

Handbook of

**DAIRY
FOODS AND
NUTRITION**

Second Edition

Gregory D. Miller
Judith K. Jarvis
Lois D. McBean

NATIONAL DAIRY COUNCIL

Contents

Chapter 1

The Importance of Milk and Milk Products in the Diet	1
I. Introduction.....	1
II. Recommendations to Include Milk and Milk Products in the Diet	2
A. Food Guide Recommendations	2
B. Government Feeding Programs/Child Nutrition Programs	2
III. Contribution of Milk and Milk Products to Nutrient Intake	4
A. Nutrient Contribution.....	4
B. Milk and Milk Products throughout Life.....	4
C. Low Intake of Dairy Foods Compromises Nutrient Intake	5
IV. Nutrient Components of Milk and Milk Products.....	6
A. Energy	6
B. Protein	6
C. Carbohydrate.....	16
D. Fat	17
E. Vitamins	22
F. Minerals	24
V. Protecting the Quality of Milk and Other Dairy Foods	29
A. Who is Responsible for Milk's Quality?	29
B. Pasteurized Milk Ordinance	29
C. Unintentional Microconstituents	30
D. Milk Treatments.....	31
E. Storage and Handling	31
VI. Kinds of Milk and Milk Products	33
A. Consumption Trends.....	33
B. Wide Range of Milk and Milk Products.....	35
C. Chocolate Milk	39
D. Cheese.....	41
E. Cultured and Culture-Containing Dairy Foods.....	48
F. Whey Products.....	51
VII. Summary	53
References.....	55

Chapter 2

Dairy Foods and Cardiovascular Health	65
I. Introduction.....	65
II. Contribution of Milk and Milk Products to Fat and Cholesterol Intake.....	67
III. Dairy Nutrients, Dairy Foods, and CHD	70
A. Single Nutrients	70
1. Dietary Fatty Acids.....	70
2. Dietary Fat Quantity.....	77
3. Dietary Cholesterol.....	78
4. Protein (Casein).....	79

5. Vitamin D	80
B. Genetics.....	81
C. Dairy Foods	85
1. Milk and Culture-Containing Dairy Foods.....	86
2. Butter	90
IV. Efficacy and Safety of Lowfat Diets.....	91
A. Efficacy	91
B. Safety	94
C. Dietary Compliance.....	97
D. The Role of Various Dairy Foods in Meeting Dietary Guidelines for Fat Intake.....	98
V. Summary	99
References.....	100

Chapter 3

Dairy Foods and Hypertension.....	117
I. Introduction.....	117
II. Calcium, Dairy Foods, and Blood Pressure.....	120
A. Experimental Animal Studies.....	120
B. Epidemiological Studies.....	121
C. Clinical Studies.....	126
D. Determinants of a Hypotensive Response to Calcium	130
1. Study Design	130
2. Individual Characteristics.....	131
3. Other Dietary Components	133
4. Who is Most Likely to Respond?.....	133
III. Potassium and Blood Pressure	134
A. Experimental Animal Studies.....	134
B. Epidemiological Studies.....	134
C. Clinical Studies.....	136
IV. Magnesium and Blood Pressure.....	138
A. Experimental Animal Studies.....	138
B. Epidemiological Studies.....	138
C. Clinical Studies.....	141
V. Dietary Patterns Including Dairy Foods and Blood Pressure.....	141
VI. Summary	143
References.....	144

Chapter 4

Dairy Foods and Colon Cancer.....	155
I. Introduction.....	155
II. Total Fat Intake, Dairy Foods, and Colon Cancer.....	155
III. Protective Components in Dairy Foods	158
A. Calcium, Vitamin D, and Colon Cancer	158
1. Epidemiological Studies.....	158
2. Animal Studies	162

3. <i>In Vitro</i> Studies	167
4. Clinical Trials	168
B. Dairy Food Cultures and Colon Cancer.....	174
C. Other Protective Components in Dairy Foods	176
1. CLA	176
2. Sphingolipids	177
3. Butyric Acid	179
4. Milk Proteins	179
IV. Summary	180
References.....	181

Chapter 5

Dairy Foods and Osteoporosis	193
I. Introduction.....	193
II. Bone Basics	195
III. Risk Factors for Osteoporosis	197
IV. Calcium Important at Every Age	200
A. Dietary Calcium Recommendations.....	200
B. Calcium Intake.....	201
C. Prevention of Osteoporosis.....	204
1. Childhood and Adolescence	205
2. Adulthood	212
a. Young Adulthood	212
b. <i>Between Peak Bone Mass and Menopause</i>	214
c. Early Postmenopausal Years.....	217
d. Later Postmenopausal Years	219
V. Prevention and Treatment of Osteoporosis	226
A. Later Years	226
1. Men at Risk	226
2. Calcium.....	227
3. Vitamin D	231
4. Treatment.....	233
VI. Summary	234
References.....	237

Chapter 6

Bone Health and the Vegetarian	251
I. Introduction.....	251
II. Vegetarianism.....	252
A. Types	252
B. How Many Vegetarians are There?	252
C. Health Effects of a Vegetarian Diet and Lifestyle	253
III. Factors Influencing Bone Health.....	254
A. Heredity.....	254
B. Environment.....	255
1. Diet	255

2. Lifestyle	255
3. Lifestage or Disease State	256
IV. The Vegetarian Diet and Osteoporosis Risk	257
V. Factors of Vegetarian Diets that Affect Bone Health	263
A. Calcium	263
1. Intake Recommendations and Consumption Patterns	263
2. Food Sources of Calcium and Absorption	266
B. Vitamin D	267
C. Phosphorus	272
D. Protein	273
1. Protein in Perspective	274
2. A Matter of Balance	274
E. Sodium	276
F. Fiber	277
VIII. Special Challenges of Vegetarian Diets	278
A. Pregnancy and Lactation	278
B. Adolescence	279
IX. Calcium Supplements	279
X. Benefits of Calcium-Rich Foods	280
XI. The Value of Milk and Milk Products in Vegetarian Diets	281
XII. Conclusion	282
References	282

Chapter 7

Dairy Foods and Oral Health	291
I. Introduction	291
II. Dental Caries	292
A. Animal Studies	294
B. Human Studies	295
1. Plaque pH	295
2. Demineralization/Remineralization Studies	297
3. Epidemiological and Clinical Studies	299
C. How Dairy Foods Inhibit Caries Formation	300
D. Chocolate Milk	302
E. Nursing Bottle Caries	304
F. Milk as a Vehicle for Fluoridation	304
III. Periodontal Diseases	304
IV. Summary	306
References	306

Chapter 8

Lactose Intolerance	311
I. Introduction	311
II. Physiology of Lactose Digestion	313
A. Course of Development of Lactase	313
B. Decline of Lactase Expression	315

C. Molecular Regulation	315
D. Types of Lactase Deficiency	316
E. Lactose Maldigestion.....	319
III. Symptoms	319
IV. Diagnosis	320
V. Relationship Between Lactose Maldigestion, Lactose Intolerance, and Milk Intolerance	323
A. Dose Dependence	323
B. Milk Intolerance	324
C. Subjective Factors Affecting Lactose Tolerance.....	326
D. Lactose Digestion During Pregnancy.....	328
VI. Long-Term Consequences of Lactose Intolerance.....	328
A. Lactose Digestion and Calcium/Nutrient Absorption.....	328
B. Effect on Milk Consumption and Nutritional Status.....	329
C. Risk of Osteoporosis/Chronic Disease.....	331
VII. Strategies for Dietary Management of Primary Lactose Maldigestion.....	332
A. Amount of Lactose	332
B. Type of Dairy Food	333
C. Fermented Milk Products	334
D. Unfermented Milk with Bacterial Cultures.....	336
E. Enzyme Preparations	337
F. Colonic Adaptation.....	338
VIII. Treatment of Malnutrition/Diarrheal Disease in Children.....	340
IX. Recommendations for Feeding Programs	340
A. International	342
B. United States.....	342
X. Future Research Needs.....	343
XI. Conclusion	344
XII. Glossary of Terms.....	344
XIII. Lactose Content of Dairy Products	345
References.....	346

Chapter 9

Contribution of Milk and Milk Products to Health Throughout the

Life Cycle	355
I. Introduction.....	355
II. Infancy	355
A. Characteristics.....	355
B. Recommendation for Feeding	356
1. Standard Cow's Milk-Based Formulas	356
2. Cow's Milk	357
3. Cow's Milk Allergy.....	357
C. Vitamin D and Rickets	360
D. Introduction of Solid Foods	360
III. Preschool Years.....	361

A. Characteristics.....	361
B. Recommendations for Milk Group Foods	362
C. Calcium Recommendations and Consumption	362
D. Strategies to Improve Intake.....	364
1. Snacks.....	364
2. Parental Role Modeling.....	364
E. Nutritional Concerns.....	364
1. Low Fat Diets.....	364
2. Excessive Fruit Juice Consumption	365
3. Lead Toxicity.....	365
IV. School-Age Child	366
A. Characteristics.....	366
B. Importance of Milk Group Foods	366
1. Bone Growth and Fracture Prevention	366
2. Prevention of Dental Caries	368
C. Strategies to Improve Milk Consumption	369
1. Encourage Consumption of All Milk Types	369
2. School Meals	370
3. Flavored Milk	371
4. Parental Role Modeling.....	372
V. Adolescence	373
A. Characteristics.....	373
B. Importance of Adequate Calcium/Dairy Food Intake.....	374
1. Peak Bone Mass	374
2. Nutritional Status.....	374
C. Calcium/Dairy Food Recommendations and Consumption	375
D. Factors Contributing to Low Milk Intake	377
1. Lack of Knowledge	377
2. Eating Away from Home.....	377
3. Soft Drinks Substituted for Milk	377
4. Body Image/Weight Concerns	378
E. Groups at Risk for Low Consumption.....	379
1. Vegetarians.....	379
2. Pregnant Teens.....	379
F. Strategies to Improve Consumption.....	379
VI. Adults	381
A. Characteristics.....	381
B. Calcium/Dairy Food Recommendations and Consumption	381
C. Milk Group Foods and Reduction of Chronic Disease Risk.....	382
1. Osteoporosis	382
2. Hypertension.....	383
3. Cancer.....	383
D. Special Needs of Women	384
1. Pregnancy and Lactation	384
2. Premenstrual Syndrome (PMS).....	386
E. Strategies to Improve Intake.....	386

VII. Older Adults.....	388
A. Characteristics.....	388
B. Milk Group Foods and the Reduction of <i>Chronic Disease Risk</i>	390
1. Osteoporosis	390
a. Calcium.....	390
b. Vitamin D	391
c. Protein.....	392
2. Hypertension.....	392
3. Cancer	392
C. Strategies to Improve Intake.....	392
VIII. Conclusion	395
References.....	396
Index	405
