

THIRD EDITION

HUMAN REPRODUCTIVE BIOLOGY

RICHARD E. JONES ■ KRISTIN H. LOPEZ

Contents

Preface	xvii	Box 2: Kallmann's Syndrome and the Embryological Origin and Migration of GnRH Cells	22
PART ONE		Pineal Gland	23
Adult Female and Male Reproductive Systems	1	Feedback Control of Gonadotropin Secretion	24
		Feedback Systems	24
		Regulation of Gonadotropin Secretion by Negative Feedback	25
		Positive Feedback	26
CHAPTER ONE		Control of Prolactin Secretion	27
<i>Endocrinology, Brain and Pituitary Gland</i>	3	Chapter Summary	28
		Further Reading	29
Introduction	3	Advanced Reading	29
Endocrine System	3		
Science of Endocrinology	4	CHAPTER TWO	
Hormones	6	<i>The Female Reproductive System</i>	31
Receptors	6		
Synthetic Hormones	9	Introduction	31
The Pituitary Gland	10	Ovaries	31
Hypothalamo-Neurohypophysial Connection	10	Ovarian Gross Anatomy	31
Adenohypophysis	14	Ovarian Microanatomy	31
Hypothalamo-Adenohypophysial Connection	15	Stages of Follicular Growth	32
Releasing and Release-Inhibiting Hormones	18	Follicular Atresia	36
Gonadotropin-Releasing Hormone	19	Ovarian Steroid Hormone Synthesis	36
Box 1: GnRH Analogs	20	Hormonal Control of Follicular Growth and Steroidogenesis	39
The GnRH Pulse Generator and Surge Center	21	Oocyte Maturation and Ovulation	40
		Corpus Luteum	43

<i>Ovarian Disorders</i>	44	CHAPTER THREE	
<i>Ovarian Cysts</i>	44	<i>The Menstrual Cycle</i>	73
<i>Ovarian Cancer</i>	45		
Box 1: The Estrogen Epidemic	46	Introduction	73
Oviducts	47	Reproductive Cycles in Mammals	73
Uterus	48	Major Events in the Menstrual Cycle	75
<i>Uterine Functional Anatomy</i>	48	The Menstrual Cycle in Detail	76
<i>Uterine Disorders</i>	49	<i>Menstrual Phase</i>	76
<i>Pelvic Infection</i>	49	<i>Follicular Phase</i>	77
<i>Cervical Cancer</i>	49	Box 1: Why Women Menstruate	79
<i>Cervical Cysts and Polyps</i>	50	<i>Luteal Phase</i>	83
<i>Endometrial Cancer</i>	50	Variations in Length of Menstrual	
<i>Endometriosis</i>	51	Cycle Phases	85
<i>Endometrial Polyps, Hyperplasia,</i>		Methods for Detecting Ovulation	85
<i>and Fibroids</i>	51	<i>Home Methods</i>	86
<i>"Tipped" Uterus</i>	52	<i>Laboratory Methods</i>	86
<i>Prolapsed Uterus</i>	52	Premenstrual Syndrome	87
Vagina	53	<i>Symptoms</i>	87
<i>Structure</i>	53	<i>Possible Causes and Treatments</i>	87
<i>The Vaginal Environment</i>	53	<i>Cyclic Changes in Mood and Skill Level</i>	88
Female External Genitalia	54	Menstrual Difficulties	88
<i>Mons Pubis</i>	54	<i>Dysmenorrhea</i>	88
<i>Labia Majora</i>	54	Absence of Menstruation	89
<i>Labia Minora</i>	55	Box 2: Body Fat and Secondary	
<i>Vestibule</i>	55	Amenorrhea	89
<i>Urethral Orifice</i>	56	Menstrual Taboos	91
<i>Clitoris</i>	56	Chapter Summary	91
Mammary Glands	56	Further Reading	92
<i>Mammary Gland Functional Anatomy</i>	56	Advanced Reading	93
<i>Hormonal Control of Mammary</i>			
<i>Gland Function</i>	58	CHAPTER FOUR	
<i>Suckling</i>	58	<i>The Male Reproductive System</i>	97
<i>Noncancerous Breast Disorders</i>	59		
<i>Breast Cancer</i>	59	Introduction	97
<i>Risk</i>	59	Testes	97
<i>Inherited Breast Cancer</i>	60	<i>Seminiferous Tubules</i>	99
<i>Noninherited Breast Cancer</i>	61	<i>Spermatogenesis and Spermiogenesis</i>	99
Box 2: Xenoestrogens and Breast Cancer	62	<i>Sertoli Cells</i>	101
<i>Detection</i>	65	<i>Testicular Interstitial Tissue</i>	102
<i>Treatment of Breast Cancer</i>	66	Box 1: Estrogens Are Male Sex Hormones	104
Chapter Summary	67	<i>Hormonal Control of Testicular Function</i>	105
Further Reading	68	<i>Control of Gonadotropin Secretion</i>	
Advanced Reading	70	<i>in the Male</i>	107

<i>Other Factors That Influence Testicular Function</i>	108	Box 1: Why the Y Chromosome?	130
<i>Other Hormones</i>	108	<i>Sex-Linked Inheritance</i>	132
<i>Nutrition and Exercise</i>	108	Development of the Reproductive System	133
<i>Chemicals, Radiation, and Infections</i>	109	<i>The Sexually Indifferent Stage</i>	133
<i>Anabolic Steroids</i>	109	Gonadal Sex Differentiation	133
Testicular Cancer	109	<i>Ovarian Development</i>	134
<i>Testosterone and Behavior</i>	110	<i>Testicular Development</i>	135
<i>Libido</i>	110	<i>Testis-Determining Factor</i>	137
<i>Aggression</i>	110	Differentiation of Sex Accessory Ducts and Glands	137
<i>Sperm Count and Endocrine Disruptors</i>	111	Differentiation of External Genitalia	138
Male Sex Accessory Ducts and Glands	112	Summary of Sexual Determination and Development	138
<i>Sex Accessory Ducts</i>	112	Disorders of Sexual Determination and Development	140
<i>Epididymis</i>	112	<i>True Hermaphroditism</i>	140
<i>Vas Deferens</i>	113	<i>Pseudohermaphroditism</i>	140
<i>Urethra</i>	113	Box 2: Guevedoces	141
Sex Accessory Glands	113	<i>Chromosomal Errors and Sex Determination</i>	144
<i>Seminal Vesicles</i>	113	<i>Other Problems in Sex Development</i>	145
<i>Prostate Gland</i>	114	Reproductive System in the Newborn	145
<i>Bulbourethral Glands</i>	114	Chapter Summary	146
<i>Prostate Disorders</i>	114	Further Reading	147
<i>Hormonal Control of Sex Accessory Structures</i>	117	Advanced Reading	147
Penis	117		
Scrotum	118	CHAPTER SIX	
Box 2: Why a Scrotum?	119	<i>Puberty</i>	149
Chapter Summary	121		
Further Reading	121	Introduction	149
Advanced Reading	122	Puberty and Its Timing	149
		<i>The Pubertal Process</i>	149
PART TWO		<i>Pubertal Changes in Females</i>	149
Sexual Differentiation and Development	125	<i>Pubertal Changes in Males</i>	151
		<i>Classification of Pubertal Changes</i>	153
CHAPTER FIVE		Gonadal Changes from Birth to Puberty	156
<i>Sexual Differentiation</i>	127	<i>Ovarian Changes</i>	156
		<i>Testicular Changes</i>	157
Introduction	127	<i>Cryptorchid Testes</i>	157
Chromosomal Sex	127	Hormone Levels from Birth to Puberty	158
X Chromosome	127	<i>Hormones in Females</i>	160
Y Chromosome	129	<i>Menarche and First Ovulation</i>	160
		<i>Estrogens</i>	160
		<i>Androgens</i>	160

<i>Hormone Levels in Males</i>	160
<i>Gonadotropins and Androgens</i>	160
<i>Estrogens</i>	161
<i>Androgens and Acne</i>	161
<i>What Mechanisms Cause Puberty?</i>	161
Environmental Factors and Puberty	163
<i>Nutrition</i>	164
<i>Day Length and Season</i>	165
<i>Stressors</i>	165
Box 1: Early Childhood Stress and Sexual Maturation	166
<i>Environmental Pollutants</i>	167
<i>Climate and Altitude</i>	168
Inheritance and Age of Puberty	168
Box 2: Puberty Genes	168
Puberty and Psychosocial Adjustment	170
Chapter Summary	171
Further Reading	171
Advanced Reading	172

CHAPTER **SEVEN**

Reproductive Aging 175

Introduction	175
Menopause	175
Timing of Menopause	176
Female Reproductive Age	176
Box 1: Egg Aging	177
Perimenopause	179
Premature Menopause	179
Symptoms of Menopause	179
Endocrine Changes during Menopause	180
Chance of Pregnancy	182
Box 2: The Evolution of Menopause in Humans	183
Osteoporosis and Other Postmenopausal Disorders	184
Treatments for Menopause: Benefits and Risks	185
Andropause	187
<i>Testicular Function in Old Age</i>	187
Chapter Summary	188
Further Reading	189
Advanced Reading	189

PART **THREE**

Procreation 191

CHAPTER **EIGHT**

The Human Sexual Response 193

Introduction	193
Sex Roles	193
<i>Factors Influencing Sex Roles</i>	193
<i>Gender Identity</i>	193
<i>Nature or Nurture</i>	194
Sexual Arousal	194
<i>Cultural Influence and Individual Variation</i>	194
<i>Erotic Stimuli</i>	195
<i>Erogenous Zones</i>	195
<i>Proceptive Behavior</i>	195
The Sexual Response Cycle	196
<i>The Female Sexual Response Cycle</i>	196
<i>Excitement Phase</i>	197
<i>Plateau Phase</i>	198
<i>Orgasmic Phase</i>	198
<i>Resolution Phase</i>	200
<i>Individual Variation</i>	201
<i>The Male Sexual Response Cycle</i>	201
<i>Excitement Phase</i>	201
<i>Plateau Phase</i>	203
<i>Orgasmic Phase</i>	204
<i>Resolution Phase</i>	205
<i>Why Did Orgasm Evolve?</i>	205
Coitus (Sexual Intercourse)	205
Hormones and Sexual Behavior	207
<i>Hormones and Male Sexual Behavior</i>	207
Box 1: Human Pheromones and the Vomeronasal Organ	208
<i>Hormones and Female Sexual Behavior</i>	209
Box 2: Human Mating Systems	210
<i>Homosexuality</i>	213
<i>Myths</i>	215
<i>Sexual Activity and Response</i>	215
<i>Patterns of Sexual Behavior</i>	216
<i>Psychoanalytic Theory</i>	216

<i>Learning Theory</i>	216
<i>Hormones</i>	217
<i>Genetic Basis of Homosexuality</i>	217
<i>Conclusions</i>	218
<i>Homophobia</i>	218
<i>Treatment</i>	219
<i>Transsexualism</i>	219
Sexual Dysfunction	220
<i>Vaginismus</i>	220
<i>Dyspareunia</i>	221
<i>Premature Ejaculation</i>	221
<i>Ejaculatory Incompetence</i>	221
<i>Erectile Dysfunction</i>	221
<i>Orgasmic Dysfunction</i>	222
Drugs and Human Sexual Behavior	223
<i>Therapeutic Drugs</i>	224
<i>Nontherapeutic Drugs</i>	224
Chapter Summary	226
Further Reading	227
Advanced Reading	228

CHAPTER NINE

Gamete Transport and Fertilization 231

Introduction	231
Semen Release	231
Contents of Seminal Plasma	232
Sperm Number and Structure	233
Sperm Transport and Maturation in the Female Reproductive Tract	234
<i>Vaginal Sperm</i>	234
<i>Cervical Sperm</i>	235
<i>Uterine Sperm</i>	235
Transport of the Sperm and Ovum in the Oviduct	236
Sperm Capacitation and Activation	237
<i>When Can Fertilization Occur?</i>	237
Box 1: Does the Human Egg Court Sperm?	238
The Process of Fertilization	239
<i>Sperm Passage through the Cumulus Oophorus</i>	239

<i>Sperm Passage through the Zona Pellucida</i>	240
<i>Sperm Attachment to the Egg Plasma Membrane</i>	242
<i>The Cortical Reaction</i>	242
<i>Completion of the Second Meiotic Division</i>	242
<i>Formation and Fusion of Sperm and Egg Pronuclei</i>	243
Box 2: Sperm Hitchhikers	244
Chemical Inhibition of Fertilization	246
Sex Ratios	246
Sex Preselection	247
Multiple Embryos	248
Parthenogenesis	248
Chromosomal Aberrations	248
Chapter Summary	251
Further Reading	251
Advanced Reading	252

CHAPTER TEN

Pregnancy 253

Introduction	253
What Is Pregnancy?	253
Signs of Pregnancy	254
Pregnancy Tests	255
What to Do If You Are Pregnant	255
The Process of Pregnancy	256
<i>Implantation</i>	256
Box 1: Trading of Cells between Fetus and Mom during Pregnancy	261
<i>Early Embryonic Development</i>	263
<i>Extraembryonic Membranes</i>	263
<i>The Placenta</i>	265
Box 2: Maternal and Paternal Genetic Imprinting	268
Twin Pregnancies	270
Embryonic and Fetal Development	271
<i>The Embryonic Period</i>	271
<i>The Fetal Period</i>	273
<i>Digestive/Urinary Systems</i>	275
<i>Circulatory System</i>	275
<i>Nervous System</i>	275

Endocrine System	277	The Birth Process	305
Fetal Disorders	277	Stage 1: Cervical Effacement and Dilation	305
Genetic and Chromosomal Disorders	277	Stage 2: Expulsion of the Fetus	310
Rhesus Disease	277	Stage 3: Expulsion of the Placenta	311
Teratogens, Mutagens, and Other Agents That Damage the Fetus	278	Premature Births	312
Viruses and Bacteria	278	Multiple Births	313
Environmental Pollutants	279	Difficult Fetal Positions	314
Drugs, Alcohol, and Tobacco	279	Handling Difficult Births	315
Box 3: The Adaptive Value of Morning Sickness	281	Forceps Delivery	315
Radiation	283	Vacuum Extraction	315
High Altitude	283	Cesarean Delivery	316
Fetal Evaluation	283	Use of Medications during Labor	317
The Pregnant Woman	285	Natural Birthing Methods	319
Maternal Nutrition	285	Box 2: Why Is Human Birth So Difficult?	320
Physiological Changes during Pregnancy	286	Chapter Summary	322
The Endocrinology of Pregnancy	286	Further Reading	323
Maternal Complications of Pregnancy	289	Advanced Reading	324
Toxemia	289		
Diabetes Mellitus	290	CHAPTER TWELVE	
Ectopic Pregnancies	290	<i>The Neonate and the New Parents</i>	325
Hydatidiform Moles	291		
Septic Pregnancy	291	Introduction	325
Hemorrhage	291	Treatment of the Newborn	325
Miscarriage	291	Apgar Score	325
Sex during Pregnancy	292	Leboyer Method	326
Chances for a Successful Pregnancy	292	Circumcision	326
Chapter Summary	293	Adaptations of the Newborn	327
Further Reading	294	The Respiratory System	327
Advanced Reading	295	The Circulatory System	328
		The Digestive Tract	328
CHAPTER ELEVEN		Thermoregulation	329
<i>Labor and Birth</i>	297	The Nervous System and Behavior	329
		What a Newborn Looks Like	330
Introduction	297	Disorders of the Newborn	331
Time of Birth	297	Box 1: Back to Sleep	332
Hormones and Birth	300	Birth Weight and Adult Disease	334
Delayed Birth in Sheep	300	Condition of the New Mother	335
Hormonal Initiation of Human Birth	301	Physical Changes	335
Box 1: The Placental Clock	301	Psychological Changes	335
Induced Labor	304	Breast-Feeding	336
Preparation for Labor	305		

<i>Postpartum Endocrine Changes and Lactation</i>	336	<i>Population Growth in Underdeveloped Countries</i>	363
Box 2: The Duration of Breast-Feeding	339	<i>Overall View of Human Population Growth</i>	365
<i>Advantages and Disadvantages of Breast- and Bottle-Feeding</i>	341	Effects of Overpopulation	365
Chapter Summary	343	<i>Illiteracy</i>	365
Further Reading	345	<i>Food Production and Hunger</i>	366
Advanced Reading	346	<i>Natural Resources and Energy</i>	366
		<i>Pollution and Environmental Illness</i>	367
		<i>Crowding and Stress</i>	367
		<i>Quality of Life</i>	368
<hr/> PART FOUR <hr/>		Will Science and Technology Save Us?	368
Fertility and its Control	349	Family Planning and Population Control	369
		<i>Family Planning Programs</i>	369
		<i>Barriers to Family Planning</i>	370
		<i>Cultural Barriers</i>	370
		<i>Religious Barriers</i>	371
		<i>Other Barriers</i>	371
		<i>Family Planning in the United States</i>	372
		<i>Individual Freedom and Family Planning</i>	374
		Box 2: Government-Enforced Population Control in China	374
		Chapter Summary	376
		Further Reading	377
		Advanced Reading	378
 CHAPTER THIRTEEN <i>Human Population Growth and Family Planning</i>	351	 CHAPTER FOURTEEN <i>Contraception</i>	379
<hr/>		<hr/>	
Introduction	351	Introduction	379
The Biology of Population Growth	351	Combination Pill	381
<i>Basic Principles of Population Biology</i>	351	<i>Ingredients</i>	382
<i>Birth Rate</i>	351	<i>How the Combination Pill Works</i>	382
<i>Death Rate</i>	352	<i>Use of the Combination Pill</i>	382
<i>Emigration and Immigration</i>	352	<i>Failure Rate</i>	383
<i>Population Growth Rate</i>	352	<i>Side Effects</i>	383
<i>Reproductive Potential</i>	353	<i>Mild Side Effects</i>	383
<i>Biotic Potential</i>	353	<i>Serious Side Effects</i>	384
<i>Environmental Resistance</i>	353	<i>Beneficial Side Effects</i>	385
<i>Population Crashes</i>	354	<i>Costs and Benefits</i>	385
<i>Doubling Time</i>	355	Minipill	389
Human Population Growth	356	Box 1: Where Is the Male Birth Control Pill?	389
<i>The Prediction of Thomas Malthus</i>	356		
<i>Human Population Growth on Earth</i>	356		
<i>Age Distribution</i>	358		
<i>Birth Rate, Death Rate, and Fertility Rate</i>	358		
Box 1: World Contraceptive Use and Fertility Rates	361		
<i>Life Expectancy</i>	362		
<i>Population Growth in Developed Countries</i>	362		
<i>U.S. Population Growth</i>	362		

Intradermal Progestogen Implants	391	First Trimester-Induced Abortions	423
Injectable Hormones	392	<i>Vacuum Aspiration</i>	424
Transdermal Hormone Delivery	392	<i>Dilation and Curettage</i>	426
Emergency Contraception	393	<i>Prostaglandins</i>	427
Intrauterine Devices	393	<i>Medication Abortion: Mifepristone, Methotrexate, and Misoprostol</i>	427
Spermicides	395	Box 2: The Early Abortion Pill in the United States	428
Box 2: Future Contraceptive Methods	396	Second Trimester Induced Abortions	429
Diaphragm	398	<i>Why a Second Trimester Abortion?</i>	429
Cervical Cap	399	<i>Intraamniotic Saline</i>	430
Sponge Contraceptive	399	<i>Prostaglandin Injections</i>	430
Male and Female Condoms	400	<i>Dilation and Evacuation</i>	431
<i>Male Condom</i>	400	<i>Dilation and Extraction</i>	431
<i>Female Condom</i>	400	Third Trimester-Induced Abortions	431
Coitus Interruptus	401	Folk Abortifacients	432
Coitus Reservatus and Coitus Obstructus	401	Safety and Consequences of Induced Abortion	432
Natural Family Planning	402	Chapter Summary	433
<i>Calendar Method</i>	402	Further Reading	434
<i>Basal Body Temperature Method</i>	402	Advanced Reading	434
<i>Cervical Mucus Method</i>	403		
<i>Sympto-Thermal Method</i>	403		
Is Breast-Feeding a Contraceptive Measure?	403		
Surgical Sterilization	403		
<i>Tubal Sterilization</i>	404		
<i>Hysterectomy</i>	407		
<i>Vasectomy</i>	407		
Psychology of Contraceptive Avoidance	409		
Choosing a Contraceptive	410		
Chapter Summary	410		
Further Reading	411		
Advanced Reading	413		
CHAPTER FIFTEEN		CHAPTER SIXTEEN	
<i>Induced Abortion</i>	417	<i>Infertility</i>	437
Introduction	417	Introduction	437
Induced Abortion in the United States	418	Seeking Medical Help for Infertility	437
<i>History of Abortion Legislation in the United States</i>	418	Female Infertility	438
<i>Present-Day Abortion Statistics in the United States</i>	419	<i>Failure to Ovulate</i>	438
Why Women Have Abortions	420	<i>Tubal Blockage</i>	439
Box 1: The History and Ethics of Induced Abortion	422	<i>Absence of Implantation</i>	440
		<i>Reduced Sperm Transport or Antibodies to Sperm</i>	440
		Box 1: Seasonal Changes in the Ability to Conceive	441
		<i>Pregnancy Loss (Miscarriage)</i>	442
		Male Infertility	443
		<i>Low Sperm Count</i>	443
		<i>Sperm Transport</i>	444
		<i>Environmental Factors</i>	444
		Assisted Reproductive Techniques (ART)	445
		<i>Gamete Storage and Artificial Insemination (AI)</i>	445
		<i>In Vitro Fertilization (IVF)</i>	447

<i>Ovarian Stimulation and Egg Retrieval</i>	447
<i>Fertilization and Embryo Transfer</i>	447
<i>Risks of IVF</i>	449
Box 2: Costs of Assisted Reproductive Technologies	450
<i>Preimplantation Genetic Diagnosis (PGD)</i>	452
<i>Egg Donation</i>	453
<i>Gamete or Zygote Intrafallopian Transfer</i>	453
<i>Surrogate Mothers and Gestational Carriers</i>	454
<i>Cloning and Ethical Issues in Assisted Reproduction</i>	454
Adoption	457
Chapter Summary	457
Further Reading	458
Advanced Reading	459

PART FIVE

Special Topics in Human Reproductive Biology	461
---	-----

CHAPTER SEVENTEEN

<i>Brain Sex</i>	463
Introduction	463
Biological Causes of Brain Sex Differences	463
Sex Differences in Neonatal Behavior	467
Sex Differences in Childhood Behavior	467
Sex Differences in Adult Cognition and Motor Skills	468
Box 1: Evolution of Sex Differences in Problem-Solving Skills	473
Brain Sex Differences in the "Surge Center"	476
Brain Sex and Human Sexual Behavior	477
<i>Sexual Orientation</i>	477
Brain Sex and Gender Identity	482
Sex Differences in Aggression	483
Box 2: The Meaning of Brain Measurements	483

Conclusion	485
Chapter Summary	485
Further Reading	486
Advanced Reading	487

CHAPTER EIGHTEEN

<i>Sexually Transmitted Diseases</i>	491
Introduction	491
Bacteria and Viruses	491
Gonorrhea	493
<i>Cause of the Gonorrhea Epidemic</i>	493
<i>Cause of Gonorrhea</i>	493
<i>Transmission</i>	494
<i>Symptoms in Females</i>	494
<i>Complications in Females</i>	494
<i>Pregnancy and Gonorrhea</i>	495
<i>Symptoms in Males</i>	495
<i>Diagnosis</i>	495
<i>Treatment</i>	495
Syphilis	496
<i>Theoretical Origins</i>	496
<i>Columbian Theory</i>	496
<i>Evolutionary Theory</i>	497
<i>Syphilis as Distinct from Gonorrhea</i>	497
<i>Transmission</i>	497
<i>Stages of the Disease</i>	497
<i>Primary Stage</i>	497
<i>Secondary Stage</i>	498
<i>Latent Stage</i>	498
<i>Tertiary Stage</i>	498
<i>Congenital Syphilis</i>	498
<i>Diagnosis</i>	499
<i>Treatment</i>	499
Chlamydia	499
Genital Herpes	500
<i>Cause</i>	501
<i>Symptoms</i>	501
<i>Diagnosis</i>	502
<i>Treatment</i>	502
Genital Warts	502
Trichomoniasis	503

Viral Hepatitis B	504	Some General Aspects of Venereal Disease	
Pediculosis Pubis	504	Infections	525
Scabies	505	<i>Vulvitis</i>	525
Lymphogranuloma Venereum	505	<i>Vaginitis</i>	525
Chancroid	505	<i>Urethritis and Cystitis</i>	527
Molluscum Contagiosum	506	<i>Cervicitis</i>	527
Granuloma Inguinale	506	<i>Pelvic Inflammatory Disease</i>	527
Acquired Immunodeficiency Syndrome (AIDS)	506	<i>Prostatitis</i>	528
<i>Statistics</i>	506	Psychological Aspects of Sexually Transmitted Disease	528
Box 1: Origins of the HIV Viruses	510	Preventing Sexually Transmitted Disease	529
<i>Transmission</i>	512	Chapter Summary	529
<i>Who Is Most Susceptible to HIV Infection?</i>	514	Further Reading	530
<i>Life Cycle of the HIV Virus</i>	515	Advanced Reading	531
<i>Symptoms of HIV Disease and AIDS</i>	516		
<i>Long-Term HIV Survivors</i>	518	Glossary	533
<i>Treatments of AIDS</i>	519	Illustration and Table Credits	581
Box 2: Attacking the HIV Virus	522	Index	589
<i>Precautions Against HIV Transmission</i>	524
