

A scenic landscape photograph of a lake and mountains. The sky is filled with large, white, fluffy clouds. In the background, a range of mountains is visible, with some peaks partially obscured by the clouds. The middle ground features a calm body of water, likely a lake or a wide river, which reflects the sky and the surrounding landscape. On the right side, a forested hillside slopes down towards the water. The foreground shows a rocky shoreline with some green vegetation and small trees. The overall color palette is dominated by blues, greens, and whites, creating a serene and natural atmosphere.

SCIENCE, PHILOSOPHY AND PHYSICAL GEOGRAPHY

ROB INKPEN

Contents

<i>Preface</i>	vii
<i>Acknowledgements</i>	xi
 Introduction	 1
<i>Structure of the book</i>	3
 Chapter 1	 5
Ideas, change and stability in physical geography	
<i>What are ideas and how do they change?</i>	5
<i>Is there a history of ideas in physical geography?</i>	10
<i>What are the important concepts in physical geography?</i>	13
<i>Summary</i>	24
 Chapter 2	 25
The nature of reality	
<i>What is reality?</i>	25
<i>Views of different philosophies</i>	27
<i>Case Study: Critical rationalism – an example from</i>	
<i>environmental reconstruction</i>	31
<i>Reality as a dialogue</i>	35
<i>Theory, reality and practice</i>	36
<i>Case Study: Myths and theories</i>	38
<i>Physical geography as historical science</i>	41
<i>Summary</i>	43
 Chapter 3	 45
Entities and classification	
<i>Introduction</i>	45
<i>What are entities?</i>	46
<i>Entities and kinds</i>	47
<i>Case Study: Species as natural kinds</i>	51
<i>Case Study: Magnitude and frequency – entities out of context</i>	52
<i>Classification</i>	56
<i>Case Study: Classification of soils</i>	58
<i>Summary</i>	60

Chapter 4	Forms of explanation	63
	<i>Explanation in physical geography</i>	63
	<i>What is explanation?</i>	63
	<i>Causality</i>	65
	<i>Case Study: Necessary and sufficient conditions</i>	67
	<i>Explanatory frameworks</i>	70
	<i>Case Study: General and token-type landslides</i>	77
	<i>Summary</i>	79
Chapter 5	Probing reality	81
	<i>Probing and the dialogue with reality</i>	81
	<i>Measurement systems</i>	84
	<i>Case Study: Multiple working hypotheses</i>	88
	<i>Case Study: Triangulation of techniques – measurement of surface form on rocks</i>	90
	<i>Practice in physical geography</i>	92
	<i>Case Study: Linking process and form – intensive study of bedforms</i>	95
	<i>Case Study: Probing reality – fluvial flow structures</i>	97
	<i>Computer simulation of reality</i>	101
	<i>Summary</i>	102
Chapter 6	Systems: the framework for physical geography?	103
	<i>Systems analysis in physical geography</i>	103
	<i>Application of systems thinking</i>	106
	<i>Systems and change</i>	108
	<i>Case Study: Systems and landscape sensitivity</i>	113
	<i>Summary</i>	115
Chapter 7	Change and complexity	117
	<i>Equilibrium: an ex-concept?</i>	117
	<i>Chaos and complexity: more of the same?</i>	121
	<i>Emergence and hierarchies: scale revisited?</i>	126
	<i>Case Study: Complexity and change – landscape evolution and organization</i>	131
	<i>Summary</i>	136
Chapter 8	Physical geography and societies	137
	<i>Paradigms and social networks</i>	137
	<i>Social construction and physical geography?</i>	139
	<i>Ethics in physical geography: reflection required?</i>	140
	<i>Physical and human geography: division or integration?</i>	143
	<i>Summary</i>	146
	<i>References</i>	147
	<i>Index</i>	157
