|           | About the Author<br>Acknowledgments<br>Preface   | V          |
|-----------|--|------------|
| Chapter 1 | Introduction to Cable Communications Systems   |            |
|           | Objectives   | 2          |
|           | 1.1 Cable Television History   | 2          |
|           | <ul><li>1.2 Changes in Plant Design and Development</li><li>1.3 Changes in CATV Regulations and Requirements</li></ul> | 29         |
|           | Summary  | 30         |
|           | Questions  | 37         |
|           | Problems   | 38         |
| Chapter 2 | Coaxial Cable Systems and Networks   | 39         |
|           | Objectives   | 4(         |
|           | 2.1 Introduction   | 4(         |
|           | 2.2 The Cable Distribution Plant   | 47         |
|           | 2.3 System Testing/Proof of Performance  | 75         |
|           | Summary  | 8          |
|           | Questions<br>Problems  | 82<br>83   |
| Chapter 3 | Headends and Signal Processing   | 85         |
|           | Objectives   | 86         |
|           | 3.1 The Headend  | 86         |
|           | 3.2 Headend Electronic Equipment   | 96         |
|           | 3.3 Headend Powering and Monitoring  | 102        |
|           | 3.4 Satellite Systems  | 106        |
|           | 3.5 Microwave Systems Applications   | 117        |
|           | Summary  | 129        |
|           | Questions<br>Problems  | 130<br>130 |
| Chapter 4 | Fiber Ootic Technology in Cable Systems  |            |
| Chapter 4 | Fiber-Optic Technology in Cable Systems  | 133        |
|           | Objectives   | 134        |
|           | 4.1 Introduction   | 134        |
|           | 4.2 Fiber-Optic Trunking and Cable Television Applications   | 153        |
|           | 4.3 Fiber-Optic Construction and Installations 4.4 Aerial Electronic Equipment   | 165<br>172 |
|           | Summary  | 172        |
|           | Questions  | 179        |
|           | Problems   | 179        |

iv

| Chapter 5 | Digital Technology and Cable System Applications       | 181 |
|-----------|--|-----|
|           | Objectives   | 182 |
|           | 5.1 A Short History of Digital Communications          | 182 |
|           | 5.2 Present Data Communications Systems                | 193 |
|           | 5.3 Telephone Systems and Digital Technology           | 202 |
|           | 5.4 Digital Video and HDTV                             | 217 |
|           | Summary  | 230 |
|           | Questions  | 232 |
|           | Problems   | 232 |
| Chapter 6 | Subscriber Installation and Terminal Devices           | 235 |
|           | Objectives   | 236 |
|           | 6.1 The Subscriber Drop                                | 236 |
|           | 6.2 Subscriber Converters                              | 255 |
| •         | Summary  | 264 |
|           | Questions  | 265 |
|           | Problems   | 266 |
| Chapter 7 | Cable Plant Testing and Maintenance Procedures         | 267 |
|           | Objectives   | 268 |
|           | 7.1 Instruments and Measurements                       | 268 |
|           | 7.2 Cable System Tests and Measurements                | 279 |
|           | 7.3 Headend and Hub Testing                            | 292 |
|           | 7.4 Fiber-Optic Plant                                  | 294 |
|           | 7.5 Digital Signal Testing                             | 300 |
|           | 7.6 Typical System Problems and Solutions              | 306 |
|           | Summary  | 324 |
|           | Questions  | 326 |
|           | Problems   | 327 |
| Chapter 8 | Cable System Network Design Considerations             | 329 |
|           | Objectives   | 330 |
|           | 8.1 Types of Cable Communication Networks              | 330 |
|           | 8.2 Optical-Fiber Applications                         | 342 |
|           | 8.3 The Interconnect Process                           | 352 |
|           | Summary  | 355 |
|           | Questions  | 357 |
|           | Appendix A Proof and Discussion of Pertinent Equations | 359 |
|           | Appendix B Transmission Line Calculations              | 367 |
|           | Appendix C Coaxial Cable System Powering               | 371 |
|           | Appendix D Broadband Noise Combining                   | 373 |
|           | Appendix E Cascaded Amplifier Theory                   | 375 |
|           | Appendix F Answers to Odd-Numbered Problems            | 383 |
|           | Glossary   | 385 |
|           | References   | 389 |
