|   |           |
|---|-----------|
| <b>1 Overview of Durability in Coated and Uncoated Plastics</b> . . . . .   | <b>1</b>  |
| <i>Rose A. Ryntz</i>  |           |
| 1.1 Introduction. . . . .   | 1         |
| 1.2 Scratch/Mar Resistance. . . . .   | 3         |
| 1.3 Chemical Resistance. . . . .  | 15        |
| 1.4 Chip Resistance. . . . .  | 18        |
| References . . . . .  | 21        |
| <br>  |           |
| <b>2 A Critical Review of the Role of Field-Exposure Experiments in Predicting the Service Life of Coatings</b> . . . . . | <b>23</b> |
| <i>Jonathan W. Martin</i>   |           |
| 2.1 Introduction. . . . .   | 23        |
| 2.2 Testimonials . . . . .  | 24        |
| 2.3 Field Experimental Results . . . . .  | 25        |
| 2.4 Laboratory-Aging Physical Models . . . . .  | 29        |
| 2.5 Weather Element Time Series . . . . .   | 33        |
| 2.6 Summary . . . . .   | 45        |
| Acknowledgments . . . . .   | 48        |
| References . . . . .  | 49        |
| <br>  |           |
| <b>3 Role of UVA/HALS in Durability Protection</b> . . . . .  | <b>57</b> |
| <i>Ramanathan Ravichandran and Revathi Iyengar</i>  |           |
| 3.1 Introduction. . . . .   | 57        |
| 3.2 Polymer Autooxidation and Degradation . . . . .   | 57        |
| 3.3 UV Light-Induced Photooxidative Degradation. . . . .  | 57        |
| 3.4 Antioxidants . . . . .  | 60        |
| 3.5 Ultraviolet Absorbers . . . . .   | 62        |
| 3.6 HALS . . . . .  | 65        |
| References . . . . .  | 71        |
| <br>  |           |
| <b>4 Photostabilization of Plastics by Additives and Coatings</b> . . . . .   | <b>73</b> |
| <i>James E. Pickett</i>   |           |
| 4.1 Background. . . . .   | 73        |
| 4.2 Approaches to Polymer Photostabilization . . . . .  | 75        |
| 4.3 Use of Coatings. . . . .  | 87        |
| Acknowledgments . . . . .   | 96        |
| References . . . . .  | 96        |

|          |  |            |
|----------|--|------------|
| <b>5</b> | <b>Stabilization of Coatings</b> . . . . .   | <b>99</b>  |
|          | <i>David R. Bauer</i>  |            |
|          | 5.1 Introduction . . . . .   | 99         |
|          | 5.2 Topcoat Chemistry . . . . .  | 100        |
|          | 5.3 Coating Weathering Failures . . . . .  | 101        |
|          | 5.4 Coating Weathering Chemistry . . . . .   | 102        |
|          | 5.5 Coating Stabilization . . . . .  | 107        |
|          | 5.6 Typical Stabilization Packages and Future Directions . . . . .   | 113        |
|          | References . . . . .   | 113        |
| <br>     |  |            |
| <b>6</b> | <b>Role of Stress on Durability of Organic Coatings</b> . . . . .  | <b>115</b> |
|          | <i>Dan Y. Perera</i>   |            |
|          | 6.1 Introduction . . . . .   | 115        |
|          | 6.2 Origins of Stress . . . . .  | 115        |
|          | 6.3 Measurement of Stress in Organic Coatings . . . . .  | 120        |
|          | 6.4 Adhesion, Cohesion, and Stress . . . . .   | 123        |
|          | 6.5 Formulation Parameters and Stress Development . . . . .  | 126        |
|          | 6.6 Substrate . . . . .  | 131        |
|          | 6.7 Stress and Corrosion . . . . .   | 131        |
|          | 6.8 Stress and Weathering . . . . .  | 132        |
|          | 6.9 Summary . . . . .  | 135        |
|          | References . . . . .   | 136        |
| <br>     |  |            |
| <b>7</b> | <b>Stabilization of Molded-in-Color Plastics</b> . . . . .   | <b>141</b> |
|          | <i>Todd Glogovsky</i>  |            |
|          | 7.1 Why Use Molded-in-Color (MIC) Plastics? . . . . .  | 141        |
|          | 7.2 Processing . . . . .   | 144        |
|          | 7.3 General Overview of Typical Molded-in-Color Defects: Tigerstripes, Haze,<br>or Gloss Gradients . . . . . | 153        |
|          | 7.4 Durability . . . . .   | 156        |
|          | 7.5 Stabilization Strategies . . . . .   | 159        |
|          | 7.6 Weatherability of Colorants in MIC Plastics . . . . .  | 160        |
|          | References . . . . .   | 161        |
| <br>     |  |            |
| <b>8</b> | <b>Effects of Injection-Molding on the Durability of Thermoplastics</b> . . . . .                            | <b>163</b> |
|          | <i>D.G. LeGrand and K. Fraser</i>  |            |
|          | 8.1 Introduction . . . . .   | 163        |
|          | 8.2 Injection-Molding Process . . . . .  | 164        |
|          | 8.3 Processing Parameters . . . . .  | 169        |
|          | 8.4 Tool Geometries . . . . .  | 174        |
|          | 8.5 Secondary Finishing . . . . .  | 185        |

|                                    |     |
|------------------------------------|-----|
| 8.6 Physical Aging . . . . .       | 186 |
| 8.7 Environmental Effects. . . . . | 187 |
| 8.8 Residual Stresses . . . . .    | 187 |
| 8.9 Conclusions. . . . .           | 187 |
| References . . . . .               | 187 |

**9 Weathering Test Methods . . . . . 189**

*Kelly Hardcastle and Norma D. Searle*

|  |     |
|--|-----|
| 9.1 Natural Weathering . . . . .                               | 189 |
| 9.2 Reference Environments . . . . .                           | 194 |
| 9.3 Natural Exposures . . . . .                                | 198 |
| 9.4 Accelerating Natural Exposures . . . . .                   | 209 |
| 9.5 Laboratory-Accelerated Weathering . . . . .                | 227 |
| 9.6 Laboratory-Accelerated versus Natural Weathering . . . . . | 237 |
| References . . . . .   | 239 |
