Contents

1 AN INTRODUCTION TO THE HUMAN BODY

Jaime's Story 2 Introduction 3

1.1 THE HUMAN BODY IS COMPOSED OF SIX LEVELS OF STRUCTURAL ORGANIZATION AND CONTAINS ELEVEN ORGAN SYSTEMS. 4

Return to Jaime's Story 8

1.2 THE HUMAN BODY CARRIES ON BASIC LIFE PROCESSES THAT DISTINGUISH IT FROM NONLIVING OBJECTS. 9

Basic Life Processes 9 Homeostasis 10 Body Fluids 10

Return to Jaime's Story 10

1.3 HOMEOSTASIS, THE DYNAMIC EQUILIBRIUM OF THE BODY'S INTERNAL ENVIRONMENT, IS CONTROLLED THROUGH FEEDBACK SYSTEMS. 11

Feedback Systems 11

Negative Feedback Systems 12 Positive Feedback Systems 13

Homeostatic Imbalances 14

Return to Jaime's Story 14

1.4 THE DESCRIPTION OF THE HUMAN BODY ASSUMES A STANDARD ANATOMICAL POSITION AND USES SPECIFIC REGIONAL AND DIRECTIONAL TERMS. 15

2 THE CHEMICAL LEVEL OF ORGANIZATION

Eugene's Story 28 Introduction 29

2.1 CHEMICAL ELEMENTS ARE COMPOSED OF SMALL UNITS CALLED ATOMS, MADE UP OF PROTONS, NEUTRONS, AND ELECTRONS. 30

Chemical Elements 30 Structure of Atoms 30

Atomic Number and Mass Number 31 Atomic Mass 31

Ions, Molecules, and Compounds 31

Return to Eugene's Story 33

2.2 ATOMS ARE HELD TOGETHER BY CHEMICAL BONDS, WHICH RESULT FROM THE GAIN, LOSS, OR SHARING OF ELECTRONS. 33

Ionic Bonds 33 Covalent Bonds 34 Hydrogen Bonds 36

Return to Eugene's Story 37

2.3 CHEMICAL REACTIONS OCCUR WHEN ATOMS COMBINE WITH OR BREAK APART FROM OTHER ATOMS. 38

Forms of Energy and Chemical Reactions 38

Energy Transfer in Chemical Reactions 38

Activation Energy 38 Catalysts 39

Types of Chemical Reactions 39

Synthesis Reactions—Anabolism 39

Decomposition Reactions—Catabolism 40

Exchange Reactions 40 Reversible Reactions 40

2.4 INORGANIC COMPOUNDS INCLUDE WATER, SALTS, ACIDS, AND BASES. 41

Water 41

Water as a Solvent 41 Water in Chemical Reactions 42

Thermal Properties of Water 42 Water as a Lubricant 42

2

Body Positions 15 Regional Names 16

Directional Terms 16 Planes and Sections 18

Return to Jaime's Story 19

1.5 BODY CAVITIES ARE SPACES WITHIN THE BODY THAT HELP PROTECT, SEPARATE, AND SUPPORT INTERNAL ORGANS. 20

1.6 SEROUS MEMBRANES LINE THE WALLS OF BODY CAVITIES AND COVER ORGANS WITHIN THEM. 23

Return to Jaime's Story 23

1.7 THE ABDOMINOPELVIC CAVITY IS DIVIDED INTO REGIONS OR QUADRANTS. 24

*Jaime's Story:
Epilogue and Discussion 25*

Summary 26

On Your DVD 27

28

Solutions, Colloids, and Suspensions 42

Inorganic Acids, Bases, Salts 42

Acid-Base Balance: The Concept of pH 43

Maintaining pH: Buffer Systems 44

2.5 ORGANIC MOLECULES ARE LARGE CARBON-BASED MOLECULES THAT CARRY OUT COMPLEX FUNCTIONS IN LIVING SYSTEMS. 45

Return to Eugene's Story 46

2.6 CARBOHYDRATES, WHICH INCLUDE SUGARS, STARCHES, GLYCOGEN AND CELLULOSE, FUNCTION AS BUILDING BLOCKS AND SOURCES OF ENERGY. 46

Monosaccharides and Disaccharides: The Simple Sugars 46

Polysaccharides 47

2.7 LIPIDS ARE NONPOLAR ORGANIC MOLECULES IMPORTANT FOR CELL MEMBRANE STRUCTURE, ENERGY STORAGE, AND HORMONE PRODUCTION. 48

Triglycerides 49 Phospholipids 50 Steroids 51

Return to Eugene's Story 51

2.8 PROTEINS, COMPLEX ORGANIC MOLECULES CONSTRUCTED FROM AMINO ACIDS, GIVE STRUCTURE TO THE BODY, REGULATE METABOLIC PROCESSES, HELP MUSCLES TO CONTRACT, AND FUNCTION AS ENZYMES. 52

Amino Acids and Polypeptides 52

Levels of Structural Organization in Proteins 53

Enzymes 55

- 2.9 THE NUCLEIC ACIDS INCLUDE DEOXYRIBONUCLEIC ACID (DNA), THE PRIMARY CHEMICAL IN GENES, AND RIBONUCLEIC ACID (RNA), WHICH TAKES PART IN PROTEIN SYNTHESIS. 57
- 2.10 ADENOSINE TRIPHOSPHATE (ATP) IS THE PRINCIPAL ENERGY-TRANSFERRING MOLECULE IN LIVING SYSTEMS. 59

Eugene's Story:

Epilogue and Discussion 60

Summary 60

On Your DVD 63

3 THE CELLULAR LEVEL OR ORGANIZATION

Joseph's Story 64 Introduction 65

- 3.1 THE PRINCIPAL PARTS OF A CELL ARE THE PLASMA MEMBRANE, THE CYTOPLASM, AND THE NUCLEUS. 66
- 3.2 THE PLASMA MEMBRANE SURROUNDS AND CONTAINS THE CYTOPLASM, AND PROVIDES A SELECTIVE BARRIER THAT REGULATES FLOW OF MATERIALS INTO AND OUT OF THE CELL. 67

The Lipid Bilayer 68 Arrangement of Membrane Proteins 68
 Functions of Membrane Proteins 68 Membrane Fluidity 69
 Membrane Permeability 70
 Gradients Across the Plasma Membrane 70
Return to Joseph's Story 71

- 3.3 TRANSPORT OF A SUBSTANCE ACROSS THE PLASMA MEMBRANE OCCURS BY BOTH PASSIVE AND ACTIVE PROCESSES. 71

Kinetic Energy Transport 71

Diffusion 71

Diffusion Through the Lipid Bilayer 72

Diffusion Through Membrane Ion Channels 72

Osmosis 73

Transport by Transporter Proteins 75

Facilitated Diffusion 75 Active Transport 75

Primary Active Transport 75 Secondary Active Transport 76

Transport in Vesicles 77

Endocytosis 77 Exocytosis 80 Transcytosis 80

Return to Joseph's Story 82

- 3.4 CYTOPLASM CONSISTS OF THE CYTOSOL AND ORGANELLES. 82

Cytosol 82 Organelles 82

The Cytoskeleton 82 Centrosome 83 Cilia and Flagella 84

4 THE TISSUE LEVEL OF ORGANIZATION 11

John Doe's Story 112 Introduction 113

- 4.1 HUMAN BODY TISSUES CAN BE CLASSIFIED ACCORDING TO THEIR FUNCTION AND STRUCTURE INTO FOUR GROUPS: EPITHELIAL, CONNECTIVE, MUSCLE, OR NERVOUS. 114
- 4.2 EPITHELIAL TISSUE COVERS BODY SURFACES, LINES ORGANS AND BODY CAVITIES, OR SECRETES SUBSTANCES INTO THE BLOOD, TO A BODY SURFACE, OR INTO THE LUMEN OF A HOLLOW ORGAN. 115

Covering and Lining Epithelia 115

Simple Epithelia 116

Simple Squamous Epithelium 116 Simple Cuboidal Epithelium 116

Simple Columnar Epithelium 117

Pseudostratified Columnar Epithelium 117

Stratified Epithelia 122

Stratified Squamous Epithelium 122 Transitional Epithelium 122

Glandular Epithelia 122

Return to John Doe's Story 123

64

Ribosomes 84 Endoplasmic Reticulum 86 Golgi Complex 87
 Lysosomes 89 Peroxisomes 89 Proteasomes 90
 Mitochondria 90

Return to Joseph's Story 91

- 3.5 THE NUCLEUS CONTAINS NUCLEOLI AND GENES. 92

Return to Joseph's Story 95

- 3.6 CELLS MAKE PROTEINS BY TRANSCRIBING AND TRANSLATING THE GENETIC INFORMATION CONTAINED IN DNA. 96

Transcription 96 Translation 97

Return to Joseph's Story 99

- 3.7 CELL DIVISION ALLOWS THE REPLACEMENT OF CELLS OR THE ADDITION OF NEW CELLS (SOMATIC CELL DIVISION) OR THE PRODUCTION OF GAMETES (REPRODUCTIVE CELL DIVISION). 100

Somatic Cell Division 100

Interphase 100 Mitotic Phase 101

Nuclear Division: Mitosis 101

Cytoplasmic Division: Cytokinesis 103

Reproductive Cell Division 103

Meiosis 103

Meiosis I 103 Meiosis II 105

Joseph's Story:

Epilogue and Discussion 107

Summary 107

On Your DVD 111

- 4.3 CONNECTIVE TISSUE BINDS ORGANS TOGETHER, STORES ENERGY RESERVES AS FAT, AND HELPS PROVIDE IMMUNITY AGAINST DISEASE-CAUSING ORGANISMS. 124

General Features of Connective Tissue 124

Connective Tissue Cells 124

Connective Tissue Extracellular Matrix 125

Ground Substance 125 Fibers 125

Types of Connective Tissue 125

Loose Connective Tissue 125

Areolar Connective Tissue 125 Adipose Tissue 126

Reticular Connective Tissue 126

Dense Connective Tissue 126

Dense Regular Connective Tissue 126

Dense Irregular Connective Tissue 126

Elastic Connective Tissue 126

Cartilage 126 Bone (Osseous Tissue) 132

Liquid Connective Tissue 132

Blood 132 Lymph 132

Return to John Doe's Story 134

4.4 MEMBRANES COVER THE SURFACE OF THE BODY, LINE BODY CAVITIES, AND COVER ORGANS. 135

Epithelial Membranes 135

Mucous Membranes 135 Serous Membranes 135

Cutaneous Membrane 135

Synovial Membranes 135

Return to John Doe's Story 137

4.5 MUSCLE TISSUE GENERATES THE PHYSICAL FORCE NEEDED TO MAKE BODY STRUCTURES MOVE. 138

Return to John Doe's Story 140

5 THE INTEGUMENTARY SYSTEM 148

Jon's Story 148

Introduction 149

5.1 SKIN IS COMPOSED OF A SUPERFICIAL EPIDERMIS AND A DEEPER DERMIS, AND IS ANCHORED BY THE HYPODERMIS. 150

Return to Jon's Story 152

5.2 THE LAYERS OF THE EPIDERMIS INCLUDE THE STRATUM BASALE, STRATUM SPINOSUM, STRATUM GRANULOSUM, STRATUM LUCIDUM, AND STRATUM CORNEUM. 153

Cells of the Epidermis 153 Strata of the Epidermis 154

Keratinization and Growth of the Epidermis 154

Return to Jon's Story 155

5.3 THE DERMIS CONTAINS BLOOD VESSELS, LYMPHATIC VESSELS, NERVES, SENSORY RECEPTORS, HAIR FOLLICLES, AND GLANDS. 156

Return to Jon's Story 157

5.4 SKIN COLOR IS A RESULT OF THE PIGMENTS MELANIN, CAROTENE, AND HEMOGLOBIN. 157

Return to Jon's Story 158

5.5 THE FUNCTIONS OF HAIR, SKIN GLANDS, AND NAILS INCLUDE PROTECTION AND BODY TEMPERATURE REGULATION. 159

Hair 159

Anatomy of a Hair 159 Hair Growth 159 Hair Color 161

4.6 NERVOUS TISSUE CONSISTS OF NEURONS AND NEUROGLIA. 141

Return to John Doe's Story 142

4.7 THE ABILITY OF AN INJURED TISSUE TO REPAIR ITSELF DEPENDS ON THE EXTENT OF DAMAGE AND THE REGENERATIVE ABILITY OF THE INJURED TISSUE, AND MAY INCLUDE THE FORMATION OF SCAR TISSUE. 143

John Doe's Story:

Epilogue and Discussion 144

Summary 144

On Your DVD 147

Glands of the Skin 161

Sebaceous Glands 161 Sudoriferous Glands 161

Ceruminous Glands 162

Nails 162

Return to Jon's Story 163

5.6 SKIN DAMAGE SETS IN MOTION A SEQUENCE OF EVENTS THAT REPAIRS THE SKIN TO ITS NORMAL (OR NEAR-NORMAL) STRUCTURE AND FUNCTION. 163

Epidermal Wound Healing 163 Deep Wound Healing 163

Return to Jon's Story 165

5.7 SKIN REGULATES BODY TEMPERATURE, PROTECTS UNDERLYING TISSUES, PROVIDES CUTANEOUS SENSATIONS, EXCRETES BODY WASTES, AND SYNTHESIZES VITAMIN D. 166

Regulation of Body Temperature 166 Protection 166

Cutaneous Sensations 166 Excretion and Absorption 166

Synthesis of Vitamin D 166

Jon's Story:

Epilogue and Discussion 167

Summary 167

On Your DVD 169

6 INTRODUCTION TO THE SKELETAL SYSTEM 170

Amanda's Story 170 Introduction 171

6.1 SKELETAL SYSTEM FUNCTIONS INCLUDE SUPPORT, PROTECTION, MOVEMENT, MINERAL HOMEOSTASIS, BLOOD CELL PRODUCTION, AND ENERGY STORAGE. 172

Return to Amanda's Story 172

6.2 BONES ARE CLASSIFIED ON THE BASIS OF SHAPE AS LONG, SHORT, FLAT, IRREGULAR, OR SESAMOID. 173

Return to Amanda's Story 174

6.3 LONG BONES CONTAIN A DIAPHYSIS, A MEDULLARY CAVITY, EPIPHYSES, METAPHYSES, AND SOMETIMES PERIOSTEUM. 174

Return to Amanda's Story 176

6.4 OSSEOUS TISSUE CAN BE ARRANGED IN TWO WAYS: AS COMPACT BONE TISSUE AND SPONGY BONE TISSUE. 176

Extracellular Matrix of Osseous Tissue 176

Cells of Osseous Tissue 176 Types of Osseous Tissue 177

Compact Bone Tissue 177 Spongy Bone Tissue 179

6.5 BONES ARE RICHLY SUPPLIED WITH BLOOD VESSELS AND NERVES. 180

Return to Amanda's Story 181

6.6 THE TWO TYPES OF BONE FORMATION INCLUDE INTRAMEMBRANEOUS OSSIFICATION AND ENDOCHONDRAL OSSIFICATION. 182

- Intramembranous Ossification 182 Endochondral Ossification 182
Return to Amanda's Story 186
- 6.7 BONES GROW LONGER DUE TO ACTIVITY OF THE EPIPHYSEAL PLATE AND INCREASE IN DIAMETER BY THE ADDITION OF NEW OSSEOUS TISSUE AROUND THE OUTER SURFACE. 187
- Growth in Length 187 Growth in Thickness 188
 Factors Affecting Bone Growth 189
Return to Amanda's Story 189

- 6.8 BONE REMODELING RENEWS OSSEOUS TISSUE, REDISTRIBUTES BONE EXTRACELLULAR MATRIX, AND REPAIRS BONE INJURIES. 190

*Amanda's Story:
 Epilogue and Discussion 191*

Summary 191

On Your DVD 193

7 THE AXIAL SKELETON 194

Hassan's Story 194 Introduction 195

- 7.1 BONES OF THE AXIAL SKELETON AND APPENDICULAR SKELETON HAVE CHARACTERISTIC SURFACE MARKINGS. 196
- 7.2 THE SKULL PROVIDES ATTACHMENT SITES FOR MUSCLES AND MEMBRANES, AND PROTECTS AND SUPPORTS THE BRAIN AND SENSE ORGANS. 199
Return to Hassan's Story 199
- 7.3 THE CRANIAL BONES INCLUDE THE FRONTAL BONE, PARIETAL BONES, TEMPORAL BONES, OCCIPITAL BONE, SPHENOID BONE, AND ETHMOID BONE. 200
- Frontal Bone 200 Parietal Bones 202 Temporal Bones 202
 Occipital Bone 204 Sphenoid Bone 206 Ethmoid Bone 210
Return to Hassan's Story 213
- 7.4 FACIAL BONES INCLUDE THE NASAL BONES, MAXILLAE, ZYGOMATIC BONES, MANDIBLE, LACRIMAL BONES, PALATINE BONES, INFERIOR NASAL CONCHAE, AND VOMER. 214
- Nasal Bones 214 Maxillae 214 Zygomatic Bones 215
 Lacrimal Bones 215 Palatine Bones 215
 Inferior Nasal Conchae 215 Vomer 215 Mandible 215
Return to Hassan's Story 216
- 7.5 UNIQUE FEATURES OF THE SKULL INCLUDE THE NASAL SEPTUM, ORBITS, SUTURES, PARANASAL SINUSES, AND FONTANELS. 217
- Nasal Septum 217 Orbits 217 Paranasal Sinuses 218
 Sutures 218 Fontanelles 219
Return to Hassan's Story 220
- 7.6 THE HYOID BONE SUPPORTS THE TONGUE AND PROVIDES ATTACHMENT SITES FOR MUSCLES OF THE TONGUE, PHARYNX, AND LARYNX. 220

- 7.7 THE VERTEBRAL COLUMN ENCLOSES AND PROTECTS THE SPINAL CORD, SUPPORTS THE HEAD, AND IS A POINT OF ATTACHMENT FOR THE RIBS, PELVIC GIRDLE, AND MUSCLES OF THE BACK. 221

Normal Curves of the Vertebral Column 221
 Intervertebral Discs 221

- 7.8 A VERTEBRA USUALLY CONSISTS OF A BODY, A VERTEBRAL ARCH, AND SEVERAL PROCESSES. 223

Body 223 Vertebral Arch 223 Processes 224
Return to Hassan's Story 225

- 7.9 VERTEBRAE IN THE DIFFERENT REGIONS OF THE VERTEBRAL COLUMN VARY IN SIZE, SHAPE, AND DETAIL. 226

Cervical Region 226 Thoracic Region 227 Lumbar Region 227
 Sacrum 229 Coccyx 230
Return to Hassan's Story 231

- 7.10 THE THORACIC CAGE ENCLOSES AND PROTECTS VITAL ORGANS IN THE THORAX AND UPPER ABDOMEN AND PROVIDES SUPPORT FOR THE BONES OF THE SHOULDER GIRDLES AND UPPER LIMBS. 232

Sternum 232 Ribs 233

*Hassan's Story:
 Epilogue and Discussion 235*

Summary 235

On Your DVD 237

8 THE APPENDICULAR SKELETON 238

Stefan's Story 238 Introduction 239

- 8.1 EACH PECTORAL GIRDLE, WHICH CONSISTS OF A CLAVICLE AND SCAPULA, ATTACHES AN UPPER LIMB TO THE AXIAL SKELETON. 240

Clavicle 240 Scapula 241
Return to Stefan's Story 243

- 8.2 THE BONES OF EACH UPPER LIMB INCLUDE THE HUMERUS, ULNA, RADIUS, CARPALS, METACARPALS, AND PHALANGES. 244

Humerus 244 Ulna and Radius 245
 Carpals, Metacarpals, and Phalanges 248
Return to Stefan's Story 250

- 8.3 THE PELVIC GIRDLE SUPPORTS THE VERTEBRAL COLUMN AND PELVIC VISCERA AND ATTACHES THE LOWER LIMBS TO THE AXIAL SKELETON. 250

Ilium 250 Ischium 251 Pubis 251
 Acetabulum 251 False and True Pelves 253

- 8.4 MALE PELVES ARE GENERALLY LARGER, HEAVIER, AND HAVE MORE PROMINENT MARKINGS; FEMALE PELVES ARE GENERALLY WIDER AND SHALLOWER. 254

Return to Stefan's Story 256

8.5 THE BONES OF EACH LOWER LIMB INCLUDE THE FEMUR, PATELLA, TIBIA, FIBULA, TARSALS, METATARSALS, AND PHALANGES. 257

Femur 257 Patella 259 Tibia and Fibula 259
Tarsals, Metatarsals, and Phalanges 261

9 ARTICULATIONS 266

Virtjean's Story 266 Introduction 267

9.1 STRUCTURALLY, JOINTS ARE CLASSIFIED AS FIBROUS, CARTILAGINOUS, OR SYNOVIAL; FUNCTIONALLY, JOINTS ARE CLASSIFIED AS SYNARTHROSES, AMPHIARTHROSES, OR DIARTHROSES. 268

9.2 FIBROUS JOINTS LACK A SYNOVIAL CAVITY AND ARE HELD TOGETHER BY FIBROUS CONNECTIVE TISSUE. 269

Sutures 269 Syndesmoses 269 Gomphoses 269

9.3 CARTILAGINOUS JOINTS LACK A SYNOVIAL CAVITY AND ARE HELD TOGETHER BY CARTILAGE. 270

Synchondroses 270 Symphyses 270
Return to Virtjean's Story 271

9.4 ARTICULATING SURFACES OF BONES AT A FREELY MOVABLE SYNOVIAL JOINT ARE COVERED WITH ARTICULAR CARTILAGE AND ENCLOSED WITHIN A FLUID-FILLED SYNOVIAL CAVITY. 271

Articular Capsule 271 Synovial Fluid 272
Accessory Ligaments and Articular Discs 273
Bursae and Tendon Sheaths 273
Return to Virtjean's Story 274

9.5 SYNOVIAL JOINTS ARE DESCRIBED AS PLANAR, HINGE, PIVOT, CONDYLOID, SADDLE, OR BALL-AND-SOCKET. 274

Planar Joints 274 Hinge Joints 274 Pivot Joints 274
Condyloid Joints 276 Saddle Joints 276
Ball-and-Socket Joints 276
Return to Virtjean's Story 276

10 MUSCLE TISSUE 298

Jesse's Story 298 Introduction 299

10.1 SKELETAL, CARDIAC, AND SMOOTH MUSCLE TISSUES DIFFER IN THEIR LOCATIONS, STRUCTURE, AND FUNCTION. 300

10.2 MUSCLE TISSUE PRODUCES MOVEMENTS, GENERATES HEAT, AND STABILIZES BODY POSITIONS; IT POSSES ELECTRICAL EXCITABILITY, CONTRACTILITY, EXTENSIBILITY, AND ELASTICITY. 301

Functions of Muscle Tissue 301 Properties of Muscle Tissue 301
Return to Jesse's Story 302

10.3 SKELETAL MUSCLES ARE SURROUNDED BY CONNECTIVE TISSUES, AND ARE WELL SUPPLIED WITH NERVES AND BLOOD VESSELS. 302

Connective Tissue Components 302 Nerve and Blood Supply 304
Return to Jesse's Story 305

*Stefan's Story:
Epilogue and Discussion 263*

Summary 264

On Your DVD 265

9.6 TERMS FOR TYPES OF MOVEMENTS AT A SYNOVIAL JOINT INDICATE THE FORM OF MOTION, THE DIRECTION OF MOVEMENT, OR THE RELATIONSHIP OF ONE BODY PART TO ANOTHER DURING MOVEMENT. 278

Gliding 278 Angular Movements 278
Flexion, Extension, Lateral Flexion, and Hyperextension 278
Abduction, Adduction, and Circumduction 279
Rotation 281 Special Movements 281
Return to Virtjean's Story 284

9.7 THE SHOULDER, ELBOW, HIP, AND KNEE JOINTS PROVIDE EXAMPLES OF SYNOVIAL JOINT COMPONENTS, STRUCTURAL AND FUNCTIONAL CLASSIFICATIONS, AND MOVEMENTS. 284

The Shoulder Joint 287
Anatomical Components 287 Movements 287
The Elbow Joint 289
Anatomical Components 289 Movements 289
The Hip Joint 290
Anatomical Components 290 Movements 291
The Knee Joint 292
Anatomical Components 292 Movements 292

*Virtjean's Story:
Epilogue and Discussion 294*

Summary 295

On Your DVD 297

10.4 EACH SKELETAL MUSCLE FIBER IS COVERED BY A SARCOLEMMA; EACH OF ITS MYOFIBRILS IS SURROUNDED BY SARCOPLASMIC RETICULUM AND CONTAINS SARCOMERES. 305

Sarcolemma, Transverse Tubules, and Sarcoplasm 305
Myofibrils and Sarcoplasmic Reticulum 307
Filaments and the Sarcomere 307 Muscle Proteins 308
Return to Jesse's Story 310

10.5 THE NEUROMUSCULAR JUNCTION, THE SYNAPSE BETWEEN A MOTOR NEURON AND A SKELETAL MUSCLE FIBER, IS WHERE A MUSCLE ACTION POTENTIAL IS INITIATED. 310

Return to Jesse's Story 312

10.6 AN ACTION POTENTIAL RELEASES CALCIUM IONS THAT ALLOW THE THICK FILAMENTS TO BIND TO AND PULL THIN FILAMENTS TOWARD THE CENTER OF THE SARCOMERE. 313

Excitation-Contraction Coupling 313 The Contraction Cycle 314
Relaxation 315

Return to Jesse's Story 317

**10.7 MUSCLE FIBER TENSION IS CONTROLLED BY STIMULATION
FREQUENCY AND THE NUMBER OF MOTOR UNITS ACTIVATED;
CHANGES IN MUSCLE FIBER TENSION CAN PRODUCE ISOTONIC OR
ISOMETRIC CONTRACTIONS. 318**

Motor Units 318 Twitch Contraction 318
Frequency of Stimulation 319 Motor Unit Recruitment 320
Muscle Tone 320 Isotonic and Isometric Contractions 320

Return to Jesse's Story 322

**10.8 THREE SOURCES FOR ATP PRODUCTION IN MUSCLE FIBERS
INCLUDE CREATINE PHOSPHATE, ANAEROBIC CELLULAR RESPIRA-
TION, AND AEROBIC CELLULAR RESPIRATION. 323**

Production of ATP in Muscle Fibers 323
Creatine Phosphate 324 Anaerobic Cellular Respiration 324
Aerobic Cellular Respiration 324

Muscle Fatigue 324 Oxygen Consumption After Exercise 324
Return to Jesse's Story 325

**10.9 SKELETAL MUSCLE FIBERS ARE CLASSIFIED INTO THREE MAIN
FUNCTIONAL TYPES: (1) SLOW OXIDATIVE FIBERS, (2) FAST
OXIDATIVE-GLYCOLYTIC FIBERS, AND (3) FAST GLYCOLYTIC
FIBERS. 326**

Slow Oxidative Fibers 326 Fast Oxidative-Glycolytic Fibers 326
Fast Glycolytic Fibers 326
Distribution and Recruitment of Different Types of Fibers 326

**10.10 CARDIAC MUSCLE TISSUE IS FOUND IN THE WALLS OF THE
HEART; SMOOTH MUSCLE TISSUE IS FOUND IN THE WALLS OF
HOLLOW ORGANS, BLOOD VESSELS, AND AIRWAYS. 328**

Cardiac Muscle Tissue 328 Smooth Muscle Tissue 328
Microscopic Anatomy of Smooth Muscle 328
Physiology of Smooth Muscle 328

Jesse's Story:

Epilogue and Discussion 332

Summary 332

On Your DVD 337

11 THE MUSCULAR SYSTEM 338

Joe's Story 338 Introduction 339

**11.1 GROUPS OF SKELETAL MUSCLES PRODUCE MOVEMENT WHEN THE
INSERTION ATTACHED TO THE MOVABLE BONE IS PULLED TOWARD
THE ORIGIN ATTACHED TO THE STATIONARY BONE. 340**

Muscle Attachment Sites: Origin and Insertion 340
Lever Systems and Leverage 340
Effects of Fascicle Arrangement 340
Coordination Within Muscle Groups 341

Return to Joe's Story 343

**11.2 MOST SKELETAL MUSCLE NAMES ARE BASED ON DIRECTION OF
MUSCLE FASCICLES, SIZE, SHAPE, ACTION, NUMBER OF ORIGINS,
LOCATION OF THE MUSCLE, OR SITES OF ORIGIN AND INSERTION
OF THE MUSCLE. 344**

**11.3 MUSCLES OF THE HEAD PRODUCE FACIAL EXPRESSIONS AND EYE-
BALL MOVEMENT, AND ASSIST IN BITING, CHEWING,
SWALLOWING, AND SPEECH. 348**

Muscles of Facial Expression 348
Muscles That Move the Eyeballs 352
Muscles That Move the Mandible 354
Muscles That Move the Tongue 355

Return to Joe's Story 357

**11.4 MUSCLES OF THE NECK ASSIST IN SWALLOWING AND SPEECH,
AND ALLOW BALANCE AND MOVEMENT OF THE HEAD ON THE VER-
TEBRAL COLUMN. 358**

Muscles of the Anterior Neck 358
Muscles That Move the Head 360
Return to Joe's Story 361

**11.5 MUSCLES OF THE TORSO HELP PROTECT THE ABDOMINAL
VISCERA, MOVE THE VERTEBRAL COLUMN, AND ASSIST
BREATHING AND ABDOMINAL FUNCTIONS. 362**

Muscles That Act on the Abdominal Wall 362
Muscles Used in Breathing 364

**11.6 MUSCLES OF THE PELVIC FLOOR AND PERINEUM SUPPORT THE
PELVIC VISCERA, FUNCTION AS SPHINCTERS, AND ASSIST IN URI-
NATION, ERECTION OF THE PENIS AND CLITORIS, EJACULATION,
AND DEFECATION. 368**

Muscles of the Pelvic Floor 368 Muscles of the Perineum 370
Return to Joe's Story 371

**11.7 MUSCLES INSERTING ON THE UPPER LIMB MOVE AND STABILIZE
THE PECTORAL GIRDLE, AND MOVE THE ARM, FOREARM, AND
HAND. 372**

Muscles That Move the Pectoral Girdle 372
Muscles That Move the Humerus 375
Muscles That Move the Radius and Ulna 377
Muscles That Move the Wrist, Hand, and Fingers 380
Intrinsic Muscles of the Hand 384
Return to Joe's Story 387

**11.8 DEEP MUSCLES OF THE BACK MOVE THE HEAD AND VERTEBRAL
COLUMN. 388**
Return to Joe's Story 392

**11.9 MUSCLES ORIGINATING ON THE PELVIC GIRDLE MOVE THE FEMUR,
AND THOSE ORIGINATING ON THE LOWER LIMB MOVE THE LEG AND
FOOT. 393**

Muscles That Move the Femur 393
Muscles That Move the Femur, Tibia, and Fibula 397
Muscles That Move the Foot and Toes 399
Intrinsic Muscles of the Foot 402

Joe's Story:

Epilogue and Discussion 404

12 INTRODUCTION TO THE NERVOUS SYSTEM 408

Mary's Story 408 Introduction 409

Depolarizing Phase 427 Repolarizing Phase 429
Refractory Period 429

12.8 NERVE IMPULSES TRAVEL AS A CHAIN REACTION OF ACTION POTENTIALS ALONG AN AXON. 430

Continuous and Saltatory Conduction 431
Effect of Axon Diameter 431 Encoding of Stimulus Intensity 431
Comparison of Electrical Signals Produced by Excitable Cells 432
Return to Mary's Story 433

12.9 THE SYNAPSE IS A SPECIAL JUNCTION BETWEEN NEURONS. 433

Electrical Synapses 433 Chemical Synapses 433
Excitatory and Inhibitory Postsynaptic Potentials 435
Removal of Neurotransmitter 436
Spatial and Temporal Summation of Postsynaptic Potentials 436
Return to Mary's Story 438

12.10 NEURONS IN THE PERIPHERAL NERVOUS SYSTEM HAVE A GREATER CAPACITY FOR REPAIR AND REGENERATION THAN THOSE OF THE CENTRAL NERVOUS SYSTEM. 438

Damage and Repair in the PNS 438
Damage and Repair in the CNS 439

*Mary's Story:
Epilogue and Discussion 440*

On Your DVD 443

13 THE CENTRAL NERVOUS SYSTEM 444

Darius' Story 444 Introduction 445

Association Areas 464 Hemispheric Lateralization 465
Return to Darius' Story 467

13.6 THE DIENCEPHALON INCLUDES THE THALAMUS AND THE HYPOTHALAMUS. 467

Thalamus 467 Hypothalamus 467 Pineal Gland 470

13.7 THE MIDBRAIN, PONS, AND MEDULLA OBLONGATA OF THE BRAIN STEM SERVES AS A RELAY STATION AND CONTROL CENTER. 471

Midbrain 471 Pons 473 Medulla Oblongata 473
Reticular Formation 474
Return to Darius' Story 475

13.8 THE CEREBELLUM COORDINATES MOVEMENTS AND HELPS MAINTAIN NORMAL MUSCLE TONE, POSTURE, AND BALANCE. 476

13.9 THE SPINAL CORD GRAY MATTER RECEIVES SENSORY INPUT AND PROVIDES MOTOR OUTPUT. 477

External Anatomy of the Spinal Cord 477
Internal Anatomy of the Spinal Cord 478

13.10 THE SPINAL CORD CONDUCTS NERVE IMPULSES BETWEEN SPINAL NERVES AND THE BRAIN, AND CONTAINS REFLEX PATHWAYS. 480

Sensory and Motor Tracts 480 Spinal Reflexes 481

12.1 THE NERVOUS SYSTEM MAINTAINS HOMEOSTASIS AND INTEGRATES ALL BODY ACTIVITIES. 410

Structures of the Nervous System 410
Functions of the Nervous System 410

12.2 THE CENTRAL NERVOUS SYSTEM CONSISTS OF THE BRAIN AND SPINAL CORD; THE PERIPHERAL NERVOUS SYSTEM CONSISTS OF NERVES AND OTHER NERVOUS TISSUE OUTSIDE THE CENTRAL NERVOUS SYSTEM. 412

Organization of the Nervous System 412
Return to Mary's Story 413

12.3 NEURONS ARE RESPONSIBLE FOR MOST OF THE UNIQUE FUNCTIONS OF THE NERVOUS SYSTEM. 414

Parts of a Neuron 414 Structural Diversity in Neurons 416
Return to Mary's Story 417

12.4 NEUROGLIA SUPPORT, NOURISH, AND PROTECT NEURONS AND MAINTAIN HOMEOSTASIS. 418

Myelination 418 Gray and White Matter 421
Return to Mary's Story 421

12.5 NEURONS COMMUNICATE WITH OTHER CELLS. 422

Ion Channels 422 Resting Membrane Potential 424

12.6 GRADED POTENTIALS ARE THE FIRST RESPONSE OF A NEURON TO STIMULATION. 426

12.7 THE ACTION POTENTIAL IS AN ALL-OR-NONE ELECTRICAL SIGNAL. 427

13 THE CENTRAL NERVOUS SYSTEM 444

Darius' Story 444 Introduction 445

13.1 THE CNS CONSISTS OF THE BRAIN, THE SPINAL CORD, AND NUMEROUS PROTECTIVE STRUCTURES. 446

Major Parts of the Central Nervous System 446
Skeletal Protection 449 Meninges 450

13.2 THE CNS IS NOURISHED BY BLOOD AND CEREBROSPINAL FLUID, WHICH ALSO PROVIDES MECHANICAL AND CHEMICAL PROTECTION. 451

Blood flow to the Brain and Spinal Cord 451
Blood-Brain Barrier 451 Cerebrospinal Fluid 452
Formation of CSF in the Ventricles 452 Circulation of CSF 452
Return to Darius' Story 457

13.3 THE CEREBRUM INTERPRETS SENSORY IMPULSES, CONTROLS MUSCULAR MOVEMENTS, AND FUNCTIONS IN EMOTIONAL AND INTELLECTUAL PROCESSES. 457

Lobes of the Cerebrum 457 Cerebral White Matter 458
Basal Nuclei 460

13.4 THE LIMBIC SYSTEM CONTROLS EMOTIONS, BEHAVIOR, AND MEMORY. 462

13.5 THE CEREBRAL CORTEX CAN BE DIVIDED FUNCTIONALLY INTO SENSORY AREAS, MOTOR AREAS, AND ASSOCIATION AREAS. 463

Sensory Areas 463 Motor Areas 464

Darius' Story:
Epilogue and Discussion 483

Summary 484

On Your DVD 487

14 THE PERIPHERAL NERVOUS SYSTEM 488

Nick's Story 488 Introduction 489

14.1 THREE PROTECTIVE CONNECTIVE TISSUE COVERINGS ASSOCIATED WITH NERVES INCLUDE ENDONEURIUM, PERINEURIUM, AND EPINEURIUM. 490

Return to Nick's Story 491

14.2 TWELVE PAIRS OF CRANIAL NERVES DESCEND FROM THE INFERIOR SURFACE OF THE BRAIN AND DISTRIBUTE PRIMARILY TO REGIONS OF THE HEAD AND NECK. 491

Olfactory (I) Nerve 491 Optic (II) Nerve 494
Oculomotor (III) Nerve 495 Trochlear (IV) Nerve 496
Trigeminal (V) Nerve 496 Abducens (VI) Nerve 497
Facial (VII) Nerve 497 Vestibulocochlear (VIII) Nerve 498
Glossopharyngeal (IX) Nerve 499 Vagus (X) Nerve 500
Accessory (XI) Nerve 501 Hypoglossal (XII) Nerve 501

Return to Nick's Story 506

14.3 BRANCHES OF A SPINAL NERVE INCLUDE THE POSTERIOR RAMUS, ANTERIOR RAMUS, MENINGEAL BRANCH, AND RAMI COMMUNICANTES. 507

Distribution of Spinal Nerves 508

Branches 508 Plexuses 509 Intercostal Nerves 514

14.4 A REFLEX, A FAST, INVOLUNTARY SEQUENCE OF ACTIONS THAT OCCUR IN RESPONSE TO A PARTICULAR STIMULUS, IS PRODUCED BY A REFLEX ARC. 515

Reflexes and Reflex Arcs 515 The Stretch Reflex 517

The Flexor Reflex 518

Return to Nick's Story 520

14.5 THE SOMATIC NERVOUS SYSTEM PRODUCES VOLUNTARY MOVEMENTS; THE AUTONOMIC NERVOUS SYSTEM PRODUCES INVOLUNTARY MOVEMENTS. 521

14.6 THE ANS INCLUDES PREGANGLIONIC NEURONS, AUTONOMIC GANGLIA AND PLEXUSES, AND POSTGANGLIONIC NEURONS. 524

Preganglionic Neurons 524 Autonomic Ganglia 524
Sympathetic Ganglia 524 Parasympathetic Ganglia 524

Autonomic Plexuses 524 Postganglionic Neurons 528

Return to Nick's Story 529

14.7 ANS NEURONS RELEASE ACETYLCHOLINE OR NOREPINEPHRINE, RESULTING IN EXCITATION OR INHIBITION. 530

Cholinergic Neurons and Receptors 530

Adrenergic Neurons and Receptors 530

14.8 THE SYMPATHETIC DIVISION SUPPORTS VIGOROUS PHYSICAL ACTIVITY; THE PARASYMPATHETIC DIVISION CONSERVES BODY ENERGY. 532

Sympathetic Responses 532 Parasympathetic Responses 533

Return to Nick's Story 535

14.9 AUTONOMIC REFLEXES REGULATE CONTROLLED BODY CONDITIONS AND ARE PRIMARILY INTEGRATED BY THE HYPOTHALAMUS. 536

Autonomic Reflexes 536

Autonomic Control by Higher Centers 536

Nick's Story:

Epilogue and Discussion 537

Summary 537

On Your DVD 541

15 SENSORY, MOTOR, AND INTEGRATIVE SYSTEMS 542

Sannu's Story 542 Introduction 543

15.1 SENSATIONS CAN BE GROUPED INTO GENERAL SENSES AND SPECIAL SENSES, AND ARISE AS A RESULT OF STIMULATION, TRANSDUCTION, GENERATION, AND INTEGRATION. 544

Sensory Modalities 544 The Process of Sensation 544

Return to Sannu's Story 545

15.2 SENSORY RECEPTORS CAN BE CLASSIFIED STRUCTURALLY, FUNCTIONALLY, OR BY THE TYPE OF STIMULUS DETECTED. 546

Types of Sensory Receptors 546

Adaptation in Sensory Receptors 548

Return to Sannu's Story 548

15.3 SOMATIC SENSATIONS INCLUDE TACTILE SENSATIONS, THERMAL SENSATIONS, PAIN, AND PROPRIOCEPTION. 549

Tactile Sensations 549

Touch 549 Pressure and Vibration 550 Itch and Tickle 550

Thermal Sensations 550 Pain Sensations 550

Types of Pain 550 Localization of Pain 551

Proprioceptive Sensations 552

Muscle Spindles 552 Tendon Organs 552

Joint Kinesthetic Receptors 553

Return to Sannu's Story 555

15.4 THE PRIMARY SOMATOSENSORY AREA OF THE CEREBRAL CORTEX RECEIVES SENSORY INPUT; THE PRIMARY MOTOR AREA CONTROLS VOLUNTARY MOVEMENTS. 556

Return to Sannu's Story 557

15.5 SOMATIC SENSORY PATHWAYS RELAY INFORMATION FROM SENSORY RECEPTORS TO SPECIFIC REGIONS OF THE CEREBRAL CORTEX AND CEREBELLUM. 558

Posterior Column Pathway to the Cerebral Cortex 558
Anterolateral Pathway to the Cerebral Cortex 558
Somatic Sensory Pathways to the Cerebellum 559
Roles of the Reticular Activating System 560

15.6 SOMATIC MOTOR PATHWAYS CARRY IMPULSES FROM SPECIFIC REGIONS OF THE BRAIN TO MOTOR NEURONS IN CRANIAL AND SPINAL NERVES, THEN ON TO EFFECTORS. 562

Organization of Upper Motor Neuron Pathways 563

Direct Motor Pathways 563 Indirect Motor Pathways 564

Roles of the Basal Nuclei 565

Roles of the Cerebellum 565

Sannu's Story:

Epilogue and Discussion 566

Summary 567

On Your DVD 569

16 THE SPECIAL SENSES 570

Dan's Story 570 Introduction 571

16.1 STIMULATION OF OLFACTORY RECEPTORS TRIGGERS NERVE IMPULSES THAT PROPAGATE ALONG THE OLFACTORY NERVE TO THE BRAIN. 572

Anatomy of the Olfactory Epithelium 572
Physiology of Olfaction 573
Odor Thresholds and Adaptation 573
The Olfactory Pathway 574
Return to Dan's Story 575

16.2 STIMULATION OF GUSTATORY RECEPTORS PRODUCES NERVE IMPULSES THAT PROPAGATE ALONG THE FACIAL, GLOSSOPHARYNGEAL, AND VAGUS NERVES TO THE BRAIN. 576

Anatomy of Taste Buds and Papillae 576
Physiology of Gustation 577 Taste Thresholds and Adaptation 577
The Gustatory Pathway 578
Return to Dan's Story 579

16.3 THE EXTRINSIC EYE MUSCLES MOVE THE EYE, WHICH IS PROTECTED BY EYELIDS, EYELASHES, EYEBROWS, AND A LACRIMAL APPARATUS. 580

Accessory Structures of the Eye 580
Eyelids 580 Eyelashes and Eyebrows 580
The Lacrimal Apparatus 580 Extrinsic Eye Muscles 582
Return to Dan's Story 583

16.4 THE EYE IS CONSTRUCTED OF THREE LAYERS AND TWO CHAMBERS. 583

Fibrous Tunic 583 Vascular Tunic 583 Retina 585
Lens 587 Interior of the Eyeball 587
Return to Dan's Story 589

16.5 IMAGE FORMATION INVOLVES REFRACTION OF LIGHT RAYS, CHANGE IN LENS SHAPE, AND CONSTRICTION OF THE PUPIL. 590

Refraction of Light Rays 590
Accommodation and the Near Point of Vision 590
Refraction Abnormalities 591 Constriction of the Pupil 591
Convergence 592
Return to Dan's Story 592

16.6 THE NEURAL PATHWAY OF LIGHT IS PHOTORECEPTORS → GANGLION CELLS → OPTIC NERVE → PRIMARY VISUAL CORTEX. 593

Photoreceptors and Photopigments 593
Light and Dark Adaptation 595
Release of Neurotransmitter by Photoreceptors 595
The Visual Pathway 596
Processing of Visual Input in the Retina 596
Brain Pathway and Visual Fields 596
Return to Dan's Story 598

16.7 THE THREE MAIN REGIONS OF THE EAR ARE THE EXTERNAL, MIDDLE, AND INTERNAL EAR. 599

Anatomy of the Ear 599
External (Outer) Ear 599 Middle Ear 600
Internal (Inner) Ear 601
Return to Dan's Story 605

16.8 THE NEURAL PATHWAY OF SOUND IS TYMPANIC MEMBRANE → OSSICLES → OVAL WINDOW → COCHLEA → VESTIBULOCOCHLEAR NERVE → PRIMARY AUDITORY CORTEX. 606

The Nature of Sound Waves 606 Physiology of Hearing 606
The Auditory Pathway 607
Return to Dan's Story 609

16.9 SIGNALS FOR STATIC EQUILIBRIUM (SENSED BY MACULAE) AND DYNAMIC EQUILIBRIUM (SENSED BY CRISTAE) ARE TRANSMITTED BY THE VESTIBULOCOCHLEAR NERVE TO THE BRAIN. 610

Physiology of Equilibrium 610
Otolithic Organs: Saccule and Utricule 610 Semicircular Ducts 610
Equilibrium Pathways 610

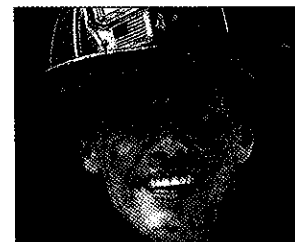

Dan's Story:

Epilogue and Discussion 614

Summary 614

On Your DVD 619

17 THE ENDOCRINE SYSTEM 620

Karen's Story 620 Introduction 621

17.1 THE ENDOCRINE SYSTEM WORKS MORE SLOWLY THAN THE NERVOUS SYSTEM, RELEASING HORMONES INTO THE BLOOD THAT CAN CONTROL VIRTUALLY ALL BODY CELLS. 622

Endocrine Glands 622

Return to Karen's Story 624

17.2 THE SECRETION OF HORMONES IS REGULATED BY SIGNALS FROM THE NERVOUS SYSTEM, CHEMICAL CHANGES IN THE BLOOD, AND OTHER HORMONES. 624

- The Role of Hormone Receptors 624
- Chemical Classes of Hormones 624
- Hormone Transport in the Blood 626
- Mechanism of Hormone Action 626
 - Action of Lipid-soluble Hormones 626
 - Action of Water-soluble Hormones 627
- Hormone Interactions 627
- Control of Hormone Secretion 628
 - Return to Karen's Story 629

17.3 THE HYPOTHALAMUS REGULATES ANTERIOR PITUITARY SECRETION OF SEVEN IMPORTANT HORMONES. 629

- The Hypothalamus 629
- The Pituitary Gland 629
 - Anterior Pituitary 629
 - Control of Secretion by the Anterior Pituitary 631
 - Human Growth Hormone and Insulinlike Growth Factors 632
 - Thyroid-stimulating Hormone 633
 - Follicle-stimulating Hormone 633
 - Luteinizing Hormone 633
 - Prolactin 633
 - Adrenocorticotrophic Hormone 633
 - Melanocyte-stimulating Hormone 633
 - Return to Karen's Story 635

17.4 OXYTOCIN AND ANTIDIURETIC HORMONE ORIGINATE IN THE HYPOTHALAMUS AND ARE STORED IN THE POSTERIOR PITUITARY. 635

- Oxytocin 635
- Antidiuretic Hormone 636
 - Return to Karen's Story 638

17.5 THE THYROID GLAND SECRETES THE THYROID HORMONES THYROXINE, TRIIODOTHYRONINE, AND CALCITONIN. 639

- Formation, Storage, and Release of Thyroid Hormones 640
- Control of Thyroid Hormone Secretion 641

- Actions of Thyroid Hormones 641
- Calcitonin 642
 - Return to Karen's Story 643

17.6 THE PARATHYROID GLANDS SECRETE PARATHYROID HORMONE, WHICH REGULATES CALCIUM, MAGNESIUM, AND PHOSPHATE ION LEVELS. 644

- Parathyroid Hormone 644

17.7 THE ADRENAL CORTEX SECRETES MINERALOCORTICIDS, GLUCOCORTICIDS, AND ANDROGENS; THE ADRENAL MEDULLA SECRETES EPINEPHRINE AND NOREPINEPHRINE. 646

- Adrenal Cortex 646
 - Mineralocorticoids 646
 - Glucocorticoids 649
 - Androgens 650
- Adrenal Medulla 650
 - Return to Karen's Story 651

17.8 THE PANCREATIC ISLETS REGULATE BLOOD GLUCOSE LEVEL BY SECRETING GLUCAGON AND INSULIN. 651

- Regulation of Glucagon and Insulin Secretion 653
 - Return to Karen's Story 654

17.9 THE OVARIES PRODUCE ESTROGENS, PROGESTERONE, AND INHIBIN; THE TESTES PRODUCE TESTOSTERONE AND INHIBIN. 655

- Return to Karen's Story 656

17.10 THE PINEAL GLAND SECRETES MELATONIN, WHICH CONTRIBUTES TO SETTING THE BODY'S BIOLOGICAL CLOCK. 656

*Karen's Story:
Epilogue and Discussion 657*

Summary 657

On Your DVD 661

18 THE CARDIOVASCULAR SYSTEM: THE BLOOD 662

Ed's Story 662 Introduction 663

18.1 BLOOD CONTAINS PLASMA AND FORMED ELEMENTS AND TRANSPORTS ESSENTIAL SUBSTANCES THROUGH THE BODY. 664

- Functions of Blood 664
- Physical Characteristics of Blood 664
- Components of Blood 664
 - Blood Plasma 664
 - Formed Elements 666
- Return to Ed's Story 667

18.2 HEMOPOIESIS IS THE PRODUCTION OF FORMED ELEMENTS. 668

18.3 MATURE RED BLOOD CELLS ARE BICONCAVE CELLS CONTAINING HEMOGLOBIN. 669

- RBC Anatomy 669
- RBC Physiology 669

18.4 RED BLOOD CELLS HAVE A LIFE CYCLE OF 120 DAYS. 671

Return to Ed's Story 672

18.5 ERYTHROPOIESIS IS THE PROCESS OF RED BLOOD CELL FORMATION. 672

Return to Ed's Story 673

18.6 BLOOD IS CATEGORIZED INTO GROUPS BASED ON SURFACE ANTIGENS. 674

- ABO Blood Group 674
- Rh Blood Group 675
- Transfusions 675
- Return to Ed's Story 676

18.7 WHITE BLOOD CELLS COMBAT INFLAMMATION AND INFECTION. 676

WBC Anatomy and Types 676

- Granular Leukocytes 676
- Agranular Leukocytes 677

WBC Functions 677 WBC Life Span 678

18.8 PLATELETS REDUCE BLOOD LOSS FROM DAMAGED VESSELS. 680

Return to Ed's Story 680

18.9 HEMOSTASIS IS THE SEQUENCE OF EVENTS THAT STOPS BLEEDING FROM A DAMAGED BLOOD VESSEL. 682

- Vascular Spasm 682
- Platelet Plug Formation 682
- Blood Clotting 683

- The Extrinsic Pathway 683
- The Intrinsic Pathway 684
- The Common Pathway 684
- Clot Retraction and Blood Vessel Repair 684

- Hemostatic Control Mechanisms 685
- Clotting in Blood Vessels 685

*Ed's Story:
Epilogue and Discussion 686*

Summary 686

On Your DVD 689

19 THE CARDIOVASCULAR SYSTEM: THE HEART 690

Prakesh's Story 690 Introduction 691

19.1 THE HEART IS LOCATED IN THE MEDIASTINUM AND HAS A MUSCULAR WALL COVERED BY PERICARDIUM. 692

Location of the Heart 692 Pericardium 692

Layers of the Heart Wall 692

Return to Prakesh's Story 695

19.2 THE HEART HAS FOUR CHAMBERS, TWO UPPER ATRIA AND TWO LOWER VENTRICLES. 695

Right Atrium 695 Right Ventricle 697 Left Atrium 697
Left Ventricle 697 Myocardial Thickness and Function 698

Return to Prakesh's Story 700

19.3 HEART VALVES ENSURE ONE-WAY FLOW OF BLOOD. 700

Atrioventricular Valves 700 Semilunar Valves 700

Return to Prakesh's Story 702

19.4 THE HEART PUMPS BLOOD TO THE LUNGS FOR OXYGENATION, THEN PUMPS OXYGEN-RICH BLOOD THROUGHOUT THE BODY. 703

Systemic and Pulmonary Circulations 703

Coronary Circulation 704

Coronary Arteries 704 Coronary Veins 705

Return to Prakesh's Story 706

19.5 THE CARDIAC CONDUCTION SYSTEM COORDINATES HEART CONTRACTIONS FOR EFFECTIVE PUMPING. 707

Return to Prakesh's Story 708

19.6 THE ELECTROCARDIOGRAM IS A RECORD OF ELECTRICAL ACTIVITY ASSOCIATED WITH EACH HEARTBEAT. 709

Electrocardiography 709

Correlation of ECG Waves with Heart Activity 709

Return to Prakesh's Story 711

19.7 THE CARDIAC CYCLE REPRESENTS ALL THE EVENTS ASSOCIATED WITH ONE HEARTBEAT. 712

Pressure and Volume Changes During the Cardiac Cycle 712

Atrial Systole 712 Ventricular Systole 712

Relaxation Period 712

Heart Sounds 714

Return to Prakesh's Story 715

19.8 CARDIAC OUTPUT IS THE BLOOD VOLUME EJECTED BY A VENTRICLE EACH MINUTE. 715

Regulation of Stroke Volume 715 Regulation of Heart Rate 716

Autonomic Regulation of Heart Rate 716

Chemical Regulation of Heart Rate 717

Other Factors in Heart Rate Regulation 717

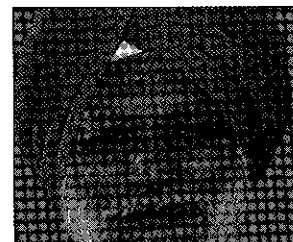

Prakesh's Story:

Epilogue and Discussion 719

Summary 719

On Your DVD 723

20 THE CARDIOVASCULAR SYSTEM: BLOOD VESSELS 724

David's Story 724 Introduction 725

20.1 BLOOD EJECTED FROM THE HEART FLOWS THROUGH ELASTIC ARTERIES TO MUSCULAR ARTERIES, ARTERIOLES, AND CAPILLARIES. 726

Arteries 726

Elastic Arteries 727 Muscular Arteries 727

Arterioles 728

Return to David's Story 729

20.2 CAPILLARIES ARE MICROSCOPIC BLOOD VESSELS THROUGH WHICH MATERIALS ARE EXCHANGED BETWEEN BLOOD AND TISSUE CELLS. 730

Return to David's Story 731

20.3 VENULES AND VEINS RETURN BLOOD TO THE HEART. 732

Venules 732 Veins 732 Blood Reservoirs 732

20.4 SUBSTANCES ENTER AND LEAVE CAPILLARIES BY DIFFUSION, TRANSCYTOSIS, OR BULK FLOW. 734

Diffusion 734 Transcytosis 734 Bulk Flow 734

Hydrostatic Pressures 734 Osmotic Pressures 734

Filtration and Reabsorption 735

Return to David's Story 736

20.5 BLOOD FLOW OCCURS FROM REGIONS OF HIGHER PRESSURE TO THOSE OF LOWER PRESSURE. 737

Blood Pressure 737 Resistance 737

Venous Return 738 Velocity of Blood Flow 739

20.6 BLOOD PRESSURE AND BLOOD FLOW ARE REGULATED BY NEURAL AND HORMONAL NEGATIVE FEEDBACK SYSTEMS, AND BY AUTOREGULATION. 740

Role of the Cardiovascular Center 740

Input 740 Output 740

Neural Regulation of Blood Pressure 741

Baroreceptor Reflexes 741 Chemoreceptor Reflexes 742

Hormonal Regulation of Blood Pressure 742

Autoregulation of Blood Pressure 743

Return to David's Story 745

20.7 MEASUREMENT OF THE PULSE AND BLOOD PRESSURE ARE TWO WAYS TO ASSESS THE FUNCTIONING OF THE CARDIOVASCULAR SYSTEM. 746

Pulse 746 Measuring Blood Pressure 746

20.8 THE TWO MAIN CIRCULATORY ROUTES ARE THE SYSTEMIC CIRCULATION AND THE PULMONARY CIRCULATION. 747

Return to David's Story 748

20.9 THE PULMONARY CIRCULATION TAKES DEOXYGENATED BLOOD FROM THE HEART TO THE LUNGS AND RETURNS OXYGENATED BLOOD FROM THE LUNGS TO THE HEART. 749

Return to David's Story 750

20.10 THE SYSTEMIC CIRCULATION CARRIES OXYGENATED BLOOD FROM THE HEART TO ALL PARTS OF THE BODY, AND RETURNS DE-OXYGENATED BLOOD TO THE HEART. 751

The Aorta and its Branches 751 Ascending Aorta 756
The Arch of the Aorta 756 Thoracic Aorta 761
Abdominal Aorta 763 Arteries of the Pelvis and Lower Limbs 768
Veins of the Systemic Circulation 772
Veins of the Head and Neck 774 Veins of the Upper Limbs 777

Veins of the Thorax 781 Veins of the Abdomen and Pelvis 784
Veins of the Lower Limbs 786 Hepatic Portal Circulation 789

David's Story:

Epilogue and Discussion 791

Summary 791

On Your DVD 795

21 THE LYMPHATIC SYSTEM AND IMMUNITY

Marlene's Story 796 Introduction 797

21.1 THE LYMPHATIC SYSTEM DRAINS INTERSTITIAL FLUID, TRANSPORTS DIETARY LIPIDS, AND PROTECTS AGAINST INVASION. 798

21.2 THE ONE-WAY FLOW OF LYMPH IS CAUSED BY SKELETAL MUSCLE CONTRACTIONS AND RESPIRATORY MOVEMENTS. 800

Lymphatic Capillaries 800 Lymph Trunks and Ducts 800
Formation and Flow of Lymph 802
Return to Marlene's Story 803

21.3 THE LYMPHATIC ORGANS AND TISSUES INCLUDE THE THYMUS, LYMPH NODES, SPLEEN, AND LYMPHATIC NODULES. 804

Thymus 804 Lymph Nodes 804 Spleen 807
Lymphatic Nodules 808
Return to Marlene's Story 809

21.4 NONSPECIFIC RESISTANCE AGAINST INFECTION INCLUDES EXTERNAL PHYSICAL AND CHEMICAL BARRIERS AND VARIOUS INTERNAL DEFENSES. 809

First Line of Defense: Skin and Mucous Membranes 809
Second Line of Defense: Internal Defenses 810
Antimicrobial Proteins 810
Natural Killer Cells and Phagocytes 810 Inflammation 811
Vasodilation and Increased Permeability of Blood Vessels 812
Emigration of Phagocytes 812
Fever 813

Return to Marlene's Story 814

21.5 SPECIFIC DEFENSES AGAINST DISEASE INVOLVE THE PRODUCTION OF A SPECIFIC LYMPHOCYTE OR ANTIBODY AGAINST A SPECIFIC ANTIGEN. 814

Maturation of T Cells and B Cells 814
Types of Immune Responses 814
Antigens and Antigen Receptors 815
Chemical Nature of Antigens 816
Major Histocompatibility Complex Antigens 816
Pathways of Antigen Processing 816

796

Processing of Exogenous Antigens 817
Processing of Endogenous Antigens 818
Return to Marlene's Story 818

21.6 CELL-MEDIATED IMMUNITY INVOLVES THE RECOGNITION OF ANTIGENS AND THE PROLIFERATION AND DIFFERENTIATION OF EFFECTOR CELLS TO ELIMINATE THE ANTIGEN. 819

Activation, Proliferation, and Differentiation of T Cells 819
Types of T Cells 819

Helper T Cells 819 Cytotoxic T Cells 820
Memory T Cells 821

Elimination of Invaders 821

Return to Marlene's Story 822

21.7 IN ANTIBODY-MEDIATED IMMUNITY, EXPOSURE TO AN ANTIGEN TRIGGERS SECRETION OF ANTIBODIES SPECIFICALLY TARGETED AGAINST THAT ANTIGEN. 823

Activation, Proliferation, and Differentiation of B Cells 823
Antibodies 824

Antibody Structure 824 Antibody Actions 825
Return to Marlene's Story 826

21.8 THE COMPLEMENT SYSTEM CONSISTS OF PROTEINS THAT COMBAT INFECTION THROUGH INFLAMMATION, PHAGOCYTOSIS, AND CYTOLYSIS. 826

21.9 IMMUNIZATION AGAINST CERTAIN MICROBES IS POSSIBLE BECAUSE MEMORY B CELLS AND MEMORY T CELLS REMAIN AFTER A PRIMARY RESPONSE TO AN ANTIGEN. 828

Marlene's Story:

Epilogue and Discussion 829

Summary 830

On Your DVD 833

22 THE RESPIRATORY SYSTEM 834

Cari's Story 834 Introduction 835

22.1 INHALED AIR TRAVELS IN THE UPPER RESPIRATORY SYSTEM THROUGH THE NASAL CAVITIES OF THE NOSE AND PHARYNX. 836

Nose 836 Pharynx 839

Return to Cari's Story 840

22.2 INHALED AIR TRAVELS IN THE LOWER RESPIRATORY SYSTEM FROM THE LARYNX TO ALVEOLI. 840

Larynx 840 The Structures of Voice Production 842
Trachea 844 Bronchi 844 Lungs 846

Lobes, Fissures, and Lobules 848 Alveoli 849

Return to Cari's Story 851

22.3 INHALATION AND EXHALATION RESULT FROM PRESSURE CHANGES CAUSED BY CONTRACTION AND RELAXATION OF THE DIAPHRAGM AND EXTERNAL INTERCOSTALS. 851

Pressure Changes During Pulmonary Ventilation 851

Inhalation 851 Exhalation 854

Other Factors Affecting Pulmonary Ventilation 855

Surface Tension of Alveolar Fluid 855

Compliance of the Lungs 856 Airway Resistance 856

Modified Respiratory Movements 856

Return to Cari's Story 858

22.4 IMPORTANT MEASUREMENTS OF LUNG VOLUMES AND CAPACITIES INCLUDE TIDAL VOLUME, INSPIRATORY RESERVE VOLUME, EXPIRATORY RESERVE VOLUME, RESIDUAL VOLUME, AND LUNG CAPACITIES. 858

22.5 OXYGEN AND CARBON DIOXIDE DIFFUSE INTO OR OUT OF THE BLOOD BASED ON THEIR INDIVIDUAL PARTIAL PRESSURE GRADIENTS AND SOLUBILITY. 860

22.6 THE TWO TYPES OF RESPIRATION ARE EXTERNAL (BETWEEN ALVEOLI AND PULMONARY BLOOD CAPILLARIES) AND INTERNAL (BETWEEN SYSTEMIC BLOOD CAPILLARIES AND TISSUE CELLS). 861

Return to Cari's Story 863

22.7 OXYGEN IS PRIMARILY TRANSPORTED IN THE BLOOD ATTACHED TO THE HEME IN HEMOGLOBIN, WHILE CARBON DIOXIDE IS TRANSPORTED IN THREE DIFFERENT WAYS. 864

Oxygen Transport 864

The Relation Between Hemoglobin and Oxygen Partial Pressure 865

Other Factors Affecting Hemoglobin's Affinity for Oxygen 865

Carbon Dioxide Transport 867

Summary of Gas Exchange and Transport in Lungs and Tissues 867

Return to Cari's Story 869

22.8 THE BASIC RHYTHM OF RESPIRATION IS CONTROLLED BY THE RESPIRATORY CENTER IN THE BRAIN STEM. 869

Medullary Rhythmicity Area 869 Pneumotaxic Area 870

Apneustic Area 870

22.9 RESPIRATION MAY BE MODIFIED BY CORTICAL INFLUENCES, CHEMICAL STIMULI, PROPRIOCEPTOR INPUT, AND THE INFLATION REFLEX. 871

Cortical Influences on Respiration 871

Chemoreceptor Regulation of Respiration 871

Proprioceptor Stimulaion of Respiration 873

The Inflation Reflex 873

Other Influences on Respiration 873

Return to Cari's Story 874

22.10 THE OVERALL ACID-BASE BALANCE OF THE BODY IS MAINTAINED BY CONTROLLING THE H⁺ CONCENTRATION OF BODY FLUIDS. 875

The Actions of Buffer Systems 875

Protein Buffer System 875

Carbonic Acid-Bicarbonate Buffer System 876

Exhalation of Carbon Dioxide 876

Acid-Base Imbalances 877

23 THE DIGESTIVE SYSTEM 884

Chloe's Story 884 Introduction 885

23.1 THE GI TRACT IS A CONTINUOUS MULTILAYERED TUBE EXTENDING FROM THE MOUTH TO THE ANUS THAT IS SUPPORTED AND PARTIALLY COVERED BY THE PERITONEUM. 886

Overview of the Digestive System 886

Layers of the GI Tract 887

Mucosa 888 Submucosa 888 Muscularis 889 Serosa 889

Peritoneum 889

Neural Innervation of the GI Tract 890

23.2 THE MOUTH CHEWS AND LUBRICATES FOOD, STARTS ITS DIGESTION, AND MANEUVERS FOOD TO THE PHARYNX FOR SWALLOWING. 891

Tongue 892 Salivary Glands 892

Composition and Function of Saliva 892 Salivation 892

Teeth 893 Mechanical and Chemical Digestion in the Mouth 894

Return to Chloe's Story 896

23.3 SWALLOWING CONSISTS OF A VOLUNTARY ORAL STAGE, AN INVOLUNTARY PHRYNGEAL STAGE, AND AN INVOLUNTARY ESOPHAGEAL STAGE. 897

Pharynx 897 Esophagus 897

Histology of the Esophagus 897 Physiology of the Esophagus 897

Deglutition 898

23.4 THE STOMACH ABSORBS WATER, IONS, AND DRUGS, MECHANICALLY BREAKS DOWN THE BOLUS, AND MIXES THE BOLUS WITH GASTRIC SECRETIONS. 900

Anatomy of the Stomach 900 Histology of the Stomach 900

Mechanical and Chemical Digestion in the Stomach 900

Return to Chloe's Story 905

23.5 THE PANCREAS SECRETES PANCREATIC JUICE, THE LIVER SECRETES BILE, AND THE GALLBLADDER STORES AND CONCENTRATES BILE. 906

Pancreas 906

Anatomy of the Pancreas 906 Histology of the Pancreas 906

Pancreatic Juice 906

Liver and Gallbladder 906

Anatomy of the Liver 906 Histology of the Liver 908

Bile Duct System 908 Blood Supply of the Liver 908

Bile 908 Functions of the Liver 910

23.6 DIGESTION IS COMPLETED IN THE SMALL INTESTINE AS CHYME MIXES WITH DIGESTIVE JUICES FROM THE SMALL INTESTINE, PANCREAS, AND LIVER. 911

Anatomy of the Small Intestine 911

Histology of the Small Intestine 911

- Role of Intestinal Juice and Brush Border Enzymes 914**
Mechanical Digestion in the Small Intestine 914
Chemical Digestion in the Small Intestine 915
 Digestion of Carbohydrates 915 Digestion of Proteins 915
 Digestion of Lipids 915 Digestion of Nucleic Acids 915
- Absorption in the Small Intestine 916**
 Absorption of Monosaccharides 916
 Absorption of Amino Acids, Dipeptides, and Tripeptides 917
 Absorption of Lipids 917 Absorption of Electrolytes 917
 Absorption of Vitamins 919 Absorption of Water 919
Return to Chloe's Story 920
- 23.7 IN THE LARGE INTESTINE, CHURNING AND PERISTALSIS DRIVE CHYME TOWARD THE RECTUM, WHERE THE FINAL SECRETION AND ABSORPTION OF NUTRIENTS OCCUR. 921**
- Anatomy of the Large Intestine 921**
Histology of the Large Intestine 922
Mechanical Digestion in the Large Intestine 924
Chemical Digestion in the Large Intestine 924
Absorption and Feces Formation in the Large Intestine 924
The Defecation Reflex 924
- 23.8 DIGESTIVE ACTIVITIES OCCUR IN THREE OVERLAPPING PHASES: CEPHALIC PHASE, GASTRIC PHASE, AND INTESTINAL PHASE. 926**
- Cephalic Phase 926 Gastric Phase 926**
 Neural Regulation 926 Hormonal Regulation 926
- Intestinal Phase 927**
 Neural Regulation 927 Hormonal Regulation 927
Return to Chloe's Story 928

24 THE URINARY SYSTEM 946

Andre's Story 946 Introduction 947

- 24.1 THE KIDNEYS REGULATE THE COMPOSITION OF THE BLOOD, PRODUCE HORMONES, AND EXCRETE WASTES AND FOREIGN SUBSTANCES. 948**
- 24.2 AFTER BLOOD IS FILTERED IN THE RENAL CORTX, THE RESULTING URINE TRAVELS THROUGH THE RENAL MEDULLA, CALYCES, AND RENAL PELVIS. 949**
- External Anatomy of the Kidneys 949**
Internal Anatomy of the Kidneys 949
Blood Supply of the Kidneys 952
- 24.3 EACH OF THE NEPHRONS, THE FILTERING UNITS OF THE KIDNEY, CONSISTS OF A RENAL CORPUSCLE AND A RENAL TUBULE. 954**
- Parts of a Nephron 954**
Histology of the Nephron and Collecting Duct 956
 Glomerular Capsule 956 Renal Tubule and Collecting Duct 956
- 24.4 THE FUNCTIONS OF THE NEPHRONS AND COLLECTING DUCTS ARE GLOMERULAR FILTRATION, TUBULAR SECRETION, AND TUBULAR REABSORPTION. 958**
Return to Andre's Story 959
- 24.5 UNLIKE OTHER COMPONENTS OF THE BLOOD, WATER AND SOLUTES EASILY PASS THROUGH THE FILTRATION MEMBRANE DURING GLOMERULAR FILTRATION. 960**
- The Filtration Membrane 960 Net Filtration Pressure 962**
Glomerular Filtration Rate 962
 Renal Autoregulation of GFR 963 Neural Regulation of GFR 964
 Hormonal Regulation of GFR 964
- 24.6 TUBULAR REABSORPTION RECLAIMS SUBSTANCES FROM THE FILTRATE, WHILE TUBULAR SECRETION DISCHARGES SUBSTANCES NOT NEEDED BY THE BODY. 965**
- Principles of Tubular Reabsorption and Secretion 965**
 Reabsorption Routes 966 Transport Mechanisms 966
Reabsorption and Secretion in the Proximal Convoluted Tubule 967
Reabsorption in the Loop of Henle 969
Reabsorption and Secretion in the Distal Convoluted Tubule and Collecting Duct 970
Return to Andre's Story 971
- 24.7 ANGIOTENSIN II, ALDOSTERONE, ANTIDIURETIC HORMONE, AND ATRIAL NATRIURETIC PEPTIDE REGULATE TUBULAR REABSORPTION AND TUBULAR SECRETION. 972**
- Renin-Angiotensin-Aldosterone System 972**
 Antidiuretic Hormone 972 Atrial Natriuretic Peptide 973
- 24.8 ANTIDIURETIC HORMONE AFFECTS THE CONCENTRATION OF URINE PRODUCED BY THE KIDNEYS. 974**
- Formation of Dilute Urine 974 Formation of Concentrated Urine 974**
Return to Andre's Story 978
- 24.9 THE URETERS TRANSPORT URINE FROM THE RENAL PELVIS TO THE URINARY BLADDER WHERE IT IS STORED UNTIL MICTURITION. 978**
- Ureters 978 Urinary Bladder 979**
 Anatomy and Histology of the Urinary Bladder 979
 The Micturition Reflex 981

23.9 FOOD MOLECULES ABSORBED BY THE GASTROINTESTINAL TRACT SUPPLY ENERGY FOR LIFE PROCESSES, SERVE AS BUILDING BLOCKS FOR COMPLEX MOLECULES, OR ARE STORED FOR FUTURE USE. 928

Guidelines for Healthy Eating 928 Minerals 930 Vitamins 930

23.10 METABOLISM INCLUDES CATABOLISM (BREAKING DOWN COMPLEX ORGANIC COMPOUNDS INTO SIMPLE ONES) AND ANABOLISM (COMBINING SIMPLE SUBSTANCES INTO MORE COMPLEX MOLECULES). 931

- Metabolic Reactions 931**
 Coupling of Catabolism and Anabolism by ATP 931
- Carbohydrate Metabolism 931**
 Glucose Catabolism 932 Glucose Anabolism 933
- Lipid Metabolism 934**
 Lipid Catabolism 934 Lipid Anabolism 934
 Lipid Transport in Blood 934
- Protein Metabolism 936**
 Protein Catabolism 936 Protein Anabolism 936

Chloe's Story:

Epilogue and Discussion 938

Summary 938

On Your DVD 944

Urethra 981

24.10 THE KIDNEYS HELP MAINTAIN THE OVERALL FLUID AND ACID-BASE BALANCE OF THE BODY. 982

Fluid Balance 982

Regulation of Water and Solute Loss 982

Movement of Water into and out of Cells 983

Acid-Base Balance 983

Phosphate Buffer System 983 Kidney Excretion of H⁺ 984

Andre's Story:

Epilogue and Discussion 986

Summary 986

On Your DVD 991

25 THE REPRODUCTIVE SYSTEMS AND DEVELOPMENT 992

Lou and Susan's Story 992 Introduction 993

25.1 THE SCROTUM SUPPORTS AND REGULATES THE TEMPERATURE OF THE TESTES, WHICH PRODUCE SPERMATOZOA UNDER THE INFLUENCE OF HORMONES. 994

Scrotum 994 Testes 995

Spermatogenesis 999 Sperm 1000

Hormonal Control of the Testes 1000

25.2 SPERM ARE TRANSPORTED FROM THE TESTES THROUGH THE EPIDIDYMIS, DUCTUS DEFERENS, EJACULATORY DUCTS, AND URETHRA, WHERE THEY ARE EJACULATED IN SEMEN. 1002

Reproductive System Ducts in Males 1002

Ducts of the Testis 1002 Epididymis 1002

Ductus Deferens 1002 Spermatic Cord 1003

Ejaculatory Ducts 1004 Urethra 1004

Accessory Sex Glands 1004

Seminal Vesicles 1004 Prostate 1004

Bulbourethral Glands 1004

Semen 1004 Penis 1005

Return to Lou and Susan's Story 1007

25.3 AFTER A SECONDARY OOCYTE IS DISCHARGED FROM AN OVARY, IF IT CONTACTS SPERM IN THE UTERINE TUBES, IT MAY UNDERGO FERTILIZATION AND IMPLANTATION IN THE UTERUS. 1008

Ovaries 1008

Histology of the Ovary 1010

Oogenesis and Follicular Development 1011

Uterine Tubes 1014 Uterus 1015

Anatomy of the Uterus 1015 Histology of the Uterus 1016

25.4 THE VAGINA IS THE RECEPTACLE FOR THE PENIS DURING SEXUAL INTERCOURSE AND A PASSAGEWAY FOR THE MENSTRUAL FLOW AND CHILDBIRTH; THE MAMMARY GLANDS SYNTHESIZE AND SECRETE MILK. 1018

Vagina 1018 Vulva 1019 Perineum 1019

Mammary Glands 1020

Return to Lou and Susan's Story 1022

25.5 THE FEMALE REPRODUCTIVE CYCLE INCLUDES THE OVARIAN CYCLE AND UTERINE CYCLE. 1022

Hormonal Regulation of the Female Reproductive Cycle 1022

Phases of the Female Reproductive Cycle 1023

Menstrual Phase 1024

Events in the Ovaries 1025 Events in the Uterus 1025

Preovulatory Phase 1025

Events in the Ovaries 1025 Events in the Uterus 1025

Ovulation 1025 Postovulatory Phase 1026

Events in One Ovary 1026 Events in the Uterus 1026

Return to Lou and Susan's Story 1028

25.6 AFTER FERTILIZATION, CLEAVAGE DIVIDES THE RESULTING ZYGOTE INTO A MORULA AND THEN A BLASTOCYST THAT IMPLANTS IN THE ENDOMETRIUM OF THE UTERUS. 1028

Fertilization 1028 Early Embryonic Development 1030

Implantation 1030

Return to Lou and Susan's Story 1033

25.7 DURING THE EMBRYONIC PERIOD, THE EMBRYONIC MEMBRANES AND MOST MAJOR ORGANS DEVELOP; DURING THE FETAL PERIOD THESE STRUCTURES GROW AND DIFFERENTIATE. 1033

Development of the Trophoblast 1033

Development of the Bilaminar Embryonic Disc 1033

Development of the Amnion 1033 Development of the Yolk Sac 1034

Development of Sinusoids 1035 Development of the Chorion 1035

Development of the Chorionic Villi 1036

Third Week of Development 1036

Development of the Placenta and Umbilical Cord 1036

Fourth Through Eighth Weeks of Development 1038

Fetal Period 1038

25.8 MATERNAL CHANGES DURING PREGNANCY INCLUDE EXPANSION OF THE UTERUS, DISPLACEMENT OF MATERNAL GASTROINTESTINAL TRACT ORGANS, AND COMPRESSION OF THE URETERS AND URINARY BLADDER. 1042

Hormones of Pregnancy 1042 Changes During Pregnancy 1043

Return to Lou and Susan's Story 1045

25.9 LABOR INCLUDES DILATION OF THE CERVIX, EXPULSION OF THE FETUS, AND DELIVERY OF THE PLACENTA. 1045

Return to Lou and Susan's Story 1047

25.10 MILK PRODUCTION AND EJECTION ARE INFLUENCED BY PROLACTIN, ESTROGENS, PROGESTERONE, AND OXYTOCIN. 1048
