

"Office development using managed code has hit new strides with the release of Visual Studio 2005. I can't wait to take advantage of this book to build great applications."

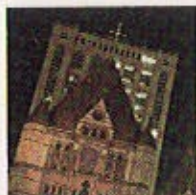

—From the Foreword by **Ken Getz**, senior consultant for MCW Technologies

# Visual Studio Tools for Office

Using Visual Basic 2005 with  
Excel, Word, Outlook, and InfoPath

Microsoft<sup>®</sup>  
**.net**<sup>™</sup>  
Development  
Series

Eric Carter

## **PART I An Introduction to VSTO 1**

The Other Parts of This Book	2
------------------------------	---

### **1 An Introduction to Office Programming 3**

Why Office Programming?	3
<i>Office Programming and the Professional Developer</i>	4
<i>Why .NET for Office?</i>	4
<i>Why Visual Studio Tools for Office?</i>	5
<i>How .NET Is It?</i>	5
<i>The Visual Basic Advantage</i>	5
Office Object Models	6
<i>Objects</i>	7
<i>Collections</i>	10
<i>Enumerations</i>	12

Properties, Methods, and Events	12
<i>Properties</i>	13
<i>Methods</i>	20
<i>Events</i>	23
<i>Handling Events Dynamically</i>	28
The Office Primary Interop Assemblies (PIAs)	34
<i>Installing the PIAs</i>	35
<i>Referencing the PIAs</i>	36
<i>Browsing the PIAs</i>	39
Conclusion	43
<b>2 Introduction to Office Solutions</b>	<b>45</b>
The Three Basic Patterns of Office Solutions	45
<i>Hosted Code</i>	46
<i>How Code Gets Run After Startup</i>	47
<i>How Code Gets Unloaded</i>	48
Office Automation Executables	49
<i>Creating a Console Application That Automates Word</i>	51
Office Add-Ins	60
<i>Creating an Outlook Add-In in VSTO</i>	60
Code Behind a Document	65
Conclusion	72
<b>PART II Office Programming in .NET</b>	<b>73</b>
<b>3 Programming Excel</b>	<b>75</b>
Ways to Customize Excel	75
<i>Automation Executable</i>	75
<i>COM Add-Ins</i>	76
<i>Automation Add-Ins</i>	77
<i>Visual Studio Tools for Office Code Behind</i>	78
<i>Smart Documents and XML Expansion Packs</i>	78
<i>Smart Tags</i>	79
<i>XLA Add-Ins</i>	81
<i>Server-Generated Documents</i>	82
<i>Research Services</i>	82

Programming User-Defined Functions	83
<i>Building a Managed Automation Add-In That Provides User-Defined Functions</i>	83
<i>Using Your Managed Automation Add-In in Excel</i>	85
<i>Creating Additional User-Defined Functions</i>	88
<i>Debugging User-Defined Functions in a Managed Automation Add-In</i>	90
<i>Deploying Managed Automation Add-Ins</i>	91
Introduction to the Excel Object Model	92
Conclusion	98
<b>4 Working with Excel Events</b>	<b>99</b>
Events in the Excel Object Model	99
<i>New Workbook and Worksheet Events</i>	100
<i>Activation and Deactivation Events</i>	104
<i>Double-Click and Right-Click Events</i>	111
<i>Calculate Events</i>	118
<i>Change Events</i>	120
<i>Follow Hyperlink Events</i>	123
<i>Selection Change Events</i>	125
<i>WindowResize Events</i>	126
<i>Add-In Install and Uninstall Events</i>	128
<i>XML Import and Export Events</i>	128
<i>Before Close Events</i>	128
<i>Before Print Events</i>	129
<i>Before Save Events</i>	130
<i>Open Events</i>	131
<i>Toolbar and Menu Events</i>	133
<i>Additional Events</i>	138
Events in Visual Studio 2005 Tools for Office	138
Conclusion	142
<b>5 Working with Excel Objects</b>	<b>143</b>
Working with the Application Object	143
<i>Controlling Excel's Screen Updating Behavior</i>	143
<i>Controlling the Dialog Boxes and Alerts That Excel Displays</i>	145
<i>Changing the Mouse Pointer</i>	146

<i>Displaying a Message in Excel's Status Bar</i>	146
<i>A Property You Should Never Use</i>	147
<i>Controlling the Editing Experience in Excel</i>	148
<i>Controlling the Look of Excel</i>	149
<i>Controlling File and Printer Settings</i>	149
<i>Properties That Return Active or Selected Objects</i>	149
<i>Properties That Return Important Collections</i>	151
<i>Controlling the Calculation of Workbooks</i>	152
<i>Using Built-In Excel Functions in Your Code</i>	152
<i>Selecting and Activating a Range of Cells</i>	153
<i>Spell Checking</i>	153
<i>Sending a Workbook in E-Mail</i>	154
<i>Quitting Excel</i>	155
<i>Undo in Excel</i>	155
<i>Sending Keyboard Commands to Excel</i>	156
<b>Working with the Workbooks Collection</b>	157
<i>Iterating over the Open Workbooks</i>	157
<i>Accessing a Workbook in the Workbooks Collection</i>	158
<i>Creating a New Workbook</i>	159
<i>Opening an Existing Workbook</i>	160
<i>Closing All the Open Workbooks</i>	160
<b>Working with the Workbook Object</b>	161
<i>Properties That Return Active or Selected Objects</i>	161
<i>Properties That Return Important Collections</i>	162
<i>Accessing Document Properties</i>	162
<i>Saving an Excel Workbook</i>	163
<i>Naming Ranges of Cells</i>	166
<i>When Excel Is Embedded in Another Application</i>	166
<i>Creating and Activating Windows</i>	167
<i>Printing a Workbook</i>	167
<i>Protecting a Workbook</i>	168
<b>Working with the Worksheets, Charts, and Sheets Collections</b>	169
<i>Iterating over the Open Sheets</i>	169
<i>Accessing a Sheet in the Collection</i>	170

<i>Adding a Worksheet or Chart Sheet</i>	170
<i>Copying a Sheet</i>	171
<i>Moving a Sheet</i>	171
Working with Document Properties	172
<i>Iterating over the DocumentProperties Collection</i>	172
<i>Accessing a DocumentProperty in the DocumentProperties Collection</i>	173
<i>Adding a DocumentProperty</i>	174
Working with the Windows Collections	175
<i>Iterating over the Open Windows</i>	175
<i>Accessing a Window in the Collection</i>	176
<i>Arranging Windows</i>	177
Working with the Window Object	179
<i>Positioning a Window</i>	179
<i>Display Settings Associated with a Window</i>	179
Working with the Names Collection and Name Object	181
<i>Iterating over the Names Collection</i>	182
<i>Accessing a Name in the Names Collection</i>	182
<i>The Name Object</i>	183
Working with the Worksheet Object	183
<i>Worksheet Management</i>	183
<i>Working with Names</i>	186
<i>Working with Worksheet Custom Properties</i>	186
<i>Protecting a Worksheet</i>	187
<i>Working with OLEObjects</i>	192
<i>Working with Shapes</i>	194
<i>Working with ChartObjects</i>	194
<i>Working with Lists</i>	196
Working with the Range Object	197
<i>Getting a Range Object for a Particular Cell or Range of Cells</i>	197
<i>Working with Addresses</i>	200
<i>Creating New Ranges Using Operators</i>	204
<i>Working with Areas</i>	205
<i>Working with Cells</i>	206
<i>Working with Rows and Columns</i>	206

	<i>Working with Regions</i>	208
	<i>Selecting a Range</i>	208
	<i>Editing the Values in a Range</i>	208
	<i>Copying, Clearing, and Deleting Ranges</i>	209
	<i>Finding Text in a Range</i>	210
	<i>Formatting a Range of Cells</i>	212
	<b>Special Excel Issues</b>	213
	<i>The Excel Locale Issue for Automation Executables and COM Add-Ins</i>	213
	<i>Converting Excel Dates to DateTime</i>	218
	<b>Conclusion</b>	220
<b>6</b>	<b>Programming Word</b>	<b>223</b>
	<b>Ways to Customize Word</b>	223
	<i>Automation Executable</i>	223
	<i>COM Add-Ins</i>	224
	<i>Visual Studio Tools for Office Code Behind</i>	225
	<i>Smart Documents and XML Expansion Packs</i>	226
	<i>Smart Tags</i>	227
	<i>Server-Generated Documents</i>	229
	<b>Programming Research Services</b>	229
	<i>Getting Started with Research Services</i>	231
	<i>A Simple Research Service</i>	233
	<i>Registering the Research Service with Word</i>	234
	<i>Using the Research Service</i>	236
	<i>More Research Service Resources</i>	236
	<b>Introduction to the Word Object Model</b>	237
	<b>Conclusion</b>	238
<b>7</b>	<b>Working with Word Events</b>	<b>243</b>
	<b>Events in the Word Object Model</b>	243
	<i>Why Are There Multiple Application and Document Event Interfaces?</i>	244
	<i>Visual Studio Generation of Event Handlers</i>	246
	<i>Startup and Shutdown Events</i>	248
	<i>New and Open Document Events</i>	249
	<i>Document Close Events</i>	252
	<i>Document Save Events</i>	254

*Document Activation Events* 255

*Document Print Events* 257

*Mouse Events* 258

*Selection Events* 260

*Window Sizing Events* 262

*XML Events* 262

*Sync Events* 263

*E-Postage Events* 263

*Mail Merge Events* 264

*CommandBar Events* 271

Events in Visual Studio Tools for Office 273

Conclusion 275

## **8 Working with Word Objects 277**

Working with the Application Object 277

*Controlling Word's Screen Updating Behavior* 278

*Controlling the Dialog Boxes and Alerts That Word Displays* 279

*Changing the Mouse Pointer* 280

*Displaying a Message in Word's Status Bar or Window Caption* 281

*Controlling the Look of Word* 282

*Properties That Return Active or Selected Objects* 284

*Properties That Return Important Collections* 285

*Navigating a Document* 288

*Working with Word's Options* 289

*Working with the New and Getting Started Document Task Panes* 291

*Working with the File Save Format Options* 294

*Working with File Dialog Boxes* 295

*User Information* 296

*Checking Grammar and Spelling* 296

*Exiting Word* 298

Working with the Dialog Object 299

*Showing the Dialog Box and Letting Word Execute Actions* 299

*Selecting the Tab on a Dialog Box* 300

*Showing the Dialog Box and Preventing Word from Executing Actions* 300

*Getting and Setting Fields in a Dialog Box* 301

Working with Windows	304
<i>Creating New Windows</i>	304
<i>Iterating over the Open Windows</i>	304
<i>Accessing a Window in the Collection</i>	305
<i>Arranging Windows</i>	306
Working with Templates	307
Working with Documents	310
<i>Iterating over the Open Documents</i>	310
<i>Accessing a Document in the Documents Collection</i>	310
<i>Creating a New Document</i>	311
<i>Opening an Existing Document</i>	312
<i>Closing All Open Documents</i>	314
<i>Saving All Open Documents</i>	315
Working with a Document	315
<i>Preserving the Dirty State of a Document</i>	316
<i>Closing and Saving a Document</i>	317
<i>Working with Windows Associated with a Document</i>	317
<i>Changing the Template Attached to a Document</i>	319
<i>Important Collections Associated with Both Document and Range</i>	319
<i>Important Collections Associated with Document Only</i>	323
<i>Working with Document Properties</i>	323
<i>Checking Spelling and Grammar in Documents and Ranges</i>	328
<i>Printing a Document</i>	329
<i>Working with Document Protection</i>	331
<i>Working with Password Protection</i>	333
<i>Undo and Redo</i>	335
Working with the Range Object	335
<i>Getting a Range</i>	336
<i>Identifying a Range</i>	339
<i>Changing a Range</i>	340
<i>Moving a Range</i>	344
<i>Ranges and Stories</i>	346
<i>Navigating a Range</i>	346
<i>Collapsing a Range</i>	348

<i>Getting Text from a Range</i>	349
<i>Setting the Text in a Range</i>	350
<i>Inserting Nonprinting Characters and Breaks</i>	351
<i>Working with Formatting</i>	352
<i>Find and Replace</i>	355
Working with Bookmarks	358
Working with Tables	360
Conclusion	362
<b>9 Programming Outlook</b>	<b>363</b>
Ways to Customize Outlook	363
<i>Automation Executable</i>	363
<i>Add-Ins</i>	364
<i>Smart Tags</i>	365
Custom Property Pages	370
Introduction to the Outlook Object Model	378
Introduction to the Collaboration Data Objects	382
Conclusion	386
<b>10 Working with Outlook Events</b>	<b>387</b>
Events in the Outlook Object Model	387
<i>Why Are There Multiple Event Interfaces?</i>	389
Application-Level Events	392
<i>Startup and Quit Events</i>	394
<i>Activation Events</i>	397
<i>New Window Events</i>	399
<i>Window Events</i>	399
<i>Close Events</i>	401
<i>View and Selection Change Events</i>	401
<i>Folder Change Events</i>	403
Outlook Item Events	405
<i>Item Addition, Deletion, and Change Events</i>	405
<i>Copy, Paste, Cut, and Delete Events</i>	408
<i>Property Change Events</i>	410
<i>Open, Read, Write, and Close Events</i>	411
<i>E-Mail Events</i>	413

<i>Attachment Events</i>	416
<i>Custom Action Events</i>	417
Other Events	419
Conclusion	422
<b>11 Working with Outlook Objects</b>	<b>423</b>
Working with the Application Object	423
<i>Methods and Properties That Return Active or Selected Objects</i>	424
<i>Properties That Return Important Collections</i>	424
<i>Performing a Search and Creating a Search Folder</i>	426
<i>Copying a File into an Outlook Folder</i>	430
<i>Quitting Outlook</i>	431
Working with the Explorers and Inspectors Collections	431
Working with the Explorer Object	433
<i>Working with the Selected Folder, View, and Items</i>	433
<i>Working with an Explorer Window</i>	437
<i>Adding Buttons and Menus to an Explorer Window</i>	438
<i>Associating a Web View with a Folder</i>	439
Working with the Inspector Object	440
<i>Working with the Outlook Item Associated with the Inspector</i>	440
<i>Working with an Inspector Window</i>	440
<i>Working with Different Inspector Editor Types</i>	440
<i>Adding Buttons and Menus to an Inspector Window</i>	442
Working with the NameSpace Object	443
<i>Working with the Root Folders of the Open Outlook Stores</i>	444
<i>Adding and Removing Outlook Stores</i>	445
<i>Determining the Current User</i>	445
<i>Checking Whether Outlook Is Offline</i>	445
<i>Getting Standard Folders Such As the Inbox Folder</i>	446
<i>Getting a Folder or Outlook Item by ID</i>	447
<i>Accessing Address Books and Address Entries</i>	448
<i>Displaying the Outlook Select Folder Dialog Box</i>	449
Working with the MAPIFolder Object	450
<i>Other Identifiers for a Folder</i>	450
<i>Accessing Subfolders Contained in a Folder</i>	450

<i>Accessing Items Contained in a Folder</i>	452
<i>Working with a Folder's View Settings</i>	457
<i>Copying or Moving a Folder to a New Location</i>	458
<i>Displaying a Folder in an Explorer View</i>	459
<b>Working with the Items Collection</b>	459
<i>Iterating over Outlook Items</i>	459
<i>Finding an Outlook Item</i>	461
<i>Adding an Outlook Item to an Items Collection</i>	464
<b>Properties and Methods Common to Outlook Items</b>	466
<i>Creating an Outlook Item</i>	468
<i>Identifying the Specific Type of an Outlook Item</i>	469
<i>Other Properties Associated with All Outlook Items</i>	473
<i>Copying or Moving an Outlook Item to a New Location</i>	474
<i>Deleting an Outlook Item</i>	474
<i>Displaying an Outlook Item in an Inspector Window</i>	478
<i>Working with Built-In and Custom Properties Associated</i> <i>with an Outlook Item</i>	479
<i>Saving an Outlook Item</i>	482
<i>Showing the Categories Dialog Box for an Outlook Item</i>	483
<i>Mail Properties and Methods</i>	483
<b>Outlook Issues</b>	486
<i>Outlook Object Model Security</i>	486
<i>Extended MAPI</i>	491
<b>Conclusion</b>	492
<b>12 Introduction to InfoPath</b>	493
<i>What Is InfoPath?</i>	493
<i>Getting Started</i>	494
<i>Form Security</i>	499
<i>Form Security Levels</i>	499
<i>Automatically and Manually Setting the Required Security Level</i>	500
<i>Deployment Location and Security</i>	501
<i>Registering a Form Template to Grant Full Trust</i>	502
<i>More Information</i>	504

Programming InfoPath	505
<i>Event-Based Programming</i>	506
<i>Previewing</i>	508
Data Source Events	509
Creating an Event Handler	510
The <i>OnBeforeChange</i> Event	512
The <i>OnValidate</i> Event	514
The <i>OnAfterChange</i> Event	517
Form Events, Properties, and Methods	518
Button Events and View Switching	519
The <i>OnContextChange</i> Event and the Custom Task Pane	521
Focus Versus Selection	525
Setting Selection	525
Overriding Submit, Confirm, and Save	526
Conclusion	529

## **PART III Office Programming in VSTO 531**

### **13 The VSTO Programming Model 533**

The VSTO Programming Model	533
<i>Separation of Data and View</i>	534
<i>Model-View-Controller</i>	535
<i>Benefits of Separation</i>	536
VSTO Extensions to Word and Excel Objects	536
<i>Aggregation, Inheritance, and Implementation</i>	537
<i>Connecting the Aggregates</i>	538
<i>Obtaining the Aggregated Object</i>	539
<i>Aggregation and Windows Forms Controls</i>	540
The "Tag" Field	541
<i>Event Model Improvements</i>	541
Dynamic Controls	542
The Controls Collection	543
Enumerating and Searching the Collection	543
Adding New Word and Excel Host Controls Dynamically	544
Removing Controls	545
Saving and Loading Controls	546
Dynamic Host Items	547

Inspecting the Generated Code	549
<i>The Startup and Shutdown Sequences</i>	552
<i>The Globals Class in Excel</i>	554
VSTO Extensions to the Word and Excel Object Models	555
<i>The Word Document Class</i>	556
<i>The Word Bookmark Host Control</i>	561
<i>The Word XmlNode and XMLNodes Host Control Classes</i>	562
<i>The Excel Workbook Host Item Class</i>	565
<i>The Excel Worksheet Host Item Class</i>	566
<i>The Excel Chart Sheet Host Item Class and Chart Host Control</i>	566
<i>The Excel NamedRange, XmlMappedRange, and ListObject Host Controls</i>	567
Conclusion	569
<b>14 Using Windows Forms in VSTO</b>	<b>571</b>
Introduction	571
<i>Moving from ActiveX to Windows Forms</i>	571
<i>When to Use Windows Forms Controls on the Document Surface</i>	572
<i>When to Use a Modal or Modeless Windows Forms Form</i>	575
Adding Windows Forms Controls to Your Document	577
<i>Modes for Adding Controls</i>	578
<i>Controls That Are Not in the Control Toolbox</i>	579
<i>Control Insertion Behavior in Word</i>	580
<i>Control Insertion Behavior in Excel</i>	582
<i>Layout of Controls on the Document or Worksheet Surface</i>	583
Writing Code Behind a Control	584
The Windows Forms Control Hosting Architecture	585
<i>The Windows Forms Control Host ActiveX Control</i>	585
<i>VSTO Controls Derived from Windows Forms Controls</i>	586
<i>Security Implications of the VSTO Control Hosting Model</i>	589
<i>Limitations of the Control Hosting Model</i>	590
<i>Control State Not Saved</i>	591
<i>Controls Sometimes Blurry</i>	593
Properties Merged from OLEObject or OLEControl	594
<i>Excel Control Properties That Are Added from OLEObject</i>	594
<i>Word Control Properties Added from OLEControl</i>	594

Adding Controls at Runtime	597
<i>Working with the Controls Collection</i>	600
<i>AddControl</i>	603
<i>Deleting Controls at Runtime</i>	603
<i>Controls Added at Runtime Not Saved</i>	604
<i>Controls in the Controls Collection Typed as Object</i>	605
Conclusion	605
<b>15 Working with the Actions Pane</b>	<b>607</b>
Introduction to the Actions Pane	607
Working with the ActionsPane Control	613
<i>The ActionsPane Architecture</i>	613
<i>Adding Windows Forms Controls to the Actions Pane</i>	614
<i>Adding a Custom User Control to the Actions Pane</i>	616
<i>Contextually Changing the Actions Pane</i>	619
<i>Detecting the Orientation of the Actions Pane</i>	621
<i>Scrolling the Actions Pane</i>	622
<i>Showing and Hiding the Actions Pane</i>	623
<i>Attaching and Detaching the Actions Pane</i>	625
<i>Some Methods and Properties to Avoid</i>	627
Conclusion	628
<b>16 Working with Smart Tags in VSTO</b>	<b>629</b>
Introduction to Smart Tags	629
<i>Configuring Smart Tags in Word and Excel</i>	631
<i>The Persistent Tagging Generated by Smart Tags</i>	632
Creating Document-Level Smart Tags with VSTO	633
<i>Action Events</i>	636
<i>Using Varying Numbers of Terms</i>	638
<i>Using Regular Expressions</i>	639
<i>Using Varying Numbers of Actions</i>	641
<i>Creating a Custom Smart Tag Class</i>	642
<i>Using Smart Tag Properties Wisely</i>	647
Creating Application-Level Smart Tags	647
<i>Creating an Application-Level Smart Tag Class Library in Visual Studio</i>	648
<i>Creating a Recognizer Class</i>	649

<i>Creating an Action Class</i>	657
<i>Registering and Trusting an Application-Level Smart Tag Class Library</i>	667
<i>Running and Testing the Application-Level Smart Tag</i>	670
<i>Debugging an Application-Level Smart Tag</i>	671
Conclusion	672
<b>17 VSTO Data Programming</b>	<b>673</b>
Creating a Data-Bound Customized Spreadsheet with VSTO	673
<i>Defining a Data Source</i>	674
<i>Creating Data-Bound Controls the Easy Way</i>	677
Creating a Data-Bound Customized Word Document with VSTO	681
Datasets, Adapters, and Sources	682
<i>Data Sources and Security Best Practices</i>	683
<i>Datasets</i>	684
<i>Adapters</i>	688
<i>Using Binding Sources As Proxies</i>	690
<i>Data-Bindable Controls</i>	691
Another Technique for Creating Data-Bound Spreadsheets	691
<i>Complex and Simple Data Binding</i>	696
<i>Data Binding in Word Documents</i>	698
Caching Data in the Data Island	699
<i>Caching Your Own Data Types</i>	700
<i>Dynamically Adding and Removing Cached Members from the Data Island</i>	701
<i>Using ICachedType</i>	702
<i>Manipulating the Serialized XML Directly</i>	703
Advanced ADO.NET Data Binding: Looking Behind the Scenes	704
Binding-Related Extensions to Host Items and Host Controls	705
<i>New Data-Related List Object Host Control Properties and Methods</i>	706
<i>New Data-Related List Object Events</i>	708
<i>New Exception</i>	711
Conclusion	712

**18 Server Data Scenarios 713****Populating a Document with Data on the Server 713***Data-Bound VSTO Documents 714**XML File Formats 714**Accessing the Data Island 715***Using ServerDocument and ASP.NET 716***Setting Up the Server 718**An Alternative Approach: Create a Custom Handler 721***A Handy Client-Side ServerDocument Utility 724****The ServerDocument Object Model 726***ServerDocument Class Constructors 727**Saving and Closing Documents 728**Static Helper Methods 729**Cached Data Objects, Methods, and Properties 731**Be Careful 736***Conclusion 737****19 .NET Code Security 739****Code-Access Security Versus Role-Based Security 740****Code-Access Security in .NET 741***The Machine Policy Level 742**Kinds of Evidence 743**Combining Policy Levels 744**The User Policy Level 745**Full Trust and Partial Trust 746**The VSTO Application Domain Policy Level 747**Resolving VSTO Policy 748***Location, Location, Location 749****Strong Names 753***Creating a Strong-Name Code Group 754**How Strong Names Are Implemented 754**Why Create a Child Code Group? 755**Implementing Strong-Named Assemblies 757**Public Keys and Public-Key Tokens 760*

Publisher Certificates	761
<i>License to Code</i>	762
<i>Obtaining Certificates</i>	764
Trusting the Document	765
Deploying Policy to User Machines	769
<i>Creating an MSI Installer</i>	769
<i>Creating a Batch File</i>	769
<i>Writing a Visual Basic Program That Modifies Security Policy</i>	772
Conclusion	773

## **20 Deployment 775**

VSTO Prerequisites	776
Deploying to an Intranet Shared Directory or Web Site	777
<i>Deploying to a Server with the Publish Wizard</i>	777
<i>Some Security Questions</i>	777
<i>Examining the Generated Files</i>	779
<i>The Deployment Manifest</i>	780
<i>The Application Manifest</i>	782
<i>The Relationship Between Application and Deployment Manifests</i>	783
<i>Determining the Assembly Location from a Deployment Manifest</i>	785
Local Machine Deployment Without a Deployment Manifest	785
Editing Manifests	787
<i>Using MAGE to Edit Deployment Manifests</i>	787
<i>Using the VSTO Application Manifest Editor</i>	788
<i>Using the ServerDocument Object Model to Read and Edit Embedded Application Manifests</i>	789
<i>Application Manifest Objects, Methods, and Properties</i>	790
Creating Setup Packages	793
<i>Deploying Network Solutions to Be Cached Locally</i>	802
<i>IntelliMirror Versus Web Caching</i>	802
<i>Why Do We Need a Configuration File?</i>	803
Conclusion	805

## **PART IV Advanced Office Programming 807**

### **21 Working with XML in Excel 809**

Introduction to Excel's XML Features 809

Introduction to XML Schema Creation in Visual Studio 811

An End-to-End Scenario 816

*Creating the Schema Using Visual Studio 817*

*Adding a Schema to the Excel Workbook 820*

*Mapping the Schema to the Excel Workbook 821*

Advanced XML Features in Excel 826

*Importing XML and Refresh XML Data 826*

*The XML Map Properties Dialog Box 827*

*XML Schema Validation 827*

*Data Formatting and Layout 829*

*Appending Data to Lists 829*

Excel-Friendly XML Schemas 830

*Unsupported XML Schema Constructs 830*

*Constructs That Can Be Mapped But Not Exported 831*

*VSTO-Friendly Schemas 831*

*How XML Schema Data Types Are Mapped to Excel Cell Formats 831*

VSTO Support for Excel Schema Mapping 833

*XMLMappedRange Controls 833*

*ListObject Controls 837*

*Schema Added to the VSTO Project 841*

*Combining XML Mapping with VSTO Data Binding 842*

Conclusion 849

### **22 Working with XML in Word 851**

Introduction to Word's XML Features 851

An End-to-End Scenario: Creating a Schema and Mapping It into a Word Document 855

*Creating the Schema Using Visual Studio 857*

*Adding a Schema to the Word Document 861*

*The XML Options Dialog Box and Mixed Content 861*

*Creating a Document with Mapped XML Structure 862*

Exporting the Mapped XML in the Document to an XML Data File	869
Importing an XML Data File into the Mapped Document	871
<i>Creating the XSLT File</i>	872
<i>Manually Converting the Book-Order XML File Using the XSLT File</i>	873
<i>Automatically Applying an XSLT File When XML Conforming to the Book-Order Schema Is Opened</i>	875
The XML Options Dialog Box	877
VSTO Support for Word Schema Mapping	880
<i>The XmlNode Control</i>	881
