Contents

Preface xiii

PART I C# 1.0 1

1 Introduction 3

- 1.1 Hello World 4
- 1.2 Program Structure 5
- 1.3 Types and Variables 7
- 1.4 Expressions 11
- 1.5 Statements 14
- 1.6 Classes and Objects 18
- 1.7 Structs 34
- 1.8 Arrays 35
- 1.9 Interfaces 37
- 1.10 Enums 39
- 1.11 Delegates 40
- 1.12 Attributes 42

2 Lexical Structure 45

- 2.1 Programs 45
- 2.2 Grammars 45
- 2.3 Lexical Analysis 47
- 2.4 Tokens 51
- 2.5 Preprocessing Directives 61

- 3 Basic Concepts 73**
 - 3.1 Application Startup 73
 - 3.2 Application Termination 74
 - 3.3 Declarations 75
 - 3.4 Members 77
 - 3.5 Member Access 79
 - 3.6 Signatures and Overloading 86
 - 3.7 Scopes 87
 - 3.8 Namespace and Type Names 93
 - 3.9 Automatic Memory Management 95
 - 3.10 Execution Order 99
- 4 Types 101**
 - 4.1 Value Types 101
 - 4.2 Reference Types 110
 - 4.3 Boxing and Unboxing 112
- 5 Variables 115**
 - 5.1 Variable Categories 115
 - 5.2 Default Values 119
 - 5.3 Definite Assignment 119
 - 5.4 Variable References 133
 - 5.5 Atomicity of Variable References 133
- 6 Conversions 135**
 - 6.1 Implicit Conversions 135
 - 6.2 Explicit Conversions 138
 - 6.3 Standard Conversions 142
 - 6.4 User-Defined Conversions 143
- 7 Expressions 147**
 - 7.1 Expression Classifications 147
 - 7.2 Operators 149
 - 7.3 Member Lookup 156
 - 7.4 Function Members 157

7.5	Primary Expressions	170
7.6	Unary Operators	193
7.7	Arithmetic Operators	198
7.8	Shift Operators	207
7.9	Relational and Type-Testing Operators	209
7.10	Logical Operators	216
7.11	Conditional Logical Operators	218
7.12	Conditional Operator	220
7.13	Assignment Operators	221
7.14	Expression	226
7.15	Constant Expressions	226
7.16	Boolean Expressions	228
8	Statements	229
8.1	End Points and Reachability	230
8.2	Blocks	232
8.3	The Empty Statement	233
8.4	Labeled Statements	233
8.5	Declaration Statements	234
8.6	Expression Statements	236
8.7	Selection Statements	237
8.8	Iteration Statements	243
8.9	Jump Statements	248
8.10	The try Statement	255
8.11	The checked and unchecked Statements	258
8.12	The lock Statement	259
8.13	The using Statement	260
9	Namespaces	263
9.1	Compilation Units	263
9.2	Namespace Declarations	264
9.3	Using Directives	265
9.4	Namespace Members	271
9.5	Type Declarations	271

10 Classes 273

- 10.1 Class Declarations 273
- 10.2 Class Members 277
- 10.3 Constants 287
- 10.4 Fields 290
- 10.5 Methods 299
- 10.6 Properties 317
- 10.7 Events 327
- 10.8 Indexers 333
- 10.9 Operators 338
- 10.10 Instance Constructors 343
- 10.11 Static Constructors 349
- 10.12 Destructors 352

11 Structs 355

- 11.1 Struct Declarations 355
- 11.2 Struct Members 356
- 11.3 Class and Struct Differences 357
- 11.4 Struct Examples 363

12 Arrays 367

- 12.1 Array Types 367
- 12.2 Array Creation 369
- 12.3 Array Element Access 369
- 12.4 Array Members 369
- 12.5 Array Covariance 369
- 12.6 Array Initializers 370

13 Interfaces 373

- 13.1 Interface Declarations 373
- 13.2 Interface Members 375
- 13.3 Fully Qualified Interface Member Names 380
- 13.4 Interface Implementations 380

14 Enums 393

- 14.1 Enum Declarations 393
- 14.2 Enum Modifiers 394
- 14.3 Enum Members 394
- 14.4 The System.Enum Type 397
- 14.5 Enum Values and Operations 397

15 Delegates 399

- 15.1 Delegate Declarations 399
- 15.2 Delegate Instantiation 402
- 15.3 Delegate Invocation 403

16 Exceptions 407

- 16.1 Causes of Exceptions 407
- 16.2 The System.Exception Class 408
- 16.3 How Exceptions Are Handled 408
- 16.4 Common Exception Classes 409

17 Attributes 411

- 17.1 Attribute Classes 411
- 17.2 Attribute Specification 414
- 17.3 Attribute Instances 420
- 17.4 Reserved Attributes 422
- 17.5 Attributes for Interoperation 428

18 Unsafe Code 429

- 18.1 Unsafe Contexts 429
- 18.2 Pointer Types 433
- 18.3 Fixed and Moveable Variables 436
- 18.4 Pointer Conversions 437
- 18.5 Pointers in Expressions 438
- 18.6 The fixed Statement 446
- 18.7 Stack Allocation 450
- 18.8 Dynamic Memory Allocation 451

PART II C# 2.0 455

19 Introduction to C# 2.0 457

- 19.1 Generics 458
- 19.2 Anonymous Methods 463
- 19.3 Iterators 467
- 19.4 Partial Types 471
- 19.5 Nullable Types 472

20 Generics 477

- 20.1 Generic Class Declarations 477
- 20.2 Generic Struct Declarations 488
- 20.3 Generic Interface Declarations 488
- 20.4 Generic Delegate Declarations 490
- 20.5 Constructed Types 491
- 20.6 Generic Methods 498
- 20.7 Constraints 506
- 20.8 Expressions and Statements 517
- 20.9 Revised Lookup Rules 521
- 20.10 Right-Shift Grammar Changes 533

21 Anonymous Methods 535

- 21.1 Anonymous Method Expressions 535
- 21.2 Anonymous Method Signatures 535
- 21.3 Anonymous Method Conversions 536
- 21.4 Anonymous Method Blocks 537
- 21.5 Outer Variables 538
- 21.6 Anonymous Method Evaluation 541
- 21.7 Delegate Instance Equality 542
- 21.8 Definite Assignment 543
- 21.9 Method Group Conversions 544
- 21.10 Delegate Creation Expressions 546
- 21.11 Implementation Example 546

22 Iterators 551

- 22.1 Iterator Blocks 551
- 22.2 Enumerator Objects 552
- 22.3 Enumerable Objects 555
- 22.4 The yield Statement 556
- 22.5 Implementation Example 558

23 Partial Types 567

- 23.1 Partial Declarations 567
- 23.2 Name Binding 571

24 Nullable Types 573

- 24.1 Nullable Types 573
- 24.2 Conversions 574
- 24.3 Expressions 580

25 Other Features 587

- 25.1 Property Accessor Accessibility 587
- 25.2 Static Classes 590
- 25.3 Namespace Alias Qualifiers 592
- 25.4 Extern Aliases 596
- 25.5 Pragma Directives 600
- 25.6 Default Value Expression 601
- 25.7 Conditional Attribute Classes 602
- 25.8 Fixed Size Buffers 603

PART III Appendixes 609

A Documentation Comments 611

- A.1 Introduction 611
- A.2 Recommended Tags 613
- A.3 Processing the Documentation File 623
- A.4 An Example 629

Contents

B Grammar 635

B.1 Lexical Grammar 635

B.2 Syntactic Grammar 644

B.3 Grammar Extensions for Unsafe Code 671

Index 675
