Plug-ins and streaming 15

Media content 16

RSS, wikis and dynamic pages 16

Downloading software from the web 18

File compression 18

Buying from the web 19

- 2 Creating web pages 21**
 - Introduction 21
 - Basic web pages 21
 - Page elements 22
 - Headings and formatting 23
 - Colour 25
 - Lists 25
 - Links and anchors 27
 - Web page graphics 29
 - Bitmap images 29
 - Vector images 30
 - Page layout and structure 31
 - Tables 32
 - Frames 35
 - Style sheets 39
 - Page creation tools 43
 - Dynamic web pages 44
 - Client-side programming 45
 - Javascript and DHTML 45
 - Java 46
 - Server-side scripting 47
 - SSI 47
 - CGI 48
 - ASP 48
 - Cookies 49
 - XML and XSL 49
 - XML applications and the Semantic Web 52
- 3 Designing and publishing websites 55**
 - Introduction 55
 - Basic web design 55
 - Content 56
 - Site structure/navigation 57
 - Graphic design and page layout 58
 - Technical issues 58
 - Web presence 59
 - Stages of website design 60
 - Identification of user groups 60
 - Content ordering/labelling 61
 - Structuring content 61
 - Enabling navigation 62
 - Publishing a website 63
 - Web servers 63
 - Web hosting 64
 - Website promotion 66
 - Usage tracking 68
 - Advanced website management 70
 - Content management 71
 - Accessibility 72
- 4 File transfer technologies 75**
 - Introduction 75
 - File transfer protocol (FTP) 75
 - Transferring files from a remote site 76

- Transferring files to a remote site
 - 77
- Text and non-text files 77
- Peer-to-peer transfer (P2P) 78
 - Copyright 79
- Spyware and adware 83
 - Spyware 83
 - Adware 84
 - Bandwidth wastage 84
- References 86
- 5 E-mail 87**
 - Introduction 87
 - Electronic mail 88
 - Addresses 88
 - E-mailer clients 90
 - Web mail 91
 - Features of e-mail 91
 - Discussion lists 94
 - Joining lists 94
 - Following lists 96
 - Netiquette 98
 - Netiquette in discussion lists 98
 - FAQs 99
 - Jargon 100
 - Malicious software 101
 - Counter measures 101
 - Spam and phishing 103
- Secure e-mail 104
 - Encryption 105
- 6 Conferencing 109**
 - Introduction 109
 - USENET conferencing 109
 - Newsreaders 111
 - Following newsgroups 112
 - Accessing USENET 114
 - Web-based forums 115
 - Blogs 116
- 7 Real-time systems 119**
 - Introduction 119
 - Internet relay chat (IRC) 119
 - Instant messaging (IM) 120
 - Access to chat 121
 - Videoconferencing 122
 - References 124
- 8 Networking technologies 125**
 - Introduction: history of the internet 125
 - Basic networking technologies 126
 - Networks 126
 - Protocols 126
 - Servers 127
 - Bandwidth 127
 - Digital networks 128

- Connecting to the internet 128
 - Home networking 130
 - Internet on the move 130
- Site addressing – host and domain names 132
 - WHOIS 135
 - Traceroute 135
- Secure internet 136
- 9 Libraries and the internet 139**
 - Introduction 139
 - Academic libraries 140
 - Follett Report, 1993 140
 - Public libraries 142
 - Special libraries, national libraries and information units 144
 - Digital libraries 145
 - The changing role of the library and information professional 146
 - Filtering and blocking 147
 - References 148
- 10 Internet applications in libraries 149**
 - Introduction 149
 - Online reference services 150
 - Information literacy 152
 - Cataloguing internet resources 156
 - Digitized collections 159
 - E-journals 160
 - E-prints 160
 - Open access publishing 161
 - Portals 162
 - Library portals 162
 - Institutional portals 163
 - Personalization 164
 - Integrated information systems 165
 - VLEs 165
 - MLEs 165
 - Conclusion 166
