# GLOBAL LOGISTICS MANAGEMENT

A COMPETITIVE ADVANTAGE FOR THE 21ST CENTURY

Second Edition

 Blackwell  
Publishing

# CONTENTS

<i>Preface</i>	xiii
<i>Acknowledgments</i>	xv
<b>1 Introduction to Logistics</b>	<b>1</b>
Logistics: The Historical Perspective	1
Logistics: The Modern Perspective	2
Components of a logistics system	4
The role of logistics in the organization	7
Logistics as a Source of Competitive Advantage	8
Why Is Management Interest in Logistics Growing?	10
Trends in global trade	10
Customers are demanding greater value	10
Transportation privatization and liberalization	11
Transportation security	12
Environmental concerns	12
Changing view of inventory	13
Continuing advances in information technology	14
Electronic commerce	15
Logistics in the Global Organization	15
Conceptual Model and Statement of Purpose	17
Chapter Summary	18
Study Questions	19
<b>2 Logistics in the Organization</b>	<b>21</b>
Introduction	21
The Marketing/Logistics Partnership	22
Marketing and Logistics Channels	22
Alternative channel structures	22
Why do channels develop?	23
Channel flows	23
Designing effective channels	25
Environmental Issues	25
Marketing Issues	26
Channel management issues	31
Formal and informal channel relationships	32
Domestic versus global channels	33
Future trends in channel structures	35
Managing the Logistics System	36
Tradeoff Analysis	37

Enhancing Corporate Profitability with Logistics	39
Chapter Summary	41
Study Questions	42
<b>3 Customer Service</b>	<b>44</b>
Introduction	44
What Is Customer Service?	45
Elements of Customer Service	45
Customer Service in a Global Setting	49
How Much Service Should Be Offered?	50
Barriers to Quality Customer Service	52
Controllable factors	52
Uncontrollable factors	53
Improving Customer Service Performance	54
The Consequences of Poor Customer Service	55
Improving Customer Service in Comparison to its Costs	59
Customer Service and the Internal Customer	59
Chapter Summary	60
Study Questions	60
<b>4 Inventory Management</b>	<b>62</b>
Introduction	62
Inventory and Customer Service	63
Purposes of Inventory	64
Types of Inventory	64
Objectives of Inventory Management	65
Inventory costs	65
Managing inventory costs	66
Classic Inventory Models	66
Economic order quantity (EOQ) model	66
Modifications to the basic EOQ model	67
Model limitations	68
Fixed order point/fixed order quantity model	68
Fixed order interval model	68
Safety stock requirements	70
Inventory Management: Signs of Trouble	71
Improving Inventory Management	74
Materials Requirements Planning (MRP)	77
Distribution Resource Planning (DRP)	77
Just-In-Time (JIT) Inventory Management	77
Basic tenets of JIT	78
Advantages of JIT	79
Disadvantages of JIT	79
JIT II/vendor managed inventory (VMI)	80
The reality of JIT	81
Integrated Inventory Management: DRP, MRP, and JIT	82

Inventory Management in a Global Market	83
Chapter Summary	85
Study Questions	86
<b>5 Global Transportation Systems</b>	<b>87</b>
Introduction	87
The Five Modes of Transportation	88
Rail	89
Road transport	91
Pipelines	93
Air	93
Water carriage	94
Deregulation and Privatization of Transportation	97
Deregulation	97
Privatization	98
Future directions	99
Government's Role in Transportation	100
Direct control and regulation of transport firms	100
Provision of transport infrastructure	101
Promulgating and enforcing environmental, safety, and security laws	101
Transportation Security	102
Intermodal Transportation	103
Rail	104
Ocean transport	104
Air	105
Motor transport	105
Infrastructure issues	106
Concluding comments	106
Chapter Summary	106
Study Questions	107
<b>6 Transportation Management Issues</b>	<b>109</b>
Introduction	109
Developing Win/Win Shipper/Carrier Relationships	109
Transport Pricing	111
Market structure models	111
Relevant market area	112
Shipper demand	113
Carrier costs	113
Pricing in Practice	115
Price negotiation: the carrier's perspective	115
Price negotiation: the shipper's perspective	116
Private Transportation	116
Other Issues Affecting Transportation Cost and Service	117
Infrastructure availability and condition	117
Environmental and quality of life issues	121

Customs and cargo security	125
Carrier safety	125
Conclusions	126
Chapter Summary	126
Study Questions	127
<b>7 Warehousing</b>	<b>129</b>
Introduction	129
The Strategic Role of Warehousing in Logistics	131
Functions of Warehousing	132
Warehouse Roles	134
Warehouse Location Issues	135
Centralized versus decentralized warehouses	135
Selecting specific sites	137
Warehousing Alternatives	139
Private warehousing	139
Contract warehousing	139
Public warehouses	139
Warehousing Strategies	140
Warehousing Concerns in Overseas Markets	141
Chapter Summary	143
Study Questions	143
<b>8 Materials Handling and Packaging</b>	<b>145</b>
Introduction	145
Basic Warehouse Design	145
Manual Versus Automated Materials Handling Systems	146
Manual warehouses	146
Automated warehouses	147
Manual versus automated: making the choice	147
Trends in Materials Handling	150
Reliability	150
Total integration	151
Flexibility and modularity	151
Upgradeability	151
Automated identification	152
Ease of use	155
Maintainability	155
Conclusions	155
Product Packaging	156
Types of packaging	156
Organizational influences on packaging	156
The role of packaging	157
Logistics packaging materials	157
Environmental issues	158
Packaging for global markets	159

Bar coding	160
Developments in packaging	161
Tradeoffs with other components of the logistics system	161
Chapter Summary	163
Study Questions	163
<b>9 Managing Logistics Information</b>	<b>166</b>
Introduction	166
The Order Processing System	167
Logistics Information Systems	168
Environmental scanning	169
LIS and information management	169
Forecasting Methods	170
Qualitative forecasts	170
Time-series methods	170
Causal methods	171
Forecasting logistics needs	172
Selecting the right forecasting technique	172
Using Information to Link a Global Logistics System Together	172
Electronic data interchange (EDI)	172
Impediments to global implementation of EDI procedures	178
Developments in Logistics Information Systems	178
The Internet and electronic commerce	179
Open-systems computer networks	180
Wireless communication	180
Multidimensional bar codes	180
Radio frequency identification (RFID) technology	180
Other advances in communications	182
Chapter Summary	182
Study Questions	183
<b>10 Inbound Logistics and Purchasing</b>	<b>185</b>
Introduction	185
The Growing Importance of Inbound Logistics	186
Inbound Logistics Activities	187
Customer service	187
Transportation	187
Inventory management	187
Warehousing and storage	188
Maintenance	188
Information management	188
Salvage and waste disposal	189
Production	189
Summary	189
Purchasing	190
Goals of purchasing	191

Purchasing tasks	191
Improving purchasing productivity	194
Organize for enhanced productivity	197
Management Techniques for Improving Materials Management	200
Chapter Summary	200
Study Questions	200
<b>11 The Global Logistics Environment</b>	<b>203</b>
Introduction	203
The Global Supply Chain	204
Changing Market Opportunities	205
Emerging nations	205
Multilateral trade organizations	205
Global sourcing	208
Cultural Issues in Logistics	208
Alternative Global Distribution Strategies	209
International Documentation	211
Customs Regulations	212
Foreign Trade Zones	214
Logistics Intermediaries and Facilitators	215
Third-Party Logistics Providers	217
Controlling the Global Logistics System	219
Chapter Summary	220
Study Questions	221
<b>12 Logistics Strategies</b>	<b>224</b>
Introduction	224
Corporate Strategic Planning	225
Formulating Logistics Strategy	226
Integrating the Logistics Channel	230
Implementing Logistics Strategies	232
Centralization of logistics activities versus decentralization	233
Third-party service providers	234
Logistics strategy and improved corporate performance	237
Future Issues That Will Affect Logistics	237
Implications for Logistics Managers	241
Chapter Summary	242
Study Questions	242
<b>13 Developing High-Quality Logistics Systems</b>	<b>245</b>
Introduction	245
Basic Quality Concepts: The Internal Perspective	246
Leadership	247
Cooperation	247
Learning	248
Process management	248

Employee outcomes	248
Organizational performances	248
Basic Quality Concepts: The External View	249
The Service Quality Model	250
Total Quality Management (TQM) in Logistics	253
Developing a Formal Quality Process	254
Quality Process Success Factors for Logistics Management	256
ISO 9001:2000 The International Quality Standard	259
The Cost of Quality	260
Chapter Summary	260
Study Questions	261
<b>14 Improving Logistics Performance</b>	<b>263</b>
Introduction	263
Improving Organizational Performance	264
Continuous and breakthrough improvements	265
Basic Tools for Improving Logistics Performance	266
Process analysis tools	266
Statistical analysis tools	268
Benchmarking	268
Activity-based costing	270
Effecting Meaningful Change	274
Logistics service quality	274
Productivity	275
Process effectiveness	276
Impediments to Improved Logistics Performance	276
Failure to adopt the customer's viewpoint	276
Lack of requisite cost data	277
Lack of broad-based management skills	278
Failure to think of logistics as a system	278
Need for cultural change within the organization	279
Creating a World-Class Logistics System	279
Chapter Summary	281
Study Questions	282
<b>15 Organizing for Logistics Effectiveness</b>	<b>284</b>
Introduction	284
Overview of Logistics Organizations	285
Building an Effective Logistics Organization	288
Centralization	288
Scope of responsibility/span of control	289
Formalization	289
Integration	289
The Role of Logistics in the Firm	289
Inter-organizational effectiveness	290
Variables Influencing Organizational Structure	291

xii CONTENTS

Organization size	292
Corporate structure	292
Corporate strategy	292
The importance of logistics	293
Corporate information technology	293
Environmental uncertainty	293
Environmental heterogeneity	294
Summary	297
Reconciling Intra- and Inter-Organizational Issues	298
Moving Towards the “Best” Organizational Structure	299
Chapter Summary	299
Study Questions	300
<i>Index</i>	303
