

The Ecology of SEEDS

Michael Fenner
and Ken Thompson

CAMBRIDGE

Contents

List of boxes page viii

Preface ix

- 1 Life histories, reproductive strategies and allocation 1**
 - 1.1 Sexual vs. asexual reproduction in plants 1
 - 1.2 Life histories and survival schedules 3
 - 1.3 Variability of seed crops 12
 - 1.4 The cost of reproduction 16
 - 1.5 Reproductive allocation and effort 20
 - 1.6 Seed size and number 23
 - 1.7 Phenotypic variation in seed size 29
- 2 Pre-dispersal hazards 32**
 - 2.1 Fruit and seed set 32
 - 2.2 Incomplete pollination 33
 - 2.3 Ovule abortion 34
 - 2.4 Resource limitation 39
 - 2.5 Pre-dispersal seed predation 40
- 3 Seed dispersal 47**
 - 3.1 Wind dispersal 47
 - 3.2 Dispersal by birds and mammals 51
 - 3.3 Myrmecochory 60
 - 3.4 Water and ballistic dispersal 62
 - 3.5 Man, his livestock and machinery 63
 - 3.6 Evolution of dispersal 67
 - 3.7 Some final questions 72

4 Soil seed banks 76

- 4.1 Seed banks in practice 78
- 4.2 Dormancy and seed size 80
- 4.3 Predicting seed persistence; hard seeds 82
- 4.4 Seed-bank dynamics 86
- 4.5 Serotiny 89
- 4.6 Ecological significance of seed banks 89

5 Seed dormancy 97

- 5.1 Types of seed dormancy 97
- 5.2 The function of seed dormancy 98
- 5.3 Defining dormancy 99
- 5.4 Microbes and seed dormancy 103
- 5.5 Effects of parental environment on dormancy 104

6 Germination 110

- 6.1 Temperature and germination 110
- 6.2 Responses of seeds to light 116
- 6.3 Water availability during germination 121
- 6.4 The soil chemical environment 123
- 6.5 Effects of climate change 131

7 Post-dispersal hazards 136

- 7.1 Post-dispersal predation 136
- 7.2 Loss to pathogens 140
- 7.3 Fatal germination at depth 141
- 7.4 Loss of viability with age 143

8 Seedling establishment 145

- 8.1 Early growth of seedlings 145
- 8.2 Seedling morphology 146
- 8.3 Relative growth rate 148
- 8.4 Seedling mineral requirements 152
- 8.5 Factors limiting establishment 155
- 8.6 Mycorrhizal inoculation of seedlings 159
- 8.7 Facilitation 160
- 8.8 Plasticity 161

9 Gaps, regeneration and diversity 163

- 9.1 Gaps, patches and safe sites 163
- 9.2 'Gaps' difficult to define and detect 164

9.3 Limitations to recruitment in gaps 167

9.4 Microtopography of soil surface 172

9.5 Gaps and species diversity 176
