

Water Treatment Made Simple

FOR OPERATORS

Darshan Singh Sarai, PhD

CONTENTS

Preface	vii
1 Introduction	1
2 Water Sources	19
3 Water Treatment Laboratory	33
4 Pretreatment	49
5 Coagulation and Flocculation	57
6 Sedimentation	63
7 Softening	73
8 Stabilization	82
9 Filtration	94
10 Disinfection	113
11 Taste and Odor Control	133
12 Fluoridation	142
13 Water Transmission	146
14 Hydraulics	165

vi **CONTENTS**

15	Mathematics	173
16	Chemistry	188
17	Microbiology	205
	Appendix A Information Sources	224
	Appendix B CT Values	226
	Appendix C Chemicals Used in Water Treatment	241
	Appendix D Chemical Reactions in Water Treatment	243
	Glossary	245
	References	255
	Index	257
