

LEAN LOGISTICS

MICHEL BAUDIN

**THE NUTS AND BOLTS
OF DELIVERING MATERIALS
AND GOODS**

Contents

<i>A guided tour</i>	1
PART I <i>Overview of lean logistics</i>	7
CHAPTER 1 What is logistics?.....	9
Logistics in general and in manufacturing.....	10
Alternative definitions of logistics	23
Military logistics	25
CHAPTER 2 The lean approach to logistics	27
What is “lean logistics”?	28
Objectives of lean logistics.....	28
Material flow concepts of lean logistics	31
Information flow concepts of lean logistics.....	35
Collaborative supplier/customer relationships	45
PART II <i>Dock-to-dock material flows inside the plant</i>	47
CHAPTER 3 Transportation inside the plant	49
Measuring transportation system performance	50

Types of vehicles	51
Structuring the transportation system	55
In-plant milk runs	67
CHAPTER 4 Warehousing strategies and devices.....	73
What are warehouses needed for?	74
Selecting storage devices for different needs.....	77
Types of warehouse storage devices.....	82
CHAPTER 5 Warehouse management	89
Six ways to improve warehouse visibility	90
Slot allocation and indexing.....	96
Determining how full a warehouse should be.....	101
Tracking inventory	104
Security and access control.....	106
CHAPTER 6 Warehousing materials, WIP, and finished goods	109
Incoming materials stores inside the plant.....	110
Stores for work in process and semi-finished goods.....	117
Finished goods stores	121
PART III <i>Material flow in the supply chain</i>	129
CHAPTER 7 Supplier milk runs.....	131
The supplier milk run concept.....	132
The advantages of milk runs	133
Where milk runs don't work.....	136
Using milk runs and remote suppliers	137
Details of supplier milk run operations.....	142
CHAPTER 8 Consolidation centers near the plant.....	159
Definition of a consolidation center and motivation for using one.....	160
How a consolidation center works	162
CHAPTER 9 Packaging and returnable containers.....	171
Assessing packaging needs.....	172
Choosing between disposable and returnable containers	175

Economics of returnable and disposable containers	178
Types of returnable containers	179
Factors affecting customer–supplier collaboration on returnables	183
Scope of use of returnable containers	190
Sizing the containers	193
Preparation of shipping containers.....	194
PART IV <i>Logistics information systems</i>	197
CHAPTER 10 Pull systems	199
How pull systems differ from push systems	200
Pull systems: A counterintuitive approach	201
Issuing pull signals.....	204
Pull signals in dedicated versus mixed-flow lines	207
Sizing and simulating pull loops.....	208
Relationship between pull systems and market mechanisms.....	213
How pull systems work within production control	218
Pull signals need simple protocols	220
CHAPTER 11 Manual pull signals	223
Using fixed devices.....	224
Using mobile devices you already have	227
Using physical tokens.....	230
CHAPTER 12 Hybrid and electronic pull signals	249
Kanbans and information technology	250
Toyota’s e-kanban system	252
Using kanbans with suppliers who don’t	253
The body-on-sequence system	255
Vendor managed inventory (VMI)	257
Dynamic replenishment	259
Other technology-based methods.....	261
CHAPTER 13 Kanban operating policies	265
When should a kanban be pulled?	266
Kanban rules for operators and materials handlers	267
Rules for production and materials/logistics managers	268

Other lists of kanban rules	269
CHAPTER 14 Scheduling principles	271
Decentralized scheduling	272
Leveled sequencing and its purpose	273
Rate work and response work	274
Order shuffling	274
Don't build cripples!	275
Late pegging of goods to orders	277
Emergency response	278
CHAPTER 15 Scheduling lines with setups between products	281
What are the true constraints generated by setups?	283
Using a fixed repeating sequence	287
Scheduling with timetables	287
Using kanban boards	290
Scheduling a Flexible Manufacturing System (FMS)	296
CHAPTER 16 Leveled sequencing of mixed-flow assembly	303
How leveled sequencing works with the pull system	304
Leveled sequencing method #1	305
Leveled sequencing method #2	309
CHAPTER 17 Production planning and forecasting	311
Planning objectives	312
Drilling down from monthly to daily planning	316
Forecasting	320
Involvement of sales and customer service	328
PART V <i>Business relationships in a supply network</i>	331
CHAPTER 18 Third-party logistics	333
Defining third-party logistics (3PL)	334
How 3PL affects lean logistics	335
3PL: special case of outsourcing	336
Where to use 3PL	338

CHAPTER 19 Supplier–customer relationships.....	341
Supplier–customer relationships versus in-plant logistics.....	342
Two ways to run a supplier–customer relationship.....	342
Transition to and stability of the collaborative mode	348
Conclusions	350
CHAPTER 20 Supplier support.....	353
The different types of supplier support.....	354
Toyota’s supplier support system.....	355
Supplier support outside of Toyota	358
Supplier quality assurance	363
Recommendations on providing supplier support.....	366
Recommendations on receiving supplier support.....	368
<i>Where should you go from here?</i>	371
<i>Bibliography</i>	373
Books in English	373
Books in Japanese.....	376
Books in German	376
Books in French	376
Books in Spanish	377
<i>Index</i>	379
