

# ALLELOPATHY

---

## FROM MOLECULES TO ECOSYSTEMS

Edited by  
Manuel Reigosa & Nuria Pedrol

## **CONTENTS**

<b>Preface.....</b>	<b>v</b>
<b>Acknowledgments .....</b>	<b>vii</b>
<b>The physiology of allelochemical action:</b>	
<b>clues and views .....</b>	<b>1</b>
F. A. Einhellig	
<b>Physiological basis for allelochemical action of ferulic acid.....</b>	<b>25</b>
M.N.V. Prasad and S. Rama Devi	
<b>Photosynthetic functions of leaves</b>	
<b>affected by the bibenzyl batatasin-III .....</b>	<b>45</b>
A. Wallstedt, S.L. Dubé and M.-C. Nilsson	
<b>Allelopathic concentrations of coumarins and other phenolics</b>	
<b>under stress conditions,</b>	
<b>and their histological localization .....</b>	<b>59</b>
A.M. Zobel, C. Silva, J. Lynch, S.A. Brown, M. Kozyra, A. Miazga, K.	
Głowniak, M. Furmanowa, K. Wierzchowska-Renke, M. Kuraś and D.	
Białyńska	
<b>The role of caffeine in the production decline</b>	
<b>due to autotoxicity in coffee and tea plantations .....</b>	<b>71</b>
Ana L. Anaya, G. R. Waller, P. Okinda Owuor, J. Friedman, Ch.-H.	
Chou, T. Suzuki, J. F. Arroyo-Estrada and R. Cruz-Ortega.	

<b>Fescue ecology, physiology and allelopathy: A case study .....</b>	<b>93</b>
C. Bertin and L. A. Weston	
<b>Ecophysiological roles of selected lichen secondary compounds.....</b>	<b>113</b>
J. G. Romagni, N.P.D. Nanayakkara, R. Rosell, and F. E. Dayan	
<b>Phenolic compounds from olive oil mill wastewater against the “tricky germination” of two worst weeds.....</b>	<b>129</b>
G. Aliotta, G. Cafiero and A. Fiorentino	
<b>Strategies for research in applied aspects of allelopathy .....</b>	<b>139</b>
S. O. Duke, A. Rimando, B. Scheffler, and F. E. Dayan	
<b>Plants as sources of natural herbicides against branched broomrape (<i>Orobanche ramosa</i> L.) .....</b>	<b>153</b>
J. R. Qasem	
<b>Allelochemicals as herbicides.....</b>	<b>183</b>
S. O. Duke, B. E. Scheffler and F. E. Dayan	
<b>Towards utilization of allelopathy: the rice example.....</b>	<b>197</b>
M. Olofsson, L. Bach Jensen, R. Pamplona, D. Navarez, S.-b. Lee, and S. Pheng	

<b>Crop allelopathy for weed management in sustainable agriculture .....</b>	<b>209</b>
S. S. Narwal	
<b>Stress and allelopathy .....</b>	<b>231</b>
M. J. Reigosa, N. Pedrol, A. M. Sánchez-Moreiras and L. González	
<b>Allelopathic interaction in forest ecosystems.....</b>	<b>257</b>
F. Pellissier, C. Gallet and X.C. Souto	
<b>Multifaceted approach to study allelochemicals in an ecosystem.....</b>	<b>271</b>
Inderjit	
<b>Secondary metabolites as allelochemicals in Plant defence against microorganisms of the phyllosphere .....</b>	<b>277</b>
K. Karamanolis	
<b>On the question of paradigm in the science of allelopathy .....</b>	<b>289</b>
A.U. Mallik	
<b>Trends in allelopathy research over six-year period analysis (1995-2000) .....</b>	<b>299</b>
Emilio V. Carral Vilariño	
<b>Cluster analysis, a valuable tool for allelopathic SAR studies? .....</b>	<b>305</b>
F. A. Macías, R. F. Velasco, V. M. I. Viñolo, D. Castellano, J. C. G. Galindo and J. M. G. Molinillo
