

# INTRODUCTION TO WIRELESS SYSTEMS

P. Mohana Shankar

|  |            |
|--|------------|
| Preface .....  | iv         |
| Acknowledgments .....  | vii        |
| <b>CHAPTER 1 HISTORICAL OVERVIEW OF WIRELESS SYSTEMS .....</b>   | <b>1</b>   |
| 1.0 Overview .....   | 1          |
| 1.1 North American Cellular Systems .....  | 1          |
| 1.2 Pan-European Cellular Systems .....  | 4          |
| 1.3 Pacific Digital Cellular (PDC) Systems ..  | 4          |
| 1.4 Universal Mobile Telecommunication Systems (UMTS)/International Mobile Telecommunications 2000 (IMT 2000) .. | 5          |
| 1.5 Components of a Cellular System .....  | 5          |
| 1.6 Summary .....  | 7          |
| Bibliography .....   | 8          |
| <b>CHAPTER 2 PROPAGATION CHARACTERISTICS OF WIRELESS CHANNELS .....</b>  | <b>10</b>  |
| 2.0 Introduction .....   | 10         |
| 2.1 Attenuation .....  | 12         |
| 2.1.1 Hata Model .....   | 17         |
| 2.1.2 Lee's Model .....  | 20         |
| 2.2 Indoor Propagation Models .....  | 22         |
| 2.2.1 Extra Large Zone .....   | 22         |
| 2.2.2 Large Zone .....   | 23         |
| 2.2.3 Middle Zone .....  | 23         |
| 2.2.4 Small Zone and Microzone .....   | 24         |
| 2.3 Fading .....   | 24         |
| 2.3.1 Multipath Fading .....   | 24         |
| 2.3.2 Dispersive Characteristics of the Channel .....  | 28         |
| 2.3.3 Time-Dispersive Behavior of the Channel .....  | 34         |
| 2.3.4 Level Crossing and Average Fade Duration .....   | 37         |
| 2.3.5 Frequency Dispersion versus Time Dispersion .....  | 39         |
| 2.4. Other Fading Models .....   | 40         |
| 2.4.1 Rician Fading .....  | 40         |
| 2.4.2 Lognormal Fading .....   | 41         |
| 2.4.3 Nakagami Distribution .....  | 44         |
| 2.4.4 Suzuki Distribution .....  | 45         |
| 2.4.5 Summary of Fading .....  | 46         |
| 2.5 Testing of Fading Models .....   | 46         |
| 2.6 Power Units .....  | 51         |
| 2.7 Summary .....  | 52         |
| Problems .....   | 53         |
| <b>CHAPTER 3 MODEMS FOR WIRELESS COMMUNICATIONS .....</b>  | <b>57</b>  |
| 3.0 Introduction .....   | 57         |
| 3.1 Analog Modulation .....  | 58         |
| 3.1.1 Amplitude Modulation .....   | 58         |
| 3.1.2 Angle Modulation .....   | 62         |
| 3.1.3 Comparison of Analog Modulation Schemes .....  | 65         |
| 3.2 Digital Modulation .....   | 67         |
| 3.2.1 Pulse Trains and Pulse Shaping ..  | 68         |
| 3.2.2 General Analysis of Receivers ..   | 77         |
| 3.3 Modems .....   | 86         |
| 3.3.1 Amplitude Shift Keying (ASK) ..  | 87         |
| 3.3.2 Binary Phase-Shift Keying ..   | 87         |
| 3.3.3 $M$ -ary Modulation Schemes ..   | 97         |
| 3.3.4 Constant Envelope Modulation Techniques .....  | 109        |
| 3.4 General $M$ -ary Modulation Schemes ..   | 125        |
| 3.4.1 $M$ -ary Phase Modulation .....  | 125        |
| 3.4.2 $M$ -ary Quadrature Amplitude Modulation (QAM) .....   | 126        |
| 3.5 Comparison of Modems for Wireless Communications .....   | 128        |
| 3.5.1 Shannon's Theorem .....  | 128        |
| 3.5.2 Channel Capacity in Rayleigh Fading .....  | 131        |
| 3.6 Summary .....  | 132        |
| Problems .....   | 134        |
| <b>CHAPTER 4 CELLS AND CELLULAR TRAFFIC .....</b>  | <b>138</b> |
| 4.0 Introduction .....   | 138        |
| 4.1 Geometry of a Hexagonal Cell .....   | 140        |
| 4.2 Co-Channel Interference (CCI) .....  | 142        |
| 4.2.1 Special Cases of Co-Channel Interference .....   | 144        |
| 4.3 CCI Reduction Techniques .....   | 146        |
| 4.3.1 Directional Antenna Using Three Sectors .....  | 146        |
| 4.3.2 Directional Antenna Using Six Sectors .....  | 147        |

## X CONTENTS

|  |            |
|--|------------|
| 4.3.3. Geographical Model with Several Tiers of Interferers .....                | 148        |
| 4.4 Cell Splitting .....   | 149        |
| 4.5 Microcells, Picocells, and Fiberoptic Mobile Systems .....                   | 150        |
| 4.6 Coverage Area Estimation .....   | 152        |
| 4.7 Traffic Capacity and Trunking .....  | 156        |
| 4.8 Trunking Efficiency of Omni versus Sectorized Antennae .....                 | 161        |
| 4.9 Adjacent Channel Interference .....  | 162        |
| 4.10 Summary .....   | 165        |
| Problems .....   | 166        |
| <br>   |            |
| <b>CHAPTER 5 FADING MITIGATION IN WIRELESS SYSTEMS .....</b>                     | <b>168</b> |
| <br>   |            |
| 5.0 Introduction .....   | 168        |
| 5.1 Effects of Fading and the Concept of Diversity .....                         | 168        |
| 5.2 Other Signal Degradation Effects .....                                       | 173        |
| 5.2.1 Effects of Random Frequency Modulation .....                               | 174        |
| 5.2.2 Effects of Frequency-Selective Fading and Co-Channel Interference .....    | 175        |
| 5.3 Forms of Diversity .....   | 178        |
| 5.3.1 Space or Spatial Diversity .....   | 179        |
| 5.3.2 Angle Diversity .....  | 180        |
| 5.3.3 Frequency Diversity .....  | 180        |
| 5.3.4 Polarization Diversity .....   | 180        |
| 5.3.5 Time Diversity .....   | 181        |
| 5.3.6 Multipath Diversity .....  | 181        |
| 5.4 Diversity Combining Methods .....  | 182        |
| 5.4.1 Selection Combining .....  | 182        |
| 5.4.2 Maximal Ratio Combining .....  | 186        |
| 5.4.3 Equal Gain Combining .....   | 189        |
| 5.5 Performance Improvement from Diversity in Terms of Reduced Bit Error Rate .. | 191        |
| 5.6 Macroscopic Diversity .....  | 193        |
| 5.7 Equalization/ Frequency-Selective Fading .....                               | 194        |
| 5.7.1. Linear Transversal Equalizer ..   | 197        |
| 5.7.2 Nonlinear Equalizer .....  | 201        |
| 5.8 Summary .....  | 204        |
| Problems .....   | 205        |
| <br>   |            |
| <b>CHAPTER 6 MULTIPLE-ACCESS TECHNIQUES .....</b>                                | <b>207</b> |
| <br>   |            |
| 6.0 Introduction .....   | 207        |
| 6.1 Frequency Division Multiple Access (FDMA) .....                              | 208        |
| 6.2 Time Division Multiple Access (TDMA) .....                                   | 210        |
| 6.3 Code Division Multiple Access (CDMA) .....                                   | 212        |
| 6.3.1 Description of a PN Code Generator .....                                   | 214        |
| 6.3.2 Properties of Pseudonoise or Pseudorandom Sequences .....                  | 215        |
| 6.3.3 Direct-Sequence Spread-Spectrum Modulation .....                           | 216        |
| 6.3.4 RAKE Receiver in DS-CDMA Systems .....                                     | 220        |
| 6.3.5 Frequency-Hopping Spread-Spectrum Technique .....                          | 221        |
| 6.3.6 Comparison of DS and FH Systems .....                                      | 222        |
| 6.4 Overview of Wireless Systems and Standards .....                             | 224        |
| 6.4.1 Advanced Mobile Phone Systems (AMPS) .....                                 | 224        |
| 6.4.2 United States Digital Cellular (IS 54) .....                               | 226        |
| 6.4.3 Japanese Digital System (JDC) .....  | 227        |
| 6.4.4 GSM .....  | 227        |
| 6.5 North American Digital Cellular Systems Based on CDMA .....                  | 228        |
| 6.5.1 Forward CDMA Channel .....   | 228        |
| 6.5.2 Reverse CDMA Channel .....   | 229        |
| 6.5.3 Power Control in CDMA Systems .....  | 229        |
| 6.5.4 Hand-off Procedure .....   | 230        |
| 6.5.5 Diversity in CDMA Systems .....  | 230        |
| 6.6 Comparison of Multiple-Access Systems in Wireless Communications .....       | 230        |
| 6.6.1 Capacity of CDMA Systems .....   | 232        |
| 6.6.2 Comparison of Features and Standards .....                                 | 239        |
| 6.7 CDMA2000 .....   | 240        |
| 6.8 Other New Developments: Bluetooth Networks .....                             | 245        |
| 6.9 Summary .....  | 246        |
| Problems .....   | 247        |
| <br>   |            |
| <b>APPENDIX A TOPICS IN SIGNALS AND SYSTEMS .....</b>                            | <b>249</b> |
| <br>   |            |
| A.1 Fourier Transforms .....   | 249        |
| A.2 Linear Networks and Impulse Response .....                                   | 251        |
| A.3 Orthogonal Functions .....   | 253        |
| A.4 Probability, Random Variables and Random Processes .....                     | 256        |
| A.4.1 Probability .....  | 256        |

|   |            |
|---|------------|
| A.4.2 Random Variables .....                              | 259        |
| A.4.3 Random Processes .....                              | 269        |
| A.5 Noise in Communication Systems .....                  | 273        |
| A.6 Power Spectra of Digital Signals .....                | 273        |
| <hr/>   |            |
| <b>APPENDIX B TOPICS IN COMMUNICATIONS THEORY .....</b>   | <b>277</b> |
| <hr/>   |            |
| B.1 Orthogonal Frequency Division Multiplexing .....      | 277        |
| B.2 Teletraffic Considerations .....                      | 279        |
| B.3 Coding .....  | 282        |
| B.3.1 Speech Coding .....                                 | 282        |
| B.3.2 Channel Coding .....                                | 287        |
| B.4 Synchronization .....                                 | 291        |
| B.4.1 Carrier Synchronization or Carrier Recovery .....   | 292        |
| B.4.2 Symbol Synchronization .....                        | 292        |
| B.5 Channel Capacity in Fading Channels .....             | 294        |
| B.6 Intersymbol Interference and Eye Patterns .....       | 295        |
| B.7 Error Function .....                                  | 297        |
| <hr/>   |            |
| <b>APPENDIX C TOPICS IN ATTENUATION AND FADING .....</b>  | <b>299</b> |
| <hr/>   |            |
| C.1 Coherence Bandwidth and Coherence Time .....          | 299        |
| C.1.1 Dispersion versus Distortion .....                  | 301        |
| C.2 Path Loss Models for Microcells and PCS Systems ..... | 303        |
| C.2.1 Path Loss Calculations in PCS Systems .....         | 303        |
| C.2.3 Macrodiversity Systems .....                        | 307        |
| C.3 ACRONYMS.....   | 313        |
| <hr/>   |            |
| <b>REFERENCES .....</b>                                   | <b>317</b> |
| <hr/>   |            |
