CONTENTS

<i>Foreword</i>	<i>v</i>	◆	<i>Contributors</i>	<i>vii</i>
<i>Preface</i>	<i>x</i>	◆	<i>Acknowledgments</i>	<i>xii</i>

PART I	Introduction to Clinical Exercise Physiology	
Chapter 1	Introduction	1
Chapter 2	Behavioral Approaches to Physical Activity Promotion ..	11
Chapter 3	Legal Considerations	25
Chapter 4	General Evaluation and Examination Skills	41
Chapter 5	Pharmacotherapy	59
Chapter 6	Graded Exercise Testing	75
Chapter 7	General Exercise Prescription Development	103
PART II	Endocrinology and Metabolic Disorders	
Chapter 8	Diabetes	129
Chapter 9	Obesity	153
Chapter 10	Hyperlipidemia and Dyslipidemia	169
Chapter 11	End-Stage Renal Disease	185
PART III	Cardiovascular Diseases	
Chapter 12	Myocardial Infarction	201
Chapter 13	Revascularization of the Heart	227
Chapter 14	Valvular Heart Disease	243
Chapter 15	Chronic Heart Failure	261
Chapter 16	Hypertension	281
Chapter 17	Peripheral Arterial Disease	297
Chapter 18	Pacemakers and Internal Cardiac Defibrillators	321

PART IV Diseases of the Respiratory System

Chapter 19	Chronic Obstructive Pulmonary Disease	339
Chapter 20	Asthma	367
Chapter 21	Cystic Fibrosis	381

PART V Oncology and the Immune System

Chapter 22	Cancer	403
Chapter 23	Human Immunodeficiency Virus	423

PART VI Disorders of Bones and the Joints

Chapter 24	Arthritis	443
Chapter 25	Osteoporosis	465
Chapter 26	Nonspecific Low Back Pain	483

PART VII Selected Neuromuscular Disorders

Chapter 27	Spinal Cord Injury	503
Chapter 28	Multiple Sclerosis	527

PART VIII Special Populations

Chapter 29	Children	543
Chapter 30	The Elderly	571
Chapter 31	Female-Specific Issues	589
