

Breeding
Tropical and
Subtropical
Fruits

P.K. RAY

Contents

<i>Preface</i>	viii
<i>Acknowledgements</i>	ix
1. Breeding Objectives, Genetic Resources and Techniques of Breeding	1
1.1 Breeding Objectives	1
1.2 Genetic Resources	3
1.3 Pollination and Breeding Approaches	5
1.4 Breeding Techniques	6
1.5 Choice of Breeding Techniques	13
1.6 Problems in Breeding Fruit Crops	14
<i>References</i>	15
2. Mango	16
2.1 Taxonomy	16
2.2 Genetic Resources	18
2.3 Floral Biology	18
2.4 Breeding Objectives	22
2.5 Limitations in Breeding	23
2.6 Inheritance Pattern	24
2.7 Sources of Desirable Traits	25
2.8 Incompatibility	26
2.9 Controlled Hybridization	26
2.10 Clonal Selection	31
2.11 Mutation Breeding	32
2.12 Biotechnology	36
2.13 Future Prospects	37
<i>References</i>	37
3. Banana and Plantain	44
3.1 Taxonomic Classification	45
3.2 Genetic Resources	49
3.3 Floral Biology	52
3.4 Breeding Objectives	56
3.5 Inheritance Pattern	58
3.6 Banana Breeding Centres	64
3.7 Conventional Breeding Approaches	64

3.8	Crossing Schemes	70	
3.9	Mutation Breeding	71	
3.10	Non-conventional (<i>In vitro</i> Breeding) Approaches	72	
3.11	Outlook for the Future	76	
	<i>References</i>	76	
4.	Citrus		84
4.1	Taxonomy	84	
4.2	Genetic Variability	88	
4.3	Breeding Objectives	89	
4.4	Inheritance Pattern	90	
4.5	Problems in Citrus Breeding	92	
4.6	Floral Biology	93	
4.7	Hybridization	95	
4.8	New Cultivars	95	
4.9	Biotechnology	96	
4.10	Polyploidy and Mutation	99	
4.11	Useful Chimeras	100	
	<i>References</i>	101	
5.	Papaya		106
5.1	Genetic Resources	106	
5.2	Sex Forms	107	
5.3	Floral Morphology	108	
5.4	Flower Induction	109	
5.5	Floral Biology and Pollination	110	
5.6	Self-incompatibility	110	
5.7	Parthenocrapy	111	
5.8	Inheritance Pattern	111	
5.9	Breeding Objectives	114	
5.10	Breeding Methods	115	
5.11	Biotechnology	121	
	<i>References</i>	124	
6.	Litchi		129
6.1	Taxonomy	129	
6.2	Cytology	130	
6.3	Gene Pool	130	
6.4	Breeding Objectives	132	
6.5	Floral Biology	132	
6.6	Hybridization Technique	134	
6.7	Inheritance Pattern	136	
6.8	Selection and Intervarietal Crosses	136	
6.9	Intergeneric Hybridization	138	
6.10	Biotechnology	139	
	<i>References</i>	139	

7. Guava	143
7.1 Systematics	143
7.2 Genetic Resources	144
7.3 Floral Biology	145
7.4 Breeding Objectives	147
7.5 Inheritance Pattern	147
7.6 Selection	148
7.7 Hybridization	148
7.8 Mutation/Biotechnology	152
<i>References</i>	152
8. Coconut	156
8.1 Taxonomy	156
8.2 Genetic Resources	156
8.3 Floral Biology	158
8.4 Emasculation and Pollination	160
8.5 Breeding Objectives	160
8.6 Inheritance Pattern	161
8.7 Selection	161
8.8 Hybridization	164
8.9 Biotechnology	167
8.10 Achievements and Prospects	168
<i>References</i>	169
9. Grape	172
9.1 Taxonomy	172
9.2 Genetic Resources	174
9.3 Floral Biology	174
9.4 Emasculation and Controlled Pollination	177
9.5 Seed Germination	178
9.6 Breeding Objectives	178
9.7 Inheritance Pattern	179
9.8 Selection	184
9.9 Hybridization	185
9.10 Polyploidy	187
9.11 Mutations	188
9.12 Biotechnology	189
<i>References</i>	191
10. Pineapple	201
10.1 Taxonomy	201
10.2 Genetic Resources	202
10.3 Breeding Objectives	202
10.4 Floral Biology	204
10.5 Controlled Pollination	205
10.6 Incompatibility and Seed Setting	206
10.7 Inheritance Pattern	207

10.8	Selection and Hybridization	208
10.9	Mutation	210
10.10	Biotechnology	210
	<i>References</i>	212
11.	Cashew	215
11.1	Taxonomy	215
11.2	Gene Pool	216
11.3	Breeding Objectives	216
11.4	Floral Biology	218
11.5	Seed Germination	219
11.6	Inheritance Pattern	219
11.7	Selection	220
11.8	Hybridization	221
11.9	Biotechnology	221
	<i>References</i>	224
12.	Pomegranate	227
12.1	Taxonomy	227
12.2	Gene Pool	228
12.3	Floral Biology	228
12.4	Breeding Objectives	231
12.5	Inheritance Pattern	231
12.6	Selection	232
12.7	Hybridization	233
12.8	Mutation	233
12.9	Biotechnology	234
	<i>References</i>	235
13.	Emblie	239
13.1	Taxonomy	239
13.2	Gene Pool	239
13.3	Floral Biology	240
13.4	Breeding Objectives	241
13.5	Inheritance Pattern	241
13.6	Selection	241
13.7	Hybridization	243
13.8	Biotechnology	243
	<i>References</i>	244
14.	Sapodilla	245
14.1	Taxonomy	245
14.2	Gene Pool	245
14.3	Floral Biology	246
14.4	Breeding Objectives	247
14.5	Inheritance Pattern	247
14.6	Hybridization	248

14.7	Selection	248	
14.8	Biotechnology	249	
	<i>References</i>	250	
15.	Custard Apple		251
15.1	Taxonomy	252	
15.2	Gene Pool	252	
15.3	Breeding Objectives	253	
15.4	Floral Biology	254	
15.5	Controlled Pollination	255	
15.6	Inheritance Pattern	256	
15.7	Selection	256	
15.8	Hybridization	257	
15.9	Biotechnology	258	
	<i>References</i>	258	
16.	Avocado		260
16.1	Taxonomy	260	
16.2	Genetic Resources	262	
16.3	Floral Biology	264	
16.4	Breeding Objectives	266	
16.5	Inheritance Pattern	266	
16.6	Selection	267	
16.7	Hybridization	271	
16.8	Mutation	272	
16.9	Biotechnology	272	
	<i>References</i>	273	
17.	Jujube		276
17.1	Taxonomy	276	
17.2	Gene Pool	278	
17.3	Floral Biology	279	
17.4	Controlled Pollination	281	
17.5	Breeding Objectives	281	
17.6	Inheritance Pattern	282	
17.7	Selection	282	
17.8	Hybridization	287	
17.9	Biotechnology	287	
	<i>References</i>	288	
18.	Jackfruit		291
18.1	Taxonomy	291	
18.2	Genetic Resources	292	
18.3	Floral Biology	293	
18.4	Breeding Objectives	295	
18.5	Inheritance Pattern	296	
18.6	Selection	296	
18.7	Hybridization	297	

18.8	Biotechnology	297	
	References	298	
19.	Mangosteen		300
19.1	Taxonomy	300	
19.2	Gene Pool	302	
19.3	Floral Biology	302	
19.4	Breeding Objectives	303	
19.5	Inheritance Pattern	304	
19.6	Selection	304	
19.7	Hybridization	304	
19.8	Biotechnology	305	
	References	305	
20.	Carambola		307
20.1	Taxonomy	307	
20.2	Genetics Resources	308	
20.3	Floral Biology	308	
20.4	Pollination	310	
20.5	Breeding Objectives	311	
20.6	Inheritance Pattern	311	
20.7	Selection	312	
20.8	Hybridization	314	
20.9	Biotechnology	314	
	References	314	
21.	Persimmon		316
21.1	Taxonomy	316	
21.2	Varietal Classification	317	
21.3	Gene Pool	318	
21.4	Floral Biology	318	
21.5	Breeding Objectives	320	
21.6	Inheritance Pattern	320	
21.7	Selection	321	
21.8	Hybridization	325	
21.9	Mutation	326	
21.10	Biotechnology	326	
	References	327
