	331
<i>Innovation/Insight</i> : The Enzyme Linked Immunosorbent Assay (ELISA)	338
<i>Innovation/Insight</i> How the Immune System Learns About Self	348
<i>Innovation/Insight</i> Making Monoclonal Antibodies That Won't Fight Back	355
LAB 9.1 Western Blotting	361
<i>Process Rationale</i> Immunoblotting	365
<i>Process Rationale</i> Western Blots Using Stained Protein Gels	366
UNIT 10	
LECTURE 10 Combinatorial Biochemical Technology	369
<i>Innovation/Insight</i> Examples of Combinatorial Techniques	375
<i>Innovation/Insight</i> Making Antibody Fragments Using Phage Display Libraries	376
<i>Innovation/Insight</i> Building a Better Enzyme	379
<i>Innovation/Insight</i> The ImmunoZAP™ Cloning and Expression System	384

APPENDICES	387
PART 1 TERMS LIST	388
PART 2 TERMS LIST	392
LABORATORY REAGENTS	497
ABBREVIATIONS LIST	403
LITERATURE SOURCES FOR BIOCHEMICAL ANALYSES, METHODS, AND PREPARATIONS	410
COPYRIGHT ACKNOWLEDGMENTS	412
SUGGESTED SCHEDULE	416
SUGGESTED INSTRUCTIONS FOR LAB REPORTS	418
SUPPLIES REQUIRED	419
INDEX	423
