K. Suresh Chandra—A View of his Career	xxv

Part I. General

1 Statistical Proofs of Some Matrix Theorems	
<i>C. R. Rao</i>	3
1.1 Introduction, 3	
1.2 Some Basic Results, 5	
1.3 Cauchy-Schwarz (CS) and Related Inequalities, 8	
1.4 Schur and Kronecker Product of Matrices, 10	
1.5 Results Based on Fisher Information, 11	
1.5.1 Properties of Information, 11	
1.5.2 Some Applications, 13	
1.6 Milne's Inequality, 14	
1.7 Convexity of Some Matrix Functions, 16	
1.8 Inequalities on Harmonic Mean and Parallel Sum of Matrices, 19	
1.9 Inequalities on the Elements of an Inverse Matrix, 21	
1.10 Carlen's Superadditivity of Fisher Information, 22	
1.11 Inequalities on Principal Submatrices of an nnd Matrix, 23	
References, 24	

Part II. Distribution Theory

2 Distributions in Given Parametric Families Most Nearly Compatible with Given Conditional Information	
<i>B. C. Arnold and D. V. Gokhale</i>	29
2.1 Introduction, 30	

2.2 Compatible Conditions, 30	
2.3 Measures of Incompatibility, 32	
2.4 Compatibility/Incompatibility with Given Parametric Families, 34	
2.5 Compatibility Given Partial Knowledge of a and b , 40	
2.6 Compatibility with Given Parametric Families of Densities Given Partial Knowledge of a and b , 42	
2.7 Remarks, 44	
References, 45	
3 Some Properties of the Matrix Generalized Inverse Gaussian Distribution	
<i>V. Seshadri</i>	47
3.1 Introduction, 47	
3.2 Wishart Connections, 49	
3.3 A Conjugate Family for the Multivariate Normal Law, 53	
References, 56	
4 On a General Multivariate Dirichlet Density and its Applications	
<i>A. M. Mathai</i>	57
4.1 Introduction, 57	
4.2 A General Density, 58	
4.3 Applications to Order Statistics, 62	
4.4 Survival Functions, 64	
4.5 Reliability Analysis, 65	
References, 66	
Part III. Inference	
5 Estimation in a Gompertzian Stochastic Model	
<i>T. V. Ramanathan and B. R. Bhat</i>	71
5.1 Introduction, 71	
5.2 Gompertzian Stochastic Model and Ornstein-Uhlenbeck Process, 73	
5.3 Estimation of Parameters of a GSM, 74	
5.3.1 Maximum Likelihood Estimation, 74	
5.3.2 Estimating Function Approach, 74	
5.3.3 Simulation Results, 76	
5.3.4 Asymptotics, 77	
5.4 Concluding Remarks, 78	
References, 78	

6 Simultaneous Equivariant Estimation of the Parameters of Uniform Models Based on Progressive Type II Right Censored Sample <i>T. Leo Alexander and B. Chandrasekar</i>	81
6.1 Introduction, 81	
6.2 Preliminaries, 82	
6.3 Location Model, 82	
6.4 Scale Model, 88	
6.5 Location-Scale Model, 92	
References, 98	
7 Best Unbiased Predictor with Respect to Convex Loss Function <i>S. Thobias and T. M. Durairajan</i>	101
7.1 Introduction, 101	
7.2 Best Linear Unbiased Estimator and Predictor in Location-Scale Semi-Parametric Family, 102	
7.3 Best Unbiased Estimator and Predictor with Respect to Convex Loss Function, 105	
References, 110	
8 Limits of Bayes Estimates of Estimable Parameters <i>H. Yamato</i>	111
8.1 Introduction, 111	
8.2 Expectation of Random Functionals, 113	
8.3 A Linear Combination of U-statistics, 116	
8.4 Deficiencies, 118	
8.5 Asymptotic Properties, 123	
8.6 Asymptotic Distribution for Degenerate Kernel, 125	
8.7 Berry-Esseen Bounds, 127	
References, 129	
9 Some Exact Results in Sequential Fixed-width Interval Estimation of Location Parameter of Exponential Distribution <i>Z. Govindarajulu</i>	133
9.1 Introduction, 133	
9.2 Notation and Assumptions, 134	
9.3 Fixed-width Confidence Interval (CI) for θ when σ is Unknown, 135	
References, 144	
10 Selecting the Normal Population with the Largest Mean: A Restricted Subset	

Selection Rule	
<i>L. Hsu and S. Panchapakesan</i>	145
10.1 Introduction, 145	
10.2 PCS and its Infimum over $\Omega(\delta^*)$ F for Rule R_{HF} , 147	
10.2.1 Comparison of R_{HF} with Fixed-size Subset Selection Procedure, 151	
10.3 Properties of R_{HF} , 152	
10.4 Expected Size of the Selected Subset for Rule R_{HF} , 153	
10.4.1 Comparison of R_{HF} and R_{GS} , 154	
10.5 Concluding Remarks, 155	
References, 156	
11 Estimation of the Number of Signals in the Uniform Linear Array Model	
<i>N. Kannan</i>	163
11.1 Introduction, 163	
11.2 Problem Formulation, 164	
11.3 Estimation of M , 167	
11.3.1 Information Theoretic Criteria, 168	
11.4 Spatial Smoothing, 169	
11.5 Spatial Smoothing Algorithm, 171	
11.6 Simulation, 172	
11.7 Conclusions, 173	
References, 173	
12 Quadratic Discriminant Function: Estimation of Probability of Misclassification	
<i>A. Dorvlo and P. S. R. S. Rao</i>	181
12.1 Introduction, 181	
12.2 Estimators for the Probability of Misclassification, 183	
12.3 Comparison of the Estimators, 184	
References, 188	
 Part IV. Outliers and Robust Inference	
 13 Outlier-Robust Estimation of the Mean of an Exponential Distribution Under the Presence of Multiple Outliers	
<i>N. Balakrishnan and V. Barnett</i>	191
13.1 Introduction, 191	
13.2 New Linear Estimator, 192	
13.3 Comparisons, 193	

13.4 Illustrative Examples, 194	
References, 195	
Appendix, 195	
14 The Hermitian Estimator of the Quantile Function: Implications for the M-Estimation of Location	
<i>G. S. Mudholkar, A. D. Hutson and C. E. Marchetti</i>	203
14.1 Introduction, 204	
14.2 Hermite Quantile Estimator, 205	
14.3 Expectation and Variance, 207	
14.4 Hermitian Median and Quartiles, 209	
14.5 An Anomaly, 210	
14.6 A Variance Periodicity Inherited by Some Robust Estimators, 213	
14.7 Conclusions, 218	
References, 218	
Appendix, 221	

Part V. Design of Experiments

15 Discrete Structure of Group Divisible Designs with $r = \lambda_1 + 2$ and $n = 4$	
<i>T. Adachi, S. Kageyama and M. Jimbo</i>	233
15.1 Introduction, 233	
15.2 Main Theorem and Examples, 235	
15.3 Proof of the Main Theorem, 237	
15.3.1 Incidence Structure of Each Group, 237	
15.3.2 Nonexistence of Pattern (ii), 239	
15.3.3 Nonexistence of Pattern (iii), 242	
15.3.4 Nonexistence of Pattern (v), 245	
15.3.5 Proof of the Main Theorem, 248	
References, 253	
16 E-Optimality and Group Divisible Designs	
<i>D. K. Ghosh and A. Shah</i>	255
16.1 Introduction, 255	
16.2 Preliminary Result, 257	
16.3 Method of Obtaining E-Optimal GD Design, 258	
References, 259	
17 Optimum and Restricted-Optimum Designs for Multivariate Time-Series Experiments	
<i>J. S. Williams and H. K. Iyer</i>	261
17.1 Introduction, 261	

17.2	The Statistical Model, 263	
17.3	A Circulant Approximation For V , 264	
17.4	Designs with Optimum Properties, 265	
17.5	An Algorithm for the Computation of Restricted-Optimum Designs when $r \geq 2$, $s \geq 1$, 269	
17.6	Numerical Study for $r = 2$, $s = 1$, $m \geq 0$ and $N = 10$, 272	
	References, 279	
18	Interval Estimation of Variance Components in Trialallel Model	
	<i>T. Anbupalam, M. R. Srinivasan and K. N. Ponnuswamy</i>	281
18.1	Introduction, 281	
18.2	Trialallel Model, 282	
18.3	Confidence Intervals for the Functions of Genetic Parameters, 287	
18.4	Satterthwaite Method, 289	
18.5	Simulation, 290	
	References, 299	
	Appendix, 300	
19	Improved Estimators of Variance Components in Diallel Model	
	<i>S. Natarajan</i>	303
19.1	Introduction, 303	
19.2	Diallel Model and ANOVA Estimators, 304	
19.3	Improvement of ANOVA Estimators, 306	
19.4	Numerical Results, 308	
	References, 310	
 Part VI. Survival Analysis and Reliability		
20	Analysis of Incomplete Data in Presence of Dependent Competing Risks	
	<i>D. Kundu and S. Basu</i>	313
20.1	Introduction, 313	
20.2	Problem Formulation and Different Notations, 315	
20.3	Exponential Failure Distribution: Point Estimation, 317	
20.4	Exponential Failure Distribution: Asymptotic Confidence Intervals, 319	
20.5	Weibull Failure Distribution, 320	
	20.5.1 Estimation of the Parameters, 320	
	20.5.2 Confidence Intervals, 322	

20.6 Numerical Experiments, 323	
20.7 Data Analysis, 325	
20.8 Conclusions, 327	
References, 328	
21 Reliability Modelling in Bivariate Pearson System	
<i>N. Unnikrishnan Nair and S. M. Sunoj</i>	333
21.1 Introduction, 333	
21.2 Reliability Measures in the Bivariate Case, 334	
21.2 Bivariate Pearson System, 335	
21.4 Characterization, 336	
21.5 Special Cases, 337	
References, 338	
Part VII. Applied Probability	
22 A Continuous Review Perishable Inventory System with Poisson Demand and Partial Backlogging	
<i>G. Arivarignan and C. Elango</i>	343
22.1 Introduction, 343	
22.2 Problem Formulation and Analysis, 344	
22.3 Special Cases, 349	
22.4 System Performance Measures, 350	
22.4.1 Mean Inventory Level, 350	
22.4.2 Mean Back Order Level, 350	
22.4.3 Shortage Rate, 351	
22.4.4 Reorder Rates, 351	
22.5 Optimal Cost Analysis, 351	
22.6 Numerical Illustrations, 352	
References, 354
