

 WILEY

UNCERTAINTY AND INFORMATION

Foundations of
Generalized
Information
Theory

GEORGE J. KLIR

CONTENTS

Preface	xiii
Acknowledgments	xvii
1 Introduction	1
1.1. Uncertainty and Its Significance / 1	
1.2. Uncertainty-Based Information / 6	
1.3. Generalized Information Theory / 7	
1.4. Relevant Terminology and Notation / 10	
1.5. An Outline of the Book / 20	
Notes / 22	
Exercises / 23	
2 Classical Possibility-Based Uncertainty Theory	26
2.1. Possibility and Necessity Functions / 26	
2.2. Hartley Measure of Uncertainty for Finite Sets / 27	
2.2.1. Simple Derivation of the Hartley Measure / 28	
2.2.2. Uniqueness of the Hartley Measure / 29	
2.2.3. Basic Properties of the Hartley Measure / 31	
2.2.4. Examples / 35	
2.3. Hartley-Like Measure of Uncertainty for Infinite Sets / 45	
2.3.1. Definition / 45	
2.3.2. Required Properties / 46	
2.3.3. Examples / 52	
Notes / 56	
Exercises / 57	
3 Classical Probability-Based Uncertainty Theory	61
3.1. Probability Functions / 61	
3.1.1. Functions on Finite Sets / 62	

3.1.2.	Functions on Infinite Sets / 64	
3.1.3.	Bayes' Theorem / 66	
3.2.	Shannon Measure of Uncertainty for Finite Sets / 67	
3.2.1.	Simple Derivation of the Shannon Entropy / 69	
3.2.2.	Uniqueness of the Shannon Entropy / 71	
3.2.3.	Basic Properties of the Shannon Entropy / 77	
3.2.4.	Examples / 83	
3.3.	Shannon-Like Measure of Uncertainty for Infinite Sets / 91	
	Notes / 95	
	Exercises / 97	
4	Generalized Measures and Imprecise Probabilities	101
4.1.	Monotone Measures / 101	
4.2.	Choquet Capacities / 106	
4.2.1.	Möbius Representation / 107	
4.3.	Imprecise Probabilities: General Principles / 110	
4.3.1.	Lower and Upper Probabilities / 112	
4.3.2.	Alternating Choquet Capacities / 115	
4.3.3.	Interaction Répresentation / 116	
4.3.4.	Möbius Representation / 119	
4.3.5.	Joint and Marginal Imprecise Probabilities / 121	
4.3.6.	Conditional Imprecise Probabilities / 122	
4.3.7.	Noninteraction of Imprecise Probabilities / 123	
4.4.	Arguments for Imprecise Probabilities / 129	
4.5.	Choquet Integral / 133	
4.6.	Unifying Features of Imprecise Probabilities / 135	
	Notes / 137	
	Exercises / 139	
5	Special Theories of Imprecise Probabilities	143
5.1.	An Overview / 143	
5.2.	Graded Possibilities / 144	
5.2.1.	Möbius Representation / 149	
5.2.2.	Ordering of Possibility Profiles / 151	
5.2.3.	Joint and Marginal Possibilities / 153	
5.2.4.	Conditional Possibilities / 155	
5.2.5.	Possibilities on Infinite Sets / 158	
5.2.6.	Some Interpretations of Graded Possibilities / 160	
5.3.	Sugeno λ -Measures / 160	
5.3.1.	Möbius Representation / 165	
5.4.	Belief and Plausibility Measures / 166	
5.4.1.	Joint and Marginal Bodies of Evidence / 169	

- 5.4.2. Rules of Combination / 170
- 5.4.3. Special Classes of Bodies of Evidence / 174
- 5.5. Reachable Interval-Valued Probability Distributions / 178
 - 5.5.1. Joint and Marginal Interval-Valued Probability Distributions / 183
- 5.6. Other Types of Monotone Measures / 185
- Notes / 186
- Exercises / 190

6 Measures of Uncertainty and Information 196

- 6.1. General Discussion / 196
- 6.2. Generalized Hartley Measure for Graded Possibilities / 198
 - 6.2.1. Joint and Marginal U -Uncertainties / 201
 - 6.2.2. Conditional U -Uncertainty / 203
 - 6.2.3. Axiomatic Requirements for the U -Uncertainty / 205
 - 6.2.4. U -Uncertainty for Infinite Sets / 206
- 6.3. Generalized Hartley Measure in Dempster–Shafer Theory / 209
 - 6.3.1. Joint and Marginal Generalized Hartley Measures / 209
 - 6.3.2. Monotonicity of the Generalized Hartley Measure / 211
 - 6.3.3. Conditional Generalized Hartley Measures / 213
- 6.4. Generalized Hartley Measure for Convex Sets of Probability Distributions / 214
- 6.5. Generalized Shannon Measure in Dempster–Shafer Theory / 216
- 6.6. Aggregate Uncertainty in Dempster–Shafer Theory / 226
 - 6.6.1. General Algorithm for Computing the Aggregate Uncertainty / 230
 - 6.6.2. Computing the Aggregated Uncertainty in Possibility Theory / 232
- 6.7. Aggregate Uncertainty for Convex Sets of Probability Distributions / 234
- 6.8. Disaggregated Total Uncertainty / 238
- 6.9. Generalized Shannon Entropy / 241
- 6.10. Alternative View of Disaggregated Total Uncertainty / 248
- 6.11. Unifying Features of Uncertainty Measures / 253
- Notes / 253
- Exercises / 255

7 Fuzzy Set Theory 260

- 7.1. An Overview / 260
- 7.2. Basic Concepts of Standard Fuzzy Sets / 262
- 7.3. Operations on Standard Fuzzy Sets / 266

- 7.3.1. Complementations Operations / 266
- 7.3.2. Intersection and Union Operations / 267
- 7.3.3. Combinations of Basic Operations / 268
- 7.3.4. Other Operations / 269
- 7.4. Fuzzy Numbers and Intervals / 270
 - 7.4.1. Standard Fuzzy Arithmetic / 273
 - 7.4.2. Constrained Fuzzy Arithmetic / 274
- 7.5. Fuzzy Relations / 280
 - 7.5.1. Projections and Cylindric Extensions / 281
 - 7.5.2. Compositions, Joins, and Inverses / 284
- 7.6. Fuzzy Logic / 286
 - 7.6.1. Fuzzy Propositions / 287
 - 7.6.2. Approximate Reasoning / 293
- 7.7. Fuzzy Systems / 294
 - 7.7.1. Granulation / 295
 - 7.7.2. Types of Fuzzy Systems / 297
 - 7.7.3. Defuzzification / 298
- 7.8. Nonstandard Fuzzy Sets / 299
- 7.9. Constructing Fuzzy Sets and Operations / 303
- Notes / 305
- Exercises / 308

8 Fuzzification of Uncertainty Theories 315

- 8.1. Aspects of Fuzzification / 315
- 8.2. Measures of Fuzziness / 321
- 8.3. Fuzzy-Set Interpretation of Possibility Theory / 326
- 8.4. Probabilities of Fuzzy Events / 334
- 8.5. Fuzzification of Reachable Interval-Valued Probability Distributions / 338
- 8.6. Other Fuzzification Efforts / 348
- Notes / 350
- Exercises / 351

9 Methodological Issues 355

- 9.1. An Overview / 355
- 9.2. Principle of Minimum Uncertainty / 357
 - 9.2.1. Simplification Problems / 358
 - 9.2.2. Conflict-Resolution Problems / 364
- 9.3. Principle of Maximum Uncertainty / 369
 - 9.3.1. Principle of Maximum Entropy / 369

9.3.2.	Principle of Maximum Nonspecificity / 373	
9.3.3.	Principle of Maximum Uncertainty in GIT / 375	
9.4.	Principle of Requisite Generalization / 383	
9.5.	Principle of Uncertainty Invariance / 387	
9.5.1.	Computationally Simple Approximations / 388	
9.5.2.	Probability–Possibility Transformations / 390	
9.5.3.	Approximations of Belief Functions by Necessity Functions / 399	
9.5.4.	Transformations Between λ -Measures and Possibility Measures / 402	
9.5.5.	Approximations of Graded Possibilities by Crisp Possibilities / 403	
	Notes / 408	
	Exercises / 411	
10	Conclusions	415
10.1.	Summary and Assessment of Results in Generalized Information Theory / 415	
10.2.	Main Issues of Current Interest / 417	
10.3.	Long-Term Research Areas / 418	
10.4.	Significance of GIT / 419	
	Notes / 421	
Appendix A	Uniqueness of the U-Uncertainty	425
Appendix B	Uniqueness of Generalized Hartley Measure in the Dempster–Shafer Theory	430
Appendix C	Correctness of Algorithm 6.1	437
Appendix D	Proper Range of Generalized Shannon Entropy	442
Appendix E	Maximum of GS_a in Section 6.9	447
Appendix F	Glossary of Key Concepts	449
Appendix G	Glossary of Symbols	455
	Bibliography	458
	Subject Index	487
	Name Index	494
