

# MECHANICAL VIBRATION

WILLIAM J. PALM III

# Contents

---

Preface v

Acknowledgments x

## **1. Introduction To Mechanical Vibration 1**

---

- 1.1 Introduction 2
- 1.2 Descriptions of Vibrational Motion 3
- 1.3 Spring Elements 11
- 1.4 Damping Elements 26
- 1.5 Parameter Estimation 36
- 1.6 MATLAB Applications 45
- 1.7 Chapter Review 48
- Problems 48

## **2. Models with One Degree of Freedom 59**

---

- 2.1 Kinematics and Degrees of Freedom 60
- 2.2 Plane Motion of a Rigid Body 67
- 2.3 Work-Energy Methods 77
- 2.4 Impulse-Momentum Methods 82
- 2.5 Equivalent Mass and Inertia 87
- 2.6 Systems with Spring Elements 96
- 2.7 Chapter Review 102
- Problems 103

## **3. Free Response with a Single Degree of Freedom 115**

---

- 3.1 First-Order Response 116
- 3.2 Free Undamped Vibration 120
- 3.3 Rayleigh's Method 131
- 3.4 Free Vibration with Viscous Damping 135
- 3.5 Analysis of the Characteristic Roots 144
- 3.6 Stability 155
- 3.7 Vibration Models with Viscous Damping 160
- 3.8 Free Vibration with Coulomb Damping 167
- 3.9 The MATLAB ode Solvers 170
- 3.10 Introduction to Simulink 174
- 3.11 Chapter Review 184
- Problems 185

## **4. Harmonic Response with a Single Degree of Freedom 203**

---

- 4.1 Solution for the Harmonic Response 204
- 4.2 Resonance and Bandwidth 217

4.3	Base Excitation	225
4.4	Rotating Unbalance	231
4.5	Critical Speeds of Rotating Shafts	234
4.6	Equivalent Damping	237
4.7	Forced Vibration with Coulomb Damping	243
4.8	Nonlinear Response	245
4.9	Frequency Response with MATLAB	253
4.10	Simulink Applications	258
4.11	Chapter Review	268
	Problems	269
<hr/>		
<b>5.</b>	<b>General Forced Response</b>	<b>277</b>
5.1	Response to General Periodic Inputs	278
5.2	The Laplace Transform	288
5.3	Forced Response from the Laplace Transform	294
5.4	Additional Response Examples	310
5.5	Pulse and Impulse Response	325
5.6	MATLAB and the Laplace Transform	336
5.7	MATLAB Applications	339
5.8	Simulink Applications	347
5.9	Chapter Review	349
	Problems	350
<hr/>		
<b>6.</b>	<b>Two-Degrees-of-Freedom Systems</b>	<b>362</b>
6.1	Models of Two-Degree-of-Freedom Systems	363
6.2	Lagrange's Equations	374
6.3	Modes and System Response	378
6.4	Harmonic Response	386
6.5	General Forced Response	389
6.6	Nodes and Modal Response	394
6.7	Root Locus Analysis with MATLAB	399
6.8	Response Analysis with MATLAB	405
6.9	Simulink Applications	410
6.10	Chapter Review	414
	Problems	415
<hr/>		
<b>7.</b>	<b>Vibration Suppression and Control</b>	<b>425</b>
7.1	Acceptable Vibration Levels	426
7.2	Sources of Vibration	430
7.3	Isolator Design for Fixed-Base Systems	433
7.4	Isolation with Base Motion	451
7.5	Dynamic Vibration Absorbers	460
7.6	Active Vibration Control	469
7.7	MATLAB Applications	475

7.8	Chapter Review	477
	Problems	478
<b>8.</b>	<b>Matrix Methods for Multi-Degree of Freedom Systems</b>	<b>486</b>
8.1	Matrix Form of the Equations of Motion	487
8.2	Mode Shapes and Eigenvalue Problems	498
8.3	Modal Analysis	509
8.4	Effects of Damping	522
8.5	MATLAB Applications	526
8.6	Simulink Applications	536
8.7	Chapter Review	541
	Problems	541
<b>9.</b>	<b>Vibration Measurement and Testing</b>	<b>554</b>
9.1	System Identification	555
9.2	Transform Analysis of Signals	562
9.3	Random Processes	571
9.4	Spectral Analysis	572
9.5	Data Acquisition and Signal Processing	586
9.6	MATLAB Applications	590
9.7	Simulink Applications	595
9.8	Chapter Review	595
	Problems	596
<b>10.</b>	<b>Distributed Systems</b>	<b>601</b>
10.1	Introduction	602
10.2	Solution of the Wave Equation	605
10.3	Separation of Variables	609
10.4	Transverse Vibrations of Beams	619
10.5	MATLAB Applications	625
10.6	Chapter Review	628
	Problems	629
<b>11.</b>	<b>Dynamic Finite Element Analysis</b>	<b>633</b>
11.1	Bar Element	635
11.2	Models with Multiple Bar Elements	640
11.3	Consistent and Lumped-Mass Matrices	644
11.4	Analysis of Trusses	646
11.5	Torsional Elements	657
11.6	Beam Elements	661
11.7	MATLAB Applications	671
11.8	Chapter Review	675
	Problems	676

**Appendix A Introduction to MATLAB**

---

Appendix A can be found on the following website: <http://www.wiley.com/college/palm>.

- A.1 MATLAB Interactive Sessions
- A.2 Computing with MATLAB
- A.3 Working with Files
- A.4 Operators, Conditional Statements, and Loops
- A.5 The MATLAB Help System

---

**Appendix B Numerical Solution Methods 685**

---

**Appendix C Mechanical Properties of Common Materials 693**

---

**References 695**

**Index 697**
