

Microbiological Methods for Assessing Soil Quality

Edited by
J. Bloem, D.W. Hopkins and A. Benedetti

CABI Publishing

Contents

Editors	ix
Abbreviations	xi
Part I: Approaches to Defining, Monitoring, Evaluating and Managing Soil Quality	1
1 Introduction	3
<i>Anna Benedetti and Oliver Dilly</i>	
2 Defining Soil Quality	15
<i>Richard G. Burns, Paolo Nannipieri, Anna Benedetti and David W. Hopkins</i>	
3 Monitoring and Evaluating Soil Quality	23
<i>Jaap Bloem, Anton J. Schouten, Søren J. Sørensen, Michiel Rutgers, Adri van der Werf and Anton M. Breure</i>	
4 Managing Soil Quality	50
<i>Michael Schloter, Jean Charles Munch and Fabio Tittarelli</i>	
5 Concluding Remarks	63
<i>Anna Benedetti, Philip C. Brookes and James M. Lynch</i>	
Part II: Selected Methods	71
6 Microbial Biomass and Numbers	73
6.1 Estimating Soil Microbial Biomass	73
<i>Andreas Fließbach and Franco Widmer</i>	

6.2	Microbial Biomass Measurements by Fumigation–Extraction	77
	<i>Philip C. Brookes and Rainer Georg Joergensen</i>	
6.3	Substrate-induced Respiration	84
	<i>Heinrich Höper</i>	
6.4	Enumeration and Biovolume Determination of Microbial Cells	93
	<i>Manfred Bölker, Jaap Bloem, Klaus Meiners and Rolf Möller</i>	
7	Soil Microbial Activity	114
7.1	Estimating Soil Microbial Activity	114
	<i>Oliver Dilly</i>	
7.2	Soil Respiration	117
	<i>Mikael Pell, John Stenström and Ulf Granhall</i>	
7.3	Soil Nitrogen Mineralization	127
	<i>Stefano Canali and Anna Benedetti</i>	
7.4	Nitrification in Soil	136
	<i>Annette Bollmann</i>	
7.5	Thymidine and Leucine Incorporation to Assess Bacterial Growth Rate	142
	<i>Jaap Bloem and Popko R. Bolhuis</i>	
7.6	N₂O Emissions and Denitrification from Soil	150
	<i>Ulrike Sehy, Michael Schlöter, Hermann Bothe and Jean Charles Munch</i>	
7.7	Enzyme Activity Profiles and Soil Quality	158
	<i>Liz J. Shaw and Richard G. Burns</i>	
8	Soil Microbial Diversity and Community Composition	183
8.1	Estimating Soil Microbial Diversity and Community Composition	183
	<i>Jan Dirk van Elsas and Michiel Rutgers</i>	
8.2	Soil Microbial Community Fingerprinting Based on Total Community DNA or RNA	187
	<i>Jan Dirk van Elsas, Eva M. Top and Kornelia Smalla</i>	
8.3	Phospholipid Fatty Acid (PLFA) Analyses	204
	<i>Ansa Palojarvi</i>	
8.4	Substrate Utilization in Biolog™ Plates for Analysis of CLPP	212
	<i>Michiel Rutgers, Anton M. Breure and Heribert Insam</i>	
9	Plant–Microbe Interactions and Soil Quality	228
9.1	Microbial Ecology of the Rhizosphere	228
	<i>Philippe Lemanceau, Pierre Offre, Christophe Mougel, Elisa Gamalero, Yves Dessaux, Yvan Moënne-Loccoz and Graziella Berta</i>	

9.2 Nodulating Symbiotic Bacteria and Soil Quality	231
<i>Alain Hartmann, Sylvie Mazurier, Dulce N. Rodríguez-Navarro, Francisco Temprano Vera, Jean-Claude Cleyet-Marel, Yves Prin, Antoine Galiana, Manuel Fernández-López, Nicolás Toro and Yvan Moëgne-Loccoz</i>	
9.3 Contribution of Arbuscular Mycorrhiza to Soil Quality and Terrestrial Ecotoxicology	248
<i>Silvio Gianinazzi, Emmanuelle Plumey-Jacquot, Vivienne Gianinazzi-Pearson and Corinne Leyval</i>	
9.4 Concepts and Methods to Assess the Phytosanitary Quality of Soils	257
<i>Claude Alabouvette, Jos Raaijmakers, Wietse de Boer, Régina Notz, Geneviève Défago, Christian Steinberg and Philippe Lemanceau</i>	
9.5 Free-living Plant-beneficial Microorganisms and Soil Quality	270
<i>Yvan Moëgne-Loccoz, Sheridan L. Woo, Yaacov Okon, René Bally, Matteo Lorito, Philippe Lemanceau and Anton Hartmann</i>	
10 Census of Microbiological Methods for Soil Quality	296
<i>Oliver Dilly</i>	
Index	301
