**HARRIS'  
SHOCK AND  
VIBRATION  
HANDBOOK**  
FIFTH EDITION

CYRIL M. HARRIS  
ALLAN G. PIERSOL

---

# CONTENTS

---

Preface xi

---

**Chapter 1. Introduction to the Handbook** 1.1

Cyril M. Harris, *Charles Batchelor Professor Emeritus of Electrical Engineering, Columbia University, New York, NY 10027.*

---

**Chapter 2. Basic Vibration Theory** 2.1

Ralph E. Blake, *formerly Consultant, Technical Center of Silicon Valley, San Jose, CA.*

---

**Chapter 3. Vibration of a Resiliently Supported Rigid Body** 3.1

Harry Himelblau, *Consultant, The Boeing Company, Space and Communications Division, Canoga Park, CA 91309-7922.*

AND

Sheldon Rubin, *Consultant, Rubin Engineering Company, Sherman Oaks, CA 91403-4708.*

---

**Chapter 4. Nonlinear Vibration** 4.1

Fredric Ehrich, *Senior Lecturer, Massachusetts Institute of Technology, Cambridge, MA 02139.*

AND

H. Norman Abramson, *Retired Executive Vice President, Southwest Research Institute, San Jose, TX 78228.*

---

**Chapter 5. Self-Excited Vibration** 5.1

Fredric Ehrich, *Senior Lecturer, Massachusetts Institute of Technology, Cambridge, MA 02139.*

---

**Chapter 6. Dynamic Vibration Absorbers and Auxiliary Mass Dampers** 6.1

F. Everett Reed, *formerly President, Littleton Research and Engineering Corporation, Littleton, MA 01460.*

---

**Chapter 7. Vibration of Systems Having Distributed Mass and Elasticity** 7.1

William F. Stokey, *Late Professor of Mechanical Engineering, Carnegie-Mellon University, Pittsburgh, PA 15236.*

---

**Chapter 8. Transient Response to Step and Pulse Functions** 8.1

Robert S. Ayre, *Late Professor of Civil Engineering, University of Colorado, Boulder, CO 80309.*

---

**Chapter 9. Effect of Impact on Structures** 9.1

William H. Hoppman II, *Late Professor of Engineering, University of South Carolina, Columbia, SC 29208.*

---

**Chapter 10. Mechanical Impedance** **10.1**

---

Elmer L. Hixson, *Professor Emeritus of Electrical Engineering, University of Texas at Austin, Austin, TX 78712.*

---

**Chapter 11. Statistical Methods for Analyzing Vibrating Systems** **11.1**

---

Richard G. DeJong, *Professor of Engineering, Calvin College, Grand Rapids, MI 49546.*

---

**Chapter 12. Vibration Transducers** **12.1**

---

Anthony S. Chu, *Director of Marketing, Test Instrumentation, Endeveco Corporation, San Juan Capistrano, CA 92675.*

---

**Chapter 13. Vibration Measurement Instrumentation** **13.1**

---

Robert B. Randall, *Associate Professor, University of New South Wales, Sydney, NSW 2052, Australia.*

---

**Chapter 14. Vibration Analyzers and Their Use** **14.1**

---

Robert B. Randall, *Associate Professor, University of New South Wales, Sydney, NSW 2052, Australia.*

---

**Chapter 15. Measurement Techniques** **15.1**

---

Cyril M. Harris, *Charles Batchelor Professor Emeritus of Electrical Engineering, Columbia University, New York, NY 10027.*

---

**Chapter 16. Condition Monitoring of Machinery** **16.1**

---

Joëlle Courrech, *Area Sales Manager, Brüel & Kjaer, Sound and Vibration Measurement, A/S Denmark.*

AND

Ronald L. Eshleman, *Director, Vibration Institute, Willowbrook, IL 60514.*

---

**Chapter 17. Strain-Gage Instrumentation** **17.1**

---

Earl J. Wilson, *formerly Chief of Strain and Environmental Branch, National Aeronautics and Space Administration, Flight Research Center, Edwards AFB, CA 93524.*

---

**Chapter 18. Calibration of Pickups** **18.1**

---

M. Roman Serbyn, *Associate Professor, Morgan State University, Baltimore, MD 21251.*

AND

Jeffrey Dosch, *Technical Director, PCB Piezotronics, Depew, NY 14043-2495.*

---

**Chapter 19. Shock and Vibration Standards** **19.1**

---

David J. Evans, *Mechanical Engineer, National Institute of Standards and Technology, Gaithersburg, MD 20899-9221.*

AND

Henry C. Pusey, *Executive Director, Society for Machinery Failure Prevention Technology, Winchester, VA 22601-6354.*

---

**Chapter 20. Test Criteria and Specifications** **20.1**

---

Allan G. Piersol, *Consultant, Piersol Engineering Company, Woodland Hills, CA 91364-4830.*

<b>Chapter 21. Experimental Modal Analysis</b>	<b>21.1</b>
<hr/>	
Randall J. Allemang, <i>Professor of Structural Dynamics Research Laboratory, University of Cincinnati, Cincinnati, OH 45221.</i>	
AND	
David L. Brown, <i>Professor of Structural Dynamics Research Laboratory, University of Cincinnati, Cincinnati, OH 45221.</i>	
<b>Chapter 22. Concepts in Vibration Data Analysis</b>	<b>22.1</b>
<hr/>	
Allan G. Piersol, <i>Consultant, Piersol Engineering Company, Woodland Hills, CA 91364-4830.</i>	
<b>Chapter 23. Concepts in Shock Data Analysis</b>	<b>23.1</b>
<hr/>	
Sheldon Rubin, <i>Consultant, Rubin Engineering Company, Sherman Oaks, CA 91403-4708.</i>	
<b>Chapter 24. Vibration of Structures Induced by Ground Motion</b>	<b>24.1</b>
<hr/>	
William J. Hall, <i>Professor Emeritus of Civil Engineering, University of Illinois at Urbana-Champaign, Urbana, IL 61801.</i>	
<b>Chapter 25. Vibration Testing Machines</b>	<b>25.1</b>
<hr/>	
David O. Smallwood, <i>Distinguished Member of the Technical Staff, Sandia National Laboratories, Albuquerque, NM 87185.</i>	
<b>Chapter 26, Part I. Shock Testing Machines</b>	<b>26.1</b>
<hr/>	
Richard H. Chalmers, <i>Late Consulting Engineer, Induced Environments Consultants, San Diego, CA 92107.</i>	
<b>Chapter 26, Part II. Pyroshock Testing</b>	<b>26.15</b>
<hr/>	
Neil T. Davie, <i>Principal Member of the Technical Staff, Sandia National Laboratories, Albuquerque, NM 87185.</i>	
AND	
Vesta I. Bateman, <i>Principal Member of the Technical Staff, Sandia National Laboratories, Albuquerque, NM 87185.</i>	
<b>Chapter 27. Application of Digital Computers</b>	<b>27.1</b>
<hr/>	
Marcos A. Underwood, <i>President, Tu'tuli Enterprises, Gualala, CA 95445.</i>	
<b>Chapter 28, Part I. Matrix Methods of Analysis</b>	<b>28.1</b>
<hr/>	
Stephen H. Crandall, <i>Ford Professor of Engineering Emeritus, Massachusetts Institute of Technology, Cambridge, MA 02139.</i>	
AND	
Robert B. McCalley, Jr., <i>Retired Engineering Manager, General Electric Company, Schenectady, NY 12309.</i>	
<b>Chapter 28, Part II. Finite Element Models</b>	<b>28.29</b>
<hr/>	
Robert N. Coppelino, <i>Principal Engineer, Measurement Analysis Corporation, Torrence, CA 90505.</i>	
<b>Chapter 29, Part I. Vibration of Structures Induced by Fluid Flow</b>	<b>29.1</b>
<hr/>	
Robert D. Blevins, <i>Consultant, San Diego, CA 92103.</i>	

<b>Chapter 29, Part II. Vibration of Structures Induced by Wind</b>	<b>29.21</b>
<hr/>	
Alan G. Davenport, <i>Founding Director, Boundary Layer Wind Tunnel Laboratory, and Professor Emeritus of Civil Engineering, University of Western Ontario, London, ON N6A 5B9, Canada.</i>	
AND	
Milos Novak, <i>Late Professor of Civil Engineering, University of Western Ontario, London, ON N6A 5B9, Canada.</i>	
<b>Chapter 29, Part III. Vibration of Structures Induced by Sound</b>	<b>29.47</b>
<hr/>	
John F. Wilby, <i>Consultant, Wilby Associates, Calabasas, CA 91302.</i>	
<b>Chapter 30. Theory of Vibration Isolation</b>	<b>30.1</b>
<hr/>	
Charles E. Crede, <i>Late Professor of Mechanical Engineering and Applied Mechanics, California Institute of Technology, Pasadena, CA 91125.</i>	
AND	
Jerome E. Ruzicka, <i>formerly Barry Controls, Brighton, MA 02135.</i>	
<b>Chapter 31. Theory of Shock Isolation</b>	<b>31.1</b>
<hr/>	
R. E. Newton, <i>Late Professor of Mechanical Engineering, United States Naval Postgraduate School, Monterey, CA 93943.</i>	
<b>Chapter 32. Shock and Vibration Isolators and Isolation Systems</b>	<b>32.1</b>
<hr/>	
Romulus H. Racca, <i>formerly Senior Staff Engineer, Barry Controls, Brighton, MA 02135.</i>	
AND	
Cyril M. Harris, <i>Charles Batchelor Professor Emeritus of Electrical Engineering, Columbia University, New York, NY 10027.</i>	
<b>Chapter 33. Mechanical Properties of Rubber</b>	<b>33.1</b>
<hr/>	
Ronald J. Schaefer, <i>President, Dynamic Rubber Technology, Wadsworth, OH 44281.</i>	
<b>Chapter 34. Engineering Properties of Metals</b>	<b>34.1</b>
<hr/>	
James E. Stallmeyer, <i>Professor Emeritus of Civil Engineering, University of Illinois at Urbana-Champaign, Urbana, IL 61801.</i>	
<b>Chapter 35. Engineering Properties of Composites</b>	<b>35.1</b>
<hr/>	
Keith T. Kedward, <i>Professor of Mechanical Engineering, University of California at Santa Barbara, Santa Barbara, CA 93106-5070.</i>	
<b>Chapter 36. Material Damping and Slip Damping</b>	<b>36.1</b>
<hr/>	
Lawrence E. Goodman, <i>Late Professor of Mechanics and Recorder Professor of Civil Engineering, University of Minnesota, Minneapolis, MN 55455.</i>	
<b>Chapter 37. Applied Damping Treatments</b>	<b>37.1</b>
<hr/>	
David I. G. Jones, <i>Consultant, D/Tech Systems, Chandler, AZ 85226.</i>	
<b>Chapter 38. Torsional Vibration in Reciprocating and Rotating Machines</b>	<b>38.1</b>
<hr/>	
Ronald L. Eshleman, <i>Director, Vibration Institute, Willowbrook, IL 60514.</i>	

---

**Chapter 39, Part I. Balancing of Rotating Machinery** **39.1**

---

Douglas G. Stadelbauer, *formerly Executive Vice President, Schenck-Trebel Corporation, Deer Park, NY 11729.*

---

**Chapter 39, Part II. Shaft Misalignment of Rotating Machinery** **39.37**

---

John D. Piotrowski, *President, Turvac, Inc., Oregonia, OH 45054.*

---

**Chapter 40. Machine-Tool Vibration** **40.1**

---

Eugene I. Rivin, *Professor, Wayne State University, Detroit, MI 48202.*

---

**Chapter 41. Equipment Design** **41.1**

---

Karl A. Sweitzer, *Senior Systems Engineer, Eastman Kodak Company, Rochester, NY 14653-7214.*

AND

Charles A. Hull, *Staff Engineer, Lockheed Martin Corporation, Syracuse, NY 13221-4840.*

AND

Allan G. Piersol, *Consultant, Piersol Engineering Company, Woodland Hills, CA 91364-4830.*

---

**Chapter 42. Effects of Shock and Vibration on Humans** **42.1**

---

Henning E. von Gierke, *Director Emeritus, Biodynamics and Bioengineering Division, Armstrong Laboratory, Wright-Patterson AFB, OH 45433-7901.*

AND

Anthony J. Brammer, *Senior Research Officer, Institute for Microstructural Sciences, National Research Council, Ottawa, ON K1A 0R6, Canada.*

**Index follows Chapter 42**
