## Part I

### The Convergence of Process and Systems . . . . . 1

#### 1 Why We Had to Write This Book . . . . . 3

Fosdick's thesis. . . . .	3
Process reengineering: the rise... . . . .	5
...And fall and rise . . . . .	6
The need for guidance. . . . .	7
Our response . . . . .	9
What to expect . . . . .	10
References . . . . .	11

#### 2 A Brief History of Process . . . . . 13

Learning from the past . . . . .	13
The Age of the Craftworker. . . . .	14
The Age of the Factory . . . . .	15

The Age of the Specialist . . . . .	15
The downside of functional organizations . . . . .	17
Enter reengineering: 1985–1993 . . . . .	18
Exit reengineering: 1994–1995 . . . . .	19
A balanced perspective . . . . .	20
The reengineering aftermath: 1996–present . . . . .	23
Kaizen . . . . .	24
BPR and IT—joined at the hip . . . . .	26
Nirvana at last? . . . . .	26
References . . . . .	27

### **3 The Approach in a Nutshell . . . . . 29**

This chapter and beyond... . . . . .	29
<i>Why it works</i> . . . . .	30
<i>Whom it's for</i> . . . . .	31
Processes—results, not work . . . . .	32
Frameworks in general . . . . .	33
A framework for process enablers . . . . .	33
A framework for putting processes and systems in context . . . . .	35
A closer look at the three-tier architecture . . . . .	37
<i>Presentation</i> . . . . .	37
<i>Application logic</i> . . . . .	38
<i>Data management</i> . . . . .	39
Models in general . . . . .	39
The modeling techniques we employ . . . . .	40
<i>Business process: process workflow models</i> . . . . .	40
<i>Presentation: use case scenarios</i> . . . . .	41
<i>Application logic: various techniques</i> . . . . .	42
<i>Data management: data models</i> . . . . .	42
Five-tier thinking . . . . .	42
A workflow-driven methodology—the process of studying processes . . . . .	44
<i>Frame the process</i> . . . . .	44
<i>Understand the as-is process</i> . . . . .	46

*Design the to-be process* . . . . . 47  
*Analyze use cases* . . . . . 48  
 Applications of the approach . . . . . 49

**Part II**  
**Framing the Process . . . . . 51**

**4 Just What Are Processes, Anyway? . . . . . 53**

The trouble with “process” . . . . . 53  
 The trouble with terminology . . . . . 55  
     *English words—dictionary definitions* . . . . . 56  
     *Information systems terms* . . . . . 56  
 So what is a process? . . . . . 57  
     *Business process terms* . . . . . 57  
 So what? . . . . . 60  
 Business process versus function . . . . . 61  
 Other business process characteristics. . . . . 62  
     *Measurable* . . . . . 62  
     *Automation* . . . . . 63  
     *Levels* . . . . . 63  
     *Customers: internal and external* . . . . . 63  
 Closing advice . . . . . 65  
     *Processes are hidden* . . . . . 65  
     *Bigger is (usually) better* . . . . . 66  
 Putting the definition to work . . . . . 68  
 References . . . . . 69

**5 Establish the Process Boundaries . . . . . 71**

Business processes and project scope . . . . . 71  
     *The dilemma* . . . . . 72  
     *A way forward* . . . . . 73  
 Framing the process: goals . . . . . 74  
 The overall process map . . . . . 75

Identifying your processes . . . . .	76
<i>Where to start?</i> . . . . .	76
<i>Link the milestones/steps together.</i> . . . . .	78
<i>Assemble processes based on frequency and affinity.</i> . . . . .	80
<i>Name the processes</i> . . . . .	80
<i>Identify the triggering event</i> . . . . .	82
<i>Identify stakeholders and expected results</i> . . . . .	84
<i>Identify the major steps.</i> . . . . .	85
<i>Identify roles</i> . . . . .	86
<i>Develop glossary or preliminary data model</i> . . . . .	86
Choose your process . . . . .	87
<i>Divine intervention</i> . . . . .	87
<i>Analytic approach</i> . . . . .	88
References . . . . .	90

## 6 Conducting the Initial Assessment . . . . . 91

A case for action and a vision . . . . .	91
Metrics . . . . .	92
<i>How many?</i> . . . . .	93
<i>Got the time?</i> . . . . .	93
<i>Who's involved?</i> . . . . .	95
<i>Efficiency.</i> . . . . .	96
<i>Cost.</i> . . . . .	97
<i>Summary of metrics</i> . . . . .	97
Assessment by stakeholder . . . . .	97
<i>Everyone's a critic...</i> . . . . .	97
<i>Don't guess—ask!</i> . . . . .	98
<i>The customer</i> . . . . .	99
<i>The performers.</i> . . . . .	100
<i>Managers and owners</i> . . . . .	101
<i>Suppliers</i> . . . . .	101
<i>Other groups</i> . . . . .	102
Look at the process in terms of enablers . . . . .	102
<i>The workflow design</i> . . . . .	102

<i>Information technology</i> . . . . .	102
<i>Motivation and measurement.</i> . . . . .	104
<i>Human resources.</i> . . . . .	106
<i>Policies and rules</i> . . . . .	107
<i>Facilities</i> . . . . .	108
Establishing rationale and direction . . . . .	109
<i>A case for action</i> . . . . .	109
<i>A vision.</i> . . . . .	110
One poster is worth a thousand words . . . . .	112
<i>Summarizing findings</i> . . . . .	112
<i>Where to now?</i> . . . . .	114
References . . . . .	114

## **7 Considering the Environment . . . . . 115**

Why bother? . . . . .	115
<i>An example</i> . . . . .	116
<i>What we will cover</i> . . . . .	116
Mission, strategy, and goals . . . . .	117
<i>Business mission, strategy, goals</i> . . . . .	117
<i>Applying MSG to your project.</i> . . . . .	119
<i>Strategic discipline</i> . . . . .	120
<i>Strategic discipline in action</i> . . . . .	122
<i>Faster, cheaper, better, or what?</i> . . . . .	122
Beliefs and culture . . . . .	124
<i>Everything stems from beliefs</i> . . . . .	125
<i>Other cultural traits.</i> . . . . .	126
Core competencies . . . . .	128
<i>What are we really good at?</i> . . . . .	128
Some questions to get started with . . . . .	129
<i>While we're on the topic of making lists...</i> . . . . .	129
<i>Questions for establishing scope, objectives, and constraints.</i> . . . . .	129
<i>It matters!</i> . . . . .	132
References. . . . .	132

**Part III**

**Swimlane Diagrams—Nuts and Bolts . . . . . 135**

**8 Workflow Process Modeling . . . . . 137**

- Swimlane diagrams—what and why . . . . . 137
  - What is the attraction?* . . . . . 137
  - The basics* . . . . . 138
- An example—the really big telephone company . . . . . 140
  - Customer service*... . . . . 140
  - Repair service*... . . . . 141
  - Service analysis*... . . . . 141
  - Telemarketing*... . . . . 141
  - Market database research*... . . . . 141
  - RB Tel—questions raised* . . . . . 142
- Essential elements . . . . . 143
- The details. . . . . 144
  - Actors and roles* . . . . . 144
  - Process steps* . . . . . 145
  - Voluntary simplicity* . . . . . 146
  - Which steps to include?* . . . . . 148
  - Process steps—naming guidelines* . . . . . 149
  - Go with the flow* . . . . . 150
  - Branching* . . . . . 154
  - Multiple flows* . . . . . 155
  - What’s next?*. . . . . 157

**9 Managing Detail . . . . . 161**

- The curse of detail . . . . . 161
- What’s the problem? . . . . . 162
- Controlling the addition of detail . . . . . 162
  - Three levels of workflow diagrams* . . . . . 162
  - Level 1* . . . . . 163
  - Issues and observations with the level 1 diagram* . . . . . 165

<i>Can we stop now?</i> . . . . .	166
<i>Level 2</i> . . . . .	166
<i>Level 3</i> . . . . .	167
<i>How many levels to go to?</i> . . . . .	170
References. . . . .	159

**10 Questions and Difficulties . . . . . 171**

Introduction. . . . .	171
Avoiding paralysis by analysis . . . . .	172
Actors and other characters . . . . .	173
Steps and types of steps . . . . .	178
What makes it go? (inputs and outputs) . . . . .	179
Variety is the spice of life . . . . .	180
Closing arguments . . . . .	182
References. . . . .	182

**Part IV**

**Understanding the As-Is Process . . . . . 183**

**11 Techniques for Modeling the As-Is Process. . . . . 185**

Introduction. . . . .	185
Issues at the extremes . . . . .	186
Assembling the team . . . . .	188
Preparation . . . . .	190
<i>Team organization</i> . . . . .	190
<i>Scheduling</i> . . . . .	190
<i>Facilities</i> . . . . .	190
<i>Supplies.</i> . . . . .	191
The kickoff . . . . .	191
Building the handoff level diagram . . . . .	192
The five key questions. . . . .	196
One more question: “can we stop now?” . . . . .	200
Subsequent levels of detail . . . . .	201

Conclusion . . . . . 203  
References. . . . . 203

**12 Difficulties with As-Is Modeling . . . . . 205**

As-is modeling: tips, tricks, and traps . . . . . 205  
Missing participants and mystery areas. . . . . 206  
    *Case #1—you can't secure involvement* . . . . . 206  
    *Case #2—you can't arrange meetings.* . . . . . 207  
Applying and misapplying process view . . . . . 208  
How do I depict or emphasize? I'm overwhelmed . . . . . 210  
Facilitation (and interaction). . . . . 211  
Systems and whether to show them . . . . . 213  
Batch systems . . . . . 214  
Disagreement . . . . . 215  
Conclusion ✓ . . . . . 217

**13 Completing the As-Is Assessment . . . . . 219**

Introduction. . . . . 219  
Getting ready . . . . . 222  
Confirm initial assessment and goals . . . . . 222  
Capture first impressions . . . . . 223  
Decide on approach. . . . . 223  
Identify leverage points . . . . . 224  
Assessment by enablers . . . . . 226  
Assess by enabler: workflow design . . . . . 228  
Assess by enabler: information technology . . . . . 231  
Assess by enabler: motivation and measurement. . . . . 232  
Assess by enabler: human resources . . . . . 236  
Assess by enabler: policies and rules . . . . . 239  
Assess by enabler: facilities . . . . . 240  
Assess individual steps. . . . . 240  
Consolidate ideas. . . . . 241  
Confirm approach . . . . . 242  
References. . . . . 242

**Part V**

**The To-Be Process and Transition to**

**System Requirements . . . . . 243**

**14 Characterizing and Designing the To-Be Process . . 245**

Look before you leap! . . . . . 245

*Goals*. . . . . 246

*Philosophy/approach* . . . . . 246

*Key steps* . . . . . 247

*Caveats*. . . . . 248

Post and review key materials from previous phases . . . . . 249

Collect ideas—getting started. . . . . 250

Bring forward ideas generated during assessment . . . . . 250

Generate ideas that specifically address the leverage points . . . . . 251

Steal ideas by reviewing best practices . . . . . 251

*Process workflow design: actors, steps, and flow*. . . . . 253

*Application of information technology: applications, databases, computers, networks* . . . . . 254

*Motivation and measurement: “reward and punishment” schemes*. . 254

*Human resources: organizational structure, job definitions, recruitment and placement strategies, skills, and training*. . . . . 256

*Policies and rules: constraints and guidelines (whether self-imposed or external)* . . . . . 257

*Facilities design: workplace layout and equipment* . . . . . 258

Brainstorming . . . . . 258

Apply the challenge process . . . . . 259

Assess ideas in context and select . . . . . 262

Develop ideal to-be workflow . . . . . 266

Develop to-be workflow . . . . . 270

Road trip . . . . . 273

**15 Data Modeling . . . . . 275**

Data modeling—what it is, what it isn’t . . . . . 275

Basic terms and concepts . . . . . 276

A simple example. . . . . 277  
*Graphics: the entity-relationship diagram* . . . . . 278  
*The narrative component: the entity definitions* . . . . . 282  
Levels of detail . . . . . 283  
*Glossary/vocabulary*. . . . . 286  
*Conceptual data model* . . . . . 286  
*Logical data model* . . . . . 286  
The components—further guidelines and pitfalls . . . . . 287  
*Entities* . . . . . 287  
*Attributes* . . . . . 290  
*Relationships* . . . . . 292  
Starting your data model . . . . . 293  
*Starting with the glossary* . . . . . 293  
*Starting with a conceptual model* . . . . . 294  
*Starting by reverse engineering* . . . . . 295  
*From conceptual to logical* . . . . . 295  
References. . . . . 296

**16 Use Case Scenario Analysis . . . . . 297**

A time of transition . . . . . 297  
Use case concepts. . . . . 299  
Use case descriptions . . . . . 301  
Use case scenarios . . . . . 302  
Developing use cases and scenarios . . . . . 304  
Identify and describe use cases . . . . . 306  
*Discovering the use cases* . . . . . 306  
An interlude on events . . . . . 307  
Returning to use case identification . . . . . 309  
*Describing the use cases* . . . . . 310  
Prepare for use case scenario development . . . . . 311  
*Establish use case scenarios* . . . . . 313  
Develop first-pass use case scenarios. . . . . 313  
An interlude on transactions . . . . . 317  
*Why bother?* . . . . . 317

<i>Terms and definitions</i> . . . . .	318
<i>Concepts and examples</i> . . . . .	318
<i>Worth the effort?</i> . . . . .	320
<i>A few more guidelines</i> . . . . .	321
<i>Discovery and documentation</i> . . . . .	321
<i>Want more?</i> . . . . .	322
Develop second-pass use case scenarios . . . . .	324
Closing thoughts . . . . .	325
<i>More uses of use cases</i> . . . . .	325
<i>But why do they work so well?</i> . . . . .	326
References. . . . .	327
<b>Afterword</b> . . . . .	<b>329</b>
<b>About the Authors.</b> . . . . .	<b>331</b>
<b>Index.</b> . . . . .	<b>333</b>
