ACSM's
GUIDELINES FOR
EXERCISE TESTING
AND PRESCRIPTION
SEVENTH EDITION

LIPPINCOTT WILLIAMS & WILKINS

Contents

Preface	vii
Nota Bene	x
Contributors	xi
Abbreviations	xix

Section I Health Appraisal, Risk Assessment, and Safety of Exercise

1	Benefits and Risks Associated With Physical Activity	3
	Physical Activity and Fitness Terminology	3
	Public Health Perspective for Current Recommendations	5
	<i>Divergent Physical Activity Recommendations</i>	6
	Benefits of Regular Physical Activity and/or Exercise	7
	<i>Dose-Response Relationship</i>	7
	Risks Associated With Exercise	10
	<i>Sudden Death Among Young Individuals</i>	11
	<i>Exercise Events in Those With Sickle Cell Trait</i>	12
	<i>Exercise-Related Cardiac Events in Adults</i>	12
	<i>Risks of Cardiac Events During Exercise Testing</i>	12
	<i>Risks of Cardiac Events During Cardiac Rehabilitation</i>	13
	<i>Prevention of Exercise-Related Cardiac Events</i>	13
2	Preparticipation Health Screening and Risk Stratification	19
	Preparticipation Screening Algorithm	19
	<i>Risk Stratification and Medical Clearance</i>	21
	<i>Additional Preparticipation Assessments</i>	28
	<i>Exercise Testing and Testing Supervision</i>	
	<i>Recommendations</i>	29
	Risk Stratification for Cardiac Patients	30

Section II Exercise Testing

3	Pre-Exercise Evaluations	39
	Medical History, Physical Examination, and Laboratory Tests	39
	<i>Blood Pressure</i>	43
	<i>Lipids and Lipoproteins</i>	45
	<i>Blood Profile Analyses</i>	46
	<i>Pulmonary Function</i>	47

	Contraindications to Exercise Testing	49
	Informed Consent	49
	<i>Participant Instructions</i>	51
4	Health-Related Physical Fitness Testing and Interpretation	55
	Purposes of Health-Related Fitness Testing	55
	Basic Principles and Guidelines	56
	<i>Pretest Instructions</i>	56
	<i>Test Order</i>	56
	<i>Test Environment</i>	56
	Body Composition	57
	<i>Anthropometric Methods</i>	57
	<i>Densitometry</i>	64
	<i>Other Techniques</i>	65
	<i>Body Composition Norms</i>	66
	Cardiorespiratory Fitness	66
	<i>The Concept of Maximal Oxygen Uptake</i>	66
	<i>Maximal versus Submaximal Exercise Testing</i>	67
	<i>Modes of Testing</i>	68
	<i>Cardiorespiratory Test Sequence and Measures</i>	76
	<i>Test Termination Criteria</i>	78
	<i>Interpretation of Results</i>	79
	Muscular Strength and Muscular Endurance	80
	<i>Muscular Strength</i>	81
	<i>Muscular Endurance</i>	83
	Flexibility	85
	A Comprehensive Health Fitness Evaluation	89
5	Clinical Exercise Testing	93
	Indications and Applications	93
	<i>Diagnostic Exercise Testing</i>	93
	<i>Exercise Testing for Disease Severity</i> <i>and Prognosis</i>	94
	<i>Exercise Testing After Myocardial Infarction</i>	94
	<i>Functional Exercise Testing</i>	95
	Exercise Test Modalities	96
	Exercise Protocols	99
	<i>Upper Body Exercise Testing</i>	102
	Testing for Return to Work	102
	Measurements During Exercise Testing	103
	<i>Heart Rate and Blood Pressure</i>	103
	<i>Electrocardiographic Monitoring</i>	105
	<i>Subjective Ratings and Symptoms</i>	106
	<i>Gas Exchange and Ventilatory Responses</i>	107
	<i>Blood Gases</i>	108
	<i>Indications for Exercise Test Termination</i>	108
	Postexercise Period	108

	Exercise Testing With Imaging Modalities	110
	<i>Exercise Echocardiography</i>	110
	<i>Exercise Nuclear Imaging</i>	110
	<i>Pharmacologic Stress Testing</i>	111
	<i>Electron Beam Computed Tomography</i>	111
	Supervision of Exercise Testing	112
6	Interpretation of Clinical Exercise Test Data	115
	Exercise Testing As a Screening Tool for Coronary Artery Disease	115
	Interpretation of Responses to Graded Exercise Testing	116
	<i>Heart Rate Response</i>	116
	<i>Blood Pressure Response</i>	119
	<i>Electrocardiographic Waveforms</i>	119
	<i>Limiting Signs and Symptoms</i>	123
	<i>Gas Exchange and Ventilatory Responses</i>	123
	Diagnostic Value of Exercise Testing	124
	<i>Sensitivity</i>	124
	<i>Specificity</i>	125
	<i>Predictive Value</i>	125
	<i>Comparison With Imaging Stress Tests</i>	126
	<i>Prognostic Applications of the Exercise Test</i>	126

Section III Exercise Prescription

7	General Principles of Exercise Prescription	133
	Principles of Training	134
	Overview of the Exercise Prescription	135
	The Art of Exercise Prescription	136
	Components of the Training Session	136
	<i>Warm-up</i>	137
	<i>Stimulus or Conditioning Phase</i>	138
	<i>Recreational Activities</i>	138
	<i>Cool-Down</i>	138
	Cardiorespiratory Exercise Prescription	139
	<i>Mode of Exercise</i>	139
	<i>Exercise Intensity</i>	141
	<i>Exercise Duration</i>	146
	Energy Expenditure Goals	148
	Rate of Progression	149
	<i>Initial Conditioning Stage</i>	150
	<i>Improvement Stage</i>	150
	<i>Maintenance Stage</i>	151
	Training Specificity	151
	<i>Summary of Guidelines for Cardiovascular Stimulus Phase</i>	153

	Resistance Exercise Prescription	154
	Flexibility Exercise Prescription	158
	Maintenance of the Training Effect	160
	Program Supervision	161
	Methods for Changing Exercise Behaviors	163
	<i>Strategies for Increasing Exercise Adherence</i>	165
	<i>Encourage Lifestyle Physical Activity</i>	165
8	Exercise Prescription Modifications for Cardiac Patients	174
	Inpatient Rehabilitation Programs	174
	Outpatient Exercise Programs	177
	<i>Exercise Intensity for the Cardiac Patient</i>	178
	<i>Modes of Exercise for Cardiac Patients</i>	181
	<i>Progression of Exercise for the Cardiac Patient</i>	182
	<i>Recommended Total Dose or Volume of Exercise for Cardiac Patients</i>	183
	Exercise Prescription Without a Preliminary Exercise Test	184
	Types of Outpatient Programs	186
	Benefits of Endurance Training in Cardiac Patients	188
	Resistance Training for Cardiac Patients	189
	<i>Eligibility and Exclusion Criteria for Resistance Training</i>	189
	<i>Time Course for Resistance Training</i>	190
	<i>Resistance Training Prescription for Cardiac Patients</i>	190
	Exercise Training for Return to Work	191
	Special Cardiac Patient Populations	191
	<i>Myocardial Ischemia</i>	191
	<i>Congestive Heart Failure</i>	193
	<i>Pacemakers and Implantable Cardioverter Defibrillators</i>	194
	<i>Cardiac Transplant Recipient</i>	197
	<i>Cardiac Surgery and Percutaneous Transluminal Coronary Intervention</i>	199
9	Other Clinical Conditions Influencing Exercise Prescription	205
	Arthritis	205
	<i>Exercise Testing</i>	206
	<i>Exercise Prescription</i>	206
	<i>Special Considerations</i>	207
	Diabetes Mellitus	207
	<i>Exercise Testing</i>	208
	<i>Exercise Prescription</i>	208
	<i>Special Considerations</i>	210
	Dyslipidemia	211
	<i>Exercise Testing</i>	212

	<i>Exercise Prescription</i>	212
	<i>Special Considerations</i>	212
Hypertension		213
	<i>Exercise Testing</i>	214
	<i>Exercise Prescription</i>	215
	<i>Special Considerations</i>	215
Obesity		216
	<i>Exercise Testing</i>	217
	<i>Exercise Prescription</i>	217
	<i>Special Considerations</i>	218
	<i>Recommended Weight Loss Programs</i>	218
Metabolic Syndrome		219
	<i>Exercise Testing and Prescription</i>	220
Immunology		221
	<i>Exercise and Upper Respiratory Tract Infections</i>	221
	<i>Immune Responses to Exercise</i>	222
	<i>Exercise Testing</i>	222
	<i>Exercise Prescription</i>	223
	<i>Special Considerations</i>	223
Osteoporosis		223
	<i>Exercise Testing</i>	224
	<i>Exercise Prescription</i>	224
	<i>Special Considerations</i>	225
Peripheral Arterial Disease		225
	<i>Exercise Testing</i>	226
	<i>Exercise Prescription</i>	226
	<i>Special Considerations</i>	226
Pulmonary Diseases		227
	<i>Exercise Testing</i>	227
	<i>Exercise Prescription</i>	228
	<i>Special Considerations</i>	229
Pregnancy		229
	<i>Exercise Testing</i>	231
	<i>Exercise Prescription</i>	231
	<i>Special Considerations</i>	231
10	Exercise Testing and Prescription for Children and Elderly People	237
	Children	237
	<i>Clinical Laboratory Testing</i>	237
	<i>Fitness Testing</i>	240
	<i>Exercise Prescription</i>	241
	Elderly People	246
	<i>Exercise Testing</i>	246
	<i>Exercise Prescription</i>	247

Section IV Appendices

A	Common Medications	255
B	Emergency Management	267
C	Electrocardiogram (ECG) Interpretation	279
D	Metabolic Calculations	286
E	Environmental Considerations	300
F	American College of Sports Medicine Certifications	309
	Index	351
