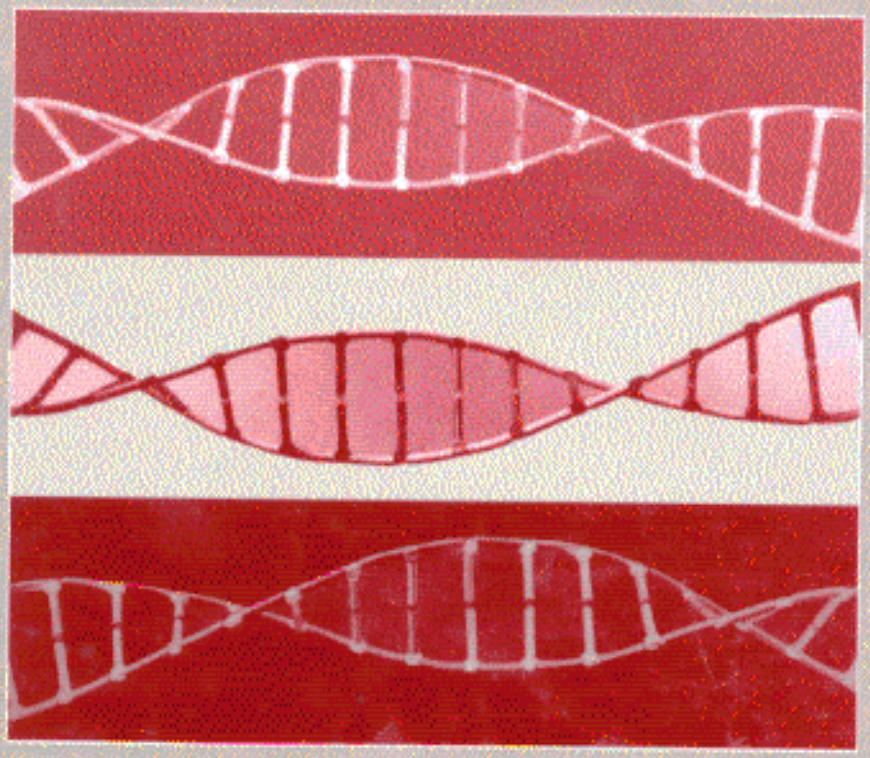
MODERN MICROBIAL GENETICS

SECOND EDITION



Edited by
ULDIS N. STREIPS
RONALD E. YASBIN

Contents

Preface vii

Preface to the First Edition ix

Introduction xi

Contributors xiii

Section 1: DNA METABOLISM 1

CHAPTER 1. Prokaryotic DNA Replication
William Firshein 3

CHAPTER 2. DNA Repair Mechanisms and Mutagenesis
Ronald E. Yasbin 27

CHAPTER 3. Gene Expression and Its Regulation
John D. Helmann 47

CHAPTER 4. Bacteriophage Genetics
Burton S. Guttman and Elizabeth M. Kutter 85

CHAPTER 5. Bacteriophage λ and Its Relatives
Roger W. Hendrix 127

CHAPTER 6. Single-Stranded DNA Phages
J. Eugene LeClerc 145

CHAPTER 7. Restriction-Modification Systems
Robert M. Blumenthal and Xiaodong Cheng 177

CHAPTER 8. Recombination
Stephen D. Levene and Kenneth E. Huffman 227

CHAPTER 9. Molecular Applications
Thomas Geoghegan 243

Section 2: GENETIC RESPONSE 259

CHAPTER 10. Genetics of Quorum Sensing Circuitry in *Pseudomonas aeruginosa*: Implications for Control of Pathogenesis, Biofilm Formation, and Antibiotic/Biocide Resistance
Daniel J. Hassett, Urs A. Ochsner, Teresa de Kievit, Barbara H. Iglewski, Luciano Passador, Thomas S. Livinghouse, Timothy R. McDermott, John J. Rowe, and Jeffrey A. Whitsett 261

CHAPTER 11. Endospore Formation in *Bacillus subtilis*: An Example of Cell Differentiation by a Bacterium
Charles P. Moran Jr. 273

CHAPTER 12. Stress Shock
Uldis N. Streips. 281

CHAPTER 13. Genetic Tools for Dissecting Motility and Development of *Myxococcus xanthus*
Patricia L. Hartzell 289

CHAPTER 14. *Agrobacterium* Genetics
Walt Ream 323

CHAPTER 15. Two-Component Regulation
Kenneth W. Bayles and David F. Fujimoto 349

CHAPTER 16. Molecular Mechanisms of Quorum Sensing
Clay Fuqua and Matthew R. Parsek 361

Section 3: GENETIC EXCHANGE 385

CHAPTER 17. Bacterial Transposons—An Increasingly Diverse Group of Elements
Gabrielle Whittle and Abigail A. Salyers 387

CHAPTER 18. Transformation
Uldis N. Streips. 429

CHAPTER 19. Conjugation
Ronald D. Porter 463

CHAPTER 20. The Subcellular Entities a.k.a. Plasmids
Michael H. Perlin 507

CHAPTER 21. Transduction in Gram-Negative Bacteria
George M. Weinstock 561

CHAPTER 22. Genetic Approaches in Bacteria with No Natural Genetic Systems
Carolyn A. Haller and Thomas J. DiChristina. 581

Index 603
