INFORMATION TECHNOLOGY FOR MANAGEMENT

TRANSFORMING BUSINESS IN THE DIGITAL ECONOMY

3RD EDITION

Contents

PART I
IT in the Organization

1 Information Technology in the Digital Economy 1
How Bristol-Myers Squibb Transformed Itself to the Digital Economy 2

1.1 Doing Business in the Digital Economy 3
Electronic Commerce and Networked Computing 3
The Digital Economy 5
The New versus the Old: Illustrative Examples 6
Business Models 8

1.2 Business Pressures, Organizational Responses, and IT Support 10
Business Pressures 11
Organizational Responses 14
Information Systems and Information Technology 20

1.3 Examples of Information Systems at Work Worldwide 22
Success Stories 22
Information Systems Failures 24

1.4 Information Technology Developments and Trends 25
General Technological Trends 26
Networked Computing 27

1.5 Why Should You Learn About Information Technology? 31
Being IT Literate on the Job and Off 31
Finding Employment Opportunities in IT 32

1.6 Plan of the Book 33

Managerial Issues 34

Appendix 1.1 Ethics in Information Technology Management 41

Appendix 1.2 Systems (Available on book's Web site)

2 Information Technologies: Concepts and Management 45
Building an E-Business at FedEx Corporation 46

2.1 Information Systems: Concepts and Definitions 48

2.2 Classification of Information Systems 49
Classification by Organizational Structure 49
Classification by Functional Area 51
Classification by Support Provided 51
The Evolution of Support Systems 52
Classification by System Architecture 55

2.3 Transaction Processing and Functional Information Systems 56
Transaction Processing 56
Functional Management Information Systems 57

2.4 Operational, Managerial, and Strategic Systems and Hierarchy Support 58
Classification by the Activity Supported 58
The Relationship between People and Information Systems 60

2.5 Information Infrastructure and Architecture 62
Infrastructure 62
Architecture 62
Client/Server and Enterprisewide Computing 65
Other Information Architectures 66

2.6 Web-based Systems 67
The Internet 68
Intranets 68
Extranets 68
E-Commerce and Storefronts 69
Corporate Portals 69
Electronic Markets and Exchanges 69
Mobile Commerce (M-Commerce) 70

2.7 Managing Information Resources 71
Which Resources Are Managed by Whom? 71
What Is the Role of the Information Systems Department? 72
Managing Relationships with End Users 73

Managerial Issues 74

3 Strategic Information Systems for Competitive Advantage 80
Rosenbluth International: Competing in the Digital Economy 81

3.1 Strategic Advantage and Information Technology 83
Strategic Information Systems 83

A Key Element of Strategic Management—Innovation 84
The Role of IT in Strategic Management 85
Competitive Intelligence 86
Sustainable Strategic Advantage 87

3.2 Porter's Competitive Forces Model and Strategies 89
The Model 89
Response Strategies 90
How the Model Is Used 92

3.3 Porter's Value Chain Analysis Model 96
How the Model Is Used 97
Porter's Models in the Digital Age 97

3.4 Strategic Information Systems Frameworks 97
Porter and Millar's Framework 99
Wiseman and MacMillan Framework 100
Bakos and Treacy Framework 100
McFarlan's Application Portfolio Analysis Framework 101
Customer Resource Life Cycle Framework 101

3.5 Web-based Strategic Information Systems 102
Competition in the Web Economy 103
Examples of Web-based SISs 104

3.6 A Framework for Global Competition 106
A Global Business Drivers Framework 106

3.7 Strategic Information Systems: Examples and Analysis 107
Classic SIS 107
Other Representative Strategic Information Systems 107

3.8 Implementing and Sustaining SIS 111
SIS Implementation 111
Risks and Failure 112
Finding Appropriate SIS 112
Sustaining SIS and Strategic Advantage 112

Managerial Issues 113

PART II
The Web Revolution

4 Network Computing: Discovery, Communication, and Collaboration 120
National Semiconductor Corporation 121

4.1 Network Computing—An Overview 123
An Overview of the Internet 123
Internet Application Categories 124

4.2 Discovery 126
The Internet 126
Intranets 130
Extranets 131
Corporate Portals 131

4.3 Communication 134
Factors Determining the Uses of Information Technologies for Communication 135
Electronic Mail 136
Web-based Call Centers 138
Peer-to-Peer (P2P) Networking 138
Chat Rooms 139
Electronic Voice Communication 139

4.4 Collaboration 140
The Nature of Group Work 141
Groupware 142
Groupware Technologies 143
Real-Time Collaboration Tools 145
Teleconferencing 147

4.5 Distance Learning and Telecommuting 148
Distance Learning 148
Telecommuting 150

4.6 Some Implementation and Ethical Issues 153
Ethics on the Net 153

Managerial Issues 155

5 Electronic Commerce 165
Intel Corporation Embraces the Web 166

5.1 Foundations of Electronic Commerce 168
History and Scope 168
The Electronic Commerce Framework 168
Electronic Markets and Interorganizational Information Systems 170
Benefits and Limitations of Electronic Commerce 170
Models of Electronic Commerce 173
EC Infrastructure 173

5.2 Direct Retail Marketing and Advertisement 175
Electronic Retailing 175
Advertising Online 178
The Impact of EC on Traditional Retailing Systems 185

5.3 Consumer Behavior, Market Research, and Customer Support 187
Consumers and Their Behavior on the Internet 187
Market Research 187
Customer Service 190

5.4 Business-to-Business Applications 191
B2B Models 191
Organizational Buyers and Their Behavior 196

5.5 Using EC in Service Industries 196
Cyberbanking 196
Online Bill-Paying and Personal Finance 198
Online Stock Trading 199

The Online Job Market 201
Travel and Tourism 203
Real Estate 203
A Non-Internet Application 203

5.6 M-Commerce, Auctions and Other Applications, and EC Failures 204
M-Commerce (Mobile Commerce) 204
Auctions and Bartering 206
Consumer-to-Consumer (C2C) E-Commerce 209
Intrabusiness and Business to Employees (B2E) 209
E-Government 209
E-Commerce Failures 210

5.7 E-Commerce Infrastructure: EDI, Extranets, and E-Payments 212
E-Commerce Infrastructure 212
B2B Extranets 216
Electronic Payment Systems 217
Intelligent Agents in E-Commerce 225

5.8 Legal, Ethical, and Public Policy Issues 226
Market Practices and Consumer/Seller Protection 226
Legal Issues Specific to E-Commerce 229
Ethical Issues 230

Managerial Issues 231

6 Supply Chain Management and ERP 239
How Dell Reengineered and Manages Its Supply Chain 240

6.1 Essentials of the Supply and Value Chains 242
Definitions and Benefits 242
The Components of Supply Chains 243
The Supply Chain and the Value Chain 245

6.2 Supply Chain Problems and Solutions 245
Background 245
Problems Along the Supply Chain 246
Solutions to Supply Chain Problems 247

6.3 Computerized Systems: MRP, MPII, ERP, and SCM 250
The Evolution of Computerized Aids 250
Why Systems Integration? 251
Integrating the Supply Chain and the Value Chain 252
Enterprise Resource Planning (ERP) 254
Post-ERP (Second-Generation ERP) 255
ERP Failures 258
Application Service Providers and ERP Outsourcing 258
Global Supply Chains 259

6.4 E-Commerce and SCM 261
Buying and Selling Along the Supply Chain 262

6.5 Order Fulfillment in E-Commerce 265
Order Fulfillment and Logistics: An Overview 265
Innovative Solutions to the Order Fulfillment Problem 266
Automated Warehouses 267
Dealing with Returns 268

Managerial Issues 269

PART III
Organizational Applications

7 Transaction Processing, Innovative Functional Systems, CRM, and Integration 275
Integrated Solutions Help Colonial Building Supply Stay Competitive 276

7.1 Functional Information Systems 277
Porter's Value Chain Model and the Supply Chain 278
Major Characteristics of the Functional Information Systems 279

7.2 Transaction Processing Information Systems 281
Computerization of Routine Transaction Processes 281
Objectives of TPS 281
Activities and Methods of TPS 281
Client/Server and Web-Based TPS 282
Typical Tasks in Transaction Processing 284
Transaction Processing Software 285

7.3 Innovative IT Applications in the Functional Areas 287
Managing Production/Operations and Logistics 287
Managing Marketing and Sales Through Channel Systems 292
Managing the Accounting and Finance Systems 301
Managing Human Resources Systems 309

7.4 Customer Relationship Management (CRM) 314
From Customer Service to CRM 314
How Is CRM Practiced? 315
The Enabling Role of Information Technology in CRM 316
Justifying Customer Service and CRM Programs 321
CRM Failures 322
Partnership Relationship Management (PRM) 323

7.5 Integrating Functional Information Systems 323
Reasons for Integration 323
Front-Office and Back-Office Integration 325

Managerial Issues 326

8 IT Planning and BPR 334
How Truserv Planned Its Information Technology 335

8.1 IT Planning—A Critical Issue for Organizations 336

Business Importance and Content 336
The Evolution of IT Planning 337
Issues in IT Planning 337
A Four-Stage Model of IT Planning 340

8.2 Stage 1: Strategic Information Systems Planning 342
Business Systems Planning (BSP) 342
Stages of IT Growth 343
Ends/Means Analysis 346
Critical Success Factors 346
Scenario Planning 347

8.3 Stages 2–4: Information Requirements Analysis, Resource Allocation, and Project Planning 348
Conducting a Requirements Analysis 348
Using the Requirements Analysis for Planning 349
Resource Allocation 349
Project Planning 350

8.4 Planning Information Technology Architectures 350
IT Infrastructure Considerations 351
Choosing Among Architecture Options 352
Reengineering Legacy Systems 354

8.5 Some Issues in IT Planning 355
Planning for Interorganizational Systems 355
IT Planning for Multinational Corporations 355

8.6 Planning for Web-based Systems and E-Commerce 356
Applications Portfolio 357
Risk Analysis 358
Planning Issues 358
Planning in a Turbulent Environment 359

8.7 The Need for Business Process Reengineering and the Role of IT 359
The Problem of the Stovepipe 359
Need for Information Integration 361
The Enabling Role of Information Technology in BPR 362
Retooling of IT for BPR 363

8.8 Restructuring Processes and Organizations 365
Redesign of Processes 365
From Mass Production to Mass Customization 365
Cycle Time Reduction 368
Restructuring the Whole Organization 369
BPR Failures 370

8.9 The Networked Organization 371
The Structure of Networked Organizations 371
Empowerment Using IT 373

8.10 Virtual Organizations 374
Definition and Characteristics 374
The Virtual Corporation and Interorganizational Information Systems 375
How IT Supports Virtual Corporations 375
Managerial Issues 376

9 Knowledge Management 385
Mitre Sharpens Its Creative Side Through Knowledge Management 386

9.1 Introduction to Knowledge Management 388
Concepts and Definitions 388
The Need for and Benefits of Knowledge Management 390

9.2 Organizational Learning and Transformation 392
The Learning Organization 392
Organizational Memory 392
Organizational Learning 392
Organizational Culture 393

9.3 The Knowledge-Management Process 393
The Goals and Objectives of Knowledge Management 394
The Knowledge Management Cycle 394

9.4 Organizational Knowledge Repositories 396
The Knowledge Network Model 396
The Knowledge Repository Model 396
The Hybrid Model 397
The Knowledge Repository 397
Constructing an Organizational Knowledge Repository 399
Managing the Knowledge Repository 399

9.5 Knowledge Management Systems Implementation 399
Strategies for Knowledge Management 399
Knowledge Management Systems Development 400
The Knowledge Audit 401
Create the KM Team 401
Challenges to Knowledge Management Implementation 402
Eliciting Knowledge and Knowledge Requirements 403
The Network Storage Model in Practice 403
The Repository Storage Model in Practice 404
Knowledge Management Facilities 404

9.6 The Role of Information Technology in Knowledge Management 406
Communication, Collaboration, and Storage 406
KMS Technology Integration 406
Knowledge Management Technologies and Tools 407
The Role of Artificial Intelligence in Knowledge Management 412
Data Mining and Knowledge Discovery in Databases 413

9.7 Managing Knowledge Management Systems 415
Knowledge Management Success 415
Establishing KM Value Metrics 416
Knowledge Management Failure 417
Buying and Selling Knowledge 417
Cultural and Organizational Challenges 418

People in the KM System 419
Integration 422
Managerial Issues 424

PART IV
Managerial and Decision Support Systems

10 Supporting Management and Decision Making 433
Web-based Data Analysis at Shopko 434
10.1 Managers and Decision Making 435
The Manager's Job 435
Managerial Decisions and Computerized Support 437
Modeling and Models 438
Computerized Decision Aids 441
A Framework for Computerized Decision Support Analysis 443
10.2 Decision Support Systems 445
DSS Concepts 445
Characteristics and Capabilities of DSS's 447
Structure and Components of a DSS 448
10.3 Group Decision Support Systems 451
Supporting Collaborative Meetings 453
Some Applications of GDSS's 454
10.4 Enterprise Decision Support Systems 454
Organizational Decision Support Systems (ODSS) 454
Executive Information (Support) Systems 457
Capabilities and Characteristics of EIS's 458
10.5 Web-based Decision Support 460
The Benefits of Web-based DSS 463
Requirements for Web-based DSS 465
10.6 Advanced Decision Support Topics 465
Simulation for Decision Making 465
Specialized Ready-Made Decision Support 467
Frontline Decision Support Systems 468
DSS Failures 469
Managerial Issues 469

11 Data Management: Warehousing, Analyzing, Mining, and Visualization 476
Precision Buying, Merchandising, and Marketing at Sears 477
11.1 Data Management: A Critical Success Factor 478
The Difficulties of Managing Data and Some Solutions 478
Data Life Cycle Process 479
Data Sources and Collection 480
Data Quality 482
Multimedia and Object-Oriented Databases 483
Document Management 483
11.2 Data Warehousing 486
Transaction versus Analytical Processing 486
The Data Warehouse 487
Data Marts and Stores: Alternatives to Data Warehouses 490
11.3 Data Analysis and Mining 491
Tools and Techniques of KDD 491
Data Mining 494
Text Mining and Web Mining 496
Business Intelligence 496
Failures of Data Warehouses and Data Mining 496
11.4 Data Visualization Technologies 497
Data Visualization 497
Multidimensionality 498
Geographical Information Systems 500
Visual Interactive Models 504
Virtual Reality 505
11.5 Marketing Databases in Action 507
The Marketing Transaction Database 507
Implementation Examples 508
11.6 Web-based Data Management Systems 510
Corporate Portals 511
Web-based Data Acquisition 512
Intelligent Data Warehouse Web-based Agents 512
Managerial Issues 513

12 Intelligent Support Systems 521
Life in the Digital Age 522
12.1 Intelligent Systems and Artificial Intelligence 523
Artificial Intelligence and Intelligent Behavior 523
Comparing Artificial and Natural Intelligence 524
Conventional versus AI Computing 525
The Commercial Artificial Intelligence Field 526
12.2 Expert Systems 529
Concepts of Expert Systems 530
Benefits of Expert Systems 531
The Limitations 531
Components and Processes of Expert Systems 533
Some Illustrative Applications 535
Embedded Expert Systems 537
12.3 Other Intelligent Systems: From Voice Understanding to Neural Computing 537
Natural Language Processing and Voice Technology 537
Neutral Computing 541
Fuzzy Logic 544
12.4 Intelligent Agents 547
Characteristics of Intelligent Agents 547

What Can Intelligent Agents Do? 548
Applications of Intelligent Agents 549

12.5 Web-based Experts and Intelligent Systems 551
Using Expert Systems on the Net 551

12.6 Supporting Creativity 554
Supporting Idea Generation and Creativity 554

Managerial Issues 556

PART V
Implementing and Managing IT

13 Information Technology Economics 564
Pilkington PLC: Total Outsourcing at Headquarters 565

13.1 Economic and Financial Trends 566
Technological and Financial Trends 566
The Productivity Paradox 568
Explaining the Productivity Paradox 568

13.2 Evaluating IT: Benefits, Costs, and Performance 572
The Value of Information in Decision Making 575
Evaluating Automation by Cost-Benefit Analyses 575
Evaluating IT Infrastructure Through Benchmarks and Metrics 577
Other Methods and Commercial Services 578

13.3 Evaluating IT: Perspectives on Intangible Benefits 579
Assessing Intangible Benefits 579
Value Analysis 579
Information Economics 580
Management by Maxim for IT Infrastructure 582
Option Valuation of IT Investments 584

13.4 IT Strategies: Chargeback and Outsourcing 585
Chargeback 586
Outsourcing as an Economic Strategy 587

13.5 Economics of Web-based Systems 591

13.6 Other Economic Aspects of Information Technology 594
Negative Impacts of Failures and "Runaways" 594
The New Economics of IT 596
Increasing Returns 597
Market Transformation Through New Technologies 598

Managerial Issues 599

14 Building Information Systems 607
Snap-On's Approach to Setting up an E-Commerce Site 608

14.1 The Concept of a Systems Development Life Cycle 609
An Eight-Stage SDLC 610
Traditional versus Modern SDLCs 615
A Light SDLC Methodology for Web-based Systems Development 616

14.2 Methods for Complex or Quickly Needed Systems 616
Prototyping 617
Joint Application Design (JAD) 618
Rapid Application Development 619
Object-Oriented Development 621
Component-based Development 623

14.3 Systems Developed Outside the IS Department 626
End-User Development 626
Outsourcing 630
External Acquisition of Software 633
Management Considerations 635

14.4 Building E-Commerce Applications 637
The Development Process of E-Commerce Applications 638
Development Strategies for E-Commerce Applications 638
Application Service Providers (ASPs) 640
Java, a Promising Tool 641
Managerial Issues in E-Commerce Applications 642

14.5 Some Important Systems Development Issues 642
CASE Tools 643
Software Quality Improvement and ISO-9000 643
Project Planning 645

Managerial Issues 648

15 Managing Information Resources and Security 656
CyberCrime in the New Millennium 657

15.1 The IS Department and End-Users 658
Information Resources 658
The IS Department in the Organization 658
The IS Department and End Users 660
Fostering the ISD/End-User Relationship 661
The Steering Committee 661
Service-Level Agreements 662
The Information Center 662
The New IT Organization 663

15.2 The CIO in Managing the IS Department 664
The Chief Information Officer 665

15.3 IS Vulnerability and Computer Crimes 667
Information Systems Breakdowns 667
Systems Vulnerability 669
Computer Crimes 671

15.4 Protecting Information Systems 673
Security and the Role of Controls 673
Defense Strategies: How Do We Protect? 674
General Controls 675
Application Controls 679
15.5 Securing the Web and Intranets 680
Security Measures 680
Firewalls 682
15.6 Implementing Security 683
Auditing Information Systems 683
Disaster Recovery Planning 685
Risk Management and Cost-Benefit Analysis 687
IT Security in the Twenty-First Century 689
Managerial Issues 690

16 Impacts of IT on Organizations, Individuals, and Society 698
Wearable Computers for Workers 699
16.1 Does IT Have Only Positive Effects? 700
16.2 Impacts of IT on Organizations 701
Structure, Authority, Power, and Job Content 701
Personnel Issues 703
The Manager's Job 704
Other's Changes 704
16.3 Impacts of IT on Individuals at Work 705
Job Satisfaction 705
Dehumanization and Psychological Impacts 705
Information Anxiety 705
Impacts on Health and Safety 706
16.4 Societal Impacts 708
Opportunities for People with Disabilities 708
Quality of Life Improvements 709
Technology and Privacy 712
Virtual Society 712
Information Technology and Employment Level 713
Digital Divide 714
International Implications 714
Challenge to Free Speech versus Internet Indecency 715
Other Impacts 716
The World Trade Center Disaster: Implications for IT Management 716
16.5 Virtual Communities 718
Types of Communities 718
Business Aspects of Internet Communities 720
16.6 Concluding Thoughts 721
Managerial Issues 723

Technology Guides

T.1 Hardware (Available on the book's Web site)
T1.1 What Is a Computer System?
Representing Data, Pictures, Time, and Size in a Computer
T1.2 The Evolution of Computer Hardware
Fifth-Generation Computers
Future Generations of Computers
T1.3 Types of Computers
Supercomputers
Massively Parallel Computers
Mainframes
Minicomputers
Workstations
Microcomputers (PCs)
Network Computers and Terminals
T1.4 The Microprocessor and Primary Storage
The Central Processing Unit
Primary Storage
Buses
Control Unit
Arithmetic-Logic Unit
Microprocessor Speed
Parallel Processing
Microprocessor Evolution
Microprocessor Architecture
T1.5 Input/Output Devices
Secondary Storage
Input Devices
Source Data Automation
Output Devices

T.2 Software (Available on the book's Web site)
T2.1 Types of Software
T2.2 Application Software
Types of Application Software
General-Purpose Application Programs
T2.3 Systems Software
System Control Programs
Systems Support Programs
T2.4 Programming Languages
The Evolution of Programming Languages
High-Level Languages
New Programming Languages
Internet-Oriented Languages

T2.5 Software Development and CASE Tools
CASE

T2.6 Software Issues and Trends
Software Licensing
Software Upgrades
Shareware and Freeware
Software Selection

T.3 Data and Databases 729

T3.1 File Management **730**
Accessing Records from Computer Files **730**
Problems Arising from the File Environment **730**

T3.2 Databases and Database Management Systems **732**
Databases **732**
Database Management Systems **732**

T3.3 Logical Data Organization **735**
The Hierarchical Database Model **735**
The Network Database Model **736**
The Relational Database Model **737**
Comparing the Three Basic Database Models **738**

T3.4 Creating Databases **740**
Entity-Relationship Modeling **740**
Normalization of Relational Databases **741**

T3.5 Emerging Database Models **742**
The Object-Oriented Database Model **742**
Hypermedia Database Model **743**

T3.6 Data Warehouses **743**

T3.7 Physical Database Organization **743**
Database Topology **743**
Physical versus Logical Data View **744**

T3.8 Database Management **745**

T3.9 An Emerging Technology: IP-Based Storage **745**

T.4 Telecommunications 747

T4.1 Telecommunication Concepts **748**
Telecommunications System **748**
Electronic Signals **749**
Communications Processors **750**

T4.2 Communications Media (Channels) **751**
Wireline Media **751**
Wireless Media **753**
Characteristics of Communications Media **756**
Transmission Direction **758**
Transmission Mode **758**
Transmission Accuracy **758**

T4.3 Network Architecture: Protocols, Standards, Interfaces, and Topologies **759**
Protocols **759**
Communication Standards **759**
Interfaces **762**
Network Topology **762**
Network Size **763**

T4.4 Network Processing: Open Systems and Enterprise Networking **765**
Technology Architecture **765**
Client/Server Architecture **767**
Peer-to-Peer Architecture **769**
Open Systems and Enterprise Networking **770**

T.5 The Internet and the Web (Available on the book's Web site)

T5.1 What Is the Internet?
Brief History
Next-Generation Internet Services

T5.2 Basic Characteristics and Capabilities
Accessing the Internet
The TCP/IP Protocol
Browsing and the World Wide Web
Creating Web Documents
Search Engines
Addressees on the Web
Gopher
Downloading Software and Files
Electronic Mail
Chat Programs
Newsgroups
Mailing Lists and Electronic Bulletin Boards
Portals
Wireless Access Protocol (WAP)

Glossary G-1
