

## Contents

#### Introduction

- 1 Origin and Domestication of Carrot
- 2 Carrot Production
- 2 Origin and Domestication of Celery
- 3 Celery Production
- 3 Causes of Diseases of Umbelliferous Crops
- 7 Breeding for Disease Resistance in Carrot
- 8 Breeding for Disease Resistance in Celery

#### Part I: Infectious Diseases

- 10 Diseases Caused by Bacteria
- 10 Bacterial Blight and Brown Stem of Celery
- 10 Bacterial Blight of Coriander
- 11 Bacterial Blight of Parsnip
- 11 Bacterial Leaf Blight of Carrot
- 12 Bacterial Leaf Spot of Celery
- 13 Bacterial Leaf Spot of Cilantro
- 13 Crown Gall
- 14 Scab
- 14 Soft Rot
- 15 Diseases Caused by Fungi
- 15 Foliar Diseases
- 15 Alternaria Leaf Blight of Carrot
- 16 Alternaria Leaf Blight of Cumin
- 17 Alternaria Leaf Blight of Parsley
- 18 Anthracnose of Caraway
- 18 Cercospora Leaf Blight of Carrot
- 18 Cercosporoid Leaf Blights
- 19 Colletotrichum Diseases of Celery
- 20 Downy Mildew
- 20 Early Blight of Celery
- 21 Late Blight of Celery
- 22 Powdery Mildew
- 24 Rust
- 24 Septoria Blight of Parsley
- 25 Stem Gall of Coriander
- 25 Crown, Root, and Wilt Diseases
- 25 Black Rot
- 27 Brown Rot of Carrot (Phoma Disease)
- 27 Brown Spot of Celery
- 27 Cavity Spot
- 29 Cottony Rot/Pink Rot
- 30 Crater Spot
- 31 Crown Rot of Carrot
- 31 Damping-Off
- 33 Fusarium Dry Rot
- 33 Fusarium Wilt of Cumin
- 33 Fusarium Yellows of Celery
- 34 Itersonilia Canker of Parsnip

- 35 Phoma Canker of Parsnip
- 36 Phoma Crown and Root Rot of Celery
- 37 Phymatotrichopsis Root Rot
- 37 Phytophthora Root Rot
- 38 Pythium Root Rot
- 39 Root Dieback (Pythium Brown Rot) of Carrot
- 40 Southern Blight
- 40 Violet Root Rot
- 41 Postharvest Fungal Diseases
- 41 Black Root Rot of Carrot
- 42 Blue-Green Mold
- 42 Crater Rot
- 42 Gray Mold
- 43 Licorice Rot
- 44 Rhizopus Wooly Soft Rot
- 44 Sooty Rot
- 44 Sour Rot
- 44 Yeasty Rot
- 45 Detection of Seedborne Pathogens
- 45 Diseases Caused by Nematodes
- 45 Cyst Nematode
- 46 Lesion Nematode
- 47 Needle Nematode
- 47 Pin Nematode
- 48 Root-Knot Nematode
- 50 Sting Nematode
- 50 Stubby Root, Awl, Spiral, and Stem Nematodes
- 51 Diseases Caused by Viruses and Phytoplasmas
- 51 Calico
- 51 Carrot Motley Dwarf
- 52 Carrot Thin Leaf
- 53 Carrot Virus Y
- 53 Celery Mosaic
- 55 Cilantro Yellow Blotch
- 55 Celery Yellow Net
- 55 Curly Top
- 56 Parsnip Yellow Fleck
- 57 Southern Mosaic
- 57 Strap Leaf
- 58 Tomato Spotted Wilt
- 58 Aster Yellows and Beet Leafhopper-Transmitted Virescence Agent Yellows

# Part II. Injuries and Abiotic and Noninfectious Biotic Disorders

- 60 Air Pollution
- 60 Allelopathy
- 60 Blackheart of Celery

61 partilizer Injury 61 partilizer Injury 61 partilizer Injury 61 partilizer and Arthropod Injury

83 Naied Toxicity of Celery

83K Nutrient Deficiency

84 Persettic Plants 65 Plunimens of Celery

65 Sallmity and pH

66 Still Compaction, Cross-Bracing, and Crusting

66 Splitting of Carrot 66 Weather-Related Injuries

### **Appendix**

- 68 Names and Authorities of Bacteria, Fungi, and **Nematodes That Affect Umbelliferous Crops**
- 68 Bacteria
- 68 Fungi
- 69 Nematodes
- 70 Index

Color Plates (following page 34)
