

Fifth Edition

**THE SCIENCE AND
ENGINEERING OF MATERIALS**

Donald R. Askeland Pradeep P. Phulé

Contents

Chapter 1 Introduction to Materials Science and Engineering 3

- 1-1 What is Materials Science and Engineering? 4
 - 1-2 Classification of Materials 7
 - 1-3 Functional Classification of Materials 10
 - 1-4 Classification of Materials Based on Structure 13
 - 1-5 Environmental and Other Effects 14
 - 1-6 Materials Design and Selection 16
- SUMMARY 17 ■ GLOSSARY 18 ■ PROBLEMS 20**

Chapter 2 Atomic Structure 23

- 2-1 The Structure of Materials: Technological Relevance 24
 - 2-2 The Structure of the Atom 25
 - 2-3 The Electronic Structure of the Atom 29
 - 2-4 The Periodic Table 30
 - 2-5 Atomic Bonding 33
 - 2-6 Binding Energy and Interatomic Spacing 39
- SUMMARY 42 ■ GLOSSARY 43 ■ PROBLEMS 46**

Chapter 3 Atomic and Ionic Arrangements 49

- 3-1 Short-Range Order versus Long-Range Order 50
 - 3-2 Amorphous Materials 52
 - 3-3 Lattice, Unit Cells, Basis, and Crystal Structures 54
 - 3-4 Allotropic or Polymorphic Transformations 62
 - 3-5 Points, Directions, and Planes in the Unit Cell 63
 - 3-6 Interstitial Sites 74
 - 3-7 Crystal Structures of Ionic Materials 76
 - 3-8 Covalent Structures 81
 - 3-9 Diffraction Techniques for Crystal Structure Analysis 84
- SUMMARY 89 ■ GLOSSARY 90 ■ PROBLEMS 93**

Chapter 4 Imperfections in the Atomic and Ionic Arrangements 101

- 4-1 Point Defects 102
 - 4-2 Other Point Defects 108
 - 4-3 Dislocations 111
 - 4-4 Significance of Dislocations 119
 - 4-5 Schmid's Law 120
 - 4-6 Influence of Crystal Structure 122
 - 4-7 Surface Defects 124
 - 4-8 Importance of Defects 129
- SUMMARY 132 ■ GLOSSARY 133 ■ PROBLEMS 136**

Chapter 5 Atom and Ion Movements in Materials 143

- 5-1 Applications of Diffusion 144
 - 5-2 Stability of Atoms and Ions 147
 - 5-3 Mechanisms for Diffusion 149
 - 5-4 Activation Energy for Diffusion 151
 - 5-5 Rate of Diffusion [Fick's First Law] 152
 - 5-6 Factors Affecting Diffusion 156
 - 5-7 Permeability of Polymers 164
 - 5-8 Composition Profile (Fick's Second Law) 165
 - 5-9 Diffusion and Materials Processing 170
- SUMMARY 174 ■ GLOSSARY 175 ■ PROBLEMS 177**

Chapter 6 Mechanical Properties: Part One 183

- 6-1 Technological Significance 184
 - 6-2 Terminology for Mechanical Properties 185
 - 6-3 The Tensile Test: Use of the Stress-Strain Diagram 191
 - 6-4 Properties Obtained from the Tensile Test 195
 - 6-5 True Stress and True Strain 203
 - 6-6 The Bend Test for Brittle Materials 204
 - 6-7 Hardness of Materials 207
 - 6-8 Strain Rate Effects and Impact Behavior 209
 - 6-9 Properties Obtained from the Impact Test 210
- SUMMARY 213 ■ GLOSSARY 214 ■ PROBLEMS 217**

Chapter 7 Mechanical Properties: Part Two 223

7-1 Fracture Mechanics 224
 7-2 The Importance of Fracture Mechanics 226
 7-3 Microstructural Features of Fracture in Metallic Materials 230
 7-4 Microstructural Features of Fracture in Ceramics, Glasses, and Composites 234
 7-5 Weibull Statistics for Failure Strength Analysis 236
 7-6 Fatigue 241
 7-7 Results of the Fatigue Test 244
 7-8 Application of Fatigue Testing 246
 7-9 Creep, Stress Rupture, and Stress Corrosion 250
 7-10 Evaluation of Creep Behavior 252
 7-11 Use of Creep Data 254
 SUMMARY 256 ■ GLOSSARY 256 ■ PROBLEMS 258

Chapter 8 Strain Hardening and Annealing 265

8-1 Relationship of Cold Working to the Stress-Strain Curve 266
 8-2 Strain-Hardening Mechanisms 271
 8-3 Properties versus Percent Cold Work 273
 8-4 Microstructure, Texture Strengthening, and Residual Stresses 275
 8-5 Characteristics of Cold Working 280
 8-6 The Three Stages of Annealing 282
 8-7 Control of Annealing 285
 8-8 Annealing and Materials Processing 287
 8-9 Hot Working 289
 SUMMARY 291 ■ GLOSSARY 292 ■ PROBLEMS 294

Chapter 9 Principles of Solidification 301

9-1 Technological Significance 302
 9-2 Nucleation 303
 9-3 Applications of Controlled Nucleation 307
 9-4 Growth Mechanisms 308
 9-5 Solidification Time and Dendrite Size 310
 9-6 Cooling Curves 315
 9-7 Cast Structure 316
 9-8 Solidification Defects 318
 9-9 Casting Processes for Manufacturing Components 323
 9-10 Continuous Casting and Ingot Casting 323

9-11	Directional Solidification [DS], Single Crystal Growth, and Epitaxial Growth	328
9-12	Solidification of Polymers and Inorganic Glasses	330
9-13	Joining of Metallic Materials	331
SUMMARY	333 ■ GLOSSARY 334 ■ PROBLEMS 337	

Chapter 10 Solid Solutions and Phase Equilibrium 345

10-1	Phases and the Phase Diagram	346
10-2	Solubility and Solid Solutions	350
10-3	Conditions for Unlimited Solid Solubility	353
10-4	Solid-Solution Strengthening	355
10-5	Isomorphous Phase Diagrams	357
10-6	Relationship Between Properties and the Phase Diagram	365
10-7	Solidification of a Solid-solution Alloy	367
10-8	Nonequilibrium Solidification and Segregation	369
SUMMARY	373 ■ GLOSSARY 374 ■ PROBLEMS 376	

Chapter 11 Dispersion Strengthening and Eutectic Phase Diagrams 383

11-1	Principles and Examples Of Dispersion Strengthening	384
11-2	Intermetallic Compounds	385
11-3	Phase Diagrams Containing Three-Phase Reactions	387
11-4	The Eutectic Phase Diagram	390
11-5	Strength of Eutectic Alloys	401
11-6	Eutectics and Materials Processing	406
11-7	Nonequilibrium Freezing in the Eutectic System	407
SUMMARY	409 ■ GLOSSARY 410 ■ PROBLEMS 412	

Chapter 12 Dispersion Strengthening by Phase Transformations and Heat Treatment 419

12-1	Nucleation and Growth in Solid-State Reactions	420
12-2	Alloys Strengthened by Exceeding the Solubility Limit	424
12-3	Age or Precipitation Hardening	427
12-4	Applications of Age-hardened Alloys	427
12-5	Microstructural Evolution in Age or Precipitation Hardening	428
12-6	Effects of Aging Temperature and Time	430
12-7	Requirements for Age Hardening	432
12-8	Use of Age-Hardenable Alloys at High Temperatures	432

12-9 The Eutectoid Reaction 433
 12-10 Controlling the Eutectoid Reaction 438
 12-11 The Martensitic Reaction and Tempering 443
 12-12 The Shape-Memory Alloys (SMAs) 447
SUMMARY 448 ■ GLOSSARY 450 ■ PROBLEMS 451

Chapter 13 Heat Treatment of Steels and Cast Irons 459

13-1 Designations and Classification of Steels 460
 13-2 Simple Heat Treatments 464
 13-3 Isothermal Heat Treatments 466
 13-4 Quench and Temper Heat Treatments 469
 13-5 Effect of Alloying Elements 474
 13-6 Application of Hardenability 476
 13-7 Specialty Steels 479
 13-8 Surface Treatments 481
 13-9 Weldability of Steel 483
 13-10 Stainless Steels 484
 13-11 Cast Irons 487
SUMMARY 494 ■ GLOSSARY 494 ■ PROBLEMS 497

Chapter 14 Nonferrous Alloys 503

14-1 Aluminum Alloys 504
 14-2 Magnesium and Beryllium Alloys 511
 14-3 Copper Alloys 513
 14-4 Nickel and Cobalt Alloys 516
 14-5 Titanium Alloys 519
 14-6 Refractory and Precious Metals 526
SUMMARY 528 ■ GLOSSARY 528 ■ PROBLEMS 529

Chapter 15 Ceramic Materials 533

15-1 Applications of Ceramics 534
 15-2 Properties of Ceramics 536
 15-3 Synthesis and Processing of Ceramic Powders 537
 15-4 Characteristics of Sintered Ceramics 542
 15-5 Inorganic Glasses 544
 15-6 Glass-Ceramics 550
 15-7 Processing and Applications of Clay Products 552

15-8 Refractories 553
15-9 Other Ceramic Materials 555
SUMMARY 557 ■ GLOSSARY 558 ■ PROBLEMS 560

Chapter 16 Polymers 563

16-1 Classification of Polymers 564
16-2 Addition and Condensation Polymerization 568
16-3 Degree of Polymerization 572
16-4 Typical Thermoplastics 574
16-5 Structure–Property Relationships in Thermoplastics 575
16-6 Effect of Temperature on Thermoplastics 580
16-7 Mechanical Properties of Thermoplastics 586
16-8 Elastomers (Rubbers) 591
16-9 Thermosetting Polymers 596
16-10 Adhesives 598
16-11 Polymer Processing and Recycling 599
SUMMARY 604 ■ GLOSSARY 605 ■ PROBLEMS 607

Chapter 17 Composites: Teamwork and Synergy in Materials 611

17-1 Dispersion-Strengthened Composites 613
17-2 Particulate Composites 615
17-3 Fiber-Reinforced Composites 620
17-4 Characteristics of Fiber-Reinforced Composites 625
17-5 Manufacturing Fibers and Composites 632
17-6 Fiber-Reinforced Systems and Applications 636
17-7 Laminar Composite Materials 643
17-8 Examples and Applications of Laminar Composites 645
17-9 Sandwich Structures 646
SUMMARY 648 ■ GLOSSARY 648 ■ PROBLEMS 650

Chapter 18 Construction Materials 655

18-1 The Structure of Wood 656
18-2 Moisture Content and Density of Wood 659
18-3 Mechanical Properties of Wood 660
18-4 Expansion and Contraction of Wood 662
18-5 Plywood 663
18-6 Concrete Materials 663

18-7	Properties of Concrete	665
18-8	Reinforced and Prestressed Concrete	670
18-9	Asphalt	671
SUMMARY	672	■ GLOSSARY 672 ■ PROBLEMS 673

Chapter 19 Electronic Materials 677

19-1	Ohm's Law and Electrical Conductivity	678
19-2	Band Structures of Solids	683
19-3	Conductivity of Metals and Alloys	686
19-4	Superconductivity	690
19-5	Conductivity in Other Materials	694
19-6	Semiconductors	697
19-7	Applications of Semiconductors	705
19-8	Insulators and Dielectric Properties	709
19-9	Polarization in Dielectrics	709
19-10	Electrostriction, Piezoelectricity, Pyroelectricity, and Ferroelectricity	713
SUMMARY	718	■ GLOSSARY 719 ■ PROBLEMS 721

Chapter 20 Magnetic Materials 725

20-1	Classification of Magnetic Materials	726
20-2	Magnetic Dipoles and Magnetic Moments	726
20-3	Magnetization, Permeability, and the Magnetic Field	728
20-4	Diamagnetic, Paramagnetic, Ferromagnetic, Ferrimagnetic, and Superparamagnetic Materials	731
20-5	Domain Structure and the Hysteresis Loop	734
20-6	The Curie Temperature	737
20-7	Applications of Magnetic Materials	738
20-8	Metallic and Ceramic Magnetic Materials	745
SUMMARY	751	■ GLOSSARY 752 ■ PROBLEMS 753

Chapter 21 Photonic Materials 757

21-1	The Electromagnetic Spectrum	758
21-2	Refraction, Reflection, Absorption, and Transmission	758
21-3	Selective Absorption, Transmission, or Reflection	771
21-4	Examples and Use of Emission Phenomena	772
21-5	Fiber-Optic Communication System	781
SUMMARY	781	■ GLOSSARY 782 ■ PROBLEMS 783

Chapter 22 Thermal Properties of Materials 787

22-1 Heat Capacity and Specific Heat 788

22-2 Thermal Expansion 791

22-3 Thermal Conductivity 795

22-4 Thermal Shock 799

SUMMARY 801 ■ GLOSSARY 801 ■ PROBLEMS 802

Chapter 23 Corrosion and Wear 805

23-1 Chemical Corrosion 806

23-2 Electrochemical Corrosion 808

23-3 The Electrode Potential in Electrochemical Cells 811

23-4 The Corrosion Current and Polarization 815

23-5 Types of Electrochemical Corrosion 816

23-6 Protection Against Electrochemical Corrosion 821

23-7 Microbial Degradation and Biodegradable Polymers 828

23-8 Oxidation and Other Gas Reactions 828

23-9 Wear and Erosion 832

SUMMARY 834 ■ GLOSSARY 835 ■ PROBLEMS 837

Appendix A: Selected Physical Properties of Metals 840

Appendix B: The Atomic and Ionic Radii of Selected Elements 843

Answers to Selected Problems 844

Index 849
