SECTION I Introduction to Digital Signal and Image Processing

| | | |
|------------------|--|----|
| Chapter 1 | Signals and Biomedical Signal Processing | 3 |
| 1.1 | Introduction and Overview | 3 |
| 1.2 | What Is a “Signal”? | 3 |
| 1.3 | Analog, Discrete, and Digital Signals | 4 |
| 1.3.1 | Analog Signals | 4 |
| 1.3.2 | Discrete Signals | 4 |
| 1.3.3 | Digital Signals | 5 |
| 1.4 | Processing and Transformation of Signals | 7 |
| 1.5 | Signal Processing for Feature Extraction | 8 |
| 1.6 | Some Characteristics of Digital Images | 9 |
| 1.6.1 | Image Capturing | 9 |
| 1.6.2 | Image Representation | 9 |
| 1.6.3 | Image Histogram | 11 |
| 1.7 | Summary | 12 |
| 1.8 | Problems | 13 |
| Chapter 2 | Fourier Transform | 15 |
| 2.1 | Introduction and Overview | 15 |
| 2.2 | One-Dimensional Continuous Fourier Transform | 15 |
| 2.2.1 | Properties of One-Dimensional Fourier Transforms | 24 |
| 2.2.1.1 | Signal Shift | 24 |
| 2.2.1.2 | Convolution | 25 |
| 2.2.1.3 | Linear Systems Analysis | 25 |
| 2.2.1.4 | Differentiation | 27 |
| 2.2.1.5 | Scaling Property | 27 |
| 2.3 | Sampling and NYQUIST Rate | 28 |
| 2.4 | One-Dimensional Discrete Fourier Transform | 29 |
| 2.4.1 | Properties of the DFT | 29 |
| 2.5 | Two-Dimensional Discrete Fourier Transform | 32 |
| 2.6 | Filter Design | 35 |
| 2.7 | Summary | 38 |
| 2.8 | Problems | 38 |
| Note | | 40 |

| | | |
|------------------|--|-----------|
| Chapter 3 | Image Filtering, Enhancement, and Restoration | 41 |
| 3.1 | Introduction and Overview | 41 |
| 3.2 | Point Processing | 42 |
| 3.2.1 | Contrast Enhancement | 42 |
| 3.2.2 | Bit-Level Slicing | 45 |
| 3.2.3 | Histogram Equalization | 48 |
| 3.3 | Mask Processing: Linear Filtering in the Space Domain | 52 |
| 3.3.1 | Lowpass Filters | 52 |
| 3.3.2 | Median Filters | 54 |
| 3.3.3 | Sharpening Spatial Filters | 59 |
| 3.3.3.1 | Highpass Filters | 59 |
| 3.3.3.2 | High-Boost Filters | 60 |
| 3.3.3.3 | Derivative Filters | 63 |
| 3.4 | Frequency Domain Filtering | 66 |
| 3.4.1 | Smoothing Filters in the Frequency Domain | 66 |
| 3.4.1.1 | Ideal Lowpass Filters | 66 |
| 3.4.1.2 | Butterworth Lowpass Filters | 67 |
| 3.4.2 | Sharpening Filters in the Frequency Domain | 68 |
| 3.4.2.1 | Ideal Highpass Filters | 68 |
| 3.4.2.2 | Butterworth Highpass Filters | 68 |
| 3.5 | Summary | 68 |
| 3.6 | Problems | 69 |
| | Notes | 70 |
| | | |
| Chapter 4 | Edge Detection and Segmentation of Images | 71 |
| 4.1 | Introduction and Overview | 71 |
| 4.2 | Edge Detection | 71 |
| 4.2.1 | Sobel Edge Detection | 71 |
| 4.2.2 | Laplacian of Gaussian Edge Detection | 74 |
| 4.2.3 | Canny Edge Detection | 75 |
| 4.3 | Image Segmentation | 78 |
| 4.3.1 | Point Detection | 79 |
| 4.3.2 | Line Detection | 81 |
| 4.3.3 | Region and Object Segmentation | 82 |
| 4.3.3.1 | Region Segmentation Using Luminance Thresholding | 83 |
| 4.3.3.2 | Region Growing | 84 |
| 4.3.3.3 | Quad-Trees | 85 |
| 4.4 | Summary | 86 |
| 4.5 | Problems | 86 |
| | | |
| Chapter 5 | Wavelet Transform | 89 |
| 5.1 | Introduction and Overview | 89 |
| 5.2 | From Fourier Transform to Short-Time Fourier Transform | 89 |

| | | |
|-------|--|-----|
| 5.3 | One-Dimensional Continuous Wavelet Transform..... | 95 |
| 5.4 | One-Dimensional Discrete Wavelet Transform..... | 98 |
| 5.4.1 | Discrete Wavelet Transform on Discrete Signals | 100 |
| 5.5 | Two-Dimensional Wavelet Transform | 103 |
| 5.5.1 | Two-Dimensional Discrete Wavelet Transform | 104 |
| 5.6 | Main Applications of the DWT..... | 107 |
| 5.6.1 | Filtering and Denoising..... | 107 |
| 5.6.2 | Compression | 108 |
| 5.7 | Discrete Wavelet Transform in MATLAB..... | 108 |
| 5.8 | Summary..... | 109 |
| 5.9 | Problems..... | 109 |
| | Notes..... | 110 |

Chapter 6 Other Signal and Image Processing Methods 111

| | | |
|-------|--|-----|
| 6.1 | Introduction and Overview | 111 |
| 6.2 | Complexity Analysis..... | 111 |
| 6.2.1 | Signal Complexity and Signal Mobility | 112 |
| 6.2.2 | Fractal Dimension..... | 113 |
| 6.2.3 | Wavelet Measures | 114 |
| 6.2.4 | Entropy..... | 114 |
| 6.3 | Cosine Transform..... | 114 |
| 6.4 | Introduction to Stochastic Processes | 118 |
| 6.4.1 | Statistical Measures for Stochastic Processes..... | 119 |
| 6.4.2 | Stationary and Ergodic Stochastic Processes..... | 120 |
| 6.4.3 | Correlation Functions and Power Spectra..... | 122 |
| 6.5 | Introduction to Information Theory | 126 |
| 6.5.1 | Entropy..... | 126 |
| 6.5.2 | Data Representation and Coding..... | 127 |
| 6.5.3 | Hoffman Coding | 129 |
| 6.6 | Registration of Images..... | 130 |
| 6.7 | Summary | 133 |
| 6.8 | Problems..... | 134 |
| | Note..... | 136 |

Chapter 7 Clustering and Classification 137

| | | |
|---------|---|-----|
| 7.1 | Introduction and Overview | 137 |
| 7.2 | Clustering versus Classification | 137 |
| 7.3 | Feature Extraction..... | 140 |
| 7.3.1 | Biomedical and Biological Features | 140 |
| 7.3.2 | Signal and Image Processing Features..... | 140 |
| 7.3.2.1 | Signal Power in Frequency Bands..... | 141 |
| 7.3.2.2 | Wavelet Measures..... | 141 |
| 7.3.2.3 | Complexity Measures..... | 141 |
| 7.3.2.4 | Geometric Measures | 141 |

| | | |
|---------|--|-----|
| 7.4 | K-Means: A Simple Clustering Method..... | 143 |
| 7.5 | Bayesian Classifier..... | 147 |
| 7.5.1 | Loss Function | 149 |
| 7.6 | Maximum Likelihood Method..... | 151 |
| 7.7 | Neural Networks | 153 |
| 7.7.1 | Perceptrons..... | 154 |
| 7.7.2 | Sigmoid Neural Networks | 159 |
| 7.7.2.1 | Activation Function..... | 160 |
| 7.7.2.2 | Backpropagation Algorithm..... | 161 |
| 7.7.2.3 | Momentum | 162 |
| 7.7.3 | MATLAB for Neural Networks..... | 163 |
| 7.8 | Summary | 164 |
| 7.9 | Problems..... | 164 |
| Note | | 167 |

SECTION II Processing of Biomedical Signals

| | | |
|------------------|---|------------|
| Chapter 8 | Electrical Activities of Cell..... | 171 |
| 8.1 | Introduction and Overview..... | 171 |
| 8.2 | Ion Transport in Biological Cells..... | 171 |
| 8.2.1 | Transmembrane Potential..... | 172 |
| 8.3 | Electrical Characteristics of Cell Membranes..... | 176 |
| 8.3.1 | Membrane Resistance..... | 176 |
| 8.3.2 | Membrane Capacitance | 177 |
| 8.3.3 | The Cell Membrane's Equivalent Electrical Circuit..... | 177 |
| 8.3.4 | Action Potential..... | 178 |
| 8.4 | Hodgkin-Huxley Model..... | 180 |
| 8.5 | Electrical Data Acquisition..... | 182 |
| 8.5.1 | Propagation of Electrical Potential as a Wave..... | 184 |
| 8.6 | Some Practical Considerations for Biomedical Electrodes | 185 |
| 8.7 | Summary | 186 |
| 8.8 | Problems..... | 186 |
| Note | | 187 |
| Chapter 9 | Electrocardiogram | 189 |
| 9.1 | Introduction and Overview | 189 |
| 9.2 | Function and Structure of the Heart..... | 189 |
| 9.2.1 | Cardiac Muscle..... | 191 |
| 9.2.2 | The Cardiac Excitation Process | 192 |
| 9.3 | Electrocardiogram: Signal of the Cardiovascular System | 194 |
| 9.3.1 | Origin of the ECG..... | 194 |
| 9.3.2 | ECG Electrode Placement..... | 196 |

| | | |
|---------|--|-----|
| 9.3.3 | Modeling and Representation of the ECG..... | 198 |
| 9.3.4 | Periodicity of the ECG: Heart Rate..... | 199 |
| 9.4 | Cardiovascular Diseases and the ECG..... | 200 |
| 9.4.1 | Atrial Fibrillation..... | 200 |
| 9.4.2 | Ventricular Arrhythmias..... | 200 |
| 9.4.3 | Ventricular Tachycardia..... | 202 |
| 9.4.4 | Ventricular Fibrillation..... | 202 |
| 9.4.5 | Myocardial Infarction..... | 202 |
| 9.4.6 | Atrial Flutter..... | 203 |
| 9.4.7 | Cardiac Re-entry..... | 204 |
| 9.4.8 | Atrioventricular (AV) Block..... | 204 |
| 9.4.8.1 | Main Types of AV Block..... | 204 |
| 9.4.9 | Wolf–Parkinson–White (WPW) Syndrome..... | 207 |
| 9.4.10 | Extra-Systole..... | 208 |
| 9.5 | Processing and Feature Extraction of ECGs..... | 208 |
| 9.5.1 | Time Domain Analysis..... | 209 |
| 9.5.2 | Frequency Domain Analysis..... | 209 |
| 9.5.3 | Wavelet Domain Analysis..... | 211 |
| 9.6 | Summary..... | 212 |
| 9.7 | Problems..... | 212 |
| | Notes..... | 213 |

Chapter 10 Electroencephalogram..... 215

| | | |
|----------|---|-----|
| 10.1 | Introduction and Overview..... | 215 |
| 10.2 | The Brain and Its Functions..... | 215 |
| 10.3 | Electroencephalogram: Signal of the Brain..... | 217 |
| 10.3.1 | EEG Frequency Spectrum..... | 218 |
| 10.3.2 | Significance of the EEG..... | 221 |
| 10.4 | Evoked Potentials..... | 222 |
| 10.4.1 | Auditory Evoked Potentials..... | 222 |
| 10.4.2 | Somatosensory Evoked Potentials..... | 222 |
| 10.4.3 | Visual Evoked Potentials..... | 223 |
| 10.4.4 | Event-Related Potentials..... | 223 |
| 10.5 | Diseases of the Central Nervous System and the EEG..... | 225 |
| 10.5.1 | Epilepsy..... | 225 |
| 10.5.2 | Sleep Disorders..... | 227 |
| 10.5.3 | Brain Tumors..... | 228 |
| 10.5.4 | Other Diseases..... | 228 |
| 10.6 | EEG for Assessment of Anesthesia..... | 228 |
| 10.7 | Processing and Feature Extraction of EEGs..... | 229 |
| 10.7.1 | Sources of Noise on EEGs..... | 229 |
| 10.7.2 | Frequency Domain Analysis..... | 230 |
| 10.7.3 | Time Domain Analysis..... | 231 |
| 10.7.3.1 | Coherence Analysis..... | 232 |
| 10.7.4 | Wavelet Domain Analysis..... | 233 |

| | |
|--------------------|-----|
| 10.8 Summary | 233 |
| 10.9 Problems..... | 234 |
| Notes | 235 |

| | |
|--|------------|
| Chapter 11 Electromyogram | 237 |
| 11.1 Introduction and Overview | 237 |
| 11.2 Muscle..... | 237 |
| 11.2.1 The Motor Unit..... | 238 |
| 11.2.2 Muscle Contraction..... | 240 |
| 11.2.3 Muscle Force | 241 |
| 11.3 EMG: Signal Muscles..... | 242 |
| 11.3.1 Significance of the EMG..... | 244 |
| 11.4 Neuromuscular Diseases and the EMG..... | 246 |
| 11.4.1 Abnormal Enervation..... | 246 |
| 11.4.2 Pathologic Motor Units | 247 |
| 11.4.3 Abnormal Neuromuscular Transmission in Motor Units..... | 248 |
| 11.4.4 Defects in Muscle Cell Membrane | 249 |
| 11.5 Other Applications of the EMG | 249 |
| 11.6 Processing and Feature Extraction of the EMG | 250 |
| 11.6.1 Sources of Noise on the EMG | 250 |
| 11.6.2 Time-Domain Analysis | 251 |
| 11.6.3 Frequency and Wavelet Domain Analysis | 252 |
| 11.7 Summary | 253 |
| 11.8 Problems..... | 253 |
| Notes | 255 |

| | |
|--|------------|
| Chapter 12 Other Biomedical Signals | 257 |
| 12.1 Introduction and Overview | 257 |
| 12.2 Blood Pressure and Blood Flow..... | 257 |
| 12.3 Electrooculogram..... | 258 |
| 12.4 Magnetoencephalogram..... | 260 |
| 12.5 Respiratory Signals | 262 |
| 12.6 More Biomedical Signals | 264 |
| 12.7 Summary | 265 |
| 12.8 Problems..... | 265 |
| Note..... | 266 |

SECTION III Processing of Biomedical Images

| | |
|---|------------|
| Chapter 13 Principles of Computed Tomography | 269 |
| 13.1 Introduction and Overview | 269 |
| 13.1.1 Attenuation Tomography | 270 |

| | | |
|--------|--|-----|
| 13.1.2 | Time-of-Flight Tomography | 271 |
| 13.1.3 | Reflection Tomography..... | 271 |
| 13.1.4 | Diffraction Tomography | 272 |
| 13.2 | Formulation of Attenuation Computed Tomography | 273 |
| 13.2.1 | Attenuation Tomography | 275 |
| 13.3 | The Fourier Slice Theorem..... | 278 |
| 13.4 | Summary | 280 |
| 13.5 | Problems..... | 281 |

Chapter 14 X-Ray Imaging and Computed Tomography 283

| | | |
|--------|--|-----|
| 14.1 | Introduction and Overview | 283 |
| 14.2 | Physics of X-Rays | 283 |
| 14.2.1 | Imaging with X-Rays | 286 |
| 14.2.2 | Radiation Dose | 287 |
| 14.3 | Attenuation-Based X-Ray Imaging | 288 |
| 14.3.1 | X-Ray Detection | 289 |
| 14.4 | Image Quality | 293 |
| 14.5 | Computed Tomography..... | 295 |
| 14.6 | Biomedical CT Scanners | 296 |
| 14.7 | Diagnostic Applications of X-Ray Imaging..... | 299 |
| 14.8 | CT Images for Stereotactic Surgeries | 300 |
| 14.9 | CT Registration for Other Image-Guided Interventions | 300 |
| 14.10 | Complications of X-Ray Imaging | 301 |
| 14.11 | Summary | 302 |
| 14.12 | Problems..... | 302 |
| Notes | | 304 |

Chapter 15 Magnetic Resonance Imaging..... 305

| | | |
|--------|--|-----|
| 15.1 | Introduction and Overview | 305 |
| 15.2 | Physical and Physiological Principles of MRI..... | 306 |
| 15.2.1 | Resonance | 310 |
| 15.3 | MRI | 313 |
| 15.4 | Formulation of MRI Reconstruction | 317 |
| 15.5 | Functional MRI (fMRI) | 320 |
| 15.5.1 | Bold MRI..... | 322 |
| 15.6 | Applications of MRI and fMRI..... | 322 |
| 15.6.1 | fMRI for Monitoring Audio Activities of the Brain | 323 |
| 15.6.2 | fMRI for Monitoring Motoneuron Activities of the Brain | 325 |
| 15.6.3 | fMRI for Monitoring Visual Cortex Activities..... | 325 |
| 15.7 | Processing and Feature Extraction of MRI | 326 |
| 15.7.1 | Sources of Noise and Filtering Methods in MRI | 326 |
| 15.7.2 | Feature Extraction..... | 327 |
| 15.8 | Comparison of MRI with Other Imaging Modalities | 328 |
| 15.9 | Registration with MR Images..... | 329 |

| | |
|---------------------|-----|
| 15.10 Summary | 330 |
| 15.11 Problems..... | 331 |
| Notes | 332 |

Chapter 16 Ultrasound Imaging..... 333

| | |
|---|-----|
| 16.1 Introduction and Overview | 333 |
| 16.2 Why Ultrasound Imaging?..... | 333 |
| 16.3 Generation and Detection of Ultrasound Waves..... | 334 |
| 16.4 Physical and Physiological Principles of Ultrasound..... | 335 |
| 16.4.1 Fundamental Ultrasound Concepts | 335 |
| 16.4.2 Wave Equation | 337 |
| 16.4.3 Attenuation..... | 338 |
| 16.4.4 Reflection | 340 |
| 16.5 Resolution of Ultrasound Imaging Systems..... | 342 |
| 16.6 Ultrasound Imaging Modalities | 343 |
| 16.6.1 Attenuation Tomography | 345 |
| 16.6.2 Ultrasound Time-of-Flight Tomography | 349 |
| 16.6.3 Reflection Tomography..... | 350 |
| 16.6.3.1 Doppler Ultrasound Imaging | 352 |
| 16.7 Modes of Ultrasound Image Representation..... | 353 |
| 16.8 Ultrasound Image Artifacts..... | 354 |
| 16.9 Three-Dimensional Ultrasound Image Reconstruction..... | 356 |
| 16.10 Applications of Ultrasound Imaging | 357 |
| 16.11 Processing and Feature Extraction of Ultrasonic Images..... | 358 |
| 16.12 Image Registration..... | 359 |
| 16.13 Comparison of CT, MRI, and Ultrasonic Images | 360 |
| 16.14 Bio-Effects of Ultrasound..... | 360 |
| 16.15 Summary | 361 |
| 16.16 Problems..... | 361 |
| Notes | 364 |

Chapter 17 Positron Emission Tomography

| | |
|---|-----|
| 17.1 Introduction and Overview | 365 |
| 17.2 Physical and Physiological Principles of PET | 365 |
| 17.2.1 Production of Radio-Nucleotides | 366 |
| 17.2.2 The Degeneration Process | 367 |
| 17.3 PET Signal Acquisition | 368 |
| 17.3.1 Radioactive Detection in PET | 369 |
| 17.4 PET Image Formation | 371 |
| 17.5 Significance of PET | 372 |
| 17.6 Applications of PET | 373 |
| 17.6.1 Cancer Tumor Detection | 373 |
| 17.6.2 Functional Brain Mapping..... | 374 |

| | | |
|---|---|------------|
| 17.6.3 | Functional Heart Imaging..... | 375 |
| 17.6.4 | Anatomical Imaging | 376 |
| 17.7 | Processing and Feature Extraction of PET Images | 377 |
| 17.7.1 | Sources of Noise and Blurring in PET | 377 |
| 17.7.2 | Image Registration with PET | 377 |
| 17.8 | Comparison of CT, MRI, and PET Images..... | 378 |
| 17.9 | Summary | 379 |
| 17.10 | Problems..... | 379 |
| | Notes | 381 |
| Chapter 18 Other Biomedical Imaging Techniques | | 383 |
| 18.1 | Introduction and Overview | 383 |
| 18.2 | Optical Microscopy..... | 384 |
| 18.3 | Fluorescent Microscopy..... | 385 |
| 18.4 | Confocal Microscopy..... | 388 |
| 18.5 | Near-Field Scanning Optical Microscopy | 389 |
| 18.6 | Electrical Impedance Imaging..... | 391 |
| 18.7 | Electron Microscopy..... | 394 |
| 18.7.1 | Transmission Electron Microscopy..... | 395 |
| 18.7.2 | Scanning Electron Microscopy..... | 395 |
| 18.7.3 | Infrared Imaging..... | 395 |
| 18.8 | Biometrics | 397 |
| 18.8.1 | Biometrics Methodology | 399 |
| 18.8.2 | Biometrics Using Fingerprints | 400 |
| 18.8.3 | Biometrics Using Retina Scans..... | 401 |
| 18.8.4 | Biometrics Using Iris Scans..... | 402 |
| 18.9 | Summary | 403 |
| 18.10 | Problems..... | 404 |
| | Notes | 404 |
| Related Titles..... | | 405 |
| Index..... | | 407 |
