PART I TRANSIT SYSTEMS OPERATIONS AND NETWORKS

1		
TRANSIT OPERATIONS AND SERVICE SCHEDULING	3	
1.1 Basic Operating Elements, 4		
1.1.1 Line, Network, Stop, and Station, 4		
1.1.2 Vehicles, Transit Units, and Fleet Size, 6		
1.1.3 Usage of Service: Passenger Flow and Volume, 6		
1.1.4 Operating Elements: Headway and Frequency, 7		
1.1.5 Capacity, Work, and Utilization, 11		
1.1.6 Travel Times, 14		
1.1.7 Speeds, 18		
1.2 Information Files and Data Collection: Surveys and Counts, 22		
1.2.1 Organization of Surveys, 23		
1.2.2 Transit Speed-and-Delay Survey, 24		
1.2.3 Passenger Volume and Load Count, 25		
1.2.4 Passenger Boarding and Alighting Counts, 25		
1.2.5 Other Types of Surveys, 28		
1.3 Transit Travel Characteristics, 28		
1.3.1 Factors Influencing Transit Travel, 30		
1.3.2 Spatial Distribution of Transit Travel, 31		
1.3.3 Temporal Variations of Transit Travel, 34		
1.3.4 Passenger Volume Analysis and Service Capacity Determination, 37		
1.3.5 Characteristics of Travel on a Transit Line, 38		
1.3.6 Indicators of Transit Usage, 43		
1.4 Scheduling of Service, 44		
1.4.1 Components of the Scheduling Process, 44		
1.4.2 Determination of Service Requirements, 46		
1.4.3 Scheduling Procedure, 51		
1.4.4 Procedure Summary, Examples, and Numerical Schedules, 52		
1.4.5 Graphical Presentations of Transit Operations, 54		
1.4.6 Crew Scheduling or Run-Cutting, 59		
1.4.7 Use of Computers in Scheduling, 63		
1.4.8 Measures of Operating Efficiency, 67		
2		
CAPACITY, SPEED, ACCELERATED AND SPECIAL OPERATIONS	78	
2.1 Transit Line Capacity, 78		
2.1.1 Elements of Line Capacity, 79		
2.1.2 Capacity Computations, 87		
2.1.3 Systems Approach to Transit Line Capacity, 91		

2.1.4	Capacities of Different Modes, 93	
2.2	Increase of Transit Speed, 98	
2.2.1	Desirability of Speed Increase, 98	
2.2.2	Possible Measures for Speed Increase, 99	
2.2.3	Sensitivity of Transit Speeds to Elements of Cycle Time, 104	
2.2.4	Evaluation of Measures for Speed Increase, 108	
2.3	Stops and Stopping Regimes, 114	
2.3.1	Definitions and Relationships, 114	
2.3.2	Stopping Regimes and Stops, 115	
2.3.3	Practical Values of Stop Spacings, 116	
2.4	Accelerated Rail Transit Operations with Fixed Stopping Schedules, 118	
2.4.1	Skip-Stop Operation, 119	
2.4.2	Zonal Operation, 128	
2.4.3	Express/Local Operation, 131	
2.4.4	Comparison of All-Stop, Skip-Stop, Zonal, and Express/Local Operations, 135	
2.4.5	Methodology for Selection of Accelerated Operations, 138	
2.5	Scheduling of Single-Track Lines, Circle Lines, and Trunk Lines with Branches, 140	
2.5.1	Single-Track Lines, 140	
2.5.2	Circle Lines, 145	
2.5.3	Trunk Lines with Branches, 146	
3		
	MODELING AND OPTIMIZATION IN TRANSIT SYSTEMS ANALYSIS	158
3.1	Application of Systems Analysis in Transit, 159	
3.1.1	Introduction of Methodology, 159	
3.1.2	Classification of Applications, 161	
3.2	Conceptual Models, 162	
3.2.1	The Conceptual Modeling Methodology, 163	
3.2.2	Representative Applications of Conceptual Models, 163	
3.3	Mathematical Modeling Procedure and Applications, 166	
3.3.1	The Mathematical Modeling Procedure, 166	
3.3.2	Models for Optimization of Rolling Stock, 167	
3.3.3	Models for Analysis of Operations, 173	
3.4	Applications of Simulation Methodology, 178	
3.5	Evaluation of Systems Analysis and Operations Research in Transit, 179	
4		
	TRANSIT LINES AND NETWORKS	185
4.1	Planning Objectives, Principles, and Considerations, 186	
4.1.1	Passenger Attraction, 186	
4.1.2	Network Operating Efficiency, 188	
4.1.3	Network-City Interactions, 190	
4.2	Geometry of Transit Lines, 191	
4.2.1	Spacing of Parallel Lines, 191	
4.2.2	Line Lengths, 193	
4.2.3	Line Alignments, 195	
4.2.4	Independent versus Integrated Lines, 195	
4.3	Types of Transit Lines and Their Characteristics, 201	
4.3.1	Radial and Diametrical Lines, 201	
4.3.2	Tangential, Circumferential, Circle, and Loop Lines, 204	
4.3.3	Trunk Lines with Branches and Feeders, 206	
4.3.4	Rights-of-Way in Special Alignments, 213	
4.4	Transfers in Transit Networks, 215	
4.4.1	Classification of Transfers by Headway Length, 216	
4.4.2	Classification of Transfers by Type of Line, 217	
4.4.3	Metro Station Layouts and Schedules for Simultaneous Transfers, 220	
4.4.4	The Importance of Transfers, 223	
4.5	Timed Transfer System Networks, 224	
4.5.1	Timed Transfer System Scheduling, 225	
4.5.2	Multifocal Networks, 228	

- 4.5.3 Graphical Presentation of Synchronized Schedules, 233
- 4.6 Transit Network Types and Their Characteristics, 234
 - 4.6.1 Networks of Modes with Different Right-of-Way Categories, 234
 - 4.6.2 Rail Transit Network Types and Their Characteristics, 235
 - 4.6.3 Review of Transit Network Types, 245
- 4.7 Analysis of Metro Network Geometric Forms, 248
 - 4.7.1 Classification of Metro Network Measures and Indicators, 249
 - 4.7.2 Network Size and Form, 249
 - 4.7.3 Network Topology, 252
 - 4.7.4 Application to Network Analysis, 254
 - 4.7.5 Relationship of Metro Network to the City, 254
 - 4.7.6 Measures of Offered and Utilized Service, 258
 - 4.7.7 Selection of Evaluation Items for Specific Analysis, 258
- 5**
- PLANNING OF RAIL TRANSIT STATION LOCATIONS 268**
- 5.1 Objectives in Station Location Planning, 268
- 5.2 Passenger Travel Time, 269
 - 5.2.1 Two Trade-offs, 269
 - 5.2.2 The Model, 270
 - 5.2.3 Case a: Uniform Passenger Distribution, 273
 - 5.2.4 Case b: Uniform Cumulative Boarding, 274
 - 5.2.5 Case c: Variable Cumulative Boarding, 276
 - 5.2.6 Case d: Variable Boarding and Alighting, 276
 - 5.2.7 Application of Theoretical Analysis to Rapid Transit Station Planning, 276
- 5.3 Other Objectives in Station Location Selection, 278
 - 5.3.1 Area Coverage, 278
 - 5.3.2 Attraction of Passengers, 280
 - 5.3.3 Cost of Stations, 280
 - 5.3.4 Auto-Transit Interface, 281
 - 5.3.5 Local Objectives and Requirements, 283
- 5.4 Integration of Objectives, 283
- 5.5 Addition or Closing of a Station, 285
- 5.6 Area Coverage versus Operating Speed, 285
 - 5.6.1 Conventional Approaches to Planning of Stations, 285
 - 5.6.2 Use of Skip-Stop Services to Improve Area Coverage, 287
- 5.7 Station Spacings on Actual Rail Transit Networks, 289

PART II TRANSIT AGENCY ECONOMICS AND ORGANIZATION

- 6**
- TRANSIT AGENCY OPERATIONS, ECONOMICS, AND MARKETING 299**
- 6.1 Organizational Structure of Transit Agencies, 299
 - 6.1.1 Board of Directors, 300
 - 6.1.2 Organizational Setup, 301
- 6.2 Management and Personnel, 303
 - 6.2.1 Management Organization, 303
 - 6.2.2 Personnel and Labor Unions, 304
- 6.3 Transit System Statistics, Performance, and Economic Measures, 308
 - 6.3.1 Transit Service Area and Its Characteristics, 308
 - 6.3.2 Transit System and Services, 309
 - 6.3.3 Transit Usage, Work, and Productivity, 312
 - 6.3.4 Revenues, Costs, and Operating Ratio, 313
 - 6.3.5 Indicators of Efficiency, Utilization, and Consumption, 314

- 6.4 Transit Agency Operations, 315
 - 6.4.1 Attitudes toward Transit Users, 315
 - 6.4.2 Organization and Control of Operations, 318
 - 6.4.3 Applications of ITS/Telematics Technology, 319
 - 6.4.4 Rail Rolling Stock/Bus Fleet Maintenance and Replacement, 325
 - 6.4.5 Safety, Legal Suits, and Security, 331
 - 6.5 Transit System Full Accessibility, 340
 - 6.5.1 The Problem of Mobility and Its Solutions, 340
 - 6.5.2 Accessibility of Different Transit Modes, 343
 - 6.5.3 Accessibility for Different User Categories, 347
 - 6.5.4 Results and Significance of Full Accessibility, 348
 - 6.6 Information System for Passengers, 350
 - 6.6.1 Planning a Transit Information System, 350
 - 6.6.2 Classification of Present and Potential Users, 351
 - 6.6.3 Information Items: Their Contents and Forms, 352
 - 6.6.4 Locations of Information, 353
 - 6.6.5 Common Causes of Deficiencies in Information Systems, 358
 - 6.6.6 Planning, Testing, and Maintenance of the Information System, 359
 - 6.7 Marketing and Public Relations, 360
 - 6.7.1 Definition and Purpose, 361
 - 6.7.2 Marketing Strategies, 361
 - 6.7.3 Marketing Activities, 362
 - 6.7.4 Public Relations, 367
 - 6.7.5 Conclusions, 368
- 7**
- TRANSIT FARES 374**
- 7.1 Objectives in Transit Fare Determination, 374
 - 7.2 Fare Collection, 376
 - 7.2.1 Times, Locations, and Methods of Fare Collection and Control, 376
 - 7.2.2 Forms of Payment, 378
 - 7.2.3 Self-Service Fare Collection (SSFC), 380
 - 7.2.4 Automated Fare Collection (AFC), 383
 - 7.2.5 Evaluation of Fare-Collection Systems, 384
 - 7.3 Fare Structures, 384
 - 7.3.1 Flat Fare, 385
 - 7.3.2 Graduated Fares, 386
 - 7.3.3 Comparison of the Three Basic Fare Structures, 387
 - 7.3.4 Transfer Fares, 388
 - 7.4 Special Higher and Lower Fares, 389
 - 7.4.1 Fares for High-Quality Services, 390
 - 7.4.2 Peak/Off-Peak and Commuter Fares, 391
 - 7.4.3 Child, Family, and Student Fares, 391
 - 7.4.4 Fares for Senior Citizens and Disabled and Low-Income Persons, 392
 - 7.4.5 Night, Group, Family, and Other Special Fares, 393
 - 7.4.6 Use of Special Fares, 393
 - 7.5 Fare Level, 394
 - 7.5.1 Influencing Factors, 394
 - 7.5.2 The Range and Domains of Fare Level, 394
 - 7.5.3 Fare Elasticity of Transit Demand, 395
 - 7.5.4 Characteristics of Different Fare Level Domains, 398
 - 7.5.5 Selection of Fare Level, 399
- 8**
- FINANCING OF TRANSIT 408**
- 8.1 Principles and Trends in Financing Transit Services, 408
 - 8.1.1 Government Participation in Transportation Financing, 408
 - 8.1.2 Funding of Different Transportation Modes in the United States, 405
 - 8.1.3 Principles in Allocating Transportation Funds, 405
 - 8.1.4 Sources of Funds for Public Services, 408
 - 8.1.5 Relationship of Transit Fare Levels and Public Financing, 409
 - 8.1.6 Roles of Different Government Levels, 411
 - 8.1.7 Summary Review of Public Policies in Transit Financing, 412
 - 8.2 Sources of Local and State Funds for Transit, 413

- 8.2.1 Taxes Dedicated to Transit, 413
 - 8.2.2 Characteristics of Different Types of Taxes, 414
 - 8.2.3 Transit Organizations with Taxation Powers, 418
 - 8.2.4 Structure of Local-State-Federal Funding, 419
 - 8.3 Federal Funding of Transit, 419
 - 8.3.1 Development of the Federal Role in Transit, 419
 - 8.3.2 Trends in Federal Funding, 420
 - 8.3.3 Criteria for Capital Fund Allocation, 421
 - 8.4 Improving the Efficiency of Transit Agencies, 423
 - 8.4.1 Requirements for Efficiency, 423
 - 8.4.2 International Efforts to Increase Transit Efficiency, 424
- 9**
- TRANSIT OWNERSHIP, REGULATION, AND ORGANIZATION 429**
- 9.1 Private Transit Companies and Public Takeover, 429
 - 9.1.1 Transit Origins and the Need for Government Control, 430
 - 9.1.2 The Problems with Private Companies, 431
 - 9.1.3 Public Takeover of Transit Companies, 432
 - 9.2 Ownership and Forms of Transit Systems, 434
 - 9.2.1 Private Transit Companies, 435
 - 9.2.2 City Area Public Transit Agencies, 435
 - 9.2.3 Regional Transit Agencies, 436
 - 9.3 Integration of Transit Services Provided by Different Operators, 438
 - 9.3.1 Limited Functional Integration, 438
 - 9.3.2 Full Functional Integration: Transit Federation, 439
 - 9.4 Regulation of Transit Services, 440
 - 9.4.1 Purposes of Regulation and Its Categories by Subject, 440
 - 9.4.2 The Role and Importance of Transit Regulation, 444
 - 9.5 Unregulated Transit Services, 445
 - 9.5.1 Unregulated Paratransit in Developing Countries, 445
 - 9.5.2 Deregulation Experiments in Developed Countries, 448
 - 9.5.3 Transit Deregulation in Other Countries, 454
 - 9.6 Evolving Forms of Transit Ownership, Organization, and Management, 454
 - 9.6.1 Organizational Problems and Their Causes, 454
 - 9.6.2 Reevaluation of Transit Agency Structures, 456
 - 9.6.3 Privatization and Other Forms of Transit Reorganization, 459

PART III TRANSIT SYSTEMS PLANNING AND MODE SELECTION

- 10**
- TRANSIT SYSTEMS PLANNING 469**
- 10.1 Purpose and Organization of Transit Planning, 469
 - 10.1.1 Short- and Long-Range Transit Planning, 469
 - 10.1.2 Need for Comprehensive Planning, 470
 - 10.1.3 Legal and Administrative Aspects, 471
 - 10.1.4 The Initial Set of Comprehensive Transportation Plans, 474
 - 10.1.5 Evolution and Trends in Urban Transportation Planning, 477
 - 10.2 Planning Procedure and Methodology, 479
 - 10.2.1 The Basic Steps in a Transportation Planning Process, 479
 - 10.2.2 Transit System Planning Procedure, 480
 - 10.2.3 Setting Goals, Policies, Objectives, and Standards, 483

- 10.2.4 Data Collection and Evaluation of the Present System, 486
- 10.3 Travel and Transit Demand Forecasting, 487
 - 10.3.1 Introduction to Four-Step and Other Demand-Estimation Models, 488
 - 10.3.2 Trip Generation, 490
 - 10.3.3 Trip Distribution, 491
 - 10.3.4 Modal Split, 493
 - 10.3.5 Trip Assignment, 497
 - 10.3.6 Alternative Methods to Four-Step Model, 498
- 10.4 Transit Plan Development, Evaluation, and Selection, 500
 - 10.4.1 Planning Procedure, 500
 - 10.4.2 Examples of Long-Range Transit Planning, 505
- 10.5 Review of the Process and Trends in Transit Planning, 512
 - 10.5.1 Planning Process and Its Components, 512
 - 10.5.2 Trends in Transit Planning, 514
- 11**
- ANALYSIS, EVALUATION, AND SELECTION OF TRANSIT MODES 519**
- 11.1 Evaluation and Selection of Public Projects, 519
- 11.2 Transit Mode Evaluations, 522
 - 11.2.1 Classification and Review of Mode-Comparison Studies, 522
 - 11.2.2 The Basic Principles and Methodology for Transit Mode Evaluation, 527
- 11.3 Definition of the Conditions Set, 528
 - 11.3.1 Passenger Requirements, 529
 - 11.3.2 Transit Operator's Requirements, 534
 - 11.3.3 Community Requirements, 541
 - 11.3.4 Selection of Requirements, 543
- 11.4 Formulation, Comparison, and Selection of Candidate Modes, 544
 - 11.4.1 Formulation of Alternative Modes or Systems, 544
 - 11.4.2 Mode Evaluation and Selection, 544
 - 11.4.3 Summary of Mode-Selection Procedure, 546
- 11.4.4 An Example of the Mode-Comparison Procedure: Lindenwold Rail Line and Shirley Busway, 547
- 12**
- PLANNING AND SELECTION OF MEDIUM- AND HIGH-PERFORMANCE TRANSIT MODES 553**
- 12.1 Basic Elements of Transit Modes, 553
 - 12.1.1 Right-of-Way Categories and Their Significance, 553
 - 12.1.2 Transit System Technology, 558
 - 12.1.3 Types of Network and Service, 562
 - 12.1.4 Interdependence of ROW and Systems Technology, 563
 - 12.1.5 Review of Technological and Operational Features, 565
- 12.2 Medium-Performance Transit Modes, 568
 - 12.2.1 Bus Rapid Transit (BRT), 569
 - 12.2.2 Light Rail Transit (LRT), 577
 - 12.2.3 Automated Guided Transit (AGT), 582
 - 12.2.4 Comparisons of Medium-Performance Modes, 587
- 12.3 High-Performance Transit Modes, 592
 - 12.3.1 Light Rail Rapid Transit (LRRT) Modes, 592
 - 12.3.2 Rail Rapid Transit (Metro), 594
 - 12.3.3 Rubber-Tired Rapid Transit (RTRT), 596
 - 12.3.4 Monorails, 597
 - 12.3.5 Review of Guided Modes and Their Automation, 599
 - 12.3.6 Regional Transit Modes, 599
 - 12.3.7 Trends in Regional Rail Transit Development, 605
- Appendix I SI and English Units and Conversion Factors, 615
- Appendix II List of Abbreviations, 621
- Appendix III Definitions of Transit Systems Terms, 623
- Appendix IV Answers to Selected Exercise Questions, 633
- Index 641**
