

CONSTRUCTION SITE SECURITY

- Recognize and address threats to construction site security
- Ensure worker safety and protect assets and equipment
- Use downloadable checklists, survey forms, and questionnaires for a quick start to a safer site

Michael J. Arata, Jr.

Contents

CHAPTER 1 OVERVIEW	1
Threat Assessments	3
The Role of Threat Assessments in Physical Security	3
Physical Security	6
The Role of Technology in Physical Security	7
Summary of the Chapters	7
CHAPTER 2 THREAT ASSESSMENT AND RISK ANALYSIS BASICS	11
How to Do a Threat Assessment	12
Identify the Risks	13
Analyze the Risk for Probability of Occurrence	14
Calculating The Cost of a Loss	16
The Survey Form	18
The Crime Statistics	28
Risk Analysis Steps	31
Choosing the Method to Mitigate the Risk	32
Planning and Designing	34
CHAPTER 3 SECURITY OVERVIEW	39
Conducting and Using Threat Assessments	40
How to Do a Threat Assessment	40
Identify the Risks	41
Analyze the Risk for Probability of Occurrence	42
Calculating the Cost of a Loss	43
The Survey Form	44
Physical Security	45
Security Lighting	45
Intrusion Detection for Job Trailers	51
Balanced Magnetic Switches	51
Alarm Systems	53
Controlling Vehicular and Pedestrian Traffic Flow	57
Clear Zones	57
Locks and Key Control	58
Equipment Security	64
Job Site Security Surveys	65
The Security Officer's Role	65

POST Orders	67
Closed Circuit Television (CCTV)	70
Access Control Systems	71
Information Security	72
Investigations	73
Eco-Terror	74
The Security Survey and Security Planning	75
CHAPTER 4 THE SECURITY SURVEY	75
Tenant Improvement (TI) jobs	79
Access Points and the Perimeter Fence	79
Remote Job Sites	80
The Security Survey	81
Lighting	82
Tools and Equipment	83
Security Officers	84
Intrusion Detection Systems	84
The Security Survey Form	85
Benefits of Doing a Security Survey	85
How to Conduct a Security Survey	94
CHAPTER 5 PERIMETER SECURITY	97
Types of Perimeter Fences	98
Chain Link	99
Wrought Iron	102
Wood Fences	103
Concrete Walls	105
Fence Openings	106
Roll/Slide Gates	107
Cantilever Gates	108
Motorized Gates	109
Swing Gates	109
Barbed Wire	109
Razor Wire	110
CHAPTER 6 INTRUSION DETECTION FOR JOB TRAILERS	113
Alarm Categories	114
Sensor Technology	115
Switches	116
Volumetric Sensors	119
Ultrasonic Sensors	119
Infrared	122
Glass Breaks	125
Microwave	127
Vibration Sensors	131
Fence Vibration Sensors	133
Fiber Optic	134

Electric Field	137
Capacitance	137
Taut Wire	140
Photo Electric Beam	140
Video Motion Detection	141
Appendix	142
Intrusion Detection System Design Specifications	143
INSTRUCTIONS TO BIDDERS	154
CHAPTER 7 LOCKS AND KEY CONTROL	189
Types of Locks	190
Cylindrical Locks	190
Deadbolt Locks	191
Mortise Locks	191
Drop Bolt Locks	192
Rim Cylinder Locks	192
Disc Tumbler Locks	192
Pin Tumbler Locks	193
Unit Locks	193
Cipher Locks	193
Fingerprint Locks	193
Padlocks	193
Electric Strike Locks	194
Electric Locks	194
Magnetic Locks	194
High Security Locks	194
Keying Systems	195
Specifications	196
CHAPTER 8 VIDEO SURVEILLANCE	207
CCTV System Components—Camera	208
Video Transmission—Coaxial Cable	211
Fiber Optic Cable	211
Microwave	211
Multiplexer (MUX)	212
Displaying Video—Monitor	212
Recorders—VCR	212
Digital Video Recorders (DVR)	213
Wireless Cameras	214
IP Addressable Cameras	214
Basic System Design Considerations	215
The Selection of the Lens	218
Selection of the Housing	219
Camera Placement	220
Lighting	221
CHAPTER 9 HEAVY EQUIPMENT SECURITY	223

Hardening the Job Site	224
Protecting Equipment	225
Protecting Tools and Portable Equipment	229
National Databases	233
Investigate All Job Site Thefts	233
CHAPTER 10 ELECTRONIC ACCESS CONTROL	235
Biometric Systems—Hand Geometry	236
Fingerprint Reader	237
Iris Scan	237
Retina Scan	237
Voice Recognition	237
Signature Recognition	238
Facial Recognition	238
Combination Systems	238
Access Control Systems Cards	239
Magnetic Stripe	239
Proximity Cards	239
Smart Cards	241
Dual Technology Cards	241
Designing the Access Control System	241
Types of Access Control System Locks	244
Request to Exit Device (REX)	245
Door Contacts	246
Automatic Door Closer	247
Access Control System Panels	247
Sample Design Specifications for Electronic Security Systems	247
CHAPTER 11 ROLE OF THE SECURITY OFFICER	277
Security Officer Selection	278
Security Officer Company Contracts	279
Post Orders	280
Security Officer Reports	283
Appendix A	285
Appendix B	289
Appendix C	292
CHAPTER 12 SECURITY POLICIES	301
Developing Policies	302
Site Access Control for Job Sites	304
Equipment Security	309
Workplace Violence Prevention	315
Bomb Threats	318
CHAPTER 13 INVESTIGATIONS	327
Pre-employment Screening	329
Investigations for Theft of Company Property	332
CHAPTER 14 INFORMATION SECURITY	341

Document Classification	342
Physical Security Countermeasures	343
Physical Access	344
Security Lighting	346
Marking Documents	346
Securing Laptop and Desk Top Computers	347
Disposing of Confidential Documents	348
Security Awareness	349
Security Website	350
Security Bulletins	350
Security Slogans	351
Physical Security Audits	351
Physical Protection for Cables and Closets	351
Technical Security Countermeasures	352
Computer and Network Access Control	352
Installing Firewalls on Job Sites	354
Virus Protection	355
Encryption	355
CHAPTER 15 SECURITY LIGHTING	357
Foot-Candle Power	359
Categories of Security lighting	359
Types of Lamps (Luminaries)	360
Types of Security Lighting	361
Lighting Requirements for security Protection	362
Lighting Requirements for CCTV	365
Electrical Power Sources for Security Lighting	366
Wiring and Lighting Controls	367
Maintenance of Lighting Systems	368
Security Lighting Design Considerations	368
CHAPTER 16 ANIMAL RIGHTS AND ECO-TERRORISM	371
The Groups: ALF and ELF	372
Protecting the Job Site	381
CHAPTER 17 DEVELOPING THE JOB SITE SECURITY PLAN	385
Performing the Threat Assessment	386
The Elements of the Plan	390
CHAPTER 18 WHERE TO FIND HELP WITH JOB SITE SECURITY AND USEFUL FORMS	405
PART I Where to Find Help with Job Site Security	406
PART II Useful Forms	415
INDEX	437
